(E) *Interest income on deposit of nonfunctional currency in a hedging account.* Interest income on a deposit of nonfunctional currency in a hedging account may be taken into account for purposes of determining the amount of a hedge if such interest is accrued on or before the accrual date. However, such interest income shall be included in income as provided in section 61. For example, if a taxpayer with the dollar as its functional currency enters into an executory contract for the purchase and delivery of a machine in one year for 100 British pounds (£), and on such date deposits £90.91 in a properly identified bank account that bears interest at the rate of 10%, the interest that accrues prior to the accrual date shall be included in income and may be considered a hedge.

(iv) *Accrual date.* The accrual date is the date when the item of income or expense (including a capital expenditure) that relates to an executory contract is required to be accrued under the taxpayer's method of accounting.

(v) *Payment date.* The payment date is the date when payment is made or received with respect to an executory contract or the subsequent corresponding account payable or receivable.

(3) *Identification rules*—(i) *Identification by the taxpayer.* A taxpayer must establish a record and before the close of the date the hedge is entered into, the taxpayer must enter into the record a clear description of the executory contract and the hedge and indicate that the transaction is being identified in accordance with paragraph (b)(3) of this section.

(ii) *Identification by the Commissioner.* If a taxpayer enters into an executory contract and a hedge but fails to satisfy one or more of the requirements of paragraph (b) of this section and, based on the facts and circumstances, the Commissioner concludes that the executory contract in substance is hedged, then the Commissioner may apply the provisions of paragraph (b) of this section as if the taxpayer had satisfied all of the requirements therein, and may make appropriate adjustments. The Commissioner may apply the provisions of paragraph (b) of this section regardless of whether the executory contract and the hedge are held by the same taxpayer.

(4) *Effect of hedged executory contract*—(i) *In general.* If a taxpayer enters into a hedged executory contract, amounts paid or received under the hedge by the taxpayer are treated as paid or received by the taxpayer under the executory contract, or any subsequent account payable or receivable, or that portion to which the hedge relates. Also, the taxpayer recognizes no exchange gain or loss on the hedge. If an executory contract, on the accrual date, becomes an account payable or receivable, the taxpayer recognizes no exchange gain or loss on such payable or receivable for the period covered by the hedge.

(ii) *Partially hedged executory contracts.* The effect of integrating an executory contract and a hedge that partially hedges such contract is to treat the amounts paid or received under the hedge as paid or received under the portion of the executory contract being hedged, or any subsequent account payable or receivable. The income or expense of services performed or received under the executory contract, or the amount realized or basis of property sold or purchased under the executory contract, that is attributable to that portion of the executory contract that is not hedged shall be translated into functional currency on the accrual date. Exchange gain or loss shall be realized when payment is made or received with respect to any payable or receivable arising on the accrual date with respect to such unhedged amount.

(iii) *Disposition of a hedge or executory contract prior to the accrual date*—(A) *In general.* If a taxpayer identifies an executory contract as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of (or otherwise terminates) the executory contract prior to the accrual date, the hedge shall be treated as sold for its fair market value on the date the executory contract is disposed of and any gain or loss shall be realized and recognized on such date. Such gain or loss shall be an adjustment to the amount received or expended with respect to the disposition or termination, if any. The spot rate on the date the hedge is treated as sold shall be used to determine subsequent exchange gain or loss on the hedge. If a taxpayer identifies a hedge as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of the hedge prior to the accrual date, any gain or loss realized on such disposition shall not be recognized and shall be an adjustment to the income from, or expense of, the services performed or received under the executory contract, or to the amount realized or basis of the property sold or purchased under the executory contract.

(B) *Certain events in a series of hedges treated as a termination of the hedged executory contract.* If the rules of paragraph (b)(2)(iii)(B) of this section are not satisfied, the hedged executory contract shall be terminated and the provisions of paragraph (b)(4)(iii)(A) of this section shall apply to any gain or loss previously realized with respect to such hedge. Any subsequent hedging contracts entered into to reduce the risk of exchange rate movements with respect to such executory contract shall not be considered a hedge as defined in paragraph (b)(2)(iii) of this section.

(C) *Executory contracts between related persons.* If an executory contract is between related persons as defined in sections 267(b) and 707(b), and the taxpayer disposes of the hedge or terminates the executory contract prior to the accrual date, the Commissioner may redetermine the timing, source, and character of gain or loss from the hedge or the executory contract if he determines that a significant purpose for disposing of the hedge or terminating the executory contract prior to the accrual date was to affect the timing, source, or character of income, gain, expense, or loss for Federal income tax purposes.

(iv) *Disposition of a hedge on or after the accrual date.* If a taxpayer identifies a hedge as part of a hedged executory contract as defined in paragraph (b)(2) of this section, and disposes of the hedge on or after the accrual date, no gain or loss is recognized on the hedge and the booking date as defined in § 1.988-2(c)(2) of the payable or receivable for purposes of computing exchange gain or loss shall be the date such hedge is disposed of. See *Example 3* of paragraph (b)(4)(iv) of this section.

(v) *Sections 263(g), 1092, and 1256 do not apply.* Sections 263(g), 1092, and 1256 do not apply with respect to an executory contract or hedge which comprise a hedged executory contract as defined in paragraph (b)(2) of this section. However, sections 263(g), 1092 and 1256 may apply to the hedged executory contract if such transaction is part of a straddle.

(vi) *Examples.* The principles set forth in paragraph (b) of this section are

illustrated in the following examples. The examples assume that K is an accrual method, calendar year U.S. corporation with the dollar as its functional currency.

Example 1. (i) On January 1, 1992, K enters into a contract with JPF, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Also on January 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for $250,000 for delivery on June 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3)(i) of this section. On June 1, 1993, K takes delivery of the 500,000 Swiss francs (in exchange for $250,000) under the forward contract and makes payment of 500,000 Swiss francs to JPF in exchange for the machine. Assume that the accrual date is June 1, 1993.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore, K is deemed to have paid $250,000 for the machine and there is no exchange gain or loss on the foreign currency forward contract. K's basis in the machine is $250,000. Section 1256 does not apply to the forward contract.

Example 2. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Under the contract, K is not obligated to pay for the machine until September 1, 1993. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for $250,000 for delivery on September 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1993, K takes delivery of machine. Assume that under K's method of accounting the delivery date is the accrual date. On September 1, 1993, K takes delivery of the 500,000 Swiss francs (in exchange for $250,000) under the forward contract and makes payment of 500,000 Swiss francs to S.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid $250,000 for the machine and there is no exchange gain or loss on the foreign currency forward contract. Thus K's basis in the machine is $250,000. In addition, no exchange gain or loss is recognized on the payable in existence from June 1, 1993, to September 1, 1993. Section 1256 does not apply to the forward contract.

Example 3. The facts are the same as in *Example 2* except that K disposed of the forward contract on August 1, 1993 for $10,000. Pursuant to paragraph (b)(4)(iv) of this section, K does not recognize the $10,000 gain. K's basis in the machine is $250,000 (the amount fixed by the forward contract), regardless of the amount in dollars that K actually pays to acquire the Sf500,000 when K pays for the machine. K has a payable with a booking date of August 1, 1993, payable on September 1, 1993 for 500,000 Swiss francs. Thus, K will realize exchange gain or loss on the difference between the amount booked on August 1, 1993 and the amount paid on September 1, 1993 under § 1.988–2(c).

Example 4. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine repair firm, to pay 500,000 Swiss francs for repairs to be performed on June 1, 1992. Under the contract, K is not obligated to pay for the repairs until September 1, 1992. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 500,000 Swiss francs for $250,000 for delivery on August 1, 1992. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1992, S performs the repair services. Assume that under K's method of accounting this date is the accrual date. On August 1, 1992, K takes delivery of the 500,000 Swiss francs (in exchange for $250,000) under the forward contract. On the same day, K deposits the Sf500,000 in a separate account with a bank and properly identifies the transaction as a continuation of the hedged executory contract. On September 1, 1992, K makes payment of the Sf500,000 in the account to S.

(ii) Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid $250,000 for the services and there is no exchange gain or loss on the foreign currency forward contract or on the disposition of Sf500,000 in the account. Any interest on the Swiss francs in the account is included in income but is not considered part of the hedge (because the amount paid for the services must be set on or before the accrual date). In addition, no exchange gain or loss is recognized on the payable in existence from June 1, 1992, to September 1, 1992. Section 1256 does not apply to the forward contract.

Example 5. (i) On January 1, 1992, K enters into a contract with S, a Swiss machine manufacturer, to pay 500,000 Swiss francs for delivery of a machine on June 1, 1993. Under the contract, K is not obligated to pay for the machine until September 1, 1993. On February 1, 1992, K enters into a foreign currency forward agreement to purchase 250,000 Swiss francs for $125,000 for delivery on September 1, 1993. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On June 1, 1993, K takes delivery of the machine. Assume that under K's method of accounting the delivery date is the accrual date. Assume further that the exchange rate is Sf1 = $.50 on June 1, 1993. On August 30, 1993, K purchases Sf250,000 for $135,000. On September 1, 1993, K takes delivery of the 250,000 Swiss francs (in exchange for $125,000) under the forward contract and makes payment of 500,000 Swiss francs (the Sf250,000 received under the contract plus the Sf250,000 purchased on August 30, 1993) to S. Assume the spot rate on September 1, 1993, is 1 Sf = $.5420 (Sf250,000 equal $135,500).

(ii) Under paragraph (b)(1) of this section, the partial hedge is integrated with the executory contract. K is deemed to have paid $250,000 for the machine [$125,000 on the hedged portion of the Sf500,000 and $125,000 ($.50, the spot rate on June 1, 1993, times Sf250,000) on the unhedged portion of the Sf500,000]. K's basis in the machine therefore is $250,000. K recognizes no exchange gain or loss on the foreign currency forward contract but K will realize exchange gain of $500 on the disposition of the Sf250,000 purchased on August 30, 1993 under § 1.988–2(a). In addition, exchange loss is realized on the unhedged portion of the payable in existence from June 1, 1993, to September 1, 1993. Thus, K will realize exchange loss of $10,500 ($125,000 booked less $135,500 paid) under § 1.988–2(c) on the payable. Section 1256 does not apply to the forward contract.

Example 6. (i) On January 1, 1990, K enters into a contract with S, a Swiss steel manufacturer, to buy steel for 1,000,000 Swiss francs (Sf) for delivery and payment on December 31, 1990. On January 1, 1990, the spot rate is Sf1 = $.50, the U.S. dollar interest rate is 10% compounded annually, and the Swiss franc rate is 5% compounded annually. Under K's method of accounting, the delivery date is the accrual date.

(ii) Assume that on January 1, 1990, K enters into a foreign currency forward contract to buy Sf1,000,000 for $523,800 for delivery on December 31, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract constitutes a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward contract are integrated under paragraph (b)(1) of this section. Thus, K is deemed to have paid $523,800 for the steel and will have a basis in the steel of $523,800. No gain or loss is realized with respect to the forward contract and section 1256 does not apply to such contract.

(iii) Assume instead that on January 1, 1990, K enters into a foreign currency forward contract to buy Sf1,000,000 for $512,200 for delivery on July 1, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On July 1, 1990, when the spot rate is Sf1 = $.53, K cancels the forward contract in exchange for $17,800 ($530,000 − $512,200). On July 1, 1990, K enters into a second forward agreement to buy Sf1,000,000 for $542,900 for delivery on December 31, 1990. K properly identifies the second forward agreement as a hedge in accordance with paragraph (b)(3) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract entered into on January 1, 1990, and the forward contract entered into on July 1, 1990, constitute a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward agreements are integrated under paragraph (b)(1) of this section. Thus, K is deemed to have paid $525,100 for the steel (the forward price in the second forward agreement of $542,900 less the gain on the first forward agreement of $17,800) and will have a basis in the steel of $525,100. No gain is realized with respect to the forward contracts and section 1256 does not apply to such contracts.

(iv) Assume instead that on January 1, 1990, K enters into a foreign currency forward contract to buy Sf1,000,000 for $512,200 for delivery on July 1, 1990. K properly identifies the executory contract and the hedge in accordance with paragraph (b)(3) of this section. On July 1, 1990, when the spot rate is Sf1 = $.53, K enters into a historical rate rollover of its $17,800 gain ($530,000 − $512,200) on the forward agreement. Thus, K enters into a second foreign currency forward agreement to buy Sf1,000,000 for $524,210 for delivery on December 31, 1990. (The forward price of $524,210 is the market forward price on July 1, 1990 for the purchase of Sf1,000,000 for delivery on December 31, 1990 of $542,900 less the $17,800 gain on January 1, 1990 contract and less the time value of such gain of $890.) K properly identifies the second forward agreement as a hedge in accordance with paragraph (b)(3) of this section. On December 31, 1990, when the spot rate is Sf1 = $.54, K takes delivery of the Sf1,000,000 (in exchange for $524,210) and purchases the steel for Sf1,000,000. Pursuant to paragraph (b)(2)(iii) of this section, the forward contract entered into on January 1, 1990, and the forward contract entered into on July 1, 1990, which incorporates the rollover of K's gain on the January 1, 1990 contract, constitute a hedge. Assuming that the requirements of paragraph (b)(2)(i) of this section are satisfied, the executory contract to buy steel and the forward agreements are integrated under paragraph (b)(1) of this section. Because the period from the rollover date to the date payment is made under the executory contract does not exceed 183 days, the $890 of interest income is considered part of the hedge and is not recognized. Thus, K is deemed to have paid $524,210 for the steel and will have a basis in the steel of $524,210. No gain is realized with respect to the forward contracts and section 1256 does not apply to such contracts.

(v) Assume instead that on January 1, 1990, K purchases Sf952,380.95 (the present value of Sf1,000,000 to be paid on December 31, 1990) for $476,190.48 and on the same day deposits the Swiss francs in a separate bank account that bears interest at a rate of 5%, compounded annually. K properly identifies the transaction as a hedged executory contract. Over the period beginning January 1, 1990, and ending December 31, 1990, K receives Sf47,619.05 in interest on the account that is included in income and that has a basis of $25,714.29. (Assume that under § 1.988–2(b)(1), K uses the spot rate of Sf1 = $.54 to translate the interest income). On December 31, 1990, K makes payment of the Sf1,000,000 principal and accrued interest in the account to S. Pursuant to paragraph (b)(2)(iii) of this section, the principal in the bank account and the interest constitute a hedge. Under paragraph (b)(1) of this section, the hedge is integrated with the executory contract. Therefore K is deemed to have paid $501,904.77 (the basis of the principal deposited plus the basis of the interest) for the steel and there is no exchange gain or loss on the disposition of the Sf1,000,000. K's basis in the steel therefore is $501,904.77.

(5) *References to this paragraph (b).* If the rules of this paragraph (b) are referred to in another paragraph of this section (*e.g.*, paragraph (c) of this section), then the rules of this paragraph (b) shall be applied for purposes of such other paragraph by substituting terms appropriate for such other paragraph. For example, paragraph (c)(2) of this section refers to the identification rules of paragraph (b)(3) of this section. Accordingly, for purposes of paragraph (c)(2), the rules of paragraph (b)(3) will be applied by substituting the term "stock or security" for "executory contract".

(c) *Hedges of period between trade date and settlement date on purchase or sale of publicly traded stock or security.* If a taxpayer purchases or sells stocks or securities which are traded on an established securities market and—

(1) Hedges all or part of such purchase or sale for any part of the period beginning on the trade date and ending on the settlement date; and

(2) Identifies the hedge and the underlying stock or securities as an integrated transaction under the rules of paragraph (b)(3) of this section;

then any gain or loss on the hedge shall be an adjustment to the amount realized or the adjusted basis of the stock or securities sold or purchased (and shall not be taken into account as exchange gain or loss). The term hedge means a deposit of nonfunctional currency in a hedging account (within the meaning of paragraph (b)(2)(iii)(D) of this section), or a forward or futures contract described in § 1.988–1(a) (1)(ii) and (2)(iii), or combination thereof, which reduces the risk of exchange rate fluctuations for any portion of the period beginning on the trade date and ending on the settlement date. The provisions of paragraphs (b)(2)(i) (D) through (G), and (b)(2)(iii) (D) and (E) of this section shall apply. Sections 263(g), 1092, and 1256 do not apply with respect to stock or securities and a hedge which are subject to this paragraph (c).

(d) [Reserved]

(e) *Advance rulings regarding net hedging and anticipatory hedging systems.* In his sole discretion, the Commissioner may issue an advance ruling addressing the income tax consequences of a taxpayer's system of hedging either its net nonfunctional currency exposure or anticipated nonfunctional currency exposure. The ruling may address the character, source, and timing of both the section 988 transaction(s) making up the hedge and the underlying transactions being hedged. The procedures for obtaining a ruling shall be governed by such pertinent revenue procedures and revenue rulings as the Commissioner may provide. The Commissioner will not issue a ruling regarding hedges of a taxpayer's investment in a foreign subsidiary.

(f) [Reserved]

(g) *General effective date.* Except as otherwise provided in this section, the rules of this section shall apply to qualified hedging transactions, hedged executory contracts and transactions described in paragraph (c) of this section entered into on or after September 21, 1989. This section shall apply even if the transaction being hedged (*e.g.*, the debt instrument) was entered into or acquired prior to such date. The effective date regarding advance rulings for net and anticipatory hedging shall be governed by such revenue procedures that the Commissioner may publish.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 5. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 6. Section 602.101 (c) is amended by removing from the table entries for "1.988–1T", "1.988–2T", "1.988–3T", "1.988–4T", and "1.988–5T" and by adding in the table "1.988–0 through 1.988–5 * * * 1545–1131".

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

Approved: January 24, 1992.

Kenneth W. Gideon,
Assistant Secretary of the Treasury.

RIN 1545–AN12

Consolidated Return Regulations—Distributions After the Sale of Stock of a Subsidiary

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary and final regulations.

SUMMARY: This document contains final regulations providing rules for dividends and other distributions declared with respect to the stock of a subsidiary in a consolidated group if the stock is disposed of after the selling member becomes entitled to the distribution but before the distribution is made. The temporary regulations contained in § 1.1502–32T(b), also issued as proposed regulations in a cross-reference notice of proposed rulemaking (see 54 FR 11007), are adopted as final regulations and

redesignated as § 1.1502–32(k)(1). Additional corrective and anti-avoidance rules are adopted as § 1.1502–32(k)(2).

EFFECTIVE DATES: Except as provided below, these regulations are effective for distributions described in section 301 that are declared in taxable years for which the due date (without extensions) of the Federal income tax return is after March 14, 1989. The new rules adopted as § 1.1502–32(k)(2) are effective March 13, 1992 and apply to distributions described in section 301 that are declared on or after March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Steven B. Teplinsky, 202–566–4324 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On March 14, 1989, temporary regulations (T.D. 8245) amending § 1.1502–32T(b) were filed with the Office of the Federal Register (see 54 FR 10980; 1989–1 C.B. 270). A Notice of Proposed Rulemaking (CO–5–89) cross-referencing the temporary regulations was filed with the Office of the Federal Register (see 54 FR 11007; 1989–1 C.B. 924) on the same day. Written comments were received, and a public hearing on the proposed regulations was held on September 18, 1989. After consideration of the comments, the temporary regulations contained in § 1.1502–32T(b) are adopted as final regulations and redesignated as § 1.1502–32(k)(1). In addition, § 1.1502–32(k)(2) is adopted in response to comments

The proposed and temporary regulations provide that, if a member of a consolidated group disposes of a share of stock of another member after a distribution subject to section 301 has been declared on that share and after the disposing member becomes entitled to the distribution, but before the distribution has been made, the distribution is deemed to be made for all Federal tax purposes immediately before the deposition. The final regulations continue this rule without change. The regulations address the Federal tax treatment of certain post-sale dividends and are not intended to affect the principles of existing case law under which these dividends may be recharacterized as part of the purchase price of the stock. *See, e.g., Waterman Steamship Corporation* v. *Comm'r* 430 F.2d 1185 (5th Cir. 1970), *rev'g* 50 T.C. 650 (1968), *cert. denied,* 401 U.S. 939 (1971).

Comments objected to the effective date of the temporary and proposed regulations. As discussed in the preamble to the temporary regulations, the regulations were adopted to clarify the investment adjustment rules under § 1.1502–32 and to ensure that the income and losses of members are taken into account only once in computing taxable income of a group. See T.D. 8245, 1989–1 C.B. 270. The Service and the Treasury Department believe that the effective date of the regulations is consistent with section 1503(a) of the Internal Revenue Code and section 553 of title 5 of the United States Code regarding temporary rules.

Comments also argued that the regulations incorrectly fail to distinguish between "true" dividends and "sham" transactions designed to abuse the investment adjustment provisions of the consolidated return regulations. However, a principal purpose of the investment adjustment rules is to ensure that the income and losses of members are taken into account only once in computing taxable income of a group. Thus, the rule in the regulations is necessary to carry out that purpose without regard to taxpayer intent.

Comments objected to the provision in the regulations that accelerates the year in which a distribution is treated as made. Under the regulations, the selling member is treated as receiving a distribution out of earnings and profits at the time of the sale, rather than out of earnings and profits at the time of the distribution. Similarly, any gain to the distributing member under section 311 is recognized at the time of the sale rather than at the time of the distribution. The Service and the Treasury Department believe that it is a reasonable approach to treat the distribution as made immediately before the disposition for all Federal tax purposes.

One comment suggested that the regulations work improperly if the selling member sells less than all of the stock of the distributing member. This is corrected in the final regulations. Under the final regulations, proper adjustments must be made to the earnings and profits of the distributing member accrued to the date of the disposition to take into account the fact that the rules of § 1.1502–32(k) do not apply to all of the distributing corporation's stock.

Another comment suggested that, because the regulations apply to a member's disposition of stock of another member (the "distributing corporation"), the regulations could be avoided by the distributing corporation ceasing to be included in the selling member's consolidated group prior to declaration of the distribution. In order to prevent avoidance of the regulations, an anti-avoidance provision has been added. Under this rule, if the distributing corporation ceases to be included in the selling member's consolidated group with a view to avoiding the application of this paragraph (k) to a distribution, the basis of the stock of the distributing corporation is adjusted in accordance with the purposes of this paragraph (k).

These final regulations are added as § 1.1502–32(k) of the consolidated return regulations. Temporary § 1.1502–32T(b) is redesignated as § 1.1502–32(k)(1) and remains effective for distributions subject to section 301 that are declared in taxable years for which the due date (without extensions) of the Federal income tax return is after March 14, 1989.

The earnings and profits allocation rule and the anti-abuse rule are contained in § 1.1502–32(k)(2), and are effective with respect to distributions described in section 301 that are declared on or after March 13, 1992.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

These rules will not have a significant economic impact on a substantial number of small entities. These rules apply only to consolidated groups, which tend to be larger businesses. These rules will not significantly alter the reporting or record keeping duties of small entities. Therefore, a final Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required.

Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for the regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on the impact of the rules on small businesses.

Drafting Information

The principal author of these regulations is Steven B. Teplinsky, of the Office of Assistant Chief Counsel (Corporate), Internal Revenue Service. Other personnel of the Service and the Treasury Department participated in their development.

Income taxes.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following citation:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805 * * * Section 1.1502–32(k) is also issued under 26 U.S.C. 1502. * * *

Par. 2. Section 1.1502–14(a)(5) is revised to read as follows:

§ 1.1502–14 Stock, bonds, and other obligations of members.

(a) * * *

(5) *Distributions after the disposition of stock of a member.* For rules relating to certain distributions subject to section 301, declared before but paid after the disposition of stock, see § 1.1502–32(k).

* * * * *

§ 1.1502–32 [Amended]

Par. 3. Section 1.1502–32 is amended as follows:

1. Revising paragraphs (b)(3) and (c)(4) as set forth below.

2. Adding new paragraph (k) with the heading set forth below.

3. The paragraph (b) heading and paragraphs (b) (1), (2) and (3) of § 1.1502–32T are redesignated as the paragraph (k)(1) heading and paragraphs (k)(1) (i), (ii) and (iii), respectively, of § 1.1502–32.

4. Adding paragraph (k)(2) as set forth below.

§ 1.1502–32 Investment adjustment.

* * * * *

(b) * * *

(3) *Distributions after the disposition of stock of a member.* For rules relating to certain distributions subject to section 301, declared before but paid after the disposition of stock, see § 1.1502–32(k).

(c) * * *

(4) *Distributions after the disposition of stock of a member.* For rules relating to certain distributions subject to section 301, declared before but paid after the disposition of stock, see § 1.1502–32(k).

* * * * *

(k) *Distributions after certain stock dispositions.*

* * * * *

(2) *Special rules*—(i) *Sales of less than all the stock of the distributing member.* If paragraph (k)(1) of this section applies to a member's disposition of less than all of the shares of stock of the distributing member, proper adjustments to carry out the purposes of this paragraph (k) must be made to the earnings and profits of the distributing member accrued to the date of the disposition to take into account the fact that the rules of § 1.1502–32(k) do not apply to all of the distributing corporation's stock.

(ii) *Anti-avoidance rule.* If the distributing corporation ceases to be a member of the same consolidated group as the selling member with a view to avoiding the application of this paragraph (k) to a distribution, the basis of the stock of the distributing corporation is adjusted in accordance with the purposes of this paragraph (k).

(iii) *Effective date.* This paragraph (k)(2) applies to distributions described in section 301 that are declared on or after March 13, 1992.

Par. 4. Section 1.1502–32T(b) is removed and reserved to read as follows:

§ 1.1502–32T Investment adjustments (temporary).

* * * * *

(b) [Reserved]

David G. Blattner,

Acting Commissioner of Internal Revenue.

Approved: March 4, 1992.

Fred T. Goldberg, Jr.,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 544

Control, Custody, Care, Treatment and Instruction of Inmates; Literacy Program (GED Standard)

CFR Correction

In title 28 of the Code of Federal Regulations, revised as of July 1, 1991, on pages 876, 881 and 882, subpart H (§§ 544.70 through 544.76) was incorrectly revised. The correct table of contents and text of subpart H was published in the **Federal Register** on May 1, 1991, at 56 FR 20088. The table of contents and the text for Subpart H should read as follows:

Subpart H—Literacy Program

Sec.

544.70 Purpose and scope.
544.71 Applicability: Who must attend the literacy program.
544.72 Applicability: Who may be promoted.
544.73 Procedures.
544.74 Federal Prison Industries (UNICOR) and Inmate Performance Pay (IPP) assignments.
544.75 Incentives.
544.76 Disciplinary action.

Subpart H—Literacy Program

§ 544.70 Purpose and scope.

An inmate confined in a federal institution who does not have a verified General Education Development (GED) or high school diploma is required to attend an adult literacy program for a minimum of 120 calendar days or until a GED is achieved, whichever occurs first. The Warden shall establish incentives to encourage an inmate to complete the literacy program.

§ 544.71 Applicability: Who must attend the literacy program.

(a) All inmates in federal institutions must attend the literacy program except:

(1) Pretrial inmates;

(2) Inmates committed for purpose of study and observation under the provisions of 18 U.S.C. 4205(c) or, effective November 1, 1987, 18 U.S.C. 3552(b);

(3) Sentenced aliens with a deportation detainer;

(4) Other inmates who, for good cause, the Warden may excuse from attending the literacy program.

(b) Staff shall document in the inmate's education file and central file the specific reasons for not requiring the inmate to participate in the literacy program.

§ 544.72 Applicability: Who may be promoted.

(a) An inmate must show prior attainment of a GED or high school diploma in order to be promoted above grade 4 UNICOR and Inmate Performance Pay (IPP) assignments except:

(1) An inmate already in a UNICOR or IPP position above pay grade 4 at the time of implementation of this rule (May 1, 1991), who does not have a GED or a high school diploma but was previously approved for promotion above grade 4.

(2) Other inmates who, for good cause, the Warden may determine are exempt from completing the academic requirements for promotion above grade 4. An inmate who is exempted from attending the literacy program under § 544.71(a) ordinarily may not be promoted above the fourth grade of compensation unless he or she meets the GED requirement.

(b) staff shall document in the inmate's education file and central file the specific reasons for allowing pay promotion exemptions.

§ 544.73 Procedures.

(a) The Warden at each federal institution shall ensure that an inmate who does not have a verified GED or

high school diploma is enrolled in the literacy program.

(b) The Warden or designee shall assign to an education staff member the responsibility to coordinate the institution's literacy program. The literacy coordinator or designated education staff shall meet initially with the inmate for the purpose of enrolling the inmate in the literacy program. Subsequently, the literacy coordinator or designated education staff shall formally interview each inmate involved in the literacy program at least once every 30 days during the mandatory 120 day period, to review and record the inmate's progress in this program. The literacy coordinator shall place documentation of these interviews in the inmate's record.

(c) At the end of 120 calendar days, excluding sick time, furloughs, or other absences from scheduled classes, the unit team shall meet with the inmate to encourage continued participation in the literacy program until the inmate attains a GED or high school diploma. At this time, the inmate may elect not to continue in the literacy program, and no disciplinary action will be taken. The inmate may not discontinue this program where participation is mandated by statute.

§ 544.74 Federal Prison Industries (UNICOR) and Inmate Performance Pay (IPP) Assignments.

(a) Inmates who wish to secure a UNICOR or IPP work assignment above grade 4 of compensation or who wish to work in non-graded incentive pay (piece-rate) positions must be able to demonstrate the prior obtainment of a GED or high school diploma. However, if labor force needs require, inmates who do not meet the literacy requirements may be employed in UNICOR incentive pay positions if they are simultaneously enrolled in a literacy or related program, and provided they are found to be progressing at an acceptable level as defined by the supervisor of education. Failure to maintain satisfactory progress shall result in termination of UNICOR incentive pay employment. Local UNICOR management may elect to place the terminated piece-rate employee in an hourly rated 4th grade position. The Warden may, for good cause, exempt inmates from this requirement.

(b) An inmate may be assigned to the fourth grade of compensation in a UNICOR or IPP work assignment contingent on the inmate's enrollment, and satisfactory participation, in the literacy program. Failure of an inmate to make adequate progress in the literacy program may be used as the basis to remove the inmate from the UNICOR or IPP work assignment.

§ 544.75 Incentives.

The Warden shall establish a system of incentives to encourage an inmate to obtain a GED.

§ 544.76 Disciplinary action.

As with other mandatory programs, such as work assignments, staff may take disciplinary action against an inmate whose academic level is below GED or high school level when that inmate refuses to enroll in, or to complete, the mandatory 120 calendar days literacy program.

BILLING CODE 1505-01-D

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-7006]

Federal Insurance Administration; Final Flood Elevation Determination; Town of Lyme, Grafton County, NH; Rescission

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: On January 7, 1992, the Federal Emergency Management Agency published the final flood elevation determination for the Town of Lyme, Grafton County, New Hampshire. This document will serve to rescind that listing of the town of Lyme. Following an engineering analysis and review, a new final flood elevation determination will be made.

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2754.

SUPPLEMENTARY INFORMATION: As a result of a recent engineering review, the Federal Emergency Management Agency gives notice of rescission of the final flood elevation determination for Town of Lyme, New Hampshire, published at 57 FR 527 on January 7, 1992, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR part 67.

Issued: February 12, 1992.

C.M. "Bud" Schauerte,

Administrator, Federal Insurance Administration.

[FR Doc. 92-6068 Filed 3-16-92; 8:45 am]

BILLING CODE 6718-05-M

GENERAL SERVICES ADMINISTRATION

48 CFR Part 502

[APD 2800.12A CHGE 36]

General Services Administration Acquisition Regulation; GSA Organizational Changes

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration Acquisition Regulation (GSAR), chapter 5 (APD 2800.12A), section 502.101 is amended to revise the definitions of "Contracting activity competition advocate" and "Head of the contracting activity" to reflect the reassignment of certain responsibilities from the Regional Administrators in Regions 7 and 9 to the Regional Administrators in Regions 8 and 10. The intended effect is to provide guidance to GSA personnel regarding the organizational changes.

EFFECTIVE DATE: March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Ida M. Ustad, Office of GSA Acquisition Policy (202) 501-1224.

SUPPLEMENTARY INFORMATION:

A. Public Comments

This rule was not published in the **Federal Register** for public comment because it merely provides guidance to GSA internal personnel.

B. Executive Order 12291

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive order 12291. The exemption applies to this rule.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act does not apply to this rule because the proposed policy was not required to be published in the **Federal Register.**

D. Paperwork Reduction Act

This rule does not contain information collection requirements that require the approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Part 502

Government procurement.

Accordingly, 478 CFR part 502 continues to read as follows:

1. The authority citation for 48 CFR part 502 continues to read as follows:

Authority: 40 U.S.C. 486(c).

2. Section 502.101 is revised to read as follows:

PART 502—DEFINITIONS OF WORDS AND TERMS

502.101 Definitions.

Agency competition advocate means the Director of the Office of Contract Review.

Chief of the contracting office means branch chiefs of Central Office or regional office branches within divisions that are responsible for performing contracting and/or contract administration functions except for FSS. In FSS Commodity Centers, "chief of contracting office" means division directors within the Commodity Centers. In Federal Supply Service Bureaus, "Chief of Contracting Office" means branch chiefs or supervisory equivalents. In PBS, the Director of a Facility Support Center is considered to be the "chief of the contracting office."

Contracting activity competition advocate means the (1) Director of the Office of Contract Review, (2) FSS Competition Advocate, Office of Commodity Management, (3) IRMS Competition Advocate, Office of Information Resources Management Policy, (4) Special Assistant to the Director, Program Support Office, FPRS, (5) Deputy Regional Administrator for Regions 2, 3, 4, 5, 6, 7, 9, and the National Capital Region and (6) the Senior Advisor to the Regional Administrator for Regions 8 and 10. The Director of the Office of Contract Review serves as the contracting activity competition advocate for Central Office contracting activities outside the FSS, IRMS, and FPRS.

Contracting director means directors of Central Office or regional office divisions that are responsible for performing contracting and/or contract administration functions except for FSS. "Contracting director" means directors of Commodity Centers and Federal Supply Service Bureaus in the FSS.

Head of the contracting activity (HCA) means the Associate Administrator for Acquisition Policy, Commissioners of the Federal Supply Service (FSS), Information Resources Management Service (IRMS), Public Buildings Service (PBS), Federal Property Resources Service (FPRS), or Regional Administrators (Regions 2, 3, 4, 5, 6, 7, 8, 9, 10 and the National Capital Region). The Associate Administrator for Acquisition Policy serves as the HCA for Central Office contracting activities outside of FSS, IRMS, PBS, and FPRS.

Senior procurement executive means the Associate Administrator for Acquisition Policy.

Dated: March 3, 1992.

Richard H. Hopf, III,

Associate Administrator for Acquisition Policy.

BILLING CODE 6820-61-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1118

[Ex Parte No. 55 (Sub-No. 85)]

Procedures in Informal Proceedings Before Employee Boards

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Commission is modifying its Part 1118 regulations for purposes of updating, streamlining, and simplification. Since these modifications are technical and are not intended to have any substantive effect, public comment is not being sought.

EFFECTIVE DATE: April 16, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927-5660 (TDD for hearing impaired: (202) 927-5721).

SUPPLEMENTARY INFORMATION: We are making several technical changes to part 1118 as part of our ongoing effort to update and streamline our codified regulations. These changes are not intended to have any substantive impact.

Part 1118

We are modifying the heading for part 1118 which currently reads Procedures in Informal Proceedings Before Certain Employee Boards by deleting the word Certain to reflect the revisions set forth below.

Section 1118.1

The first sentence of this section currently refers to specifically identified employee boards, some of which no longer exist. We are deleting the reference to these specifically identified boards and substituting in lieu thereof the phrase all employee boards.

Section 1118.4(d)

This provision directs where appeals and replies to appeals of employee board decisions should be filed. Except for those relating to Regional Motor Carrier Board emergency temporary authority (ETA) and temporary authority (TA) decisions, all appeals and replies to appeals of employee board decisions are to be filed with the Secretary of the Commission. Sections 1162.6 (d) and (e) direct that appeals and replies concerning ETA and TA decisions are to be filed with the Regional Office where the application was filed. We are revising § 1118.4(d) to track § 1162.6 (d) and (e) more closely and to provide a cross-reference to them.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

This action will not have a significant effect on a substantial number of small entities.

List of Subjects in 49 CFR Part 1118

Administrative practice and procedure.

Decided: March 10, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

For the reasons set forth in the preamble, title 49, chapter X, part 1118 of the Code of Federal Regulations is amended as follows:

1. The heading for part 1118 is revised to read as follows:

PART 1118—PROCEDURES IN INFORMAL PROCEEDINGS BEFORE EMPLOYEE BOARDS

2. The authority citation for part 1118 continues to read as follows:

Authority: 49 U.S.C. 10321; 5 U.S.C. 559.

3. Section 1118.1 is revised to read as follows:

§ 1118.1 Scope.

The rules in this part govern proceedings before all employee boards. Special rules, located elsewhere in this part should also be consulted.

4. Section 1118.4 is amended by revising paragraph (d) to read as follows:

§ 1118.4 Appeals.

* * * * *

(d) *Where filed.* Appeals and replies to appeals of Regional Motor Carrier Board temporary authority (TA) and

emergency temporary authority (ETA) application decisions must be filed with the Regional Office in which the application was filed [see §§ 1162.6 (d) and (e)]. Appeals and replies to appeals of all other decisions issued by employee boards must be filed with the Secretary, Interstate Commerce Commission, Washington, DC 20423.

BILLING CODE 7035-01-M

Proposed Rules

Federal Register
Vol. 57, No. 52
Tuesday, March 17, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-NM-23-AD]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Boeing Model 727 series airplanes, that currently requires inspection to detect corrosion in the aft cargo compartment belly skin panels, doublers, and triplers, and repair, if necessary. This action would expand the applicability to include all Model 727-100 and -100C series airplanes. This proposal is prompted by reports of corrosion in both the cold- and hot-bonded skin, doublers, and triplers located beneath the aft cargo compartment floor. The actions specified by the proposed AD are intended to prevent degradation of the skin panel structural integrity, which could lead to depressurization of the cabin.

DATES: Comments must be received by May 4, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-23-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

FOR FURTHER INFORMATION CONTACT: Mr. Stanton R. Wood, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S; telephone (206) 227-2772; fax (206) 227-1181. Mailing address: FAA, Northwest Mountain Region, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing data for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-23-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-23-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

On September 7, 1990, the FAA issued AD 90-20-08, Amendment 39-6742 (55 FR 38047, September 17, 1990), to require inspections to detect corrosion in the aft cargo compartment belly skin panels, doublers, and triplers, and repair, if necessary, on certain Boeing Model 727 series airplanes. That action was prompted by reports of corrosion in the skin, doublers, and triplers in the skin panels beneath the aft cargo compartment floor. The requirements of that AD are intended to prevent degradation of the skin panels' structural integrity, which could lead to depressurization of the cabin.

Since the issuance of that AD, the FAA has determined that additional Model 727-100 and -100C series airplane are potentially susceptible to the corrosion problem addressed in AD 90-20-08. That AD only applied to airplanes having line numbers 1 to 547, on which the aluminum body skin panels were installed using a "cold bonding" process. Corrosion also has been detected recently on airplanes with panels that were manufactured using a "hot bonding" process; these are airplanes having line numbers 548 and subsequent. Such corrosion presents the same potential unsafe condition addressed in AD 90-20-08.

The FAA has reviewed and approved Boeing Service Bulletin 727-53-0085, Revision 4, dated July 11, 1991, that describes procedures for external and internal inspection for corrosion of hot- and cold-bonded skin panels, doublers, and triplers located beneath the aft cargo compartment floor, and repair, if necessary. The effectivity listing in this revised service bulletin includes all airplanes for the Model 727-100 and -100C series.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 90-20-08 to require inspections to detect corrosion in the aft cargo compartment belly skin panels, doublers, and triplers, and repair, if necessary. This action would expand the applicability to include additional Model 727-100 and -100C series airplanes. The actions would be required to be accomplished in accordance with the service bulletin described previously.

There are approximately 693 Boeing Model 727 series airplanes of the affected design in the worldwide fleet. The FAA estimates that a total of 514 airplanes of U.S. registry would be affected by this AD action; this number

includes 430 airplanes that were affected previously by the requirements of AD 90-20-08, and 84 additional airplanes (added to the applicability of this proposed rule) that would be affected by the requirements of this new AD action. The FAA estimates that it would take approximately 402 work hours per airplane to accomplish the inspection actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of AD 90-20-08 on U.S. operators was $9,507,300. By expanding the applicability of this rule via this proposed AD action to include the additional 84 airplanes, the cost impact on U.S. operators is increased by $1,857,240. Therefore, the total cost impact of this AD action is estimated to be $11,364,540; or $22,110 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6742 (55 FR 38047, September 17, 1990) and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket 92-NM-23-AD. Supersedes AD 90-20-08, Amendment 39-6742.

Applicability: Model 727-100 and -100C series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent degradation of the skin panel structural integrity, which could lead to depressurization of the cabin, accomplish the following:

(a) For Model 727-100 and -100C series airplanes, having line position 001 through 547: Within 15 months after October 23, 1990 (the effective date of AD 90-20-08, amendment 39-6742) conduct an internal and external close visual inspection for corrosion of the skin panels, doublers, and triplers located between body stations (BS) 950 and BS 1183 and stringers S-26L and S-26R. Perform the inspections in accordance with Parts II.A and II.B of Boeing Service Bulletin 727-53-0085, Revision 3, dated September 28, 1989, or Revision 4, dated July 11, 1991. Repeat the external inspection at intervals not to exceed 15 months. Repeat the internal inspection and apply corrosion inhibitor at intervals not to exceed 36 months.

(b) For all Model 727-100 and -100C series airplanes, having line position 548 or subsequent: Within 15 months after the effective date of this AD, conduct an internal and external close visual inspection for corrosion of the skin panels, doublers, and triplers located between BS 950 and BS 1183 and stringers S-26L and S-26R. Perform the inspections in accordance with Parts II.A and II.B of Boeing Service Bulletin 727-53-0085, Revision 3, dated September 28, 1989; or Revision 4, dated July 11, 1991. Repeat the external inspection at intervals not to exceed 15 months. Repeat the internal inspection and apply corrosion inhibitor at intervals not to exceed 36 months.

(c) If no corrosion or minor corrosion, as defined in Part II.A.2. of Boeing Service Bulletin 727-53-0085, Revision 3, dated September 28, 1989; or Revision 4, dated July 11, 1991, is detected by the inspections required by in paragraph (a) or (b) of this AD, prior to further flight, perform an ultrasonic inspection for voids in accordance with Part II.C of the applicable service bulletin.

(1) If no voids and no corrosion are detected, prior to further flight, reseal the doublers and triplers in accordance with Figure 3 of the applicable service bulletin or replace the affected skin panel in accordance with Part VI. of the applicable service bulletin.

(2) If voids or minor corrosion are detected, perform a Low Frequency Eddy Current (LFEC) inspection, to determine the amount of material loss, in accordance with Part II.D. of the applicable service bulletin.

(d) If major corrosion, as defined in Parts II.A.3 or II.B. of Boeing Service Bulletin 727-53-0085, Revision 3, dated September 28, 1989; or Revision 4, dated July 11, 1991, is detected, or material loss is 10 percent or more of the skin, doubler, or tripler thickness, prior to further flight, repair or replace the affected skin panel in accordance with Parts V. or VI. of the applicable service bulletin.

(e) If material loss is less than 10 percent of the skin, doubler, or tripler, and voids are present, prior to further flight, repair in accordance with Part III.B., III.D., IV.B., V., or VI. of Boeing Service Bulletin 727-53-0085, Revision 3, dated September 28, 1989; or Revision 4, dated July 11, 1991.

(f) For repairs made in accordance with Parts III. or IV. of the service bulletin, with 15 months after the repair is made, perform a LFEC inspection for corrosion progression in accordance with Part II.D. of Boeing Service Bulletin 727-53-0085, Revision 3, dated September 28, 1989; or Revision 4, dated July 11, 1991. Repeat the inspections at intervals not to exceed 15 months.

(g) Blind fasteners installed in accordance with Part IV. of Boeing Service Bulletin 727-53-0085, Revision 3 dated September 28, 1989; or Revision 4, dated July 11, 1991 are to be used as an interim repair only. The blind fasteners have a life limit of 10,000 landings before they must be replaced with solid fasteners in accordance with Part IV. of the service bulletin.

(1) The blind fasteners must be inspected for loose or missing fasteners after accumulating 3,000 landings since installation or 1,000 landings after the effective date of this AD, whichever occurs later, and thereafter at intervals not to exceed 3,000 landings.

(2) Blind fasteners installed prior to the effective date of this AD must be replaced prior to accumulating 10,000 landings or within 3,000 landings after the effective date of this AD, whichever occurs later.

(h) Replacement of the skin panels in accordance with Part VI. of Boeing Service Bulletin 727-53-0085, Revision 3, dated September 28, 1989; or Revision 4, dated July 11, 1991 constitutes terminating action for the inspection requirements of this AD for those panels.

(i) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may occur or comment and then send it to the Manager, Seattle ACO.

(j) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 4, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

26 CFR Part I

[INTL-0015-91]

RIN 1545-AP78

Taxation of Gain or Loss from Certain Nonfunctional Currency Transactions (Section 988 Transactions)

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed Income Tax Regulations relating to the taxation of gain or loss from certain foreign currency transactions and applies to taxpayers engaging in such transactions. This action is necessary because of changes to the applicable tax law made by the Tax Reform Act of 1986.

DATES: Comments and requests for a public hearing must be received by May 18, 1992.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention: CC:CORP:T:R (INTL-0015-91), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Jeffrey L. Dorfman of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:CORP:T:R (INTL-0015-91) (202-377-9059 (Dorfman), not toll-free calls).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attention: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The collection of information in these regulations is in § 1.988-5 (d) and (f). This information is required by the Internal Revenue Service to verify various elections made by the taxpayer. The likely respondents are businesses or other for-profit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on information as is available to the Internal Revenue Service. Individual respondents/recordkeepers may require greater or less time, depending on their particular circumstances.

Estimated total annual reporting and/or recordkeeping burden: 1,000 hours.

The estimated annual burden per respondent/recordkeeper varies from 30 minutes to 60 minutes, depending on individual circumstances, with an estimated average of 40 minutes.

Estimated number of respondents and/or recordkeepers: 1,500.

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR part 1) under section 988 of the Internal Revenue Code.

Explanation of Provisions

Section 1.988-1

Section 1.988-1(a)(3) coordinates section 988 with § 1.1275-4(g) of the proposed regulations. Section 1.988-1(a)(3) provides that § 1.1275-4(g) applies prior to section 988 to separate a contingent payment debt instrument into contingent and noncontingent components. To the extent applicable, section 988 applies to the distinct components.

Section 1.988-1(a)(4) provides rules for the treatment of dual currency debt instruments. Section 1.988-1(a)(4) provides that a dual currency debt instrument is separated into two hypothetical instruments—a zero coupon bond denominated in the currency of the stated redemption price at maturity (discounted as provided in § 1.1273-2(d)(2)(iv) of the proposed regulations), and an installment obligation, as defined in § 1.1273-1(b)(2) of the proposed regulations, denominated in the currency of the qualified periodic interest payments of the dual currency debt instrument. To the extent applicable, section 988 applies to the distinct instruments.

Section 1.988-1(a)(5) provides rules for multicurrency debt instruments similar to the rules applicable to dual currency debt instruments.

Section 1.988-2

Pursuant to section 989(c)(5), § 1.988-2(b)(14) provides special rules regarding nonfunctional currency related person debt. If a debt instrument denominated in a nonfunctional currency is entered into between related persons as defined in sections 267(b) and 707(b), and the taxpayer disposes of or terminates such instrument prior to maturity in a transaction in which exchange gain or loss would be recognized, the District Director or the Assistant Commissioner (International) may defer such gain or loss if he determines that the debt has in effect been replaced with debt denominated in a different currency (replacément debt) entered into with a related person (regardless of whether the replacement currency is the taxpayer' s functional currency). Such deferral, however, shall not exceed the earlier of the date the replacement debt is terminated in a transaction in which gain or loss is recognized or the maturity date of the replacement debt (so long as such debt is not replaced with related person debt denominated in a different currency). The rule set forth in § 1.988-2(b)(14) does not apply to debt for debt exchanges in the same nonfunctional currency. The Service solicits comments regarding issues raised by debt for debt exchanges in the same nonfunctional currency.

Section 1.988-2(b)(15) provides rules addressing debt instruments denominated in hyperinflationary currencies. Generally, exchange gain or loss is recognized at the close of each taxable year and is treated as an offset to interest income or expense.

Section 1.988-2(d)(4) and (e)(7) provides rules addressing forward contracts, futures contracts, option contracts and currency swaps where payments to be made or received are denominated in hyperinflationary currencies (hereafter referred to as hyperinflationary contracts). Section 1.988-2(d)(4) and (e)(7) generally provides that a taxpayer's position in a hyperinflationary contract is to be marked to market on the last day of the taxable year and any exchange gain or loss realized on such date.

Section 1.988-2(e)(3)(iv) coordinates section 988 with the rules of § 1.446-3(e)(4)(iii) of the proposed regulations regarding currency swaps with significant nonperiodic payments.

Section 1.988-5

Section 1.988-5(d) provides integration rules for hedged qualified payments patterned after the rules in § 1.988-5(b) of the final regulations regarding hedged executory contracts. A qualified payment is—(1) a declared but unpaid dividend denominated in a nonfunctional currency with respect to the recipient of such dividend, or (2) an unaccrued rent or royalty payment

denominated in a nonfunctional currency of the taxpayer the amount of which is fixed on the date the hedge is entered into. The term hedge is defined in § 1.988–5(d)(2)(iii). If a qualified payment and a hedge satisfy the rules of § 1.988–5 (d)(2)(i), the qualified payment and hedge are integrated. The effect of integrating a qualified payment and hedge is to treat amounts paid or received under the hedge as paid or received under the qualified payment or any subsequent account payable or receivable, or that portion thereof to which the hedge relates.

Mark to Market Method of Accounting

Pursuant to § 1.988–5(f), certain taxpayers may elect to realize for the taxable year exchange gain or loss on section 988 transactions that results from changes in exchange rates between the date a financial accounting period begins and the date a financial accounting period closes (but no less frequently than quarterly), provided such treatment is consistent with the taxpayer's method of accounting for financial reporting purposes (and that method conforms to U.S. generally accepted accounting principles). If a taxpayer makes the mark to market election under § 1.988–5(f), it must use the mark to market method to account for all section 988 transactions, other than those subject to the special hedging rules of § 1.988–5. Designation of a transaction as a hedging transaction for financial accounting (which generally precludes such transaction from being marked to market under the financial accounting rules) is irrelevant.

The time and manner of making a mark to market election is prescribed in § 1.988–5(f)(4). Such election cannot be revoked without the consent of the Commissioner and related person conformity rules apply.

If there is a Treasury Decision based on these proposed regulations, the Service anticipates issuing a revenue procedure setting forth the terms and conditions under which a change of method of accounting will be granted. The Service solicits comments regarding the terms and conditions of the revenue procedure, including the character of the adjustments for purposes of sections 904 and 954, and the appropriate period during which the section 481(a) adjustment should be taken into account.

Section 1.6045–1(d)(6)(iii)

Proposed § 1.6045–1(d)(6)(iii) is in response to a comment which suggested conforming the section 6045 broker reporting rules and section 988(d) hedging rules where the sale of stock or securities for nonfunctional currency and the hedge are effected through the same broker.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Request for a Public Hearing

Before adopting these regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request by any person who submits timely written comments on the proposed rules. Notice of the time, place and date for the hearing will be published in the **Federal Register**.

Drafting Information

The principal authors of these regulations are Jeffrey Dorfman and Charles T. Plambeck. Messrs. Dorfman and Plambeck are of the Office of Chief Counsel, Internal Revenue Service. Other personnel from the Internal Revenue Service and Treasury Department participated in developing the regulations.

List of Subjects

26 CFR §§ 1.985–0 through 1.989(c)–1T

Income taxes, Reporting and Recordkeeping requirements.

26 CFR §§ 1.6031–1 through 1.6060–1

Income taxes, Reporting and Recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 continues to read in part:

Authority: Sec. 7805, 68A Stat. 917 (26 U.S.C. 7805) * * *

Par. 2. Section 1.988–1 is amended by adding paragraphs (a) (3), (4), and (5), and adding *Example 12* to paragraph (a)(6) to read as follows:

§ 1.988–1 Certain definitions and special rules.

* * * * *

(a) * * *

(3) *Coordination with § 1.1275–4(g) regarding certain contingent payment instruments*—(i) *In general.* Section 1.1275–4(g) applies to separate an instrument into contingent and noncontingent components prior to the application of this § 1.988–1. To the extent applicable, §§ 1.988–1 through 1.988–5 of these regulations shall govern the taxation of each component. For example, if, after applying § 1.1275–4(g), a contingent instrument is separated into a nonfunctional currency denominated debt instrument and an option to buy a group of stocks, section 1.988–2(b) shall govern the taxation of the nonfunctional currency denominated debt instrument. However, because the option is not a section 988 transaction, §§ 1.988–1 through 1.988–5 do not apply to such component.

(ii) *Effective date.* This paragraph (a)(3) shall be effective for debt instruments issued on or after February 20, 1991.

(4) *Dual currency debt instruments*—(i) *Definition.* A dual currency debt instrument is a debt instrument with respect to which (prior to application of this section)—

(A) The qualified periodic interest payments as defined in § 1.1273–1(b)(1)(ii) are denominated in or determined by reference to a single currency;

(B) The stated redemption price at maturity as defined in § 1.1272–1(b)(1)(i) is denominated in or determined by reference to a currency different than that referred to in paragraph (a)(4)(i)(A) of this section; and

(C) The amount of all payments in each currency is fixed on the issue date as defined in § 1.1275–1(c).

A dual currency debt instrument is not a contingent debt instrument under section 1275(d).

(ii) *Operative rules.* A dual currency debt instrument shall be separated into two component hypothetical debt instruments each of which shall be treated separately as follows—

(A) *Creation of hypothetical zero coupon bond denominated in currency of stated redemption price at maturity.* The stated redemption price at maturity of the dual currency debt instrument shall be discounted at a rate consistent with the rules of § 1.1273–2(d)(2)(iv) to determine the issue price of a hypothetical zero coupon bond (denominated in the currency in which the stated redemption price at maturity is denominated or determined by reference to) to which the rules of sections 1272 and 1273 apply.

(B) *Creation of hypothetical installment obligation denominated in currency of qualified periodic interest payments.* The difference between the stated redemption price at maturity of the dual currency debt instrument and the issue price of the hypothetical zero coupon bond (translated at the spot rate on the issue date into the currency in which the qualified periodic interest payments of the dual currency debt instrument are denominated in or determined by reference to) shall be considered to be the principal amount of an installment obligation (as defined in § 1.1273–1(b)(2)), denominated in the currency of the qualified periodic interest payments of the dual currency instrument, to which the rules of sections 1272 and 1273 apply.

(C) *Application of section 988.* Section 988 shall apply to a hypothetical debt instrument created under paragraph (a)(4)(ii) (A) or (B) of this section if such hypothetical instrument is denominated in a nonfunctional currency. See *Example 12* of § 1.988–1(a)(6).

(iii) *Effective date.* This paragraph (a)(4) shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

(5) *Special rules for multi-currency debt instruments*—(i) *Definition of multi-currency debt instrument.* For purposes of this paragraph (a)(5), a multi-currency debt instrument is a debt instrument (other than a dual currency debt instrument)—

(A) Where, under the terms of the instrument, payments are made in more than one currency; and

(B) The amount of all payments in each currency is fixed on the issue date.

A multi-currency debt instrument is not a contingent debt instrument under section 1275(d).

(ii) *Operative rules.* A multi-currency debt instrument shall be separated into component hypothetical debt instruments in each currency and each component shall be treated separately in a manner consistent with the principles of paragraph (a)(4) of this section.

(iii) *Effective date.* This paragraph (a)(5) shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

(6) * * *

Example 12. (i) On January 1, 1993, X issues a 3 year bond with the following terms. The bond is priced at par with a principal amount of $100. X agrees to make three payments on December 31 of each year of $5.26 and, upon maturity, will repay 200 Swiss francs (Sf) in satisfaction of the principal due. The spot rate on January 1, 1993 is Sf1=$.50.

(ii) The debt instrument is a dual currency debt instrument within the meaning of paragraph (a)(4) of this section. The dual currency debt instrument is separated into two component hypothetical debt instruments. The first is a hypothetical Swiss franc denominated zero coupon bond with a stated redemption price at maturity of Sf200 discounted at a rate consistent with the rules of § 1.1273–2(d)(2)(iv) (assume 5% compounded annually) to determine an issue price of Sf172.77. The second is a 3 year hypothetical dollar self-amortizing installment obligation with annual payments of $5.26, a principal amount of $13.62 [$100−(Sf172.77×$.50)] and a yield to maturity of 8% compounded annually. Issuing a hypothetical dollar denominated installment obligation is not a section 988 transaction. Issuing the hypothetical Swiss franc zero coupon bond is a section 988 transaction subject to the computational rules of § 1.988–2(b).

* * * * *

Par. 3. Section § 1.988–2 is amended by adding paragraphs (b) (14) and (15), (d)(5), (e)(3)(iv) and (e)(7) as follows:

§ 1.988–2 Recognition and computation of exchange gain or loss.

* * * * *

(b) * * *

(14) *Nonfunctional currency debt replaced by other related person debt denominated in a different currency*—(i) *In general.* If a debt instrument denominated in a nonfunctional currency (or the payments of which are determined with reference to a nonfunctional currency) is entered into between related persons as defined in sections 267(b) and 707(b), and the instrument is disposed of or otherwise terminated prior to maturity in a transaction in which exchange gain or loss would be recognized, the District Director or the Assistant Commissioner (International) may defer such gain or loss if he determines that the debt has in effect been replaced with other debt denominated in a different currency (replacement debt) entered into with the same or another related person (regardless of whether the replacement debt is denominated in, or determined by reference to, the taxpayer's functional currency). Such deferral, however, shall not exceed the earlier of the date the replacement debt is terminated in a transaction in which gain or loss is recognized or the maturity date of the replacement debt (so long as such debt is not replaced with debt of a related person in a different currency).

(ii) *Debt for debt exchanges in the same nonfunctional currency.* [Reserved]

(iii) *Example.* The following example illustrates the application of this paragraph (b)(14).

Example. X is a calendar year corporation with the dollar as its functional currency. On January 1, 1995, X issues a par bond with a principal amount of 3,500,000 British pounds (£) to Y, a related person under section 267(b). The bond pays interest at the rate of 10% compounded semi-annually and matures on December 31, 2009. The £3,500,000 have a spot value of $5,000,000 on January 1, 1995. On January 1, 1997, X and Y agree to convert X's pound obligation to a dollar obligation in the principal amount of $5,300,000, the spot value of the pound principal amount on that date. Assume that but for paragraph (b)(14) of this section, X would realize and recognize a $300,000 exchange loss on January 1, 1997. However, the District Director may defer X's $300,000 exchange loss until the $5,300,000 obligation matures or is otherwise terminated in a transaction in which gain or loss is recognized.

(iv) *Effective date.* Paragraph (b)(14)(i) of this section shall be effective for transactions entered into after March 17, 1992.

(15) *Debt instruments (or demand deposits) denominated in hyperinflationary currencies*—(i) *In general.* If a taxpayer acquires, incurs, or otherwise enters into a debt instrument (other than a loan described in section 988(a)(3)(C)) or a demand deposit denominated in a nonfunctional currency of the taxpayer that is also a hyperinflationary currency (as defined in § 1.988–1(f)) at the time the deposit or instrument is acquired or otherwise entered into, then the taxpayer shall realize exchange gain or loss with respect to such deposit or instrument for its taxable year determined by reference to the change in exchange rates between—

(A) The later of the first day of the taxable year, or the date the instrument was entered into (or an amount deposited); and

(B) The earlier of the last day of the taxable year, or the date the instrument (or deposit) is disposed of or otherwise terminated.

(ii) *Source and character of gain or loss.* For purposes of subtitle A of the Internal Revenue Code, any exchange gain or loss realized under paragraph

(b)(15)(i) of this section shall be directly allocable to the interest income or interest expense from the debt instrument or demand deposit (computed under § 1.988–2(b)), and therefore shall reduce or increase the amount of interest income or interest expense paid or accrued during that year with respect to that instrument or deposit. To the extent exchange gain or loss realized under paragraph (b)(15)(i) of this section exceeds interest expense or income paid or accrued during that year with respect to the nonfunctional hyperinflationary currency debt instrument, the character and source of such excess amount shall be determined under §§ 1.988–3 and 1.988–4.

(iii) *Adjustment to principal or basis.* Any exchange gain or loss realized under paragraph (b)(15)(i) of this section shall be an adjustment to the functional currency principal amount of the issuer, or functional currency basis of the holder, for purposes of subsequent computations of exchange gain or loss.

(iv) *Interaction with other provisions.* This § 1.988–2(b)(15) applies before § 1.861–9T. This § 1.988–2(b)(15) shall not apply to a qualified business unit that uses the United States dollar approximate separate transactions method of accounting described in § 1.985–3.

(v) *Effective date.* This paragraph (b)(15) shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

* * * * *

(d) * * *

(5) *Hyperinflationary contracts*—(i) *In general.* If a taxpayer acquires or otherwise enters a contract described in paragraph (d)(1) of this section that has payments to be made or received that are denominated in or determined by reference to a nonfunctional currency of the taxpayer that is also a hyperinflationary currency (as defined in § 1.988–1(f)) at the time the contract is acquired or otherwise entered into, then the taxpayer shall realize exchange gain or loss with respect to such contract for its taxable year determined by reference to the change in exchange rates between—

(A) The later of the first day of the taxable year, or the date the contract was entered into; and

(B) The earlier of the last day of the taxable year, or the date the contract is disposed of or otherwise terminated.

Proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain or loss taken into account by reason of this paragraph (d)(5). This § 1.988–2 (d)(5) shall not apply to a qualified business unit that uses the United States dollar approximate separate transactions method of accounting described in § 1.985–3.

(ii) *Effective date.* This paragraph (d)(5) shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

* * * * *

(e) * * *

(3) * * *

(iv) *Coordination with § 1.446–3(e)(4)(iii) regarding swaps with significant nonperiodic payments.* The rules of § 1.446–3(e)(4)(iii) regarding swaps with significant nonperiodic payments shall apply with respect to a currency swap (regardless of whether it is an on-market or off-market currency swap). This paragraph (e)(3)(iv) shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

* * * * *

(7) *Special rules for currency swaps in hyperinflationary currencies*—(i) *In general.* If a taxpayer enters into a currency swap or similar financial instrument having payments to be made or received that are denominated in or determined by reference to a nonfunctional currency of the taxpayer that is also a hyperinflationary currency (as defined in § 1.988–1(f)) at the time the contract is acquired or otherwise entered into, then the taxpayer shall realize exchange gain or loss for its taxable year with respect to such instrument determined by reference to the change in exchange rates between—

(A) The later of the first day of the taxable year, or the date the instrument was entered into; and

(B) The earlier of the last day of the taxable year, or the date the instrument is disposed of or otherwise terminated.

Proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain or loss taken into account by reason of this paragraph (e)(7). This § 1.988–2(e)(7) shall not apply to a qualified business unit that uses the United States dollar approximate separate transactions method of accounting described in § 1.985–3.

(ii) *Effective date.* This paragraph (e)(7) shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

* * * * *

Par. 4. Section 1.988–5 is amended by adding paragraphs (d) and (f) to read as follows:

§ 1.988–5 Section 988(d) hedging transactions.

* * * * *

(d) *Hedges of certain nonfunctional currency payments*—(1) *In general.* If a qualified payment, as defined in paragraph (d)(2)(ii) of this section, and a hedge, as defined paragraph (d)(2)(iii) of this section, satisfy the requirements of paragraph (d)(2)(i) of this section, the qualified payment and the hedge shall be integrated as provided in paragraph (d)(3) of this section. A transaction integrated in accordance with the provisions of this section shall be referred to as a "hedged qualified payment." For purposes of this paragraph (d), the rules of paragraph (b)(3)(ii) of this section shall apply.

(2) *Requirements and definitions*—(i) *Requirements of hedged qualified payment.* A qualified payment as defined in paragraph (d)(2)(ii) of this section and a hedge as defined in paragraph (d)(2)(iii) of this section must satisfy the following requirements in order to be treated as a hedged qualified payment under paragraph (d)(1) of this section.

(A) The qualified payment and the hedge are identified as an integrated transaction under the rules of paragraph (b)(3) of this section.

(B) The hedge is entered into (or in the case of nonfunctional currency deposited in a separate account with a bank or other financial institution, such currency is acquired and deposited) on or after the date the qualified payment becomes fixed (or declared in the case of a dividend), and before the accrual date as defined in paragraph (d)(2)(iv) of this section.

(C) The qualified payment is hedged in whole or in part throughout the period beginning with the date the hedge is identified in accordance with paragraph (b)(3) of this section and ending on or after the accrual date (but not later than the payment date).

(D) None of the parties to the hedge are related. For this purpose, parties are related if they satisfy any of the relationships defined in sections 267(b) and 707(b).

(E) In the case of a qualified business unit with a residence, as defined in section 988(a)(3)(B), outside of the United States, both the qualified payment and the hedge are properly reflected on the books of that qualified business unit.

(F) Subject to the limitations of paragraph (d)(2)(i)(E) of this section, both the qualified payment and the hedge are entered into by the same individual, partnership, trust, estate, or corporation. With respect to a corporation, the same corporation must enter into both the qualified payment and the hedge whether or not such corporation is a member of an affiliated group of corporations that files a consolidated return.

(G) With respect to a foreign person engaged in a U.S. trade or business that enters into a qualified payment or hedge through such trade or business, all items of income and expense associated with the qualified payment and the hedge would have been effectively connected with such U.S. trade or business throughout the term of the hedged qualified payment had this paragraph (d) not applied.

(ii) *Qualified payment.* A qualified payment is—

(A) A declared but unpaid dividend denominated in or determined by reference to a nonfunctional currency with respect to the recipient; or

(B) An unaccrued rent or royalty payment denominated in or determined by reference to a nonfunctional currency of the taxpayer (whether the taxpayer is the payor or recipient), the amount of which is fixed on the date the hedge is entered into.

(iii) *Hedge*—(A) *In general.* For purposes of this paragraph (d), the term hedge means a deposit of nonfunctional currency in a hedging account (as defined paragraph (d)(3)(iii)(D) of this section), a contract described in § 1.988–1(a) (1)(ii) and (2) (iii), or combination thereof, that reduces the risk of exchange rate fluctuations by reference to the taxpayer's functional currency with respect to nonfunctional currency payments made or received under a qualified payment (as defined in paragraph (d)(2)(ii) of this section). The term hedge includes an option contract described in § 1.988–1(a) (1)(ii) and (2) (iii) only if the option contract expires on or before the accrual date and is exercised on or before such date. The premium paid for an option that lapses shall be integrated with the qualified payment.

(B) *Special rule for series of hedges.* A series of hedges as defined in paragraph (d)(3)(iii)(A) of this section shall be considered a hedge if the qualified payment is hedged in whole or in part throughout the period beginning with the date the hedge is identified in accordance with paragraph (d)(2)(i)(A) of this section and ending on or after the accrual date. A taxpayer that enters into a series of hedges will be deemed to have satisfied the preceding sentence if the hedge that succeeds a hedge that has been terminated is entered into on the business day following such termination.

(C) *Special rules for historical rate rollovers.* The principles of paragraph (b)(2)(iii)(C) of this section shall apply for purposes of this paragraph (d).

(D) *Special rules regarding deposits of nonfunctional currency in a hedging account.* The principles of paragraph (b)(2)(iii)(D) of this section shall apply for purposes of this paragraph (d).

(E) *Interest income on deposit of nonfunctional currency in a hedging account.* The principles of paragraph (b)(2)(iii)(E) of this section shall apply for purposes of this paragraph (d).

(iv) *Accrual date.* The accrual date is the date when a dividend, rent or royalty that is a qualified payment is required to be accrued (or otherwise taken into account) under the taxpayer's method of accounting. A taxpayer may use any reasonable convention consistently applied to translate an accrued payment or receipt into the taxpayer's functional currency.

(v) *Payment date.* The payment date is the date when payment is made or received with respect to a qualified payment or the subsequent account payable or receivable arising from such qualified payment.

(3) *Effect of hedged qualified payment*—(i) *In general.* A taxpayer that has entered into a transaction that is treated as a hedged qualified payment shall treat amounts paid or received under the hedge as paid or received under the qualified payment, or any subsequent account payable or receivable, or that portion to which the hedge relates. Thus, for example, any gain or loss on the hedge shall have the same source and character as the source and character of the qualified payment. The taxpayer shall recognize no exchange gain or loss on the hedge. The taxpayer shall recognize no exchange gain or loss with respect to an account payable or receivable that arises from a qualified payment during the period that the account payable or receivable is covered by the hedge.

(ii) *Partially hedged qualified payments.* The effect of integrating a qualified payment and a hedge that partially hedges such qualified payment is to treat the amounts paid or received under the hedge as paid or received under the portion of the qualified payment being hedged, or any subsequent account payable or receivable. The income or expense resulting from qualified payment that is attributable to that portion of the qualified payment that is not hedged shall be translated into functional currency on the accrual date. The taxpayer shall realize exchange gain or loss shall with respect to any unhedged payable or receivable arising from the qualified payment.

(iii) *Disposition of a hedge or termination of the qualified payment prior to the accrual date*—(A) *In general.* If a taxpayer identifies a qualified payment as part of a hedged qualified payment as defined in paragraph (d)(2) of this section, and the qualified payment is disposed of or otherwise terminated prior to the accrual date (by transfer, cancellation, or otherwise), the taxpayer shall treat the hedge as sold for its fair market value on the date the qualified payment is terminated and shall realize and recognize any gain or loss with respect to that hedge on such date. Such gain or loss shall be an adjustment to the amount received or expended with respect to the disposition or termination, if any. The spot rate on the date the hedge is treated as sold shall be used to determine subsequent exchange gain or loss on the hedge. If a taxpayer identifies a hedge as part of a hedged qualified payment as defined in paragraph (d)(2) of this section, and disposes of the hedge prior to the accrual date, any gain or loss realized by the taxpayer on such disposition shall not be recognized and shall be an adjustment to the income or expense from the qualified payment.

(B) *Certain events in a series of hedges treated as a termination of the hedged qualified payment.* If the rules of paragraph (d)(2)(iii)(B) of this section are not satisfied, the hedged qualified payment shall be terminated and the provisions of paragraph (d)(3)(iii)(A) of this section shall apply to any gain or loss actually realized with respect to such hedge. Any subsequent transactions entered into to reduce the risk of exchange rate movements with respect to such qualified payment shall not be considered a hedge as defined in paragraph (d)(2)(iii) of this section.

(C) *Qualified payments between related persons*—(*1*) *In general.* Notwithstanding any other provision of this paragraph (d), if the parties to a qualified payment are related within the meaning of sections 267(b) and 707(b), and the hedge or qualified payment is disposed of or otherwise terminated prior to the accrual date, the District Director or the Assistant Commissioner (International) may redetermine the timing, source, and character of gain or loss from the hedge or the qualified payment if he determines that a significant purpose for disposing of the hedge or terminating the qualified payment prior to the accrual date was to affect the timing, source, or character of

income, gain, expense, or loss for Federal income tax purposes.

(2) *Special source rule for certain hedges of dividends between related persons.* If a hedged qualified payment is entered into by a U.S. person and consists of a declared but unpaid dividend between related persons (as defined in section 267(b)) and a hedge, and the dividend is not paid, then any loss realized with respect to the hedge shall reduce foreign source income described in section 904(d)(1)(I) and any gain shall be treated as from U.S. sources.

(iv) *Disposition of a hedge on or after the accrual date.* If a taxpayer identifies a hedge as part of a hedged qualified payment as defined in paragraph (d)(2) of this section, and disposes of the hedge on or after the accrual date, the taxpayer shall recognize no gain or loss on the hedge and the booking date, as defined in § 1.988–2(c)(2), of the payable or receivable for purposes of computing exchange gain or loss shall be the date such hedge is disposed of.

(v) *Special rule for foreign persons that enter into hedged qualified payments giving rise to U.S. source income not effectively connected with a U.S. trade or business.* If a foreign person enters into a hedged qualified payment that gives rise to U.S. source income not effectively connected with a U.S. trade or business of such foreign person, for purposes of sections 871(a), 881, 1441, 1442 and 6049, the provisions of this paragraph (d) shall not apply and such sections of the Internal Revenue Code shall be applied separately to the qualified payment and the hedge. To the extent relevant to any foreign person, if the requirements of this paragraph (d) are otherwise met, the provisions of this paragraph (d) shall apply for all other purposes of the Internal Revenue Code (*e.g.*, for purposes of calculating the earnings and profits of a controlled foreign corporation that enters into a hedged qualified payment through a qualified business unit resident outside the United States, income or expense with respect to such hedged qualified payment shall be calculated under the provisions of this paragraph (d)).

(vi) *Sections 263(g), 1092, and 1256 do not apply.* Sections 263(g), 1092, and 1256 do not apply with respect to a qualified payment or hedge which comprises a hedged qualified payment as defined in paragraph (d)(2) of this section. However, sections 263(g), 1092 and 1256 may apply to the hedged qualified payment if such transaction is part of a straddle.

(vii) *Examples.* The principles set forth in paragraph (d) of this section are illustrated in the following examples. The examples assume that K is an accrual method, calendar year U.S. corporation with the dollar as its functional currency.

Example 1. (i) K is a U.S. corporation that has a qualified business unit, Q. Q's principal place of business is in Canada, and it has the U.S. dollar (US$) as its functional currency. On January 1, 1993, Q enters into a 3 year lease to rent an office in Canada for annual payments of 50,000 Canadian dollars (C$). On February 1, 1993, 1994, and 1995, Q enters into a forward contract to buy C$50,000 for US$24,500, US$24,000, and US$23,500 respectively. Assume Q satisfies the identification requirements of paragraph (d)(2)(i)(A) of this section.

(ii) The obligation to pay rent denominated in nonfunctional currency as set forth above is a qualified payment as defined in paragraph (d)(2)(ii) of this section. Further, the forward contracts constitute a hedge as defined in paragraph (d)(2)(iii) of this section. Assuming the requirements of paragraph (d)(2)(i) of this section are satisfied, Q may integrate the forward contracts with the rental payments. Accordingly, Q is treated as having paid US$24,500 in rent in 1993, US$24,000 in rent in 1994, and US$23,500 in 1995.

Example 2. (i) B is a wholly owned Danish subsidiary of K, a U.S. corporation. B was organized on January 1, 1995, and its functional currency is the Danish Kroner. On September 1, 1995, the board of directors of B declares a dividend payable on December 31, 1995 in the amount of Kr100,000, which equals $10,000 at the spot rate on September 1, 1995. On the same day, K enters into a forward contract to sell Kr100,000 for $9,750 on September 1, 1995. Assume K satisfies the identification requirements of paragraph (d)(2)(i)(A) of this section. B pays a dividend of Kr100,000 on December 31, 1995. At the end of 1995, B's pool of post-1986 undistributed earnings is Kr300,000 of non-subpart F foreign source earnings and profits, and B's pool of post-1986 foreign income taxes is $3,000.

(ii) The declared dividend denominated in Kroner as set forth above is a qualified payment as defined in paragraph (d)(2)(ii) of this section. Further, the forward contract constitutes a hedge as defined in paragraph (d)(2)(iii) of this section. Assuming the requirements of paragraph (d)(2)(i) of this section are satisfied, K may integrate the forward contract with the dividend. Accordingly, K is treated as having received a $9,750 dividend in 1995.

(iii) The amount of foreign taxes deemed paid with respect to the dividend is $1,000 (Kr100,000/Kr300,000×$3,000). If B had not hedged the dividend, the amount of the foreign taxes deemed paid would still be $1,000, computed in the same manner.

(iv) Assume that B does not pay the Kr100,000 dividend and K realizes a $250 loss on December 31, 1995, when the forward contract is terminated. Under paragraph (d)(3)(iii)(C)(*2*) of this section, the $250 loss shall reduce foreign source income described in section 904(d)(1)(I).

(4) *Effective date.* This paragraph (d) shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

* * * * *

(f) *Mark to market method of accounting for taxpayers that are not acting in the capacity of a dealer*—(1) *Scope.* This paragraph (f) shall apply to any taxpayer that makes an election as provided in paragraph (f)(2) of this section. However, this election is not available to a qualified business unit that uses the United States dollar approximate separate transactions method of accounting described in § 1.985–3.

(2) *Operative rules*—(i) *In general.* A taxpayer described in paragraph (f)(1) of this section may elect to realize for the taxable year exchange gain or loss on section 988 transactions that results from changes in exchange rates between the date a financial accounting period begins and the date a financial accounting period closes (but no less frequently than quarterly), provided such treatment is consistent with the taxpayer's method of accounting for financial reporting purposes (and that method conforms to U.S. generally accepted accounting principles). Realizing the gain or loss resulting from changes in exchange rates between the date a financial accounting period begins and the date a financial accounting period closes shall hereafter be referred to as marking to market.

(ii) *Treatment of gain or loss.* Proper adjustment for gain or loss realized under the preceding paragraph shall be made in the amount of any gain or loss subsequently realized. The character and source of gain or loss realized under the preceding paragraph shall be determined under § 1.988–3 and § 1.988–4.

(iii) *Exception.* The method of accounting described in this paragraph (f) shall not apply to transactions entered into by a taxpayer in its capacity as a dealer or trader (as defined in § 1.446–4(b)) in nonfunctional currency or nonfunctional currency denominated instruments.

(3) *Treatment of hedging transactions*—(i) *Hedging election by the taxpayer.* Except as provided in this paragraph (f)(3), all section 988 transactions must be accounted for as if they were not hedging any transaction (*i.e.*, without regard to the taxpayer's treatment of hedging transaction for financial accounting purposes). A taxpayer that makes an election under this paragraph (f) shall account for section 988 hedging transactions as provided in paragraphs (a) through (e) of this section. Thus, if a taxpayer that has made an election under this paragraph (f) fully hedges all payments under a nonfunctional currency borrowing so as to create a synthetic functional currency borrowing that satisfies the requirements of paragraph (a) of this section, such nonfunctional currency borrowing and the related hedges shall not be marked to market under paragraph (f)(2) of this section. In contrast, if the taxpayer elects hedge accounting treatment for financial accounting purposes with respect to the transaction described in the preceding sentence, but does not comply with paragraph (a) of this section (*e.g.*, fails to satisfy the identification requirements of paragraph (a)(8) of this section), the nonfunctional currency borrowing and related hedges must be marked to market under paragraph (f)(2) of this section.

(ii) *Authority of the District Director.* Nothing in this paragraph (f) shall prevent the District Director (or Assistant Commissioner (International)) from applying the rules of paragraphs (a) through (d) of this section.

(4) *Consistency rules.* If a taxpayer elects the mark to market method of accounting of this paragraph (f) each person who is related to the taxpayer within the meaning of section 267(b) or 707(b) (whether or not such person uses U.S. generally accepted accounting principles) shall be deemed to make the election described in paragraph (f)(2) of this section. The deemed election shall not apply to persons who otherwise would not be eligible to make the election described in paragraph (f)(2) of this section.

(5) *Time and manner of making election*—(i) *Time for making the election.* A taxpayer's election under this paragraph (f) is effective for any taxable year (and subsequent taxable years) only if it is made by the due date (including extensions) of the taxpayer's federal income tax return for the year.

(ii) *Manner of making the election.* A taxpayer shall make the election provided in this paragraph (f) by attaching a statement entitled "Election of mark to market method of accounting with respect to section 988 transactions" to the taxpayer's return for the first taxable year for which the election is to be effective. The statement must contain the following information:

(A) A brief description of the taxpayer's method of accounting for financial purposes; and

(B) A statement that this method of accounting applies consistently to all related persons (except for the dealing or trading activities of such person) within the meaning of sections 267(b) and 707(b) except qualified business units that use the United States dollar approximate separate transactions method of accounting described in § 1.985–3.

(iii) *Election by a partnership, trust or controlled foreign corporation.* In the case of a partnership, the election shall be made on behalf of all partners by the general partners; in the case of a trust (other than a grantor trust) the election shall be made by the trustees. In the case of a controlled foreign corporation, the election shall be made on behalf of all shareholders by its controlling United States shareholders under § 1.964–1(c)(3).

(iv) *Revocation.* The election under this paragraph (f) cannot be revoked without the consent of the Commissioner.

(6) *Interaction with § 1.988–2(b)(14).* Section 1.988–2(b)(14) (relating to nonfunctional currency related person debt replaced by other related person debt in a different currency) shall not apply to exchange gain or loss realized with respect to a debt instrument which is subject to the mark to market method of accounting elected under this paragraph (f).

(7) *Examples.* The following examples illustrate the rules of this paragraph (f):

Example 1. (i) X is a calendar year U.S. corporation with the dollar as its functional currency. X is on the accrual method of accounting, and has properly elected the mark to market method of accounting of § 1.988–5(f) under which X's section 988 transactions are marked to market monthly. X also uses a spot rate convention to determine the spot rate as provided in § 1.988–1(d)(3). Pursuant to X's spot rate convention, the spot rate at which a transaction within a month is booked is determined by the spot rate at the end of the prior month. Under X's method of accounting, nonfunctional currency denominated transactions (other than inventory and property accounts) on the books at the end of the month are revalued at the spot rate on the last day of the month. Inventory and property accounts (which are not section 988 transactions and therefore are not eligible for mark to market treatment) on the balance sheet are recorded exclusively at historical cost translated on the day of purchase. On January 1, 1995, X's only financial asset is a £2,000 bank account, which pursuant to X's spot rate convention is equal to $4,000 (the December 31, 1994 spot rate is £1=$2, multiplied by £2,000). X also has inventory of $500 (translated at the historical rate). Assume that all of X's inventory was purchased on the same day. X has no liabilities.

(ii) On January 15, 1995, X receives £100 from the issuance of a note payable on January 15, 2000, and deposits the £100 into the bank account. The December 31, 1994 spot rate of £1=$2 is used to book the cash and the note, not the spot rate on January 15, 1995. X has no other transactions during the month of January. The spot rate at the end of January is £1=$2.50. Accordingly, X will realize $1,050 of exchange gain [(£2,100×$2.50=$5,250)–(£2,100×$2.00=$4,200)] with respect to X's pound cash account. Additionally, X will realize $50 of exchange loss [(£100×$2.00=$200)–(£100×$2.50=$250)] with respect to X's liability. Thus, X's total exchange gain for the January is $1,000. Because the acquisition of the inventory is not a section 988 transaction (and accordingly is recorded at historical cost and not revalued), no gain or loss is realized with respect to the inventory.

(iii) On February 21, 1995, X sells half of its inventory for £195, in exchange for an account receivable. The January 31, 1995 spot rate of £1=$2.50 is used to book the receivable and to determine the amount realized on the inventory sale, not the spot rate on February 21, 1995. X has no other transactions during the month of February. The spot rate at the end of February is £1=$2.75. X will realize $540.50 of exchange gain computed as follows:

(A) X will realize $573.50 of exchange gain on its assets subject to section 988 computed as follows. With respect to X's pound cash account, X will realize $525 of exchange gain [(£2,100×$2.75=$5,775)–(£2,100×$2.50–$5,250)]. With respect to the account receivable, X will realize $48.50 of exchange gain [(£195×$2.75=$536.25)–(£195×$2.50=$487.75)].

(B) X will realize $25 of exchange loss [(£100×$2.50=$250)–(£100×$2.75=$275)] with respect to X's £100 liability.

X will compute gain on the sale of its inventory by translating the £195 realized at the January 31, 1995 rate of £1=$2.50 to equal $487.50 and subtracting the assumed basis of $250. Thus, X's gain on the sale of inventory is $237.50, none of which is exchange gain or loss under section 988.

(iv) On March 22, 1995, X is paid £195 in satisfaction of the account receivable, and deposits that amount in its bank account. The February 28, 1995 spot rate of £1=$2.75 is used to book payment of the receivable and the amount deposited. X has no other transactions during the month of March. The spot rate at the end of March is £1=$3.00. X will realize $550.75 of exchange gain computed as follows:

(A) X will realize $575.75 of exchange gain on its assets computed as follows. With respect to X's pound cash account, X will realize $575.75 of exchange gain [(£2,295×$3.00=$6,887)–(£2,295×$2.75=$6,311.25)]. With respect to the account receivable, X will not realize exchange gain or loss because it is terminated within the month of March.

(B) X will realize $25 of exchange loss [(£100×$2.75=$275)–(£100×$3.00=$300)] with respect to X's £100 liability.

(v) On April 15, 1995, (when the spot rate is £1=$3.25) X withdraws £1000 from its bank account that it uses to purchase a machine. The basis of the machine is $3000 (the spot rate on March 31, 1995 of £1=$3.00 times £1000).

Example 2. H is a calendar year U.S. corporation with the dollar as its functional currency that has properly elected the mark

to market method of accounting of paragraph (f)(2) of this section. Under this method, H revalues its nonfunctional currency positions at the close of each month. H owns 100 percent of L, a foreign corporation. L has the local currency as its functional currency. On August 4, 1995, H enters into a forward contract which it designates for financial accounting purposes as a hedge of its net investment in L. Under H's method of financial accounting, gain or loss on the forward contract is not included in profit and loss but is treated as an adjustment to the equity account of H. Under paragraph (f)(2) of this section, the forward contract is not treated as hedging any transaction and therefore must be revalued on August 31, 1995 and gain or loss realized.

(8) *Effective date.* This paragraph (f) shall be effective for taxable years ending on or after [Date Final Regulations are Published in the **Federal Register**].

* * * * *

Par. 5. Section 1.6045–1 is amended by adding new paragraph (d)(6)(iii) to read as follows:

§ 1.6045–1 Returns of information of brokers and barter exchanges.

* * * * *

(d) * * *

(6) * * *

(iii) *Effect of identification under § 1.988–5 (b) or (c) where taxpayer effects a sale and the hedge through the same broker*—(A) *In general.* In lieu of the amount reportable under paragraph (d)(6) (i) or (ii) of this section, the amount subject to reporting shall be the integrated amount computed under § 1.988–5 (b) or (c) if—

(*1*) A taxpayer effects through a broker a sale (as defined in paragraph (a)(9) of this section) for nonfunctional currency (as defined in § 1.988–1(d)) and hedges all or a part of such sale as provided in § 1.988–5 (b) or (c) with the same broker; and

(*2*) The taxpayer complies with the requirements of § 1.988–5 (b) or (c) and so notifies the broker prior to the date the broker prepares Forms 1099 as required under this section.

(B) *Effective date.* This section shall be effective for transactions entered into on or after [Date Final Regulations are Published in the **Federal Register**].

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 9

[Docket No. 48043: Notice No. 92–2]

RIN 2105–AB56

Testimony of Employees of the Department and Production of Records in Legal Proceedings

AGENCY: Office of the Secretary; DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Transportation (DOT or Department) is proposing to establish procedures that must be followed when a Department employee or former employee is requested or subpoenaed to provide testimony or produce records concerning information acquired in the course of performing official duties or because of the official status of the employee. The proposed procedures are necessary to ensure more efficient use of Department resources (Department attorneys and employees currently spend a considerable amount of time responding to litigants' requests for documents or testimony), to minimize the possibility of involving the Department in controversial issues not related to its mission, to maintain the impartiality of the Department among private litigants, and to enhance the Department's ability to respond to requests.

DATES: Comments on this NPRM are due no later than May 18, 1992.

ADDRESSES: Written comments should refer to the docket number of this notice and should be submitted to Docket Clerk, room 4107, Office of the Secretary, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Steven B. Farbman, Office of the Assistant General Counsel for Regulation and Enforcement, Department of Transportation 400 Seventh Street SW., room 10424, Washington, DC 20590, (202) 366–9307.

SUPPLEMENTARY INFORMATION:

Background

The Department's current regulations at 49 CFR Part 9 do not contain any procedural requirements that private parties must meet in order to obtain departmental records or testimony of DOT employees for use in legal proceedings between private litigants. The regulations require only that the General Counsel or other appropriate counsel determine whether the employee is required to comply with a subpoena, and impose certain restrictions on the employee's testimony.

Private litigants are requesting or serving subpoenas for testimony, documents, or both from DOT agencies and their personnel in a large number of cases. The Department is composed of nine operating administrations plus the Office of the Secretary. One of the operating administrations, the Coast Guard, has had experience that illustrates this point. The following chart lists the types and number of activities relating to requests for testimony and documents that the Coast Guard was involved in for calendar year 1988.

a. Subpoenas for personal appearances at trial or deposition	182
b. Subpoenas or written requests for certified documents	108
c. Subpoenas for both personal appearances and documents	59
d. Appearances pursuant to subpoenas	40
e. Depositions pursuant to subpoenas	45
f. Motions to Quash	5

Similarly, the Federal Railroad Administration, which also records the number of requests for the testimony of its employees in private proceedings, receives approximately thirty requests annually.

Since many of the requests involve a transportation accident, any one of which may generate numerous private lawsuits or other proceedings, private litigants may seek the same investigative personned to provide testimony in different proceedings. Responding to each request for documents and for testimony can be burdensome and time consuming; sometimes litigants make requests on unnecessarily short notice. Based on our experience over the last several years, we believe that the number of requests will continue to increase, thereby causing additional use of Departmental resources to support private litigants.

The Proposed Rule: General

The Department proposes to establish procedures governing the testimony of an employee in legal proceedings in which the United States is a party. The Department also proposes to establish procedural requirements that private litigants must meet before the Department would produce documents or make an employee available to testify in a private legal or administrative proceeding. These procedures are not being proposed to inflict any unnecessary burden on private litigants. They are being proposed to conserve DOT resources, to minimize the possibility of involving the Department in controversial issues not related to its mission, to maintain the Department's impartiality among private litigants, and to enhance the Department's ability to respond more efficiently to requests for testimony and documents.

The proposed rule would include the Maritime Administration and the Research and Special Programs Administration in the definition of "Department;" the current regulation became effective before those operating administrations became part of DOT. To preclude having to revise this part for a similar reason in the future, the proposed rule would include within the definition of "Department" any operating administration established after the effective date of a final rule. The proposed rule also would clarify the definition of "Legal proceeding between private litigants" to mean those proceedings in which neither the DOT (or one of its operating administrations), nor the United States (including any federal agency or officer of the United States in his or her official capacity) is a party. The definition of "Employee" would be expanded to include former employees of the Department, retired or former officers and enlisted members of the Coast Guard, and individuals who have worked for the Department under contract, whose testimony about former official duties or functions of the Department might involve DOT in controversies unrelated to its mission. The rule as proposed more specifically define "Testimony" to mean any written or oral statements given in a legal proceeding, including depositions, affidavits, declarations, answers to interrogatories, and statements at a hearing or trial.

We also propose to add a definition of "Agency counsel." Under the proposed definition, the term "Agency counsel" would include the General Counsel, the Chief Counsels of the operating administrations, and any person to whom the General Counsel or a Chief Counsel has delegated authority under this part. This would make it clear that, for a decision on how to respond to a demand or a request for testimony, an employee must contact the agency counsel in his or her operating administration. The definition also would include any person, such as a Department of Justice attorney, who is authorized to represent the Department in a specific legal proceeding.

Under proposed § 9.1(c), agency counsel, under certain circumstances, may permit an exception from any requirement in the proposed rule. For example, agency counsel may grant an exception from a requirement of part 9 if he or she believes that to do so would be in the best interest of the Department. The Inspector General may also permit an exception from any requirement concerning Office of Inspector General employees and documents.

Demands to Testify

The proper method for obtaining testimony or records from an employee is to submit a request to agency counsel as provided in § 9.13 and 9.15 of the proposal, not to serve a subpoena, order or other demand (collectively referred to as demands) on the employee. The proposed rule (which would not apply to Congressional demands for testimony or documents) would require employees to notify agency counsel if they are served with demands, or receive requests, to testify or produce documents, and would prohibit employees from honoring demands or requests absent explicit approval from the agency counsel. Under the proposed rule, the agency counsel has the discretion to grant demands for records or testimony of an employee and to determine the manner in which documents are disclosed or testimony is given in particular cases or types of cases. The agency counsel would notify the counsel for the party seeking the demand of the proper procedures to secure records or employee testimony.

If the party fails to follow proper procedures or does not withdraw a demand if requested to do so by agency counsel, the Department may move to quash the demand. If that motion is denied, the agency counsel would instruct the employee whether to testify or produce documents pursuant to the demand. Agency counsel would take steps to arrange for legal representation for the employee. If response to a demand is required before the court rules on the motion to quash and the court fails to stay the demand, the employee would appear with agency counsel at the time and place stated in the demand, produce a copy of these regulations, and respectfully decline to testify or produce any documents. If the court orders his or her testimony, the agency counsel may direct the employee not to testify, or might permit an exception under § 9.1(c). For example, the agency counsel might permit the employee to give factual testimony if permission would have been granted had the party seeking the testimony followed the procedures set forth in this part. This would prevent a miscarriage of justice by not subjecting the employee to a contempt charge. Agency counsel could still appeal the denial of the motion to quash. The appeal would not be moot because the issue would be capable of repetition.

Documents

Private litigants who wish to obtain documents from the Department should follow the procedures specified at 49 CFR part 7 concerning Freedom of Information (FOIA) requests. Private litigants who do not follow those procedures would be required to submit a statement setting forth the relevancy of the records to the proceeding. The proposed rule would require private litigants to submit requests for records before submitting any request for testimony. If these parties desire additional documents, they would have to indicate how the new request differs from previous record requests.

Testimony

The proposal describes when and to what extent an employee of the Department would be allowed to testify in legal proceedings in which the United States is a party and those in which it is not. The proposal generally would not permit Department employees to testify at a hearing or trial in legal proceedings between private parties. At present, the Department does not prohibit this testimony. However, because this testimony is usually more time consuming than, and duplicative of, deposition testimony, proposing to bar testimony at a hearing or trial on behalf of private parties, except when agency counsel permits an exception, seems to be a reasonable measure to conserve government time and resources for public purposes. For example, agency counsel might permit an exception under § 9.1(c) in a civil proceeding in which the testimony might be vital to the case and would not unduly harm the Department.

For other than testimony at a hearing or trial in legal proceedings between private litigants, an employee, under the proposal, could testify only to facts within that employee's personal knowledge with regard to matters arising out of his or her official duties; in a proceeding arising from an accident, an employee could testify only to personally known facts, not reasonably available from other sources, uncovered during the employee's investigation of the accident, or observed by the employee even if he or she did not investigate the accident. Thus, an employee who inspected a facility before an accident occurred could testify concerning his or her

observations. The testimony would be limited to a single deposition, affidavit, or set of interrogatories concerning the circumstances from which the proceeding arose. The proposed rule generally would prohibit an employee from providing expert or opinion testimony regarding any matter arising out of his or her official duties or the functions of the Department. If requested to do so, the employee would be required to decline to answer on the grounds that it is forbidden by this part. The agency counsel would instruct the employee on how to proceed if the court ordered the employee's testimony. The agency counsel could permit the testimony under § 9.1(c) exception.

The proposal also provides that, in legal proceedings between private litigants, an employee could not testify to facts in a report unless he or she receives permission from the agency counsel. The reasons for restricting this testimony is to ensure that any opinions expressed in reports are appropriately protected. The use of Department employees as experts or opinion witnesses would impose a serious administrative burden on the Department and compromise its impartiality toward private litigants. Moreover, the Accident Reports Act and other statutes prohibit the admission into evidence of certain accident and investigative reports. The proposed regulation would assist in giving these statutes greater practical effect by keeping the opinions of the Department's accident investigators—whether in oral or documentary form—out of private proceedings. The purposes of these statutes would be frustrated by this testimony.

The proposal would not apply to situations in which an employee, although on official duty, observes facts regarding matters that do not arise out of his or her official duties. For example, an employee who witnesses an automobile accident while driving a government vehicle would testify as a private citizen because observing the accident would not be related to the discharge of the employee's official duties.

Procedures for Litigants' Request

The proposed rule would require private litigants seeking the testimony of an employee of the Department of submit a request for that testimony to the agency counsel 30 days before the testimony is scheduled to be taken or received. Thirty days would provide the Department with sufficient time to respond to these requests. Agency counsel may authorize a different time for submission under § 9.1(c).

The proposal would require a party seeking employee testimony to furnish the agency counsel with certain facts about the proceeding together with a written summary of the information sought and its relevance to the proceeding. (It is often difficult to determine from a subpoena the precise nature and purpose of the information sought.) The Department also proposes to require the party seeking the testimony to certify that the information sought is not reasonably available from other sources. The Department believes that the burden of furnishing the summary, statement of relevance, and certification will be minimal. This information will greatly assist the Department in determining the appropriate response to the request.

Except in extraordinary circumstances, testimony may ordinarily be taken or received only once concerning a set of circumstances—whether by deposition, affidavit, declaration, or response to interrogatories—and at a place and time convenient to the Department. Moreover, the form of the testimony would be the one least burdensomé to the Department. For example, a private litigant may request that an employee be deposed when an affidavit or declaration will suffice. The Department also proposes that it be the duty of the party seeking the testimony to ascertain, whether feasible, the identities of all parties or potential parties in the proceeding, or in a related proceeding (e.g., actions in state and federal courts,) and notify them of the time and place scheduled for the deposition of a DOT employee. The would relieve Department employees from having to testify in multiple proceedings about the same matter. The private litigant would further be required to submit an affidavit or certification describing the extent of the litigant's search for parties and listing the names of the parties and potential parties notified. Any party or potential party not notified, however, would not be precluded from requesting testimony in the future. The Department also proposes to require the party requesting the testimony to furnish, at its own expense, a copy of the transcript, or other record, of the testimony to the agency counsel for the agency's files. If a party wishes to submit an additional request for testimony, the Department proposes to require the party to explain why it did not request this testimony earlier and why the prior testimony or previously disclosed documents are insufficient.

Fees and Costs

The proposed rule would explain the Department's policy on fees for obtaining records, and costs of processing and responding to requests for witness testimony by private parties.

Acceptance of Service

Finally, the Department proposes to modify current § 9.17, concerning acceptance of service; the proposed revision would clarify that this section is not inconsistent with, and does not waive, the requirements of Rules 4(d)(4) and 4(d)(5) of the Federal Rules of Civil Procedure. Rules 4(d)(4) and 4(d)(5) require that, in a suit involving the United States, the summons and complaint be served upon the United States Attorney for the district, the United States Attorney General, and the Secretary of Transportation. Process must be served upon all three persons in order to be valid.

Authority

The courts have upheld regulations restricting the right of private litigants to require testimony of, or production of documents from, employees of federal agencies. The landmark case in this area is *United States ex rel. Touhy* v. *Ragen*, 340 U.S. 462 (1951), in which the Supreme Court held that a Department of Justice (DOJ) official, acting on order of the Attorney General, could not be held in contempt for declining to produce records in response to a *subpoena duces tecum*. It reasoned that the variety of information contained in the files of any government agency and the possibilities of harm from unrestricted disclosure in court necessitate centralizing determinations as to whether to obey or challenge a *subpoena duces tecum*. The Court stated that it was appropriate for the Attorney General to prescribe regulations for the preservation of records of the Department of Justice. See *Marcoux* v. *Mid-States Livestock*, 66 F.R.D. 573 (W.D. Mo. 1975).

Federal circuit and district courts have consistently upheld the validity of regulations based on *Touhy*. In *Reynolds Metals Co.* v. *Crowther*, 572 F. Supp. 288 (D. Mass. 1982), plaintiff sought to compel two employees of the Occupational Safety and Health Administration to testify, contrary to specific instructions of their superiors given pursuant to Department of Labor regulations, concerning information acquired during official investigations. After the two employees refused to testify in response to a state court subpoena, they were ordered to show cause why they should not be held in contempt. In dismissing the contempt proceedings, the district court stated: "The policy behind the prohibition of testimony is to conserve governmental resources where the United States is not a party to a suit, and to minimize governmental involvement in controversial matters unrelated to official business." In *Boron Oil* v. *Downie*, 873 F.2d 67 (4th Cir. 1989), the court held that the state court and the federal district court on removal lacked jurisdiction to compel an Environmental Protection Agency (EPA) On-Scene Coordinator to appear and testify about his investigation of an alleged service station gasoline leak in a state court action to which the government was not a party. It stated that "an action seeking specific relief against a federal official, acting within the scope of his delegated authority, is an action against the United States, subject to governmental privilege of immunity." Counsel for EPA had refused to permit the employee to testify under EPA regulations whose purpose "is to ensure that employees' official time is used only for official purposes, to maintain the impartiality of EPA among private litigants, to ensure that public funds are not used for private purposes and to establish procedures for approving testimony or production of documents when clearly in the interests of EPA." Recently, in *Davis Enterprises* v. *EPA*, 877 F.2d 1181 (3d Cir. 1989), the court found that EPA's refusal to allow an employee to testify as a fact witness to refute damage claims brought by homeowners as a result of a gasoline spill was not arbitrary or capricious or an abuse of discretion.

"Notwithstanding the argument that the employee's deposition would only take a minimal amount of time, * * * EPA has a legitimate concern with the potential cumulative effect of granting such requests." Courts have also upheld regulations that limit federal employees' testimony in private proceedings to factual information. *E.g.*, *Southeastern Pa. Transp. Auth.* v. *General Motors Corp.*, 103 F.R.D. 12 (E.D. Pa. 1984); and *Kline* v. *Martin*, 345 F. Supp. 31 (E.D. Va. 1972).

There is also authority for including former employees in the proposal. In *Fowkes* v. *Dravo Corporation*, 5 F.R.D. 51 (E.D. Pa. 1945), a former employee and a current employee of the Treasury Department refused to testify or produce documents pursuant to subpoenas issued by the clerk of the district court because they were instructed not to do so by the Deputy Commissioner of Internal Revenue. Because the information had been obtained by the current employee and the former employee while in their official positions, disclosure could not be permitted unless in accordance with a Treasury regulation and a Treasury Department circular. No argument was made that the regulation and circular did not apply to the former employee. The court upheld the Treasury Department's refusal to allow the testimony, at least until the procedures in the Department circular were followed. The court based its decision on the nature of the information; no mention was made of the fact that the individual was no longer employed by the Treasury Department. Thus, so long as the former employee had acquired the information in his official capacity as an employee, persons seeking his testimony would still be required to follow the agency's procedures and regulations governing disclosure of the information.

Both 49 U.S.C. 322 (conferring general regulatory authority on the Secretary of Transportation) and 5 U.S.C. 301 (the successor to the statute relied on in *Touhy*) support the issuance of the proposed regulation. The Department believes these statutes provide it with ample authority to issue regulations setting reasonable conditions under which the Department's employees may provide testimony or produce documents. The Department also believes that the conditions that would be imposed by issuance of this proposed regulation are reasonable. Private litigants would remain able to obtain factual information from the Department, but would be required to do so in a way that is least disruptive to the orderly conduct of the Department's official business. Additional authority is found in: (1) The Accident Reports Act, 45 U.S.C. 41–42. Section 41 prohibits the admission into evidence, or the use in any suit or action for damages, of certain railroad accident and investigative reports; section 42 authorizes the Secretary to prescribe rules and regulations to implement and effectuate the purposes of section 41; (2) 43 U.S.C. 409, which prohibits the admission into evidence of certain reports and surveys pertaining to railroad highway crossings, bridges, and hazardous highway locations; and (3) 49 U.S.C. 504(f), which prohibits the admission into evidence, or the use in a civil action for damages, of certain reports pertaining to accidents, and investigation of accidents, in motor carrier operations. With respect to the cost of processing and responding to requests for witness testimony, 31 U.S.C. 9701 authorizes the head of each agency to prescribe regulations establishing the charge for a service or thing of value provided by the agency.

Executive Order 12291, DOT Regulatory Policies and Procedures, and Regulatory Flexibility Act

The Department has considered the impact of this proposal and has determined that this NPRM is neither a "major" rule under Executive Order 12291, nor a "significant" rule under the Department's Regulatory Policies and Procedures. The Department believes that the economic impact of the rule would be so minimal that further regulatory evaluation is unnecessary. The Department has also considered the impact of this proposed rule under the Regulatory Flexibility Act. The Department certifies that this rule would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This notice does not contain a collection of information requirement for purposes of the Paperwork Reduction Act of 1980.

Federalism

This action has been reviewed under Executive Order 12612, "Federalism," and the Department has determined that this action does not have implications for principles of federalism that warrant the preparation of a federalism assessment. This rule would not limit the policymaking and administrative discretion of the states, nor would it affect the states' abilities to discharge traditional state governmental functions or otherwise affect any aspect of state sovereignty.

List of Subjects in 49 CFR Part 9

Administrative practice and procedure, Courts, and Government employees.

In consideration of the foregoing, the Department of Transportation proposes to revise part 9 of its Regulations (49 CFR part 9) as follows:

PART 9—TESTIMONY OF EMPLOYEES OF THE DEPARTMENT AND PRODUCTION OF RECORDS IN LEGAL PROCEEDINGS

Sec.

9.1 Purpose.
9.2 Applicability.
9.3 Definitions.
9.5 General prohibition of production or disclosure in legal proceedings.
9.7 Testimony by employees before the Department or in legal proceedings in which the United States is a party.

Sec.
9.9 Legal proceedings between private litigants: general rules.
9.11 Legal proceedings between private litigants: demands.
9.13 Legal proceedings between private litigants: procedures to request records.
9.15 Legal proceedings between private litigants: procedures to request testimony.
9.17 Legal proceedings between private litigants: procedures for taking testimony.
9.19 Fees and costs.
9.21 Acceptance of service on behalf of Secretary.

Authority: 5 U.S.C. § 301; 45 U.S.C. §§ 41–42; 49 U.S.C. § 322; 49 U.S.C. § 504(f); 23 U.S.C. § 409; 31 U.S.C. § 9701.

§ 9.1 Purpose.

(a) This part sets forth procedures governing the testimony of an employee in legal proceedings in which the United States is a party. It also sets forth procedures to be followed when an employee is issued a subpoena, order or other demand (collectively referred to in this part as a "demand") by a court or other competent authority, or is requested by a private litigant, to provide testimony or produce records concerning information acquired in the course of performing official duties or because of the employee's official status. It also prescribes the policies and procedures of the Department with respect to the acceptance of service of legal process and pleadings in legal proceedings involving the Department.

(b) The purposes of this part are to:

(1) Conserve the time of employees for conducting official business;

(2) Minimize the possibility of involving the Department in controversial issues not related to its mission;

(3) Maintain the impartiality of the Department among private litigants; and

(4) Avoid spending the time and money of the United States for private purposes.

(c) Agency counsel, in his or her discretion, may permit an exception from any requirement in this part. The exception may be granted only when the deviation will not interfere with matters of operational or military necessity, and when agency counsel determines that:

(1) It is necessary to prevent a miscarriage of justice;

(2) The Department has an interest in the decision that may be rendered in the legal proceeding; or

(3) The exception is in the best interest of the Department or the United States.

For Office of Inspector General employees and documents, the Inspector General, in conjunction with the General Counsel of the Department, may permit an exception from any requirement of this part if he or she determines, based on the Inspector General Act of 1978, as amended, that application of the requirement would be inappropriate.

§ 9.2 Applicability.

This part applies to the testimony of an employee in legal proceedings in which the United States is a party. It also applies in legal proceedings between private litigants to requests or demands for testimony or recordings concerning information acquired in the course of an employee performing official duties or because of the employee's official status. This part does not apply to any legal proceeding in which an employee is to testify as to facts or events that are in no way related to the employee's official duties or the functions of the Department. Nor does it apply to Congressional demands for testimony or documents.

§ 9.3 Definitions.

For purposes of this part:

Department means the Department of Transportation (DOT), including the Office of the Secretary (which encompasses the Office of the Inspector General) and the following operating administrations while they are part of DOT:

(1) The U.S. Coast Guard.
(2) The Federal Aviation Administration.
(3) The Federal Highway Administration.
(4) The Federal Railroad Administration.
(5) The Urban Mass Transportation Administration.
(6) The St. Lawrence Seaway Development Corporation.
(7) The National Highway Traffic Safety Administration.
(8) The Maritime Administration.
(9) The Research and Special Programs Administration.
(10) Any DOT operating administration established after the effective date of this part.

Legal proceeding means any case or controversy pending before any federal, state, or local court (including grand jury proceedings), any administrative proceeding pending before any federal, state, or local agency, or any legislative proceeding pending before any state or local agency.

Legal proceeding between private litigants means any legal proceeding in which neither the Department of Transportation nor the United States (including any federal agency or officer of the United States in his or her official capacity) is party.

Employee of the Department or "Employee" means any current of former officer or employee of the Department; an active duty, retired, or former officer or enlisted member of the Coast Guard; or an individual who works, or has worked, for the Department under a contract.

Agency counsel means the General Counsel of the Department or the Chief Counsel of any operating administration of the Department concerned, any person to whom the General Counsel or Chief Counsel has delegated his or her authority, or any person who is authorized to represent the Department in a specific legal proceeding.

Testimony means any written or oral statement by a witness, including depositions, answers to interrogatories, affidavits, declarations, and statements at a hearing or trial.

§ 9.5 General prohibition of production or disclosure in legal proceedings.

No employee of the Department may provide testimony or produce any material contained in the files of the Department, or disclose any information relating to, or based upon, material contained in the files of the Department, or disclose any information or produce any material acquired as part of the performance of that employee's official duties or because of that employee's official status unless authorized in accordance with this part, or by other applicable law.

§ 9.7 Testimony by employees before the Department or in legal proceedings in which the United States is a party.

In any legal proceeding before the Department or in which the United States (including any federal agency or officer of the United States) is a party:

(a) Agency counsel shall arrange for an employee to testify as a witness for the United States whenever the attorney representing the United States requests it.

(b) An employee may testify for the United States both as to facts within the employee's personal knowledge and as an expert or opinion witness. Except as provided in paragraph (c) of this section, an employee may not testify as an expert or opinion witness, with regard to any matter arising out of the employee's official duties or the functions of the Department, for any party other than the United States in any legal proceeding in which the United States is a party. An employee who receives a demand to testify on behalf of a party other than the United States may testify as to facts within the employee's personal knowledge, provided that the testimony be subject to the prior approval of agency counsel and to the Federal Rules of Civil Procedure and any applicable claims of privilege.

(c) An employee must testify as an expert or opinion witness on behalf of an officer or enlisted member of the Coast Guard in any legal proceeding conducted by the Coast Guard.

§ 9.9 Legal proceedings between private litigants: general rules.

In legal proceedings between private litigants:

(a) The proper method for obtaining testimony or records from an employee is to submit a request to agency counsel as provided in §§ 9.13 and 9.15 of this part, not to serve a demand on the employee. Whenever, in a legal proceeding between private litigants, an employee is served with a demand, or receives a request, to testify in his or her official capacity or produce records, the employee shall immediately notify agency counsel.

(b) If authorized to testify pursuant to these rules, an employee may testify only as to facts within his or her personal knowledge with regard to matters arising out of his or her official duties.

(1) When the proceeding arises from an accident, an employee may testify only as to personally known facts, not reasonably available from other sources, observed by the employee or uncovered during the employee's investigation of the accident. The employee shall decline to testify regarding facts beyond the scope of his or her official duties.

(2) The employee shall not testify to facts that are contained in a report, of any part of a report, unless the employee has obtained permission from agency counsel to disclose the information.

(3) The employee shall not disclose confidential or privileged information unless the employee has obtained permission from agency counsel to disclose the information.

(4) The employee shall not testify as to facts when agency counsel determines that the testimony would not be in the best interest of the Department or the United States if disclosed.

(c) An employee shall not testify as an expert or opinion witness with regard to any matter arising out of the employee's official duties or the functions of the Department. An employee who is asked questions that call for expert or opinion testimony shall decline to answer on the grounds that it is forbidden by this part. Agency counsel shall advise the employee on how to proceed if the presiding officer directs the employee to provide expert or opinion testimony.

(d) An employee shall not provide testimony at a trial or hearing. An employee's testimony shall be limited to a single deposition, affidavit, or set of interrogatories, concerning the circumstances (*e.g.*, an accident) from which the proceeding arose. Where multiple legal proceedings concerning those circumstances are pending, or can occur, it shall be the duty of the private litigant seeking the testimony to ascertain, to the extent feasible, the identities of all parties, or potential parties, to those proceedings and notify them that a deposition has been granted and that they have the opportunity to participate. The private litigant shall submit an affidavit or certification describing the extent of the search for parties and potential parties and listing the names of the parties and potential parties notified.

(e) Where an employee has already provided testimony, any party wishing to obtain further testimony from that employee concerning the same matter or occurrence, whether in the same or a different private legal proceeding, may submit a request to agency counsel to waive the restrictions of paragraph (c) of this section. The request shall, in addition to meeting the requirements of § 9.15 of this part, state why the requester should be permitted to gather additional information despite not having previously requested the information when it had an opportunity to do so, and why the additional testimony is now required and the prior testimony or previously supplied documents are insufficient.

§ 9.11 Legal proceedings between private litigants: demands.

(a) If an employee receives a demand that has not been validly issued or served, agency counsel may instruct the employee not to comply with the demand.

(b) If an employee receives a demand (validly issued and served) to testify or produce records, agency counsel, in his or her discretion, may grant the employee permission to testify or produce records only if the purposes of this part are met or agency counsel determines that an exception is appropriate.

(c) If a demand is issued to an employee, agency counsel shall contact the requester of the demand, inform him or her of the requirements of this part, and may, in his or her discretion, ask that the demand be withdrawn.

(d) If the requester of the demand refuses to have it withdrawn or fails to comply with this part, the Department may seek to quash the demand.

(e) If the court or other competent authority declines to grant the Department's motion to quash, agency counsel shall instruct the employee whether to testify or produce documents pursuant to the demand. Agency counsel may permit the testimony under § 9.1(c) of this part. If response to a demand is required before the court or other competent authority rules on the motion to quash and the court fails to stay the demand, the employee must appear at the stated time and place, produce a copy of this part, and respectfully refuse to provide any testimony or produce any documents. Agency counsel shall take steps to arrange for legal representation for the employee. Agency counsel shall advise the employee how to respond, including not to testify, if the court or other competent authority rules that the demand must be complied with irrespective of these regulations.

§ 9.13 Legal proceedings between private litigants: procedures to request records.

In legal proceeding between private litigants, a party who wishes to obtain records from the Department shall submit to agency counsel a request for the records. The request will ordinarily be handled in accordance with the Department's procedures concerning requests for records found at 49 CFR part 7. If the party does not follow the procedures specified in that part, the request must be accompanied by a statement setting forth the relevance of the records to the proceeding. The request should be resolved before any request for testimony under § 9.15 is submitted. Where a request for testimony includes a request for additional records, it shall indicate precisely how this new request differs in scope from any previous request in order to avoid agency duplication of effort. Agency counsel shall notify the requester of the approval or denial of the request.

§ 9.15 Legal proceedings between private litigants: procedures to request testimony.

(a) Any party seeking the testimony of an employee in a legal proceeding between private litigants, concerning facts within the employee's personal knowledge with regard to matters arising out of the employee's official duties, shall, rather than serving a demand for the testimony, request the testimony at least 30 days before it is intended to be taken or received. The request must be submitted to agency counsel and must include:

(1) the title of the case, docket number, and the court, or otherwise clearly identify the legal proceeding involved;

(2) a statement setting forth the basic facts in the proceeding, such as the type, date, and location of an accident;

(3) a summary of the unresolved issues applicable to the testimony sought;

(4) a summary of the testimony sought and its relevance to the proceeding;

(5) a certification with support, that the information desired is not reasonably available from other sources, including Departmental documents;

(6) pursuant to § 9.9(d) of this part, an affidavit or certification describing the extent of a search of parties and potential parties and listing the names of the parties and potential parties notified; and

(7) a declaration that the party will not seek expert or opinion testimony from the witness or seek the testimony of the witness at a hearing or trial in the proceeding.

The request shall specify which form of testimony (deposition, affidavit, declaration, or answers to interrogatories) is desired and the date by which it is desired; only one form, the one least burdensome to the Department that will provide the needed information, is permitted for each witness.

(b) The party seeking the testimony shall include with its request for testimony a copy of any prior request(s) made by the same requester to the Department or other agency of the United States for records pertaining to the matter being litigated and of the response (not including the records themselves) to the request(s). The party seeking the testimony shall also comply with any agency counsel request that copies of the records previously disclosed by the Department, or a list of those records, be furnished.

(c) Agency counsel shall notify the requester of the approval or denial of the request. Agency counsel may attach special conditions to its approval.

§ 9.17 Legal proceedings between private litigants: procedures for taking testimony.

(a) Testimony of an employee of the Department may be taken only at the office to which the employee is assigned, or any other place designated by agency counsel, under any additional conditions, if any, specified under § 9.15(c) of this part, and at a time arranged with the employee reasonably fixed to avoid substantial interference with the performance of the employee's or agency counsel's official duties.

(b) Upon completion of the testimony of an employee of the Department, a copy of the transcript of the testimony shall be furnished, at the expense of the party requesting the testimony, to agency counsel for the Department's files.

§ 9.19 Fees and costs.

(a) A private litigant obtaining records from the Department shall be charged according to the fee schedule specified at 49 CFR part 7.

(b) Agency counsel may charge additional fees, not to exceed actual costs, to private litigants seeking testimony by request or demand. The fees, which are to be calculated to fully reimburse the Department for processing the request or the demand and providing the witness, may include, among others:

(1) Costs of the time spent by employees, including attorneys, of the Department to process and respond to the request or demand;

(2) Costs of attendance of the employee and agency counsel at any deposition, hearing or trial.

(3) Costs of materials and equipment used to search for, process, and make available information.

All costs for employee time shall be calculated on the hourly pay of the employee (including all pay, allowances and benefits), and shall include the hourly fee for each hour, or portion of each hour, when the employee is in travel, in attendance at a deposition, hearing, or trial, or is processing or responding to a request or demand.

(c) At the discretion of agency counsel, costs may be estimated and collected before testimony is given.

§ 9.21 Acceptance of service on behalf of Secretary.

In any legal proceeding, at the option of the server, process or pleadings may be served on agency counsel, with the same effect as if served upon the Secretary or the head of the operating administration concerned, as the case may be. The official accepting service under this section shall acknowledge the service and take appropriate action. This section does not in any way abrogate or modify the requirements of Rule 4(d)(4) and 4(d)(5) of the Federal Rules of Civil Procedure regarding service of summons and complaint.

Issued in Washington, DC, on March 10, 1992.

Andrew H. Card, Jr.,

Secretary of Transportation.

Notices

Federal Register
Vol. 57, No. 52
Tuesday, March 17, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Collaborative Research Grants Program; Egypt

AGENCY: Office of International Cooperation and Development (OICD).

ACTION: Solicitation of proposals.

ACTIVITY: The Research and Scientific Exchanges Division (RSED) of OICD is administering a Collaborative Research Grants Program which is managed by the Egyptian National Agriculture Research Project (NARP). The research program is funded under a USDA agreement with United States Agency for International Development (USAID) in Cairo, which oversees the entire project.

AUTHORITY: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291).

OICD announces the availability of funds in fiscal year 1992 (FY1992) to conduct collaborative research of mutual interest to the U.S. and Egypt in the following areas: agro-management techniques related to newly reclaimed lands (irrigation, chemigation and fertigation); animal health (diagnostic reagencies, virus genetic resistance, and cell-mediated immunity); animal production (immunogenetics, modeling, biotechnology (transgenics), and cell physiology); aquaculture; computer expert systems in agro-management; export-oriented agro-systems (modification of existing horticultural crops to improve their postharvest characteristics; product value (quality, maturity and size) and losses (deterioration); and market expansion); food consumption patterns (ensuring safety and stability of consumer foods; optimal health through improved nutrition); genetic engineering (disease and stress tolerance; improvement of quality traits); and remote sensing (ground water exploration in Egyptian Deserts; assessment and monitoring of desertification processes).

Collaborative research is defined as research which involves active collaboration between Egyptian and American scientists. The research proposal should be prepared jointly by all investigators involved and should describe the areas of anticipated cooperation.

This is a formal request for application. Proposals should address a single specific research issue but may be multi-disciplinary in approach and may involve more than one institution. Problem-oriented research will be undertaken including basic and appropriate research programs, the results of which have potential application in Egypt and the United States.

Proposals must be received at the below-noted address not later than 15 April 1992. Please contact the undersigned for a complete package of information concerning these potential agreements, as follows: USDA/OICD/Admin Services, 0324 South Bldg., Washington DC 20250-4300, Facsimile 202/690-1628.

Dated: March 12, 1992.

Nancy J. Croft,

Contracting Officer.

BILLING CODE 3410-DP-M

Animal and Plant Health Inspection Service

[Docket No. 92-018]

Availability of Environmental Assessments and Findings of No Significant Impact Relative to Issuance of Permits to Field Test Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that seven environmental assessments and findings of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The assessments provide a basis for the conclusion that the field testing of these genetically engineered organisms will not present a risk of the introduction or dissemination of a plant pest and will not have a significant impact on the quality of the human environment. Based on these findings of no significant impact, the Animal and Plant Health Inspection Service has determined that environmental impact statements need not be prepared.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD, 20782, (301) 436-7612. For copies of the environmental assessments and findings of no significant impact, write Mr. Clayton Givens at this same address. The documents should be requested under the permit numbers listed below.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article can be introduced into the United States. The regulations set forth procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

In the course of reviewing the permit applications, APHIS assessed the impact on the environment of releasing the organisms under the conditions described in the permit applications. We concluded that the issuance of the permits listed below will not present a

risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment.

The environmental assessments and findings of no significant impact, which are based on data submitted by the applicants as well as a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the environmental impacts associated with conducting the field tests.

Seven environmental assessments and findings of no significant impact have been prepared by APHIS relative to the issuance of the following permits to allow the field testing of genetically engineered organizations:

Permit No.	Permittee	Date issued	Organism	Field test location
91-317-01, renewal of permit 90-332-02, issued on 03-12-91.	DeKalb Plant Genetics	01-22-92	Corn plants genetically engineered to express a phosphinothricin acetyl transferase gene, which confers tolerance to glufosinate and bialaphos herbicides.	Kihei, Hawaii.
91-301-01	Frito-Lay, Incorporated	02-03-92	Potato plants genetically engineered to express metabolic enzymes in order to increase levels of dry matter in potato tubers.	Oneida County, Wisconsin.
91-295-01	Holden's Foundation Seeds, Incorporated.	02-04-92	Corn plants genetically engineered to express the phosphinothricin-N-trasfease (PAT) gene to confer tolerance to the herbicide glufosinate.	Molaki, Hawaii.
91-322-01	North Carolina State University	02-04-92	Tobacco plants genetically engineered to express a coat protein of a highly aphidtransmissible strain of tobacco eich virus (TEV).	Wake County, North Carolina.
91-326-01	Monsanto Agricultural Company	02-07-92	Tomato plants genetically engineered to express a coat protein of tomato yellow leaf curl virus (TYLCV) for resistance to TYLCV.	Lee County, Florida.
91-346-02	Pioneer Hi-Bred International, Incorporated.	02-07-92	Soybean plants engineered to express methio-nine-and cysteine-rich seed storage proteins from Brazil nut.	Salinas, Puerto, Rico.
91-302-01	Frito-Lay, Incorporated	02-14-92	Potato plants genetically engineered to express metabolic enzymes in order to inhibit accumulation of simple sugars in potato tubers.	Oneida County, Wisconsin.

The environmental assessments and findings of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1509), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381–50384, August 28, 1979, and 44 FR 51272–51274, August 31, 1979).

Done in Washington, DC, this 12th day of March 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-6187 Filed 3-16-92; 8:45am]

BILLING CODE 3410-34-M

[Docket No. 92-037]

Receipt of Permit Applications for Release into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that six applications for permits to release genetically engineered organisms into the environment are being reviewed by the Animal and Plant Health Inspection Service. The applications have been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the applications referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain a copy of these documents by writing to the person listed under **FOR FURTHER INFORMATION CONTACT.**

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 850, Federal building, 6505 Belcrest road, Hyattsville, MD 20782, (301) 436–7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which are Plant Pests or Which There is Reason to Believe Are Plant Pests," require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following applications for permits to release genetically engineered organisms into the environment:

Application	Applicant	Date received	Organism	Field test location
92-049-01	Monsato Agricultural Company	02-15-92	Tomato plants genetically engineered to express a heterologous aminocyclopropene-1-carbonylic acid (ACC) degradation gene, to delay ripening.	Yolo County, California; Jersey County, Illinois.
92-049-02	InterMountain Canola Company	02-18-92	Rapeseed plants genetically engineered to express tolerance to the herbicide glyphosate.	Fremont County, Idaho.
92-049-03	Petoseed Company, Incorporated	02-18-92	Tomato plants genetically engineered to express anti-sense gene constructs of polygalacturonase (PG), pectinesterase (PE), and ethylene forming enzymes, to modify ripening.	Yolo County, California.
92-049-04	DeKalb Plant Genetics	02-18-92	Corn plants genetically engineered to express a bacterial marker gene for hygromycin resistance, a betaglucuronidase (GUS) gene, and a methion-inerich storage protein gene.	DeKalb County, Illinois.
92-049-05	Upjohn Company	02-18-92	Corn plants genetically engineered to express a phosphinothricin acetyltransferase (PAT) gene for tolerance to the herbicide glufosinate.	Kalamazoo County, Michigan; Isabela, Puerto Rico.
92-052-01	University of Arizona	02-21-92	Tobacco plants genetically engineered to express a coat protein gene of the beet curly top virus (BCTV) for resistance to BCTV.	Pima County, Arizona.

Done in Washington, DC, this 12th day of March 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

Forest Service

Little Snowies Vegetative Management, Lewis and Clark National Forest, Fergus and Golden Valley Counties, MT

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an Environmental Impact Statement (EIS) to analyze and disclose the environmental impacts of implementing fire and timber management practices in the Little Snowy Mountains. The fire management practices include reducing fuel load to 12–15 tons/acre by chipping, piling, and burning on 245 acres, constructing five firebreaks totaling 13.4 miles, and using prescribed fire to reduce natural fuels and improve wildlife habitat on 1,540 acres. In conjunction with these projects, timber management practices on 545 acres will be implemented. These practices include: (1) Harvesting sawlogs, (2) commercially thinning younger trees, (3) firewood gathering, (4) site preparation/slash disposal, and (5) planting.

Road construction and reconstruction would be required to implement the timber management practices. Additional public access into the Little Snowies may be needed.

The underlying concept of implementing fire and timber management practices in the Little Snowies is to create a condition more in accord with the natural state and reduce the potential for stand replacement fires. While current fuels conditions in the Little Snowies have developed over the past 100 years and it will take nearly as long to return to a more natural state, the above mentioned practices will be implemented over the next decade (FYs 1992–2002).

DATES: Comments concerning the scope of the analysis should be received in writing within one month of the publication date of this notice in the **Federal Register** in order to receive timely consideration in the preparation of the Draft Environmental Impact Statement (DEIS).

ADDRESSES: Send written comments to William Fortune, District Ranger, Musselshell Ranger District, 809 2 NW., Box F, Harlowton, MT 59036.

FOR FURTHER INFORMATION CONTACT: Dave Wanderaas, Little Snowy Interdisciplinary Team Leader, Musselshell Ranger District, (406) 632–4391.

SUPPLEMENTARY INFORMATION: The Little Snowies project area is located approximately 25 miles southeast of Lewistown, Montana in Fergus and Golden Valley Counties. The project area of approximately 16,000 acres includes all land in the Little Snowy Mountains. About 13,350 acres of the project area are National Forest System lands and approximately 2,670 acres are private land. The project area is the head waters for Cameron Creek, North Fork of Pole Creek, Willow Creek, and the South Fork of Flatwillow Creek. Elevations range from about 4,600 feet at the eastern boundary to 6,200 feet at the western boundary.

Fire and timber management practices are addressed together because the timing and geographic location represent a similar action under 40 CFR 1508.25(a)(3). Public access and road construction/reconstruction represent connected actions under 1508.25(a)(1)(iii). The scope of the proposed action is site-specific with timber and fire management practices identified on a stand or unit basis and roads and public access on a corridor basis. Appropriate mitigation measures are designed to respond to the identified issues and anticipated effects.

This EIS will tier to the Lewis and Clark National Forest Land and Resource Management Plan of June, 1986, which provides goals and objectives. Forest-wide management standards and management area prescriptions are identified in the Plan to provide overall guidance and management practices in achieving these goals and objectives. The proposed actions of fire management, timber management, road construction/reconstruction, and public access are designed to help move from the existing condition of the Little Snowies to a more ecologically natural state, that in the past was maintained by light ground fires. This move will be accomplished by the primary purpose and need for the proposed action to: (1) Create a mosaic of vegetative successional stages that will maintain the ponderosa pine forest type, (2) reduce the potential for a stand replacement fire that will remove a large percentage of the tree canopy lessening the diversity in the area, and (3) provide

a completed landscape from early successional stages to old growth forest.

No public meetings will be held prior to the issuance of the DEIS. However, a letter indicating the proposed action and a map of the project area will be sent to interested publics for comment. Two public meetings will be held during the formal review period of the DEIS (September 1992). However, the public is invited to visit with Forest Service officials at any time during the EIS preparation prior to the issuance of the Record of Decision.

The Forest Service is seeking information and comments from Federal, State, and local agencies and individuals and organizations who may be interested in or affected by the proposed actions. The agency invites written comments and suggestions on the issues and management opportunities in the area being analyzed. This information will be used in preparing the DEIS. This process includes:

1. Identification of potential issues related to the proposed action.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Identification of alternatives to the proposed action.
5. Identification of potential environmental effects of the alternatives.
6. Determination of potential cooperating agencies and task assignments.

The analysis will consider a range of alternatives. One of these will be the "No-Action" alternative, in which all fire and timber management practices are deferred. Other alternatives will examine various levels and locations of treatment and fire management to return the Little Snowies to a more ecologically natural state.

The analysis will disclose the environmental effects of alternative ways of implementing management direction outlined in the Forest Plan and in addressing the identified issues. The Forest Service will analyze and document the direct, indirect, and cumulative environmental effects of the alternatives. In addition, the EIS will disclose site-specific mitigation measures and the effectiveness of each proposed mitigation measure.

Preliminary scoping has been done for this project by the interdisciplinary team from the Lewis and Clark National Forest and six major issues have been identified.

Fire (Issue 1)

(a) What fire and vegetative management practices should be initiated to reduce the potential for a stand replacement fire of large size and high energy release?

(b) How can fire and vegetative management practices be integrated to creat a mosaic of Forest age classes?

(c) What are the effects of fire management practices on the landscape?

Timber (Issue 2)

What treatments, if any, are needed to maintain forest health and fiber production?

Biodiversity (Issue 3)

In this fire dependent ponderosa pine ecosystem, what measure should be taken to maintain and/or restore biological diversity?

Wildlife (Issue 4)

(a) What opportunities are available to improve habitat for whitetail deer, wild turkeys, old growth dependent species, snag dependent species, and other wildlife?

(b) What are the effects of the proposed actions on whitetail deer, wild turkeys, old growth dependent species, snag dependent species, and other wildlife?

Access (Issue 5)

(a) What additional transportation types and routes, if any, are needed to provide adequate public access to the Little Snowies?

(b) What Travel Plan measureg, if any, are needed to manage the existing and planned transportation systems in order to reduce their effects on wildlife?

Recreation (Issue 6)

What are the effects of improved access and Travel Plan management on recreation activities and opportunities?

The DEIS will be filed with the Environmental Protection Agency (EPA) and a notice of availability of the DEIS published in the **Federal Register**. It is estimated that the DEIS will be available for public review in September 1992.

The comment period on the DEIS will be for 45 days from the date of publication in the **Federal Register**.

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of DEISs must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the DEIS stage but that are not raised until after completion of the final environmental impact statement (FEIS) may be waived or dismissed by the courts. *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when they can be meaningfully considered and responded to in the FEIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the DEIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the DEIS. Comments may also address the adequacy of the DEIS or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

After a 45-day public comment period, this comments received will be analyzed and considered by the Forest Service in preparing the FEIS. The FEIS is scheduled to be completed by January, 1993. The Forest Service will respond in the FEIS to the comments received on the DEIS. John D. Gorman, Forest Supervisor for the Lewis and Clark National Forest, the responsible official for this EIS, will make a decision regarding this proposal after considering the comments, responses, and environmental consequences discussed in the FEIS as well as applicable laws, regulations, and policies. The decision and reasons for the decision will be documented in a Record of Decision.

The Forest Supervisor's address is: 1101 15th St. N., Box 869, Great Falls, MT 59403.

Dated: March 6, 1992.

John D. Gorman,

Forest Supervisor, Lewis and Clark National Forest.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Changes in Organization and Functions During Calendar Year 1991

AGENCY: Office of the Secretary, Department of Commerce.

SUMMARY: Following is a summary of Department of Commerce officials and units affected by major changes in authority, title, function, or structure during the past calendar year. Specific information on each action can be obtained by requesting a copy of the applicable Department Organization Order (DOO), also listed below.

Department Officials

Mission and Organization of the Department of Commerce:

DOO 1-1, Amendment 26, 3-22-91
DOO 1-1, Amendment 27, 8-27-91

Under Secretary for International Trade:

DOO 10-3, Revision, 1-22-91

Assistant Secretary for Economic Development:

DOO 10-4, Amendment 4, 1-22-91

Assistant Secretary for Administration:

DOO 10-5, Amendment 2, 1-18-91
DOO 10-5, Amendment 3, 3-22-91
DOO 10-5, Amendment 4, 4-19-91
DOO 10-5, Amendment 5, 8-27-91

Under Secretary for Economic Affairs:

DOO 10-9, Amendment 1, 5-6-91
DOO 10-9, Amendment 2, 7-1-91

Assistant Secretary and Commissioner of Patents and Trademarks:

DOO 10-14, Revision, 9-26-91

Under Secretary for Oceans and Atmosphere and Administrator of the National Oceanic and Atmospheric Administration:

DOO 10-15, Revision, 9-26-91

Under Secretary for Export Administration:

DOO 10-16, Amendment 1, 2-15-91

Chief of Staff and Assistant Secretary:

DOO 15-20, Revision, 3-22-91

Office of Federal Property Programs:

DOO 20-1, Revision, 5-20-91

Office of Civil Rights:

DOO 20-10, Revision, 1-18-91

Certain Brass Sheet and Strip From Italy; Final Results of Antidumping Duty Administrative Reviews

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative reviews.

SUMMARY: On November 7, 1991, the Department of Commerce (the Department) published the preliminary results of two administrative reviews of the antidumping duty order on brass sheet and strip from Italy. The reviews cover one manufacturer/exporter for the periods August 22, 1986 through February 29, 1988 and March 1, 1989 through February 28, 1990.

We gave interested parties the opportunity to comment on the preliminary results of these administrative reviews. Based upon our analysis of the comments received, the Department has changed the final results from those presented in the preliminary results of these reviews.

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: James Rice or Linda Pasden, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th St. and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377-3793.

SUPPLEMENTARY INFORMATION:

Background

On November 7, 1991, the Department published in the **Federal Register** (56 FR 56974) the preliminary results of two administrative reviews of the antidumping duty order on brass sheet and strip from Italy. The Department has now completed these administrative reviews in accordance with section 751 of the Tariff Act of 1930 (the Act).

Scope of the Review

Imports covered by these reviews are shipments of brass sheet and strip, other than leaded brass and tin brass sheet and strip, from Italy. The chemical composition of the products under review is currently defined in the Copper Development Association (C.D.A) 200 series or the Unified Numbering System (U.N.S.) C20000 series. Products whose chemical composition are defined by other C.D.A. or U.N.S. series are not covered by these reviews. The physical dimensions of the products covered by these reviews are brass sheet and strip of solid rectangular cross section, over 0.006 inch (0.15 millimeter) but not over 0.188 inch (4.8 millimeters) in finished thickness or guage, regardless of width, whether coiled, wound on reels (traverse wound), or cut-to-length. Prior to January 1, 1989, this merchandise was classifiable in the Tariff Schedules of the United States Annotated (TSUSA) under item numbers 612.3960, 612.3982, and 612.3986. Since January 1, 1989, the merchandise has been classifiable under Harmonized Tariff System (HTS) item numbers 7409.21.00.50, 7409.21.00.75, 7409.21.00.90, 7409.29.00.50, 7409.29.00.75, and 7409.29.00.90. The HTS and TSUSA item numbers are provided for convenience and customs purposes only. The written product description remains dispositive. The reviews cover one manufacturer/

exporter, Europe Metalli LMI, S.p.A. (LMI).

Analysis of Comments Received

The Department gave interested parties an opportunity to comment on the preliminary results. At the request of respondent, a hearing was held on December 20, 1991. We received case and rebuttal briefs from both LMI and petitioners, Hussey Copper Ltd., *et al.* The following comments apply equally to both reviews.

Comments by LMI

Comment 1: LMI asserts that the Department is not justified in rejecting its raw material cost information and resorting to best information available (BIA) in the calculation of constructed value (CV). LMI claims that the Department's use of BIA is not in compliance with the dumping law. Section 776(c) of the Act permits the Department to use "best information available" whenever a party "refuses or is unable to produce information requested in a timely manner and in the form required." LMI contends that neither of these circumstances apply in this case. The Court of Appeals for the Federal Circuit has held that the Department's authority under section 776(c) is limited, and that the Department may not apply BIA where a respondent's inability to provide information is due, as LMI alleges is the case here, to the fact that the information does not exist (*Olympic Adhesives, Inc.* versus *United States*, 899 F.2d. 1565 (Fed. Cir. 1990)). In the antidumping review underlying *Olympic Adhesives*, the Department resorted to BIA because the respondent failed to provide certain information, despite the fact that the respondent had previously informed the Department that such information did not exist.

LMI also contends that the Department's rejection of LMI's reported costs is at odds with agency practice of accepting costs as they have been recorded in a respondent's books in accordance with the generally accepted accounting principles (GAAP) of the respondent's home country (Kaplan, Kamarck & Parker Cost Analysis Under the Antidumping Law, 21 Geo. Wash. J. Int'l L. & Econ. 357, 373 (1988)).

Department's Position: In both reviews the Department requested monthly raw material cost information because brass manufacturers constantly adjust their prices to account for fluctuating metal costs. Copper and zinc represent the largest variable in the pricing of brass sheet and strip. LMI did not comply with the Department's request, and instead provided annual raw material costs which did not reflect the fluctuating raw material costs.

The Department disagrees with LMI that it cannot provide actual monthly costs because, as LMI stated in its March 28, 1991 submission, LMI pays its many suppliers more than once in a given month. LMI should have been able to calculate monthly costs. As a result, LMI's contention that the facts in this case are similar to those in Olympic Adhesives is without merit because the information does exist in LMI's records.

Moreover, the Department disagrees with LMI's contention that the Department is at odds with agency practice of accepting cost information as it is recorded in a respondent's books in accordance with the GAAP of the respondent's home country (Kaplan, Kamarck & Parker, 357, 373). The Department determined in this review that the GAAP approach was inconsistent with the Department's needs for specific per unit costs, since GAAP was developed primarily as a conceptual framework to reflect profitability of a company and not per unit costs (Kaplan, Kamarck & Parker, 374). For these reviews, the Department looked beyond GAAP to evaluate LMI's specific per unit raw material costs. In doing so, the Department was fully justified in requesting LMI to provide specific monthly costs even though it does not maintain these costs in the company's books on a monthly basis. Since LMI did not provide the data as requested, the Department used the best information available in accordance with section 776(c) of the Act (see comment 3).

Comment 2: LMI states that the Department had no basis to make an adjustment to account for a loss or yield rate incurred in the manufacturing process. LMI contends that it incurred no loss of material in its manufacturing process, claiming it recovers 100 percent of the scrap produced during the fabrication of brass. LMI states that this scrap material is reintroduced in its entirety into the production process and therefore no "loss in value" results from material that becomes recoverable scrap.

Department's Position: Because LMI did not substantiate its claim that it recovers 100 percent of the scrap generated in the production process, and because the Department considers it likely that not all scrap is recoverable, the BIA calculation used by the Department in constructing LMI's raw material costs includes a reasonable yield loss rate. This yield loss rate was derived from proprietary data submitted by petitioners as representative of U.S. industry experience.

Comment 3: LMI contends that the Department's methodology of constructing value substantially overstates LMI's actual metal costs because the Department based its constructed value on "A" grade cathode copper, as quoted in the London Metal Exchange (LME). LMI states that it purchases various quantities of scrap material and lower cost copper ingots in addition to virgin material.

Department's Position: In LMI's February 18, 1991 supplemental questionnaire response, LMI cited monthly average LME prices for grade "A" cathode copper as the source of its revised average monthly raw material costs. No other information was provided. Therefore, the Department's use of these market prices is consistent with LMI's calculation.

Comment 4: LMI contends that the Department may not resort to constructed value without determining whether there have been below-cost sales in substantial quantities over an extended period of time. LMI claims that even if the Department decides to use average monthly LME prices as the basis for material costs, it cannot simply bypass the cost of production analysis before resorting to CV. The Department's decision to bypass the cost of production analysis is at odds with its practice in other cost cases. For example, in the final determination in Electrical Conductor Aluminum Redraw Rod from Venezuela (final determination of sales at less than fair value), 53 FR 24755 (June 30, 1988), the Department made numerous adjustments to a respondent's reported costs, including an adjustment to the price of aluminum, before performing a cost test. In Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From the Federal Republic of Germany, 56 FR 31733–31734, the Department made adjustments to various elements of respondents' reported costs, before performing a cost test.

Petitioners agree with the Department's use of CV as best information otherwise available. Petitioners state that, because the cost of metal represents such an important element of the cost of production of the subject merchandise, LMI's failure to report complete cost data would result in a severely distorted cost analysis.

Department's Position: The Department's decision to bypass the cost test and proceed to best information available (constructed value) was based on the fact that LMI's responses for both review periods were woefully inadequate. In the 1986–88 review, LMI only submitted cost information for two of the nine alloys sold in the home market (alloys 67/33 and 63/37). In the 1989–90, review, LMI reported only two out of six alloys (again, alloys 67/33 and 63/37). However, the majority of sales to the United States during the first period were of alloy 70/30. There were a few sales of 63/37 and no sales of 67/33 to the United States. In the second review, only alloy 70/30 was sold in the United States. During both periods of review, LMI sold identical or similar alloys in the home market, but LMI did not provide cost data for these alloys. The Department made repeated requests for the cost data for the unreported alloys and for the monthly raw materials costs. However, LMI did not comply.

There is no comparison to LMI's circumstances and the circumstances in Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from the Federal Republic of Germany 56 FR 31692 (July 11, 1991), and Electrical Conductor Aluminum Redraw Rod from Venezuela 53 FR 34755 (June 30, 1988). In these cases, the Department had only to make minor adjustments to the respondent's cost data before testing for below-cost sales. In this instance, however, the Department would have had to reconstruct LMI's entire cost of production response. Thus the Department determined that use of BIA was the only appropriate basis for establishing foreign market value.

Comment 5: LMI states that the Department incorrectly calculated the weighted-average margin and credit expense for both reviews.

Department's Position: The Department has made the appropriate corrections for the final results.

Comments by Petitioners

Comment 1: Petitioners allege that the Department has understated LMI's cost of materials by failing to adjust the transportaiton charge for the material loss or yield rate.

Department's Position: The Department agrees that it would be appropriate to adjust the transportation charge for material loss. However, insofar as such an adjustment would have had a *de minimis* effect on the weighted-average margin in both reviews, we have declined to make the adjustment pursuant to 19 CFR 353.59.

Comment 2: Petitioners claim that the Department should increase LMI's reported general costs by the "capitalized miscellaneous costs" and "miscellaneous income" which LMI did not include, because these costs are related to factory production costs incurred for production of "instrumental goods" for the company's activities. Petitioners contend that LMI failed to substantiate that these costs associated with its instrumental goods were not related to the subject merchandise. Furthermore, petitioners object to LMI offsetting interest expense with interest revenue because LMI again failed to tie this income to sales of brass merchandise under review.

Department's Position: There is no information on the record to indicate that "capitalized miscellaneous costs" and "miscellaneous income" are directly related to the production of brass sheet and strip. In addition, the Department generally allows interest expense to be offset by interest income, and does not require that such adjustments be directly tied to sales of the subject merchandise, therefore, the Department has not changed LMI's reported general costs for the final results.

Final Results of the Reviews

As a result of our comparison of United States price to foreign market value, we determine that the following margins exist for the two review periods:

Manufacturer/exporter	Period of review	Percent margin
Europa Metalli-LMI	06/22/86–02/29/88	9.49
Europa Metalli-LMI	03/01/89–02/28/90	4.70

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of this notice of final results of administrative review for all shipments of the subject merchandise, entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for LMI will be 4.70 percent; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all the other manufacturers or exporters who are not covered in this or prior administrative reviews and who are unrelated to the reviewed firm will be 4.70 percent. This rate represents the highest rate for any firm in the latest administrative review (whose shipments to the United States were reviewed), other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility to file a certificate regarding the reimbursement of antidumping duties pursuant to 19 CFR 353.26 prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: March 11, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

[FR Doc. 92-6197 Filed 3-16-92; 8:45 am]

BILLING CODE 3510-DS-M

[A-122-813]

Final Determination of Sales at Less Than Fair Value: Nepheline Syenite From Canada

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: John Gloninger, Office of Antidumpting Investigations, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–2778.

FINAL DETERMINATION:

Background

Since the publication of our affirmative preliminary determination on December 27, 1991 (56 FR 67061), the following events have occurred.

On December 23, 1991 respondent, Unimin Canada, Ltd. (Unimin) requested that the Department postpone the final

determination in this investigation by one week, pursuant to 19 CFR 353.20(b).

On January 6, 1992, the petitioner, The Feldspar Corporation (TFC), requested a public hearing. On January 9, 1992, respondent notified the Department that it would no longer pursue a suspension agreement in the case.

On January 9, 1992, the Department solicited comments from interested parties on the scope of the investigation. The Department received comments from respondent and petitioner on January 16 and January 17, 1992.

On January 13 through January 15, 1992, the Department conducted verification in Canada of the questionnaire responses submitted by Unimin. On January 17, 1992, the Department published a notice in the **Federal Register** (57 FR 2078) postponing the final determination in this investigation until not later than March 10, 1992.

On January 31, 1992, respondent submitted a supplemental narrative response and a revised computer tape with changes required as a result of the Department's verification. Petitioner and Pittsburgh Corning Corporation, an interested party, filed case briefs on February 14, 1992, and petitioner and respondent filed rebuttal briefs on February 19, 1992. A public hearing was held on February 26, 1992.

Scope of Investigation

After soliciting comments from interested parties, the Department has amended the scope of the investigation to the following: The product covered by this investigation is nepheline syenite (NS). For purposes of this investigation, NS is a coarse, crystalline rock consisting principally of feldspathic minerals (*i.e.*, sodium-potassium feldspars and nepheline), with little or no free quartz, and whose typical mean value passing through ASTM E–11 mesh sieve no. 40 and retained on ASTM E–11 mesh sieve no. 200 (when solely said two sieves are used) is no less than 70 percent by weight.

NS is currently classifiable under item 2529.30.0010 of the Harmonized Tariff Schedule (HTS). Although the HTS item number is provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Period of Investigation

The period of investigation (POI) is February 1, 1991, through July 31, 1991.

Such or Similar Comparisons

We have determined for purposes of the final determination that the product covered by this investigation comprises a single category of "such or similar" merchandise.

Fair Value Comparisons

To determine whether sales of NS from Canada to the United States were made at less than fair value, we compared the United States price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice. We compared U.S. sales of NS to sales of identical or similar NS in Canada.

United States Price

We based USP on purchase price, in accordance with section 772(b) of the Tariff Act of 1930, as amended (the Act), because all sales were made to unrelated parties prior to importation into the United States. Exporter's sales price methodology is not appropriate here because the subject merchandise was not introduced into the inventory of Unimin's related U.S. selling agent, this was the customary commercial channel for sales of this merchandise between Unimin and its customers, and the selling agent acted only as a processor of sales-related documentation and a communication link with the unrelated U.S. customers.

We calculated purchase price based on packed, f.o.b. plant and delivered prices. We made deductions, where appropriate, for foreign inland freight, inland freight, marine insurance, loading, U.S. brokerage and handling, and railcar leasing costs in accordance with section 772(d)(2) of the Act. In addition, we made deductions, where appropriate, for discounts, rebates, and post-sale price adjustments. In accordance with section 772(d)(1)(C) of the Act, we added to the United States price the amount of the Canadian value-added tax that was forgiven by reason of the export.

Foreign Market Value

In order to determine whether there were sufficient sales of NS in the home market to serve as a viable basis for calculating FMV, we compared the volume of home market sales of NS to the volume of third country sales of NS, in accordance with section 773(a)(1) of the Act. Unimin had a viable home market with respect to sales of NS during the POI.

We calculated FMV based on delivered and f.o.b. plant prices to unrelated customers in the home market. We made deductions, where appropriate, for rebates, inland freight, railcar leasing, loading costs and post-sale price adjustments. We deducted home market packing costs and added U.S. packing costs, in accordance with section 773(a)(1) of the Act.

Pursuant to 19 CFR 353.56 of the Department's regulations, we made circumstance of sale adjustments, where appropriate, for differences in credit expenses. We recalculated Unimin's imputed credit expense incurred on home market and U.S. sales net of discounts and rebates.

Although Unimin borrowed in both markets, the U.S. interest rate was the lowest rate. Therefore, we have used Unimin's short-term U.S. interest rate to impute credit expenses on home market sales. This use of the lowest interest rate is consistent with the Court of Appeals' decision in *LMI—La Metalli Industriale, S.p.A.* v. *United States*, 912 F.2d 455 (Fed. Cir 1990). We also made a circumstance of sale adjustment for differences in the amounts of value-added taxes.

Lastly, we made an adjustment for physical differences in merchandise, where appropriate, in accordance with 19 CFR 353.57.

Currency Conversion

We have made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we verified information provided by the respondent by using standard verification procedures, including the examination of relevant sales and financial records, and selection of original source documentation containing relevant information.

Interested Party Comments

Analysis of Comments Received

We invited interested parties to comment on the preliminary determination of this investigation. We received case briefs from petitioner and an interested party and rebuttal briefs from petitioner and respondent. As noted above, we held a public hearing on February 20, 1992.

Comment 1: Petitioner claims there are discrepancies concerning the volume and value of sales reported during the POI in various sections of Unimin's response to the Department's questionnaire. Petitioner also claims that there are discrepancies between the value of sales used to calculate indirect selling expenses and the value used to calculate the difference of merchandise adjustment (difmer). Petitioner states that Unimin reported a lower value in the indirect selling expense calculation than it reported in the difmer calculation in order to increase the amount of its indirect selling expense offset and, thus, decrease its dumping margin.

Petitioner further states that the Department's verification report finds discrepancies in all of the transactions examined during the verification process, indicating that respondent's data is generally unreliable. Petitioner states that it believes respondent did not permit proper verification of sales data because that data was not tied to respondent's financial statements.

Respondent claims that petitioner has taken out of context two sets of sales figures, which are not identical since they relate to different periods, and that the two data sets are appropriate for use in their respective calculations. Specifically, respondent argues that the reported sales figures properly include and exclude certain sales based on the Department's "date of sale" definition. It further contends that the cost of production figures used in the calculation of the difmer are based on its financial records, without regard to the date of sale considerations. Respondent claims that other supposed discrepancies claimed by petitioner are not actually discrepancies, but arise from petitioner's failure to distinguish tons shipped from tons sold.

Respondent contends that its calculation of indirect selling expenses is correct and that petitioner has improperly compared the revenue figure for home market and third country sales with a total revenue figure inclusive of sales to the U.S. market. Respondent also claims that it did permit proper verification procedures to be performed, and that representatives of the Department reviewed Unimin's Profit/Loss Statement to verify the total volume and value of sales reported.

DOC Position: We disagree with petitioner that there are discrepancies concerning the volume and value of sales reported during the POI. The volume and value of sales in Unimin's questionnaire responses were reported correctly according to the Department's date of sale methodology (*i.e.*, when the basic terms of sale were established, in particular, price and quantity). The accuracy and completeness of these figures were examined a tverification and no discrepancies were noted. The cost of production figures used in the calculation of the difmer adjustment, however, were based on Unimin's financial records, without regard to the Department's date of sale considerations. Since Unimin sells NS pursuant to long-term contracts, the volume and value of sales (according to the Department's date of sale methodology) will not match the volume and value of shipments during this same time period.

Furthermore, we agree with respondent that its calculation of indirect selling expenses is correct and that the total NS sales revenue figures used in this calculation were accurate. The difference between those revenue figures used to calculate the difmer adjustment and those used to calculate indirect selling expenses were explained on the record by respondent. The revenue figures used to calculate cost of production for the difmeer adjustment included U.S. sales revenue, and those used in the calculation of indirect selling expenses do not include U.S. sales revenue. Therefore, the figures are different. Furthermore, since we are not adjusting for commissions paid to respondent's parent company, petitioner's discussion of the indirect selling expense offset is moot.

We also disagree with petitioner's claim that there were discrepancies in all of the transactions examined during verification and that respondent's data is generally unrcliable. This is not true because as stated in the verification report, we did not find discrepancies with every sale examined at verification. The verification report only discusses those sales where a discrepancy was noted. Furthermore, a review of the Department's verification report shows that these discrepancies were not significant. Therefore, there is no reason to call into question the validity of respondent's data.

Finally, we disagree with petitioner's statement that respondent did not permit proper verification of sales data because that data was not tied to respondent's financial statements. On page five of the Department's verification report, it states that sales figures were "all verified by tracing those reported in Unimin's financial statements to internal sales records and finally to those reported in the 11/91 computer database." Furthermore, on the same page it states that the Department "began verification of volume and value by examining Unimin's financial records, in particular the Profit/Loss (P/L) statement (Verification Exhibit A–9) which shows all home market sales of all products." Exhibit A–9 contains a copy of a combined "Actual Profit Contribution" report, which is part of Unimin's larger P/L financial statement.

Comment 2: Petitioner states that Unimin has improperly allocated leased railcar costs by weight rather than by time (*i.e.*, the period of the lease). Petitioner states that rather than allocating the total lease cost over total tonnage shipped, Unimin should have allocated the total lease cost during the POI over the number of days that leased cars were in service during that period. If the Department does not use petitioner's methodology, petitioner states that the Department should use best information available, which should be the average of the freight charges for all delivered price transactions.

Respondent argues that it has reported the cost of its leased railcars in the manner in which it is both invoiced and maintains its records. It further contends that Unimin is invoiced without regard to the length of time each car is in use and without regard to actual distance travelled. Since the Department has verified the accuracy of the data disclosed by Unimin, respondent claims the Department should not resort to best information available.

DOC Position: We disagree with petitioner that Unimin has improperly allocated leased railcar costs and have accepted Unimin's reported methodology for allocating its lease costs during the POI. At verification we examined all appropriate shipping documents, as well as the relevant lease contracts. The invoices which Unimin receives from its lease companies show a total lease charge for one month. On these invoices there is no indication of how many cars were in use, how many days in the month each car was used, or how many miles a particular car traveled. Furthermore, since the lease companies only issue one invoice per month to Unimin, there is no way to tie any portion of the total monthly lease cost to a particular sale or shipment. The invoices cover all shipments of NS (both subject and non-subject merchandise) in both the U.S. and home markets. Neither the products nor the markets are segregated on invoices.

Finally, it would be unreasonable for the Department to require a respondent to manually sort through documentation of all its shipments of all its products, including shipments of non-subject merchandise in both the U.S. and Canadian markets, in order to allocate a portion of a total lease cost to a particular sale because this would be unduly burdensome. As shown in verification exhibit C–1a, the total lease cost for one month is entered into Unimin's general ledger without any indication of whether the cost was incurred in the Canadian or U.S. market. In addition to these circumstances, it is not possible for the Department to verify the actual time in transit for any particular sale. The time it takes any given shipment to arrive at its

destination does not only depend on mileage; we would also have to consider rail routings, delays, and speed. Without this information, the Department could not adequately verify time of shipments. Given these circumstances, we feel that respondent's methodology was reasonable, and thus, acceptable.

Comment 3: Petitioner claims that there is no basis for a difmer adjustment between grades 131 and 134. Also, petitioner disagrees with the use of the "net realizable value" (NRV) method for cost allocation in respondent's calculation of difmer adjustments. Specifically, petitioner states that the NRV method has been inappropriately borrowed from "constructed value" calculations for use in this difmer calculation. Petitioner also states there is no evidence that the price differential between the products is due to any difference in physical characteristics of the merchandise, a necessary condition for allowing a difmer adjustment. Petitioner states that the NRV creates a cost difference by allocating costs based on different market values of the two products. Therefore, petitioner claims that such an adjustment should not be allowed. Petitioner further states that even if there were a basis for a difmer adjustment, Unimin's data cannot be relied upon to calculate the difmer adjustment since its volume and value data is inconsistent, and since various cost figures were not tied to financial statements at verification. Also, petitioner claims that Unimin has misapplied the NRV by not excluding costs associated with what it views as common stages of production.

Respondent claims that it properly calculated the difmer adjustment. Respondent claims that Department regulations state that where appropriate, the Secretary may also consider differences in market value between products to arrive at a difmer adjustment. Respondent also states that grades 131 and 134 are distinct and that there are differences in the cost of manufacture which are driven by the differences in physical characteristics. Unimin points specifically to the costly removal of iron and the fine content of the products. Unimin further claims that the different physical characteristics of the two products are reflected in their market values. Respondent also claims that the Department has verified information on differences in cost of manufacture, and, therefore, the Department should accept the difmer adjustment as provided by Unimin.

DOC Position: We agree with petitioner that the "net realizable value" method for co-product cost accounting is not normally an appropriate measure of a difmer adjustment. However, based on the facts on the record and the following analysis, we have accepted respondent's methodology for purposes of this final determination. In 19 CFR 353.57(a), it states that the "Secretary will make a reasonable allowance for differences in the physical characteristics of merchandise compared to the extent that the Secretary is satisfied that the amount of any price differential is wholly or partly due to such difference." Further, the regulations state in 19 CFR 353.57(b) that in "deciding what is a reasonable allowance for difference in physical characteristics, the Secretary normally will consider differences in the cost of production but, where appropriate, may also consider differences in the market value." There is a clear preference in the regulations for using cost of production figures, rather than market value, in the calculation of a difmer adjustment. However, an analysis of whether the circumstances in this particular investigation make it appropriate for the Department to consider differences in market value had to be conducted using the information submitted on the record by both parties to the investigation.

There is evidence on the record, submitted by both petitioner and respondent, that physical differences do exist and that the market value of each grade can vary based on these differences; they are: (1) The iron content and (2) the level of impurities and the particle size and distribution. This relationship between physical properties and market value has been supported on the record by both petitioner and respondent.

The iron content of Unimin's grade 131 has a typical mean value of 0.10 percent, and the iron content of grade 134 has a typical mean value of 0.35 percent. Since the removal of iron is a costly process involving the use of large amounts of electricity to power magnetic separators, a low-iron product such as 131 is more costly to produce than a higher-iron content product such as 134. This difference is reflected in the different market values placed on the two products. For example, in its petition, petitioner submitted a 1989 annual report from the U.S. Bureau of Mines which states that prices for Canadian nepheline syenite in the U.S. market were $22.00 to $28.00 per ton for glass grade, 30 mesh, bulk, depending on the iron content.

Furthermore, a petitioner stated in its petition that the price of grade 340 ("a low-iron 40 mesh product") is significantly higher than the price of grade 333 ("a high-iron 30 mesh product"). Also attached to its petition was an affidavit which referred to a 1991 Industrial Minerals edition which shows the price of Canadian 30 mesh, low-iron MS as $32..75 (Canadian dollars) per short ton, and that of Canadian 30 mesh, high-iron as $25.50 (Canadian dollars).

Another cost of production difference relates to the material composition and particle distribution of the two grades. Both grades 131 and 134 are blended products which contain fines, or waste material; however, grade 134 contains a higher percentage of fines than 131 (75 percent and 65 percent, respectively). This is evident in the technical data sheet for 134 which shows higher values for the amount of material typically passing through a 100 mesh screen. This means that 131 has less waste material and more higher priced, non-waste material.

An finally, in its petition, petitioner states that glass grade NS is generally ground no finer than 140 mesh, and that NS ground to a size of 200 mesh, (*i.e.*, to a greater degree of fineness), typically sells for two or three times the price of a coarser glass-grade NS. Petitioner further states that NS ground to an even greater degree of fineness (325 mesh) typically sells for three to four times the price of coarser glass grade NS.

As already state, the Department's regulations clearly state a preference for cost. Nvertheless, where appropriate the Department will use market value as a basis for calculating a difmer adjustment. In this investigation, although our policy and procedural preference would have been to seek additional information regarding cost, we did not do so. Given the fact that it is now too late to request further cost of production data and the fact that the difmer has a very small impact on the overall margin, we set aside our preference for cost, and evaluated whether the use of market value is appropriate. Because there is substantial evidence on the record showing differences in the physical characteristics of respondent's product 131 and 134, and because these physical differences have been shown to have an impact on the market value of these products, there is sufficient evidence to support the appropriateness of using market value. Furthermore, we disagree with petitioner's statement that Unimin's data used to calculate the difmer is not reliable because the data is inconsistent and was not tied to any financial statements. This is discussed under *Comment 1* of this notice.

Therefore, we accept respondent's calculation of its difmer adjustment.

Comment 4: Petitioner claims that commission payments made by respondent to its U.S. parent should be the basis for a price adjustment because they are directly related to the sales in question.

Petitioner states that the Department erred in not making an adjustment in its preliminary determination, and it presumes this error is due to the Department's belief that the payments failed the arm's-length test. Citing *LMI—La Metalli Industriale* v. *U.S.*, ("LMI") 912 F.2d 455 (Fed. Cir. 1990), petitioner argues that the Court of Appeals for the Federal Circuit has adopted a test to determine arm's-length transactions which is based on evaluation of the full circumstances as revealed by the evidence at hand. Citing *Coated Groundwood Paper from Finland*, 56 FR 56,363, (November 4, 1991), petitioner argues that although the affiliation between the exporter and the agent may be a relevant factor, such a relationship does not automatically disqualify an adjustment from consideration, and that under *LMI* other factors must also be examined.

Petitioner states that evidence of unrelated party commissions and other evidence of bona fides of the commission relationship exist. Specifically, petitioner argues that there is no dissimilarity between the basis of a commission to an unrelated agency in the third country and the basis of the commision in this investigation. Petitioner also argues that Unimin's descriptions in company documents referring to the payments as"commissions" clarifies the true nature of these payments. Petitioner also points to the specific services for which the payment is rendered.

Petitioner also claims that the home market indirect selling expenses listed by Unimin should be rejected for various reasons: the total sales figure appears unreasonably low, improper inclusion of distribution and customer service costs in its reporting of total sales expense, improper use of non-subject merchandise in irrelevant markets to calculate indirect expenses, inappropriate inclusion of "Credit Department" expenses, and the appearance that sales expense figures are unverified.

Respondent claims that the Department's treatment of commisisons is correct and fully in accord with *LMI* and that the Federal Circuit did not implicitly reject the Department's test. Unimin contends that they do pay a commision to an unrelated agency in a third country and that this payment does not support a finding that the payment to Unimin Corporation is at arm's-length. Respondent also argues that peitioner would have the Department improperly apply different standards for considering related party commissions depending on the market in which the commision is paid.

With respect to its indirect selling expenses, respondent states that petitioner improperly extrapolates using a Unimin accounts receivable figure to arrive at a total sales figure for the POI. Unimin contends that peitioner is erroneously attempting to draw conclusions about a revenue number which excludes U.S. sales from a revenue number which includes U.S. sales. Respondent holds that distribtion and customer service expenses are properly included in caluculating indirect selling expenses.

DOC Position: We disagree with petitioner and have not deducted the commission paid by Unimin Canada to its U.S. parent, Unimin Corporation. In *LMI*, the Federal Circuit adopted a test for determining the arm's length nature of a transaction which requires consideration of the full circumstances of the transactions in question. Consistent with *LMI*, we have considered all of the circumstances of the commision relationship in question. We have compared payments to respondent's related selling agent in the U.S. with those to an unrelated selling agent in a third country. We have determined that these relationships are not comparable because the method of determining the amounts of payment are not similar to each other and because the requirements placed on each agent by the Canadian manufacturer are not comparable (*i.e.*, the obligations and responsilbilites placed on the selling agents were different). For example, one selling arrangement allows for the sales of all Unimin products in a broadly and generally defined area, whereas, the other selling arrangement strictly limits the number of products and the geographical territory open to the agent.

In addition, we found that the company's internal reference to these payments as "commissions" does not indicate that they are made at arm's-length. We also did not find any indication of arm's length transactions from petitioner's claim that respondent's U.S. parent performed traditional commission agent services.

Based on this information, we cannot determine that the related party commission in question is in fact an arm's length payment for services rendered, and, therefore, we have not deducted the commission from U.S. price.

Petitioner claims that home market indirect selling expenses reported by Unimin should be rejected by the Department for various reasons, and because the expense figures were not verified. As stated in the Final Results of Antidumping Duty Administrative Review: Lug Nuts from the People's Republic of China (56 FR 46153) (September 10, 1991), "During verification, it is the Department's practice to select only a certain number of items to verify. Due to time constraints, the Department often is unable to complete the review of source documentation for all selected items. Nevertheless, if the Department's verification team establishes the integrity of the source documents for those sales that it does review, then it assumes that source documents for the remaining sales are similarly reliable." In this investigation, the verifiers established the reliability of those items examined at verification. Since we did not verify those indirect selling expenses reported by Unimin, we have no reason to reject what Unimin reported. (For further discussion, see *Comment 1* and the *DOC Position*).

Comment 5: Pittsburgh Corning, an interested party in this investigation, claims that the Department should determine that TFC is not an interested party because TFC does not manufacture a like product. Pittsburgh Corning claims that we are obligated to evaluate the petitioner's standing and that we are not bound by the ITC's preliminary like product determination. In its brief, Pittsburgh Corning states that one class or kind of merchandise subject to this investigation is NS. Corning submits that TFC's products, aplite and glass grade feldspar, are not like products.

Citing High Information Content Flat Panel Displays and Display Glass Thereof from Japan: Final Determination: Rescission of Investigation and Partial Dismissal of Petition, 56 FR 32376 (July 16, 1991) ("Flat Panel Displays"), Pittsburgh Corning states that the Department determined that there were four separate classes or kinds of merchandise in that investigation. Since petitioners in that case did not produce one of the classes or kinds of merchandise, the Department evaluated whether the petitioners had standing to file a petition with respect to that class or kind of merchandise by conducting a like product inquiry.

Pittsburgh Corning points out that a petitioner may qualify as a producer of a like product for purposes of an ITC injury investigation and yet lack

standing to file a petition. In Flat Panel Displays, the Department examined the same six factors that the ITC considers in its injury like product analysis. Pittsburgh Corning has requested that the Department conduct a such a like product analysis for purposes of determining petitioner's standing and that in conducting this anaylsis, the Department should apply the traditional like product factors, and conclude that NS is not a like product of aplite or feldspar.

DOC Position: While we agree with Pittsburgh Corning that the Department is not bound by the ITC's like product determination, we may nevertheless agree with and accept it. Indeed, absent any indication that the ITC's definition of like product for purposes of determining injury would not be suitable for purposes of standing, we will accept the ITC definition. Therefore, we disagree with Pittsburgh Corning that the Department must evaluate petitioner's standing in this investigation by conduction our own "like product" analysis.

In its preliminary determination, the ITC found that petitioner's products, aplite and glass-grade feldspar, are the products most similar to NS and included them in its definition of "like product." We have analyzed the information on the record pertaining to this issue (*see*, Memorandum to File dated March 9, 1992) and have determined that we have no basis to disagree with the ITC's "like product" determination. Consequently, we are not required, as Pittsburgh Corning claims, to undertake our own "like product" analysis.

Therefore, since petitioner is a producer of a "like product," it is an interested party pursuant to section 771(9)(C) of the Act, and, as such, petitioner has met the standing requirement of section 732(b)(1) of the Act for filing this antidumping duty petition.

Comment 6: Petitioner claims that the Department should reject any changes in Unimin's January 31, 1992 submission that are more than mere corrections made during the course of the verification.

DOC Position: We have accepted only those changes noted during the course of verification, consistent with Department practice.

Continuation of Suspension of Liquidation

For Unimin and all other producers/manufacturers/exporters, we are directing the Customs Service to continue to suspend liquidation of all entries of NS from Canada that are entered, or withdrawn from warehouse, for consumption on or after December 27, 1991, which is the date of publication of our preliminary determination in the **Federal Register**.

The Customs Service shall require a cash deposit or posting of a bond equal to the estimated weighted-average amount by which the FMV of the merchandise subject to this investigation exceeds the U.S. price as shown in the table below. This suspension of liquidation will remain in effect until further notice. The weighted-average margins are as follows:

Producer/manufacturer/exporter	Weighted-average margin percentage
Unimin Corporation	9.36
All Others	9.36

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)), and 19 CFR 353.20.

Dated: March 10, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C-307-804]

Gray Portland Cement and Clinker From Venezuela Suspension of Investigation

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of suspension of countervailing duty investigation.

SUMMARY: The Department of Commerce has decided to suspend the countervailing duty investigation involving gray portland cement and clinker from Venezuela. The basis for the suspension is an agreement to offset or eliminate completely all benefits provided by the Government of Venezuela which we find to constitute bounties or grants on exports of gray portland cement and clinker to the United States.

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: Robert Bolling or Wendy Frankel, Office of Agreements Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-3793.

SUPPLEMENTARY INFORMATION:

Case History

On May 21, 1991, the Ad Hoc Committee of Florida Producers of Gray Portland Cement (the Ad Hoc Committee) filed with the Department of Commerce (the Department) a countervailing duty petition on behalf of the United States industry producing gray portland cement and clinker. In accordance with 19 CFR 355.12, the petitioner alleged that manufacturers, producers or exporters of cement in Venezuela receive bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), and that these imports are materially injuring, or threaten material injury to, a regional U.S. industry (Florida). We initiated such an investigation on June 14, 1991 (56 FR 27498).

In past countervailing duty investigations, Venezuela was considered to be a "country under the Agreement" within the meaning of section 701(b)(3) of the Act. As such title VII of the Act applied in those investigations, and the U.S. International Trade Commission (ITC) as required to determine whether imports of the subject merchandise from Venezuela materially injured, or threatened material injury to, a U.S. industry.

On August 31, 1990, Venezuela became a contracting party to the General Agreement on Tariffs and Trade (GATT). Since qualification as a "country under the Agreement" under section 701(b)(3) of the Act requires that the GATT not apply between the United States and the country from which the subject merchandise is imported, Venezuela is no longer eligible for treatment as a "country under the Agreement" within the meaning of section 701(b)(3) of the Act. However, because Venezuela is a GATT contracting party and the merchandise included within the scope of this investigation is nondutiable, the petitioner is nonetheless required to allege that, and the ITC is required to determine whether, pursuant to section 303(a)(2) of the Act, imports of such merchandise from Venezuela materially injure, or threaten material injury to, a U.S. industry.

Since publication of the notice of initiation (56 FR 27498; June 14, 1991) the following events have occured. On June 20, 1991, the Department issued a questionnaire to the Government of Venezuela (GOV) concerning petitioner's allegations. At the COV's request, the due dates for the questionnaire responses were extended until July 29, 1991 and August 2, 1991. On July 2, 1991, the U.S. International Trade Commission (ITC) preliminarily determined that imports of gray portland cement and clinker from Venezuela materially injured, or threatened material injury to, a U.S. industry.

On July 29, 1991 and August 2, 1991, we received responses from the GOV and two companies: Cementos Caribe, C.A. (Caribe) and Venezolana de Cementos S.A.C.A. (Vencemos). On August 5, 1991, we presented the GOV with supplemental questionnaire and received responses from the GOV, Caribe, and Vencemos on August 9, 1991.

On August 21, 1991, we published a Preleminary Affirmative Countervailing Duty Determination: Gray Portland Cement and Clinker from Venezuela (56 FR 41522). In our preliminary determination we found that bounties or grants were being provided to Venezuelan manufacturers, producers, or exporters of gray portland cement and clinker under the following programs: The Export Bond Program and the Corporacion Venezolana de Fomento (CVF). On September 5, 1991, the final countervailing duty determination was aligned with that of the companion antifumping duty investigation (56 FR 43907). Between November 11 and November 21, 1991, we conducted verification of the information provided by the GOV and the respondents of Venezuela. On November 21, 1991, the final antidumping duty determination was postponed in accordance with section 735(a)(2) of the Act. Therefore, in accordance with section 705(a)(1) of the Act, the Department also posponed the final countervailing duty determination on the subject merchandise until no later than March 18, 1992 (56 FR 58680).

Standing

The Department received letters from the National Portland Cement Company, Continential Cement Company of Florida, Inc., and Charles Redi-Mix Company opposing the petition. We issued questionnaires to Continental Cement and National Portlant Cement Company, inquiring about their production of cement, in order to determine whether these companies should be considered part of the domestic industry producing cement and clinker. We did not issue a standing questionnaire to Charles Redi-Mix because it is an importer of Venezuelan cement. We received responses from Continental Cement and National Portland Cement Company. It is the Department's practice to accept a petitioner's representations that it is filing on behalf of the domestic industry unless parties account for a significant proportion of domestic production of the like product affirmatively oppose the filing. As a result of our analysis of the responses from Continental Cement and National Portland Cement Company, we have determined that the opposing parties do not, in fact, represent a significant enough proportion of the domestic industry to cause us to call into question petitioner's standing. Therefore, we determined that the petitioner in this investigation has standing to bring this case.

There is nothing in the statue, the legislative history, or our regulations requiring the petitioners establish affirmatively that they have the support of a majority of the domestic producers of the subject merchandise. This position has recently been upheld by the Court of International Trade in *NTN Bearing Corporation of America* v. *United States*, 757 F. Supp. 1425 (CIT 1991). In many cases, such a requirement would be so onerous as to preclude access to import relief under the countervailing duty laws.

Products Under Investigation

The products covered by this investigation are gray portland cement and clinker. Gray portland cement and clinker are currently classifiable under subheadings 2523.10 and 2523.29 of the Harmonized Tariff Schedule (HTS). Gray portland cement has also been entered under HTS subheading 2523.90 as "other hydraulic cements." Gray portland cement is a hydraulic cement and the primary component of concrete. Clinker, an intermediate material produced when manufacturing cement, has no use other than grinding into finished cement. Oil well cement is also included within the scope of this investigation; microfine cement is not included within the scope of this investigation. Although the HTS subheadings are provided for convenience and customs purposes, the written description of the products covered under the scope of this proceeding remains dispositive.

Suspension of Investigation

On February 11, 1992, the Department and the Government of Venezuela initialed a proposed agreement to suspend the contervailing duty investigation on gray portland cement and clinker from Venezuela. The Department gave parties an opportunity to comment on the proposed suspension agreement. The petitioner and respondents commented on one issue: whether the CVF loan program confers a countervailable benefit upon Caribe.

Comments

The respondents note that in the preliminary determination, the Department found that the CVF loan program confers a countervailable benefit upon Caribe, because Caribe received the loan on terms inconsistent with commercial considerations. Citing the Department's verfication report (January 13, 1992), the respondents argue that the Department has since recognized that this loan was in fact an agreement settling protracted litigation between adverse parties, and does not constitute a loan on terms inconsistent with commercial considerations. The comments submitted by the respondents on February 24, 1992, summarize the events surrounding the lawsuit and subsequent settlement. Therefore, respondents maintain the loan conferred no subsidy upon Caribe. According to the respondents, there is sufficient evidence on the record to support their claim that the CVF-Caribe settlement agreement does not constitute a countervailable program. Thus, the Department should amend the proposed suspension agreement by removing all mention of the CVF program.

The petitioner concurs with the respondents' contention that the CVF-Caribe settlement did not provide a countervailable bounty or grant and that any mention of the program should be removed from the suspension agreement.

Department's Position

As detailed in our verification report and a decision memo (See, Memorandum from Richard W. Moreland to Alan M. Dunn dated March 6, 1992), we have carefully reviewed the circumstances and terms of the CVF-Caribe loan. After careful analysis of the information provided at verification and in the comments received, we have determined that this loan does not constitute a countervailable bounty or grant. Therefore, we have removed all reference to this program from the agreement suspending the countervailing duty investigation on gray portland cement and clinker from Venezuela.

We have determined that the suspension agreement will offset completely the amount of the net bounty or grant with respect to the subject merchandise exported directly or indirectly to the United States, that the agreement can be monitored effectively and that the agreement is in the public interest. We find, therefore, that the

criteria for suspension of an investigation pursuant to section 704 of the Act have been met. The terms and conditions of the agreement, signed March 11, 1992, are set forth in Annex 1 to this notice.

Pursuant to section 704(f)(2)(A) of the Act, the suspension of liquidation of all entries, entered or withdrawn from warehouse, for consumption, of gray portland cement and clinker from Venezuela effective August 21, 1991, as directed in our notice of Preliminary Affirmative Countervailing Duty Determination: Gray Portland Cement and Clinker from Venezuela (56 FR 41522), is hereby terminated. Any cash deposit on entries of gray portland cement and clinker from Venezuela pursuant to that preliminary affirmative determination shall be refunded and any bonds shall be released.

Notwithstanding the suspension agreement, the Department will continue the investigation if we receive a request, in accordance with section 704(g) of the Act, within 20 days after the date of publication of this notice.

This notice is published pursuant to section 704(f)(1)(A) of the Act.

Dated: March 11, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Suspension Agreement

Gray Portland Cement and Clinker from Venezuela

Pursuant to the provisions of section 704(b)(1) of the Tariff Act of 1930 (the Act) and § 355.18 of the Department of Commerce Regulations, the Department of Commerce (the Department) and the Government of Venezuela (Venezuela) enter into the following Suspension Agreement (the Agreement). On the basis of this agreement the Department shall suspend its countervailing duty investigation initiated on June 14, 1991 (56 FR 27498) with respect to gray portland cement and clinker from Venezuela, subject to the terms and provisions set forth below.

I. Scope of the Agreement

The Agreement applies to the following merchandise (the subject merchandise) manufactured in Venezuela and exported, directly or indirectly, from Venezuela to the United States:

Gray portland cement and clinker, which are currently classified under subheadings 2523.10 and 2523.29 of the Harmonized Tariff Schedule (HTS). Gray portland cement has also been entered under HTS subheading 2523.90 as "other hydraulic cements." Gray portland cement is a hydraulic cement and the primary component of concrete. Clinker, an intermediate material produced when manufacturing cement, has no use other than grinding into finished cement. Oil well cement is also subject to the Agreement. Microfine cement was not included within the scope of the investigation and therefore is not subject to the Agreement.

II. Basis of the Agreement

A. The Government of Venezuela (GOV) hereby agrees to eliminate completely the amount of the net bounty or grant determined by the Department to exist with respect to the subject merchandise. The elimination of the net bounty or grant shall be accomplished for all exports of the subject merchandise made on or after June 15, 1991. The Government of Venezuela certifies that all exports of the subject merchandise to the United States made on or after June 15, 1991, are excluded from eligibility for the Export Bond Program, where exporters are eligible to receive bond payments based on a percentage of the FOB export value, and it will continue this exclusion in full force and effect.

B. The GOV recognizes that the provision of subsidies on the production or shipment of the subject merchandise exported directly or indirectly from Venezuela to the United States may result in termination of this Agreement and resumption of the investigation pursuant to the provisions of section 704(i) of the Act. Subsidies are those benefits which have been found or are likely to be found countervailable in any final U.S. countervailing duty investigation of a Venezuelan product, in any final determination in this investigation, or in any final review of a Venezuelan product under section 751 of the Act, including subsidies which may apply to other products or exports to other destinations to the extent that such subsidies cannot be segregated as applying solely to such other products or exports.

C. The GOV shall notify the Department in writing of any new benefit which is, or which Venezuela has reason to know would be, a subsidy on shipments of the subject merchandise exported, directly or indirectly, from Venezuela to the United States, including subsidies which may apply to both the subject merchandise and other products or exports to other destinations, to the extent such benefits cannot be segregated as applying solely to such other products or exports.

D. If any program under which benefits have been received in the past, and which is included in this Agreement, is found not to constitute a countervailable benefit under the Act in (i) the notice of suspension of investigation, (ii) the final determination, or (iii) the final results of any administrative review of this Agreement under section 751 of the Act in this proceeding, then the elimination of the benefits under that program will no longer be required.

E. The GOV agrees to comply with the notification requirements, as outlined in Section III of this agreement, concerning any application for, or receipt of benefits under the Partial Duty Drawback program (where a company can apply for a partial duty drawback of five percent of the FOB export value) with respect to the subject merchandise.

III. Monitoring of the Agreement

A. The GOV agrees to supply any information and documentation (consistent with Venezuelan law and regulations) which the Department deems necessary to demonstrate that there is full compliance with the terms of this Agreement. The GOV also agrees to provide copies of all such documents as the Department deems necessary in connection with verifying full compliance with the terms of this agreement.

B. The GOV will notify the Department if its producers/exporters:

1. Transship the subject merchandise through third countries to the United States;

2. Alter their position with respect to any terms of the Agreement; or

3. Apply for, or receive, directly or indirectly, the benefits of the programs described in Section II for the manufacture or export of gray portland cement and clinker exported, directly or indirectly, from Venezuela to the United States.

C. The Department will request information and may perform verifications periodically pursuant to administrative reviews conducted under section 751 of the Act, in addition to exercising its rights under paragraphs III. A. and B., above.

D. The GOV agrees to permit such verification and data collection (consistent with Venezuelan law and regulations) which the Department deems necessary in order to monitor this Agreement.

E. The GOV agrees to provide quarterly certifications that it continues to be in compliance with the terms of this Agreement. A certification will be provided within 45 days after the end of each calendar quarter beginning with the quarter ending March 31, 1992.

F. The GOV agrees to provide to the Department, within 45 days from the end of each calendar quarter beginning March 31, 1992, the value and volume of exports of the subject merchandise to the United States by the producers and exporters.

G. The GOV agrees to notify the Department if it alters its position with respect to any of the terms of this Agreement.

IV. General Provisions

A. In entering into this Agreement, Venezuela does not admit that any of the programs alleged or investigated constitute countervailable benefits within the meaning of the Act.

B. The provisions of section 704(i) of the Act shall apply if:

1. Venezuela withdraws from this Agreement or refuses to participate in this Agreement;

2. The Department determines that the Agreement is being or has been violated or no longer meets the requirements of section 704 of the Act.

C. If the Department determines that the Agreement is being or has been violated, it may terminate this Agreement and reopen the investigation or issue a countervailing duty order as appropriate under § 355.19 of the Commerce Regulations. If reopened, the investigation will be resumed for all producers and exporters of the subject merchandise as if the affirmative preliminary determination were made on the date the Department terminates this Agreement.

D. The Department will terminate this suspended investigation after review under section 751 of the Act, whenever the conditions set forth in § 355.25 of the Commerce Regulations are satisfied.

V. Effective Date

The effective date of this Agreement is the date of its publication in the **Federal Register**. The provisions of this Agreement apply to exports on or after the effective date.

Signed on this 11th day of March, 1992.

For the Government of Venezuela.

Edmond Benedetti,

Minister Conselor Embassy of Venezuela.

For the U.S. Department of Commerce.

Alan M. Dunn,

Assistant Secretary for Import Administration.

I have determined pursuant to section 704(b) of the Act that the provisions of Section B completely eliminate the bounties or grants that the Government of Venezuela is providing with respect to gray portland cement and clinker exported, directly or indirectly, from Venezuela to the United States. Furthermore, I have determined that suspension of the investigation is in the public interest, that the provisions of Section III ensure that this Agreement can be monitored effectively, and that the agreement meets the requirements of section 704(d) of the Act.

Signed on this 11th day of March, 1992.

For the U.S. Department of Commerce.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

July 1990 Galveston Bay Oil Spill; Availability and Request for Comments on a Draft Damage Assessment Plan

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of 60-day comment period.

SUMMARY: Notice is given that the draft document entitled, "The Galveston Bay Oil Spill July 28, 1990, Assessment Plan for the Measurement of Natural Resource Damages" is available for public review and comment. The document describes the plan developed by State and Federal natural resource trustees for assessing natural resource damages from the oil spill occurring in Galveston Bay, Texas, following the July 28, 1990, collision of certain vessels in Galveston Bay. The draft plan follows the guidance of the Natural Resource Damage Assessment regulations found at 43 CFR part 11 (1988) (the NRDA regulations), issued by the U.S. Department of the Interior, as modified by *State of Ohio* v. *United States Department of the Interior*, 880 F.2d 432 (D.C.Cir. 1989). The public review of this draft damage assessment plan, announced by this notice, parallels that provided for in 43 CFR 11.32(c) of the NRDA regulations.

DATES: Comments must be submitted in writing on or before May 18, 1992.

ADDRESSES: Requests for copies of the damage assessment plan should be sent to Jim Jeansonne of the National Oceanic and Atmospheric Administration (NOAA) Damage Assessment Center, c/o the National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702, or Ellen Wenzel of the Texas Water Commission, P. O. Box 13087, Capitol Station, Austin, TX 78711-3087.

Written comments on the plan should be sent to either Jim Jeansonne c/o the National Marine Fisheries Service or to J. P. Schmidt of the Texas Water Commission at the same addresses for each agency as listed above.

FOR FURTHER INFORMATION CONTACT: Jim Jeansonne of the NOAA Damage Assessment Center, (813) 893-3144.

SUPPLEMENTARY INFORMATION: On July 28, 1990, at approximately 2:30 p.m., the outbound tanker *M/V Shinoussa*, after passing the *M/T Hellespont Faith* in the Houston Ship Channel in Galveston Bay, collided with inbound petroleum barges being pushed by the tug Chandy N. The collision occurred south of Red Fish Island off of Eagle Point, about 15 miles north of Galveston, Texas. As a result of the collision, approximately 700,000 gallons of a petroleum product known as catfeed oil were discharged into Galveston Bay from two barges.

The incident is subject ot the authority of the Federal Water Pollution Control Act, 33 U.S.C. 1321 *et seq.* (FWPCA). NOAA, The Department of the Interior, the Texas Water Commission, the Texas Parks and Wildlife Department, and the Texas General Land Office are trustees for natural resources pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, the FWPCA, the Oil Pollution Act of 1990, subpart G of the National Oil and Hazardous Substances Pollution Contingency Plan, 40 CFR 300.72-300.74 and, in the case of the federal trustees, Executive Order 12580.

These State and Federal agencies (the co-trustees) have determined that natural resources subject to their trust authority under the FWPCA were or are likely to have been exposed to catfeed oil as a result of the discharge. The quantity and concentration of the oil discharged was sufficient to result in injury to trust resources and information available to the co-trustees indicates that trust resources were or are likely to have been affected. Consequently, the co-trustees are proceeding with an assessment of the natural resource damages resulting from this oil spill.

The draft plan for assessing those damages developed by the co-trustees proposes to utilize the Type A procedure for assessing damages identified in the NRDA regulations at subpart D, 43 CFR 11.40-11.41, and a restoration costs component consistent with the *Ohio* decision.

Interested members of the public are invited to request a copy of the draft damage assessment plan from and to submit written comments on the plan to

either Jim Jeansonne, the Southeast Science Coordinator for NOAA's Damage Assessment Center, or J. P. Schmidt of the Texas Water Commission, at the addresses given above. All written comments will be considered by NOAA's Authorized Official, the Department of the Interior, and the State trustees in finalizing the assessment plan and will be included in the Report of Assessment issued at the conclusion of the damage assessment process.

Dated: March 11, 1992.

Thomas A. Campbell,

General Counsel, National Oceanic and Atmospheric Administration.

BILLING CODE 3910-10-M

Department of the Army

Draft Environmental Impact Statement for the Realignment of the 5th Infantry Division (Mechanized) from Fort Polk, Louisiana to Fort Hood, Texas; Notice of Availability

AGENCY: Department of Defense, United States Army.

SUMMARY: The recommendation to realign the 5th Infantry Division (Mechanized) to Fort Hood, Texas from Fort Polk, Louisiana was mandated by Public Law 101-510, the Defense Base Closure and Realignment Act of 1990. The document focuses on the environmental and socioeconomic impacts and mitigations associated with the receiving of the division at Fort Hood, Texas.

There may be some significant environmental impacts associated with the realignment of the 5th Infantry Division. There are some significant socioeconomic impacts related to the population increase as a result of the realignment. All potential significant impacts are mitigable.

The public is encouraged to comment on the Draft Environmental Impact Statement. Comments received within 45 days of this notice will be considered. Copies of the Draft Environmental Impact Statement can be requested by contacting Mr. Arver Ferguson, (817) 334-3246 or by writing to: United States Army Corps of Engineers, Fort Worth District, ATTN: CESWF-PL-RE, 819 Taylor Street, Fort Worth, Texas 76102-0300.

Lewis D. Walker,

Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health) OASA (I,L&E).

Department of the Navy

CNO Executive Panel; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app. 2), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Space and Electronic Warfare Task Force will meet April 8, 1992, from 9 am to 5 pm, at 4401 Ford Avenue, Alexandria, Virginia. This session will be closed to the public.

The purpose of this meeting is to continue discussions on Navy space and electronic warfare (SEW) doctrine, technology and core program, as well as review related intelligence data. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and are, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of Title 5, United States Code.

For further information concerning this meeting, contact: Judith A. Holden, Executive Secretary to the CNO Executive Panel, 4401 Ford Avenue, room 601, Alexandria, Virginia, 22302-0268, Telephone Number (703) 756-1205.

Dated: March 9, 1992.

Wayne T. Baucino

Lieutenant, JAGC, U.S. Naval Reserve, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-AE-F

Navy Exchange System Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given that the Navy Exchange System Advisory Committee will meet April 2, 1992, in New York City. Sessions of the meeting will commence at 9 am and 9:30 am. The 9:30 am to 4 pm session will be closed to the public because it is likely to relate solely to internal agency personnel rules and practices; may disclose trade secrets and commercial or financial information, and may involve information which, if disclosed prematurely, would be likely to significantly frustrate implementation of a proposed agency action. The Secretary of the Navy has therefore determined that the 9:30 am to 4 pm session of the meeting will be closed to the public because it will be concerned with matters listed in section 552b (c)(2),(4), and 9(B) of title 5, United States Code.

For further information concerning this meeting contact: Commander N. Malcolm, SC, USN, Naval Supply Systems Command (NAVSUP 09B), room 606, Crystal Mall, Building No. 3, Arlington, Virginia, 22202, Telephone Number (703) 607-0072/3.

Dated: March 10, 1992.

Wayne T. Baucino

Lieutenant, JAGC, U.S. Naval Reserve, Alternate Federal Register Liaison Officer.

[FR Doc. 92-6145 Filed 3-16-92; 8:45 am]

BILLING CODE 3810-AE-F

Privacy Act of 1974; Adding Record Systems.

AGENCY: Department of the Navy, DOD

ACTION: Adding Record Systems.

SUMMARY: The Department of the Navy proposes to add two system of records notices to its inventory of system of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: The additions will be effective on April 16, 1992, unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to the Head, PA/FOIA Branch, Office of the Chief of Naval Operations (OP-09B30), Department of the Navy, The Pentagon, Washington, DC 20350-2000.

FOR FURTHER INFORMATION CONTACT: Mrs. Gwendolyn Aitken at (703) 614-2004.

SUPPLEMENTARY INFORMATION: The Department of the Navy record system notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, were published in the Federal Resister as follows:

51 FR 12908, Apr 16, 1986
51 FR 18086, May 16, 1986 (DON Compilation changes follow)
51 FR 19884, Jun 3, 1986

57 FR 2898, Jan 24, 1992

New system reports, as required by 5 U.S.C. 522a(r) of the Privacy Act, were submitted on March 3, 1992, to the Committee on Government Operations of the House of Representatives, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget (OMB) pursuant to paragraph 4b of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985 (50 FR 52738, December 24, 1985).

Dated: March 9, 1992.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

N05330-2

SYSTEM NAME:

Naval Aviation Depot Workload Control System

SYSTEM LOCATION:

Naval Aviation Depots; Naval Computer and Telecommunications Stations (NAVCOMTELSTAs) located at Alameda and San Diego, CA and Jacksonville and Pensacola, FL; Naval Computer and Telecommunications Area Master Station Atlantic (NCTAMS LANT); Regional Automated Services Center (RASC), Marine Corps Air Station, Cherry Point, NC. Official mailing addresses are published as an appendix to the Navy's compilation of system of record notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian employees and naval personnel assigned to the Naval Aviation Depots.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name, Social Security Number, employee number, pay prefix, hourly pay rate, pay grade, computation date, age, sex, date and place of birth, home address and telephone number, physical examination schedules and types, licenses, courses taken, trade skills, occupation titles and codes, and workhour statistics.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations and Executive Order 9397.

PURPOSE(S):

To collect, edit, validate, and process employee's workhours in order to calculate labor expenditures of an employee and assure proper pay entitlement coding. System also tracks the availability, location, and status of manpower.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of system of record notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic disk, tape, and hard copy forms.

RETRIEVABILITY:

Employee number or Social Security Number.

SAFEGUARDS:

System information is protected by user account number and password sign-on, data base access authority, data set, data item authority for lost, add, update and delete, and individual authority tables. Each location has established physical security protection for their respective computers and terminals.

RETENTION AND DISPOSAL:

Ten years and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

WCS Project Manager, Naval Aviation Depot (Code 501), Cherry Point NC 28533-5030.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the WCS Project Manager, Naval Aviation Depot (Code 501), Cherry Point, NC 28533-5030 or the head of Naval Aviation Depot where employed.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the WCS Project Manager, Naval Aviation Depot (Code 501), Cherry Point, NC 28533-5030 or the head of the Naval Aviation Depot where employed.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed.

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Individual and Naval Aviation Depots.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

N05801-2

SYSTEM NAME:

Legal Assistance Management Information System

SYSTEM LOCATION:

Naval Legal Service Offices (NLSO) and NLSO detachments and other commands that provide legal assistance services under the auspices of the Navy's Legal Assistance Program through an assigned judge advocate or civilian attorney. Official mailing addresses are published as an appendix to the Navy's compilation of system of record notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty military personnel, retirees, dependents, and authorized civilians who have been provided legal assistance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Legal Assistance Card Files contain basic client identification information; e.g., name, address, duty station, telephone number(s), a brief description of the subject of the visit, name of the attorney assigned, and attorney time expended.

Legal Assistance Client Case Files contain personal and privileged information on the client and about the legal matter(s) for which the client is seeking assistance, including various documents related to the client's case, such as copies of client records provided to the attorney; memoranda of attorney-client interviews and attorney-client telephone conversations; memoranda of meetings and telephone conversations with relevant third parties; copies of statutes and case law relevant to the case; attorney research and notes; copies of all documents prepared, and of all correspondence sent or received, by the legal assistance provider; and a record of the results obtained.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations; 10 U.S.C. 1044; and 32 CFR part 727, Legal Assistance.

PURPOSE(S):

Data from the records is compiled for the purpose of generating periodic workload productivity and statistical reports, for internal management of the office, and for counsel assignment. To provide an administrative record for use by attorneys and clerical personnel directly involved in rendering legal assistance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper card and case files are stored in file cabinets.

RETRIEVABILITY:

Name of client.

SAFEGUARDS:

Cards and case files are maintained in metal filing cabinets or other storage devices under the control of authorized personnel during working hours; the office space in which the file cabinets and storage devices are located is locked outside normal working hours.

RETENTION AND DISPOSAL:

Files are maintained for two years after completion of the services and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Assistant Judge Advocate General (Legal Assistance), Office of the Judge Advocate General, Department of the Navy, 200 Stovall Street, Alexandria, VA 22332-2400.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the office providing the legal assistance or to the Deputy Assistant Judge Advocate General (Legal Assistance), Office of the Judge Advocate General, Department of the Navy, 200 Stovall Street, Alexandria, VA 22332-2400.

The written request should include full name and must be signed by the requesting individual.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the office providing the legal assistance or to the Deputy Assistant Judge Advocate General (Legal Assistance), Office of the Judge Advocate General, Department of the Navy, 200 Stovall Street, Alexandria, VA 22332-2400.

The written request should include full name, address, and telephone number of the requester and must be signed by the requesting individual.

CONTESTING RECORD PROCEDURES:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Basic information is provided by the client. Additional information regarding the case, including actions taken and the ultimate disposition of the case, is provided by the attorney rendering the service.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3810-01-F

DELAWARE RIVER BASIN COMMISSION

Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, March 25, 1992. The hearing will be part of the Commission's regular business meeting which is open to the public and scheduled to begin at 1 p.m. in the Goddard Conference Room of the Commission's offices at 25 State Police Drive, West Trenton, New Jersey.

An informal conference among the Commissioners and staff will be open for public observation at 10:30 a.m. at the same location and will include a briefing on the Delaware Estuary toxics management program and reports on the upper Delaware ice jam project, amendment of Compact Section 15.1(b) to fund the F. E. Walter Reservoir project and possible inclusion of the White Clay Creek scenic rivers study area in the Comprehensive Plan.

The subjects of the hearing will be as follows:

Applications for Approval of the Following Projects Pursuant to Article 10.3, Article 11 and/or Section 3.8 of the Compact

1. *Holdover Project: BP Oil Company D-91-78.* A ground water remediation project which entails withdrawal of 0.072 million gallons per day (mgd) of petroleum product contaminated ground water for biological treatment via granulated activated carbon prior to discharge to an unnamed tributary of Cacoosing Creek. The proposed treatment facility will serve the BP Oil Company plant site located in the Borough of Sinking Spring, Berks County, Pennsylvania. This hearing continues that of February 26, 1992.

2. *Louis Romano, Jr. D-81-42 Renewal-2.* An application for the removal of a ground water withdrawal project to supply up to 22.1 million gallons (mg)/30 days of water to the applicant's agricultural irrigation system from Well Nos. 1 and 2. Commission approval on September 17, 1986 was limited to five years. The applicant requests that the total withdrawal from all wells remain limited to 22.1 mg/30 days. The project is located in Lawrence Township, Cumberland County, New Jersey.

3. *Matamoras Municipal Authority D-81-78 CP Renewal-2.* An application for the renewal of a ground water withdrawal project to supply up to 9 mg/30 days of water to the applicant's distribution system from Well Nos. 7 and 8, and reactivated Well Nos. 3 and 5. Commission approval on February 25, 1987 was limited to five years. The applicant requests that the total withdrawal from all wells remain limited to 9 mg/30 days. The project is located in Matamoras Borough, Pike County, Pennsylvania.

4. *Douglassville Water Company D-86-54 CP Renewal.* An application for the renewal of a ground water withdrawal project to supply up to 9.2 mg/30 days of water to the applicant's distribution system from Well Nos. 5 and 6. Commission approval on March 25, 1987 was limited to five years and will expire unless renewed. The applicant requests that the total withdrawal from all wells remain limited to 12.1 mg/30 days. The project is located in Amity Township, Berks County, Pennsylvania.

5. *Montague Water Company D-91-75 CP.* An application for approval of a ground water withdrawal project to supply up to 8.0 mg/30 days of water to the applicant's distribution system from existing Well Nos. 1-5, and to limit the withdrawal from all wells to 8.0 mg/30 days. The project is located in Montague Township, Sussex County, New Jersey.

6. *Town of Smyrna D-91-81 CP.* An application to replace the withdrawal of water from Well No. 2 in the applicant's water supply system which has become an unreliable source of supply. The applicant requests that the withdrawal from replacement Well No. 2A be limited to 33.99 mg/30 days, and that the total withdrawal from all wells remain limited to 33.99 mg/30 days. The project is located in the Town of Smyrna, Kent County, Delaware.

7. *U.S. Generating Company D-91-85.* A proposed cogeneration project that will produce approximately 70,000 lbs/hr of steam energy and 87 megawatts of steam-turbine generated electrical energy, using anthracite culm as the fuel source. Water for the project will be withdrawn from the Lehigh River at a rate of up to 2.25 mgd and will be used for cooling water makeup, process water and water requirements for a steam host. The electrical power will be sold to the Metropolitan Edison Company. The cogeneration project is designed to consume all water withdrawn and will have no wastewater discharge. The applicant proposes to use a nearby quarry (Horwith Quarry) as a backup water source. The project is located at a site formerly occupied by the Universal Atlas Cement Plant in Northampton Borough and Allen Township, Northampton County, Pennsylvania. The site is located south of Route 329 about six miles north of Allentown.

8. *Old Liberty Road Sewerage Co. Inc. D-92-10.* An application for approval of a sewage treatment plant (STP) upgrade and expansion from 0.112 mgd to 0.20 mgd. The project STP provides secondary treatment and will continue to discharge to an unnamed tributary of Anawana Brook. The STP serves the Kutshers Country Club resort development and is located in the Town of Thompson, Sullivan County, New York.

Documents relating to these items may be examined at the Commission's offices. Preliminary dockets are available in single copies upon request. Please contact George C. Elias concerning docket-related questions. Persons wishing to testify at this hearing are requested to register with the Secretary prior to the hearing.

Dated: March 10, 1992.

Susan M. Weisman,

Secretary.

BILLING CODE 6360-01-M

DEPARTMENT OF EDUCATION

Chapter 1 of Title I of the Elementary and Secondary Education Act of 1965; Spring Conferences on Alternative Assessment, Preschool Programs, and Staff Development

AGENCY: Department of Education.

ACTION: Notice of regional conferences.

SUMMARY: The Assistant Secretary for Elementary and Secondary Education of the U.S. Department of Education will convene three regional conferences to provide assistance in the areas of (1) early childhood programs, including identification and selection of developmentally appropriate practices, and techniques of assessment, (2) staff development, innovation, institutional development, and demonstration of effective staff development models, and (3) alternative techniques of assessment for all Chapter 1 programs, including sessions dealing with performance-based assessment in mathematics, reading, writing, and science.

The Assistant Secretary has notified the Chief State School Officer (CSSO) in each State of these meetings. The CSSOs will assist by inviting selected individuals to attend the conferences. Other interested persons are welcome to attend as well. If overnight accommodations are needed, hotels should be contacted directly at the numbers listed. No reservations are needed for the conferences.

MEETING INFORMATION: The regional conferences are scheduled as follows:

March 16-18: Los Angeles, California, at the Stouffer Concourse Hotel, 5400 West Century Boulevard, Los Angeles, California; 310-216-5858.

March 23-25: Dallas, Texas, at the Adolphus Hotel, 1321 Commerce Street, Dallas, Texas; 214-742-8200.

April 15-17: Washington, DC, at the Hyatt Regency Hotel Washington, 400 New Jersey Avenue, NW., Washington, DC; (202) 737-1234.

SUPPLEMENTARY INFORMATION: Persons interested in attending one of the meetings who need more information should contact Dr. Linda Mount, Compensatory Education Programs, Office of Elementary and Secondary Education, 400 Maryland Avenue, SW., Washington, DC 20202-6132; telephone: (202) 401-3710. Deaf and hearing-impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

Dated: March 11, 1992.

John T. MacDonald,

Assistant Secretary for Elementary and Secondary Education.

[FR Doc. 92-6111 Filed 3-16-92; 8:45 am]

BILLING CODE 4000-01-M

Submission of Data by State Educational Agencies

AGENCY: Department of Education.

ACTION: Notice of dates for submission of State revenue and expenditure

reports for fiscal year 1991 and of revisions to those reports.

SUMMARY: The Secretary of Education announces a date for the submission by State educational agencies (SEAs) of preliminary expenditure and revenue data and average daily attendance statistics for fiscal year (FY) 1991 and establishes a deadline for any revisions to that information. The setting of these dates is necessary to ensure timely distribution of Federal funds. The data will be published by the Department's National Center for Education Statistics (NCES) and will be used by the Secretary in the calculation of allocations for FY 1993 appropriated funds.

DATES: The suggested date for the submission of preliminary data was March 10, 1992. The mandatory deadline for the submission of final data is September 8, 1992.

ADDRESSES: SEAs are urged to mail or hand deliver ED Form 2447 (The National Public Education Financial Survey—Fiscal Year 1991) by the first date specified in this notice. SEAs must mail or hand deliver final data and any revisions to preliminary data on or before the mandatory deadline date to—

U.S. Department of Education, Office of Educational Research and Improvement, National Center for Education Statistics, Attention: GSAB—Fiscal Survey, 555 New Jersey Avenue, NW., Washington, DC 20208–5651.

An SEA may hand deliver any revisions to room 410 of the address above by 4 p.m. (Washington, DC time) on or before the mandatory deadline date.

The SEA must show one of the following as proof of mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

If the SEA mails ED Form 2447 through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an SEA should check with its local post office.

FOR FURTHER INFORMATION CONTACT: Dr. William J. Fowler, Jr., at the address specified above or by telephone: (202) 219–1921.

SUPPLEMENTARY INFORMATION: Under the authority of section 406(g) of the General Education Provisions Act, as amended (20 U.S.C. 1221e–1(g)), which authorizes NCES to gather data from States on the financing of elementary and secondary education, NCES collects data annually from SEAs through ED Form 2447. The report from SEAs includes attendance, revenue, and expenditure data from which NCES determines the average State per pupil expenditure (SPPE) for elementary and secondary education.

In addition to providing useful statistical information, the Secretary uses SPPE data directly in calculating allocations for certain formula grant programs, including chapter 1 of title I of the Elementary and Secondary Education Act of 1965 (Chapter 1), Impact Aid, and Indian Education. Other programs such as title VII of the Stewart B. McKinney Homeless Assistance Act, the Eisenhower Mathematics and Science Education program, and the Drug Free Schools and Community Act make use of SPPE data indirectly because their formulas are based, in whole or in part, on State Chapter 1 allocations.

In December 1991 NCES mailed to SEAs ED Form 2447 with instructions and requested that SEAs submit initial data to the Department by March 16, 1992. If an SEA does not submit initial FY 1991 data on ED Form 2447 on or about March 16, 1992, it should inform NCES, in writing, of the delay and the date by which it will submit FY 1991 data. Submissions by SEAs to NCES are edited by NCES and returned to each SEA for verification. NCES acknowledges that data submitted prior to September 8, 1992, may be preliminary and are subject to revision by an SEA not later than September 8, 1992.

To ensure timely distribution of Federal education funds based on the best, most accurate data available, NCES must establish, for allocation purposes, a final date by which ED Form 2447 must be submitted. However, if an SEA submits revised data after the final deadline that results in a lower SPPE figure, its allocations may be adjusted downward or the Department may request the SEA to return funds. SEAs should be aware that all of these data are subject to audit and that, if any inaccuracies are discovered in the audit process, the Department may seek recovery of overpayments for the applicable programs.

Authority: 20 U.S.C. 1221e–1(g).

Dated: March 11, 1992.

Diane Ravitch,

Assistant Secretary for Educational Research and Improvement.

[FR Doc. 92–6110 Filed 3–16–92; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Proposed Billing Credits Contracts and Availability of Addendum Two—Contract Development Conservation Proposals, and Amendment A to Addendum One—Contract Development Customer System Efficiency Improvements, Draft Administrative Record for the Billing Credits Policy Test Program

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of Intent to sign Billing Credits Contracts for Conservation Activities. Notice of availability of Addendum Two—Contract Development Conservation Proposals, Draft Administrative Record for the Billing Credits Test Program. Notice of Availability of Amendment A to Addendum One—Contract Development Customer System Efficiency Improvements (CSEI), Draft Administrative Record for the Billing Credits Test Program. BPA File No: BCR–5.

SUMMARY: BPA, pursuant to its Billing Credits Policy, as amended August 30, 1984 (48 FR 20275), and its Billing Credit Solicitation July 1990, has negotiated contracts with twenty-six public bodies or cooperative utilities for proposed conservation projects. Conservation projects include residential weatherization, lighting retrofits, institutional and industrial energy conservation measures, municipal water system improvements, irrigation pump removal, heat pump installations that reduce electric power consumption, and efficiency measures that increase production. BPA intends to sign twenty-three conservation contracts.

Also pursuant to its Billing Credits Policy, BPA has negotiated with public bodies or cooperative utilities for proposed customer system efficiency improvement projects. CSEI projects include voltage modifications, reconductoring, transformer replacements, and other system improvements undertaken to reduce electric power consumption or losses, as a result of an increase in the efficiency of electric use, production, transmission or distribution. BPA intends to sign four additional CSEI contracts.

The Draft Administrative Record, which was released for public review on January 10, 1992 (57 FR 1161), contains background on BPA's Billing Credits Policy, the need for billing credits resources, a summary of the Billing Credit Solicitation, a summary of the evaluation process for proposals, and environmental considerations. The Draft Administrative Record includes two Appendices: Appendix A—Billing Credit Solicitation, and appendix B—Issue Resolution Log. Addendum One of the Draft Administrative Record—Customer System Efficiency Improvements (CSEI) Contract Development, provides specific information about CSEI proposals and how billing credits for CSEI projects are determined. This Addendum also was released for public review on January 10, 1992 (57 FR 1161).

Addendum Two—Conservation Proposals Contract Development, provides specific information about the conservation proposals and how billing credits for conservation projects are determined.

Amendment A to Addendum One—Contract Development Customer System Efficiency Improvements, provides specific information about four additional customer system efficiency projects and how billing credits for these projects are determined.

Responsible Official: Paul Norman, Billing Credits Project Manager, is the official responsible for BPA's Conservation Billing Credits contracts, the Draft Administrative Record, and addenda.

DATES: BPA will receive comments on the Billing Credits Conservation and CSEI Contracts for 30 days. Payment or credits will not be made or granted until 90 days after the date of a **Federal Register** notice announcing that a contract has been signed.

FOR FURTHER INFORMATION CONTACT: For a copy of a specific Conservation Billing Credits Contract(s) and Addendum Two—Conservation Proposals Contract Development, or a specific CSEI Billing Credits Contract(s) and Amendment A to Addendum One—Contract Development Customer System Efficiency Improvements, please contact the Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212. If a particular contract is not specified, a sample contract will be sent. Copies of the Draft Administrative Record, appendix A—Billing Credit Solicitation, and appendix B—Issue Resolution Log, and Addendum One—Customer System Efficiency Improvements Contract Development, are also available.

Telephone numbers, voice/TTY, for the Public Involvement Office are 503–230–3478 in Portland, or toll-free 800–622–4519.

Information also may be obtained from:

Mr. George E. Bell, Lower Columbia Area Manager, 1500 NE. Irving Street, room 243, Portland, Oregon 97208, 503–230–4551.

Mr. Robert Laffel, Eugene District Manager, Federal Building, room 206, 211 East Seventh Street, Eugene, Oregon 97401, 503–465–6952.

Mr. Wayne R. Lee, Upper Columbia Area Manager, room 561 U.S. Court House, 920 W. Riverside Avenue, Spokane, Washington 99201, 509–353–2518.

Ms. Carol S. Fleischman, Spokane District Manager, room 561 U.S. Court House, 920 W. Riverside Avenue, Spokane, Washington 99201, 509–353–2907.

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406–329–3060.

Mr. Ronald K. Rodewald, Wenatchee District Manager, 301 Yakima Street, room 307, Wenatchee, Washington 98807, 509–662–4377.

Mr. Terence G. Esvelt, Puget Sound Area Manager, 201 Queen Anne Avenue North, suite 400 Seattle, Washington 98109, 206–553–4130.

Mr. Thomas Wagenhoffer, Snake River Area, West 101 Poplar, Walla Walla, Washington 99362, 508–522–6228.

Mr. Thomas Blakenship, Boise District Manager, Federal Building, 304 North Eighth Street, room 450, Boise, Idaho 83702, 208–334–9137.

Mr. Richard J. Itami, Idaho Falls District Manager, 1527 Hollipark Drive, Idaho Falls, Idaho 83401, 208–523–2706.

SUPPLEMENTARY INFORMATION:

I. Relevant Statutory Provisions

BPA is a self-financing power marketing agency within the United States Department of Energy. BPA was established by the Bonneville Project Act of 1937, 16 U.S.C. 832 *et seq.*, to market wholesale power from Bonneville Dam and to construct power lines for the transmission of this power to load centers in the Northwest. BPA sells wholesale electric power and energy to 126 utilities, 13 direct service industrial customers (DSIs) and several government agencies.

The Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act) directs BPA to serve the net power requirements of any regional electric utility requesting service, and to serve existing DSIs in the Pacific Northwest. 16 U.S.C. 839 c and d. Although BPA cannot own or construct electric generating facilities, the Northwest Power Act directs BPA to acquire rights to the output or capability of electric power resources to serve increased customer requirements. *See* 16 U.S.C. 839b(1). The Northwest Power Act requires BPA to grant credits to BPA's customers on their power bills for electric power resources that reduce the Administrator's obligation to acquire resources to meet BPA's electric power requirements. 16 U.S.C. 839d(h). Billing credits may be adjustments to customers' power bills or equivalent cash payments. Resources eligible for billing credits include conservation and generation.

II. Background

BPA's Billing Credits Policy interprets the billing credits provisions in the Northwest Power Act, prescribes criteria for customer and resource eligibility, and establishes procedures for granting billing credits.

BPA's 1990 Resource Program focused on choosing near-term resource actions for Fiscal Years 1992 and 1993. After receiving comments from customers on the draft 1990 Resource Program that suggested BPA use billing credits, BPA chose a resource strategy that included billing credits. BPA then developed a Solicitation requesting proposals for billing credits resources. Billing credits provide a way to shift some of the risk for resource development to utilities and others, which was an objective of the chosen strategy in the 1990 Resource Program. In July 1990, BPA released the Solicitation. It proposed to test the billing credit approach for acquiring energy resources by granting 50 average megawatts of billing credits to eligible customers. BPA's objective in the test was to ensure that the billing credit mechanism is workable for BPA customers.

III. Conservation Proposals

The proposals submitted in response to the Billing Credit Solicitation were divided into two groups, conservation and generation resources. Because CSEI projects reduce electric power consumption or losses by increasing efficiency of electric use, production, transmission, or distribution, they were considered a subset of conservation measures, but covered in separate contracts.

IV. Description of the Conservation Proposals

Thirty-seven conservation proposals from twenty-six public bodies or cooperative utilities were submitted pursuant to the July 1990 Billing Credit Solicitation. Thirteen proposals were withdrawn, three utilities withdrew from participation in group-sponsored proposals, and some proposals were

rejected. Conservation projects include measures in the residential, commercial, industrial and agricultural sectors to reduce electric power consumption or increase production. Conservation projects include residential weatherization, lighting retrofits, institutional and industrial energy conservation measures, municipal water system improvements, heat pump installations, and removal of irrigation pumps. These measures reduce electric power consumption or increase production.

BPA proposes to sign contracts with the following utilities for their respective conservation projects:

1. Coos-Curry Electric Cooperative, Inc.—Residential Weatherization Project.
2. Western Public Agency Group (Public Utility District No. 3 of Mason County, Washington)—Residential Weatherization Project.
3. Springfield Utility Board—Municipal Water System Efficiency Project.
4. Eugene Water and Electric Board—Industrial Incentives Project.
5. City of Idaho Falls—Street Lighting Project.
6. City of Soda Springs—Street Lighting Project.
7. Lincoln Electric Cooperative—Street Lighting Project.
8. Lower Valley Power and Light, Inc.—Commercial Lighting Project.
9. Tillamook People's Utility District—Institutional Buildings Project.
10. Western Public Agency Group (The City of Ellensburg, Washington; Public Utility District No. 3 of Mason County, Washington; and Public Utility District No. 2 of Pacific County, Washington.)—Residential Lighting Project.
11. Western Public Agency Group (Public Utility District No. 3 of Mason County, Washington; and Public Utility District No. 2 of Pacific County, Washington)—Heat Pump Project.
12. Pacific Northwest Generating Cooperative (Coos-Curry Electric Cooperative, Inc.; Clearwater Electric Cooperative; Douglas Electric Cooperative, Inc.; and Umatilla Electric Cooperative Association)—Heat Pump Project.
13. City of Richland—Heat Pump Project.
14. Public Utility District No. 1 of Clark County, Washington—Commerical Project Weatherization Project.
15. Public Utility District No. 3 of Mason County, Washington—Residential Weatherization Project.
16. Salem Electric Cooperative—Residential Weatherization, Residential Lighting, and Commercial Lighting Project.

The projects listed above meet the qualifications for billing credits. Conservation proposals received encompassed the residential, industrial, commercial, and agricultural sectors. The Customer must comply with current commercial and residential environmental requirements established for BPA programs. The Customer must comply with applicable commercial/industrial environmental requirements. Several of the energy conservation measures (ECMs) proposed were covered under The Expanded Residential Weatherization Program Environmental Impact Statement dated August 1984, and the subsequent Record of Decision or the Approaches for Acquiring Energy Savings in Commercial Sector Buildings Environmental Assessment dated September 25, 1991, and the Finding of No Significant Impact. Other proposed ECMs were categorically excluded from the procedural provisions of NEPA (52 Federal Register 47,669 (1987)) under categorical exclusion determinations dated April 9, 1991, July 3, 1991, and November 1, 1991. BPA therefore granted conditional approval to the above-listed conservation proposals and proposes to enter into contracts with those customers.

V. Description of the CSEI proposals

BPA intends to sign contracts with these utilities or public bodies for four additional CSEI proposals.

The City of Port Angeles proposes a voltage upgrade and replacement transformer project to reduce energy losses by increasing the operating voltage of feeders, and replacing existing standard dual voltage distribution transformers with dual voltage low loss silicon steel distribution transformers.

The City of Rupert proposes a voltage upgrade and replacement transformer project to reduce energy losses by increasing the operating voltage of feeders, and replacing existing standard dual voltage distributaion transformers with dual voltage low loss silicon steel distribution transformers.

Public Utility District No. 1 of Snohomish County, Washington proposes to reduce the secondary system voltage along selected feeder distribution lines to reduce end-use energy consumption and demand.

Tacoma City Light proposes to increase the production capability of two hydroelectric resources by improving the efficiency of turbines at its Cushman and LaGrande hydroelectraic generating projects. The efficiencies will be obtained by replacing the runners on these units.

These projects meet the qualifications for billing credits. These actions are categorically excluded from the procedural requirements of the National Environomental Policy Act (52 FR 47669) under categorical exclusion determinations dated April 18, 1991, July 3, 1991, and November 1, 1991. BPA therefore granted conditional approval to these projects and proposes to enter into contract with those same customers.

VI. Methodology for Determining Billing Credits

The payment or billing credit (BC) will be calculated by using the following formula: $BC=(AC-PF) \times Savings \times C_s$. As shown in Exhibit F of the proposed contracts, alternative cost (AC), minus the Priority Firm (PF) rate, times the savings from the measures, times the cost share percentage (C_s), equals the billing credit (BC).

Issued in Portland, Oregon, on March 5, 1992.

Jack Robertson,

Acting Administrator, Bonneville Power Administration.

[FR Doc. 91-6195 Filed 3-16-91; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project No. 1354-005 California]

Pacific Gas and Electric Co.; Availability of Environmental Assessment

March 11, 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for new license for the Crane Valley Project and has prepared an Environmental Assessment (EA) for this major, existing dam project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate mitigation measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 1000, of the Commission's offices at 825 North Capitol Street, NE., Washington, DC 20426.

Comments should be filed within 30 days from the date of this notice and should be addressed to Lois D. Cashell, Acting Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Please affix Project No. 1354-005 to all comments. For further information please contact Jim Fargo, Environmental Assessment Coordinator, at (202) 219-2848.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6107 Filed 3-16-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA92-2-31-001 and TA91-1-31-007]

Arkla Energy Resources; Filing

March 10, 1992.

Take notice that on March 5, 1992, Arkla Energy Resources (AER) a division of Arkla Inc., filed responses to certain information requested by the Commission in its order dated February 24, 1992 relating to its annual PGA filing. AER also submits for filing as part of Second Revised Volume No. 1 of its FERC Gas Tariff six copies of the following revised tariff sheets, with proposed effective dates as indicated:

Effective July 1, 1991

Second Revised Sheet No. 29
Second Revised Sheet No. 30
Original Sheet No. 30A

Effective April 1, 1992

First Substitute Ninth Revised Sheet No. 11
First Substitute Ninth Revised Sheet No. 16

The tariff sheets proposed to become effective July 1, 1991 are being filed to reflect revised tariff language which provides that AER's sales rates will not include costs associated with its non-sales service fuel use and lost and unaccounted-for gas costs.

The tariff sheets proposed to become effective April 1, 1992 are being filed to reflect revised surcharge amounts applicable to AER's customers under Rate Schedule G-2 and to correct a typographical error in the February 18, 1992 filing.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 17, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6106 Filed 3-16-92; 8:45 am]

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-350000; FR 4049-1]

Notice of Availability of Pollution Prevention Grants and Announcement of Financial Assistance Programs Eligible for Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Office of Pollution Prevention and Toxics is announcing the availability of approximately $3 million in FY 92 grant/cooperative agreement funds under the Pollution Prevention Incentives for States Grant Program (Fourth Funding Cycle). The purpose of this program is to support State and regional-based programs that address the reduction or elimination of pollution across all environmental media: air, land, and water. Grants/cooperative agreements will be awarded under the authority of the Pollution Prevention Act of 1990. The Office of Pollution Prevention and Toxics is also announcing three financial assistance programs available for review.

DATES: Preproposals postmarked after Monday, April 20, 1992 will not be considered.

ADDRESS: Office of Pollution Prevention and Toxics, Mail Code PM-222B, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Lena Hann, Office of Pollution Prevention and Toxics, Phone: (202) 260-2237.

SUPPLEMENTARY INFORMATION:

Background. Since its inception in 1989, approximately $15.5 million has been awarded to 56 State and regional organizations under EPA's multimedia pollution prevention grant program. In March 1989, EPA awarded approximately $4 million to 13 States and one regional organization. At that time, the program was called the Source Reduction and Recycling Technical Assistance (SRRTA) State Grant Program. In 1990, the program was renamed Pollution Prevention Incentives for States (PPIS) to acknowledge EPA's increased emphasis on multimedia pollution prevention. EPA awarded approximately $7 million to 26 State organizations in May 1990 under the PPIS program. In October 1991, an additional $4.5 million was awarded to 16 State agencies.

In November 1990, the Pollution Prevention Act of 1990 (the Act) (Public Law 101-508) was enacted, establishing as national policy that pollution should be prevented or reduced at the source whenever feasible. Section 6603 of the Act defines source reduction as any practice that:

(i) reduces the amount of any hazardous substance, pollutant, or contaminant entering any waste stream or otherwise released into the environment (including fugitive emissions) prior to recycling, treatment, or disposal; and

(ii) reduces the hazards to public health and the environment associated with the release of such substances, pollutants, or contaminants.

EPA further defines pollution prevention as the use of processes, practices, or products that reduce or eliminate the generation of pollutants and wastes at the source, including those which protect natural resources through conservation or more efficient utilization. Pollution prevention encompasses both volume reduction and toxicity reduction.

Section 6605 of the Act authorizes EPA to make matching grants to States to promote the use of source reduction techniques by businesses. In evaluating grant applications, the Act directs EPA to consider whether the proposed State programs will:

1. Make technical assistance available to businesses seeking information about source reduction opportunities, including funding for experts to provide on-site technical advice and to assist in the development of source reduction plans.

2. Target assistance to businesses for whom lack of information is an impediment to source reduction.

3. Provide training in source reduction techniques.

In addition to this grant making authority, the Act authorizes other pollution prevention activities such as the establishment of a national source reduction clearinghouse centered at EPA, expands EPA's data collection authorities so that they may better track source reduction activities, and requires periodic reports to Congress on EPA's progress in implementing the Act.

In January 1991, EPA formally announced its Pollution Prevention Strategy, a comprehensive document designed to provide guidance and direction for incorporating pollution prevention within EPA's existing regulatory and non-regulatory programs. The Strategy affirms EPA's belief that

pollution prevention can benefit both the environment and the economy, and outlines EPA's approach to facilitate pollution prevention in private sector initiatives. The Strategy recognizes that there are substantial opportunities to promote prevention in other sectors, including agriculture, transportation, energy, Federal facilities, and with consumers, and commits the Agency to work with other Federal agencies to develop specific strategies for these sectors in the near future. The Strategy discusses several activities that form the basis for implementing EPA's program, including identifying and overcoming obstacles to prevention, expanding public participation, enhancing State capabilities in pollution prevention, providing outreach and training, and using the existing regulatory framework to provide incentives for prevention. In addition, the Strategy outlines EPA's 33/50 Project which targets for reduction specific high-risk chemicals that are reported and tracked in the Toxics Release Inventory. The Agency is seeking voluntary commitments from major industrial sources of the contaminants to reduce environmental releases through prevention. EPA's goal is to reduce aggregate environmental releases of these targeted chemicals by at least 50 percent by 1995.

Consistent with the Pollution Prevention Act, the Strategy includes using State grants to foster exchange of information about source reduction techniques, to disseminate such information to businesses, and to provide technical assistance to businesses.

Availability of FY 92 Funds. With this publication, EPA is announcing the availability of approximately $3 million in grant/cooperative agreement funds for fiscal year 1992. This fourth round of awards will be made through a competitive process for amounts not to exceed $200,000. Projects may last up to 3 years. EPA strongly encourages applicants to submit proposals for grants/cooperative agreements under $200,000. Eligible applicants for purposes of funding under this program include the 50 States, the District of Columbia, the U.S. Virgin Islands, the Commonwealth of Puerto Rico, any territory or possession of the United States, any agency or instrumentality of a State including State universities, and all federally-recognized Indian tribes. For convenience, the term 'State' in this notice refers to all eligible applicants. Local governments, private universities, private non-profits, private businesses, and individuals are not eligible. In addition, due to the limited funds available for the PPIS program this year, those organizations awarded a pollution prevention grant in FY 1991 are not eligible for funding again in FY 1992. However, applications from organizations that have been funded under this program in a year other than FY 1991 will receive consideration. Organizations excluded from applying directly are encouraged to work with eligible applicants in developing proposals that include them as participants in the projects. EPA strongly encourages this type of cooperative arrangement.

The *Catalogue of Federal Domestic Assistance* number assigned to this program is 66.900. Organizations receiving pollution prevention grant funds are required to match Federal funds by at least 50 percent (in other words, the Federal government will provide 1/2 of the total allowable cost of the project, the State 1/2 of the total allowable cost of the project. For example, a grant request for the maximum $200,000 would support a total allowable project cost of $400,000, with the State also providing $200,000). State contributions may include dollars and/or in-kind goods and services. Due to limited amount of funds available in FY 92, a maximum of one proposal per State will be funded.

Potential applicants from Indian tribes should also be aware that they are eligible to receive grants/cooperative agreements under EPA's Multimedia Assistance Agreements for Indian Tribes Program. The primary purpose of these multimedia assistance agreements is to directly assist tribes in developing the capacity to manage their environmental programs. Pursuant to Agency policy, pollution prevention should be the strategy of first choice in these programs. Only a 5 percent match is required in this program. Tribal governments should contact the Indian Coordinator in the EPA Regional Offices for more information.

Eligible activities. In general, the purpose of the Pollution Prevention Incentives for States grant program is to support the establishment and expansion of State-, regional-, or local-based pollution prevention programs. EPA specifically seeks to build State pollution prevention capabilities or to test, at the State level, innovative pollution prevention approaches and methodologies. Funds awarded under the Pollution Prevention Incentives for States grant program must be used to support pollution prevention programs that address the transfer of potentially harmful pollutants across all environmental media: air, water, and land. Programs should reflect comprehensive and coordinated pollution prevention planning and implementation efforts State- or region-wide. States might focus on, for example:

- Institutionalizing multimedia pollution prevention as an environmental management priority, establishing prevention goals, developing strategies to meet those goals, and integrating the pollution prevention ethic within both governmental and non-governmental institutions of the state or region.
- Developing other multimedia pollution prevention activities, including but not limited to: Providing direct technical assistance to businesses; collecting and analyzing data to target outreach and technical assistance opportunities; conducting outreach activities; developing measures to determine progress in pollution prevention; and identifying regulatory and non-regulatory barriers and incentives to pollution prevention and developing plans to implement solutions, where possible.
- Initiating demonstration projects that test and support innovative pollution prevention approaches and methodologies.

Proposal evaluation criteria. Proposals accepted for review under this program must qualify as pollution prevention. They also must identify plans for long term implementation of a multimedia pollution prevention program beyond the initial project funding period. In addition to those specified in the Act, the criteria against which grant/cooperative agreement applications will be evaluated include the following:

1. Goals and objectives are clearly identified and a strategy for meeting them is defined.

2. Multimedia opportunities and impacts are identified. A multimedia pollution prevention program addresses the prevention of pollution in and across all environmental media: air, land, and water.

3. Significant needs of the State or region are addressed and areas for significant risk reduction are targeted and integrated into overall pollution prevention goals and implementation strategies. Proposals are encouraged to address the goals of EPA's Pollution Prevention Strategy, to support programs focused on implementation of EPA's 33/50 project outlined in the Strategy, and to address the targeted high risk chemicals identified in the 33/50 project. A more complete summary of EPA's Pollution Prevention Strategy will be provided in each application kit.

4. The pollution prevention activities of other programs or organizations in the State or region are integrated and leveraged into the proposed program, as appropriate. Proposed activities augment and complement pollution prevention activities already underway in the State.

5. Measures of success are identified. There is a reasonable expectation for significant accomplishments in pollution prevention and there is an adequate system planned for measuring progress with environmental and/or programmatic indicators.

The following criterion applies to proposals submitted from organizations in States that have been funded previously under this program. The following have not received EPA support under this grant program and therefore do not have to address criterion 6: Maryland, Ohio, New Mexico, North Dakota, South Dakota, Montana, Wyoming, Arizona, Hawaii, Puerto Rico, the U.S. Virgin Islands, other territories, and all federally-recognized Indian tribes.

6. The proposal builds on existing pollution prevention activities currently underway in the State by:

- Integrating pollution prevention approaches into State regulatory programs, moving beyond the pure non-regulatory approach, or
- Establishing a State-wide pollution prevention infrastructure involving all levels of State government, including promoting interagency pollution prevention initiatives (with State departments such as agriculture, transportation, energy) and defining the roles of county and municipal government.

These criteria will be clarified further in the grant guidance included in the application kit.

Program management. There will be a two-phased review process. Interested applicants are first asked to submit to EPA a pre-proposal or abstract no longer than a one two-sided page. Pre-proposals will be evaluated based on the application evaluation criteria identified above. Applicants submitting the most successful pre-proposals will be invited to submit full proposals.

To submit a pre-proposal, interested applicants must:

1. Contact Lena Hann or Jackie Krieger at the phone number or address listed above to request guidance for submitting pre-proposals. Guidance will contain instructions regarding format and additional information on EPA's pollution prevention program.

2. Submit a pre-proposal to Lena Hann, Pollution Prevention Division (PM-222B), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Pre-proposals postmarked after Monday, April 20, 1992 will not be considered.

Other grant programs. EPA's Pollution Prevention Strategy also recognizes that there are substantial opportunities to promote prevention in other sectors, including agriculture, energy, and transportation, and commits the Agency to work with other Federal agencies to develop specific strategies for these sectors in the near future. To support this goal, EPA has established separate pollution prevention grant programs to target the following sectors with a high potential for risk reduction and for significant gains in pollution prevention:

- *Agriculture.* EPA and the U.S. Department of Agriculture are jointly administering a State grant program focused on sustainable agriculture. The program, Agriculture in Concert with the Environment (ACE), supports initiatives focused on the economic implications of sustainable agriculture, training, demonstrations of promising sustainable farming practices, and research on the effect of agricultural chemicals on wildlife and fish habitat.
- *Energy.* The U.S. Department of Energy and EPA are jointly managing a State grant program entitled National Industrial Competitiveness through Efficiency: Energy, Environment, and Economics (NICE3). The goals of the NICE3 program are to foster new industrial processes and/or equipment that can significantly reduce the generation of wastes in industry, to improve energy efficiency, and to enhance the competitiveness of U.S. industry.
- *Municipal Water Pollution Prevention.* In conjunction with EPA's Office of Water, the Office of Pollution Prevention has designed an initiative to foster the development of State pilot programs aimed at harnessing POTWs as a force for achieving pollution prevention in local communities.

The agriculture, energy, and municipal water pollution prevention grant initiatives are funded and managed separately from the Pollution Prevention Incentives for States Grant Program discussed in this notice. For further information on these programs, please contact the following:

ACE: Harry Wells, (202) 260-4472
NICE3: Brian Symmes, (202) 260-3590
POTWs: Deborah Hanlon, (202) 260-2728

EPA has established a public docket for this Notice of Availability, docket number "OPPT-350000", which is available for inspection in room NE-G004, 401 M St., SW., Washington, DC., 20460, Monday through Friday, excluding legal holidays, from 8 a.m. to 12 noon, and from 1 p.m. to 4 p.m.

Dated: March 9, 1992.

Linda J. Fisher,

Assistant Administrator for Prevention, Pesticides and Toxic Substances.

BILLING CODE 6560-50-F

EXPORT-IMPORT BANK OF THE UNITED STATES

Open Meeting of the Advisory Committee of the Export-Import Bank of the United States

SUMMARY: The Advisory Committee was established by Public Law 98-181, November 30, 1983, to advise the Export-Import Bank on its programs and to provide comments for inclusion in the reports of the Export-Import Bank to the United States Congress.

Time and Place: Thursday, April 2, 1992, from 3:30 p.m. to 5 p.m. The meeting will be held at Eximbank in room 1143, 811 Vermont Avenue, NW., Washington, DC 20571.

Agenda: The meeting agenda will include a discussion of the following topics: Advisory Committee Responsibilities; Financial and Budget Status Report; Congressional Status Report, OECD Agreement Status Report/Activity Review; Small Business Report; Report on FY 1991 Advisory Committee Recommendations; and other topics.

Public Participation: The meeting will be open to public participation; and the last 15 minutes will be set aside for oral questions or comments. Members of the public may also file written statement(s) before or after the meeting. In order to permit the Export-Import Bank to arrange suitable accommodations, members of the public who plan to attend the meeting should notify Joan P. Harris, room 935, 811 Vermont Avenue, NW., Washington, DC 20571, (202) 566-8871, not later than April 1, 1992. If any person wishes auxiliary aids (such as a sign language interpreter) or other special accommodations, please contact, prior to March 27, 1992, the Office of the Secretary, room 935, 811 Vermont Avenue, NW., Washington, DC 20571, Voice: (202) 566-8871 or TDD: (202) 535-3913.

Further Information: For further information, contact Joan P. Harris,

room 935, 811 Vermont Avenue, NW., Washington, DC 20571, (202) 566–0871.

Joan P. Harris,

Corporate Secretary.

BILLING CODE 6690–01–M

FEDERAL MARITIME COMMISSION

L.A. Cruise Ship Terminals, Inc., et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which the notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200632.

Title: L.A. Cruise Ship Terminals, Inc./Carnival Cruise Line Customer Agreement.

Parties: L.A. Cruise Ship Terminals, Inc. ("L.A. Cruise") Carnival Cruise Line ("Carnival").

Synopsis: The proposed Agreement would permit L.A. Cruise to provide terminal facilities and services to Carnival at the Port of Los Angeles, California.

Agreement No.: 224–200633.

Title: Alabama State Docks Department/Premier Stevedoring, Inc. Cargo and Freight Handling Agreement.

Parties: Alabama State Docks Department ("Department") Premier Stevedoring, Inc.

Synopsis: This Agreement, filed March 10, 1992, permits and designates Premier Stevedoring to perform or have performed cargo and freight handling services at the Alabama State Dock Department's facilities at the Port of Mobile. The Department shall retain ten percent (10%) of all charges, exclusive of overtime, collected with respect to cargo and freight handling rendered by Premier Stevedoring.

Dated: March 11, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

[FR Doc. 92–6135 Filed 3–16–92; 8:45 am]

BILLING CODE 6730–01–M

Port of New Orleans; et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC, Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200300–001.

Title: Port of New Orleans/Coastal Cargo Company, Inc. Terminal Agreement.

Parties: The Port of New Orleans, Coastal Cargo Company, Inc.

Synopsis: The subject amendment extends the original two-year term of the agreement for an additional 30 days until April 7, 1992.

Agreement No.: 224–200630.

Title: Port Authority of New York and New Jersey/Maher Terminals Inc. Terminal Agreement.

Parties: The Port Authority of New York and New Jersey Maher Terminals, Inc. ("Maher").

Synopsis: The proposed Agreement would permit Maher to utilize approximately five acres of open area adjacent to Maher's Tripoli Street Container Terminal until May 2, 1992.

Dated: March 10, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

[Docket No. 92–08]

Compania Trasatlantica Espanola, S.A. Trasatlantica Agency (USA) Inc. v. Virginia International Terminals, Inc.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Compania Trasatlantica Espanola, S.A. ("CTE") and Trasatlantica Agency (USA) Inc. ("Complainants") against Virginia International Terminals, Inc. ("Respondent") was served March 10, 1992. Complainants allege that Respondent has violated sections 10(b)(11), (b)(12), (d)(1) and (d)(3) of the Shipping Act of 1984, 46 U.S.C. app. 1709(b)(11), (b)(12), (d)(1) and (d)(3), by *inter alia*, assessing charges against Complainants that are not provided for in Respondent's terminal tariff on file with the Commission, retaliating against Complainant CTE for no longer making vessel calls at Portsmouth Marine Terminal, invoicing Complainants for dockage even though Complainants have no vessels calling at Respondent's facilities, invoicing for charges bearing little or no relation to services rendered and for fewer benefits than other parties receive, invoicing Complainants for charges for the same service being fully charged to another user, intentionally interfering or threatening to interfere in Complainants' relationship with their customers and principals, damaging or threatening to damage Complainants' reputations, retaliating against and threatening to refuse to serve Complainants, and threatening to refuse to deal with Complainants.

This proceeding has been assigned to Administrative Law Judge Frederick M. Dolan ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by March 10, 1993, and the final decision of the

Commission shall be issued by July 8, 1993.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

[Docket No. 92–09]

Universal Fixture Manufacturing Co., Inc. v. Asia North America Eastbound Rate Agreement; Filing of Complaint and Assignment

Notice is given that a complaint filed by Universal Fixture Manufacturing C., Inc. ("Complainant") against Asia North America Eastbound Rate Agreement ("Respondent") was served March 11, 1992. Complainant alleges that Respondent engaged in violations of sections 3(21), 8(c), 10(b) (1), (6)(A), (10), (11) and (12) of the Shipping Act of 1984, 46 U.S.C. app. 1702(21), 1707(c) and 1709(b)(1), (5)(A), (10), (11) and (12), in seeking to collect liquidated damages under an illegal, unlawful and illusory agreement, in addition to freight paid under tariffs on file with the Commission.

This proceeding has been assigned to Administrative Law Judge Frederick M. Dolan ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by March 11, 1993, and the final decision of the Commission shall be issued by July 9, 1993.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Farmers State Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 10, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. Farmers State Bancshares, Inc., Mountain City, Tennessee; to become a bank holding company by acquiring 100 percent of the voting shares of Farmers State Bank, Mountain City, Tennessee.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First of America Bank Corporation, Kalamazoo, Michigan; to acquire 100 percent of the voting shares of First of America Bancshares, Inc., Petersburg, Illinois, a *de novo* bank holding company, and First Petersburg Bancshares, Inc., Petersburg, Illinois, and thereby indirectly acquire First National Bank of Petersburg, Petersburg, Illinois.

C. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Mabrey Insurance Agency, Okmulgee, Oklahoma; to acquire Morris State Bank, Morris, Oklahoma.

Board of Governors of the Federal Reserve System, March 11, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

James Lewis Hewitt, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 10, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. James Lewis Hewitt, Orlando, Florida; to retain an additional 5.0 percent, for a total of 22.4 percent, of the voting shares of Florida Security Holding Corporation, Orlando, Florida, and thereby indirectly acquire United American Bank of Central Florida, Orlando, Florida.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Norman Dean Oswald, Duncanville, Texas; to acquire 34.89 percent of the voting shares of Metroplex Bancshares, Inc., Dallas, Texas, and thereby indirectly acquire Bent Tree National Bank, Dallas, Texas.

Board of Governors of the Federal Reserve System, March 11, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

Village Financial Services, Ltd.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities

of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 10, 1992.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. Village Financial Services, Ltd., Port Chester, New York; to acquire 100 percent of the voting shares of Village Bank of Connecticut, Stamford, Connecticut, a *de novo* bank.

In connection with this application, Applicant also proposes to acquire Sentry Savings and Loan Association, Stamford, Connecticut, which will be merged into Village Bank of Connecticut immediately upon acquisition.

Board of Governors of the Federal Reserve System, March 11, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

[Dkt. C-3373]

Roberto Fojo, M.D.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order prohibits, among other things, a Miami, Florida, obstetrician/gynecologist from agreeing with any other physician to withhold or threaten to withhold emergency room services at any hospital, and, for a period of five years, from threatening that any physician would or might withhold such services at any hospital.

DATES: Complaint and Order issued March 2, 1992.[1]

FOR FURTHER INFORMATION CONTACT: Barry Costilo or Paul Nolan, FTC/S-2627 or S-3115, Washington, DC 20580. (202) 326-2748 or 326-2770.

SUPPLEMENTARY INFORMATION: On Thursday, December 19, 1991, there was published in the **Federal Register**, 56 FR 65901, a proposed consent agreement with analysis In the Matter of Roberto Fojo, M.D., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Donald S. Clark,

Secretary.

[Dkt. C-3372]

Service Corporation International; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires, among other things, a Houston, Texas, based corporation to divest, within twelve months, four Pierce Brothers funeral homes, and, for ten years, to obtain prior Commission approval before acquiring any additional funeral homes in the San Bernardino/Riverside, California, areas.

DATES: Complaint and Order issued February 25, 1992.[1]

FOR FURTHER INFORMATION CONTACT: Katherine Alphin, Atlanta Regional Office, Federal Trade Commission, 1718 Peachtree St., NW., room 1000, Atlanta, GA. 30367. (404) 347-4836.

SUPPLEMENTARY INFORMATION: On Friday, December 13, 1991, there was published in the **Federal Register**, 56 FR 65088, a proposed consent agreement with analysis In the Matter of Service Corporation International, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[ATSDR-51]

Quarterly Health Assessments Completed and Health Assessments To Be Conducted in Response to Requests From the Public

AGENCY: Agency for Toxic Substances and Disease Registry (ATSDR), Public Health Service (PHS), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice contains the following: 1. A list of sites for which ATSDR has completed a health assessment, or issued an addendum to a previously completed health assessment, during the period October-December 1991. This list includes sites that are on, or proposed for inclusion on, the National Priorities List (NPL). 2. A list of sites for which ATSDR, during the same period, has accepted a request from the public to conduct a health assessment (petitioned health assessment). Acceptance for a request for the conduct of a health assessment is based on a determination by the Agency that there is a reasonable basis for conducting a health assessment at the site.

FOR FURTHER INFORMATION CONTACT: Robert C. Williams, P.E., Director, Division of Health Assessment and Consultation, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road, NE., Mailstop E32, Atlanta, Georgia 30333, telephone (404) 639-0610 or FTS 236-0610.

SUPPLEMENTARY INFORMATION: A list of completed health assessments, health assessments with addenda, and petitioned health assessments which were accepted by ATSDR during July-September 1991 was published in the **Federal Register** on December 30, 1991, (56 FR 67322). The quarterly announcement is the responsibility of ATSDR under the regulation, Health Assessments and Health Effects Studies of Hazardous Substances Releases and Facilities (42 CFR part 30). This rule sets forth ATSDR's procedures for the conduct of health assessments under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act (SARA) (42 U.S.C. 9604(i)), and appeared in the **Federal Register** on February 13, 1990 (55 FR 5136).

Availability

The completed health assessments are available for public inspection at the Division of Health Assessment and Consultation, Agency for Toxic Substances and Disease Registry, Building 33, Executive Park Drive, Atlanta, Georgia (not a mailing address), between 8 a.m. and 4:30 p.m., Monday through Friday except legal holidays. The completed health assessments are also available by mail through the U.S. Department of Commerce, National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161, or by telephone at (703) 487-4650. There is a charge determined by NTIS for these health assessments. The NTIS order numbers are listed in parentheses after the site name.

1. Health Assessments or Addenda Completed or Issued

Between October 1, 1991, and December 31, 1991, health assessments or addenda to health assessments were issued for the NPL sites listed below:

Iowa
- Northwestern States Portland Cement Company—Mason City—(PB92-134618)
- Sheller-Globe Corporation Disposal—Keokuk—(PB92-140375)

Michigan
- Hi-Mill Manufacturing Company—Highland—(PB92-111004)

Minnesota
- Union Scrap Iron and Metal—Minneapolis—(PB92-140367)

Missouri
- West Lake Landfill—Bridgeton—(PB92-110964)

Oregon
- Union Pacific Railroad, Kerr McGee Tie Point—The Dalles—(PB92-133396)

Pennsylvania
- Brodhead Creek—Stroudsburg—(PB92-134626)

Vermont
- Burgess Brothers Landfill—Woodford—(PB92-134592)

Wisconsin
- Fort Howard Paper Company Sludge Lagoons—Green Bay—(PB92-134600)

2. Petition for Health Assessment Accepted

Between October 1, 1991, and December 31, 1991, ATSDR determined that there was a reasonable basis to conduct a health assessment for the site listed below in response to requests from the public. As of December 31, 1991, ATSDR initiated a health assessment at this site.

Colorado
- Hansen Containers—Grand Junction

Dated: March 11, 1992.

William L. Roper,

Administrator, Agency for Toxic Substances and Disease Registry.

[FR Doc. 92-6122 Filed 3-16-92; 8:45 am]

BILLING CODE 4160-70-M

[ATSDR-48]

Change in Name of Health Assessment to Public Health Assessment

AGENCY: Agency for Toxic Substances and Disease Registry (ATSDR), Public Health Service (PHS), Department of Health and Human Services (HHS).

ACTION: Notice of change in document name from health assessment to public health assessment.

SUMMARY: This notice serves to announce that ATSDR is changing the name of the documents curently entitled health assessments to public health assessments. The decision to make this change results from the need to develop a name that more accurately reflects the nature of the activities that are conducted when ATSDR evaluates the human health effects of hazardous substance releases into the environment.

SUPPLEMENTARY INFORMATION: Section 104(i)(6)(A) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended (42 U.S.C. 9604(i)(6)(A)), requires ATSDR to conduct health assessments of sites on or proposed for inclusion on the National Priorities List established by the Environmental Protection Agency. In addition, section 104(i)(6)(B) of CERCLA provides that any person or group or persons may submit evidence of a release of or exposure to a hazardous substance to ATSDR and request ATSDR to perform a health assessment. Further, section 3019(b) of the Resource Conservation and Recovery Act of 1984 (RCRA), as amended (42 U.S.C. 6939a) provides that when, in the judgement of the U.S. Environmental Protection Agency (EPA) or a state, a landfill or surface impoundment poses a substantial potential risk to human health, the EPA or state may request ATSDR to perform a health assessment.

Specifically, section 104(i)(6)(F) of CERCLA and section 3019(f) of RCRA state: "* * * the term 'health assessments' shall include preliminary assessments of the potential risk to human health posed by individual sites and facilities * * *." ATSDR has determined through discussions with the public that the term "health assessment" does not always accurately describe the

activities ATSDR carries out when conducting a health assessment. For that reason, the Agency has considered another name for health assessments that better distinguishes between its efforts to evaluate the health status of a population that is potentially exposed to hazardous substances, and the efforts of a health care provider to evaluate the health status of an individual person.

The practice of public health has been defined as the art and science of protecting and improving community health by means of preventive medicine, health promotion, disease control, and the application of social and sanitary sciences. A community may be defined as a group or class having common interests. The term "public health assessment" encompasses the art and science of dealing with public health issues related to hazardous substance releases into the environment, and imparts a sense of community involvement or awareness to the process and to the document. The concepts of public health and community are consistent with the intent and use of what is called a "health assessment" in CERCLA and RCRA.

For these reasons, ATSDR is changing the name of the document currently entitled health assessment to public health assessment.

FOR FURTHER INFORMATION CONTACT: Robert C. Williams, P.E., Director, Division of Health Assessment and Consultation, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road, NE, Mailstop E–32, Atlanta Georgia 30333, telephone (404) 639–0610 or FTS 236–0610.

Dated: March 11, 1992.

William L. Roper,

Administrator, Agency for Toxic Substances and Disease Registry.

BILLING CODE 4160–70–M

Centers for Disease Control

Request for Nominations of Candidates to Serve on the Clinical Laboratory Improvement Advisory Committee, Department of Health and Human Services

The Public Health Service is soliciting additional nominations for possible membership on the Clinical Laboratory Improvement Advisory Committee. This committee will provide scientific and technical advice and guidance to the Secretary and the Assistant Secretary for Health regarding the need for, and the nature of, revisions to the standards under which clinical laboratories are regulated; the impact on medical and laboratory practice of proposed revisions to the standards; and the modification of the standards to accommodate technological advances.

Nominations are being sought for the fields of microbiology (including bacteriology, mycobacteriology, mycology, parasitology, and virology); immunology (including histocompatibility); chemistry; hematology; pathology (including histopathology, cytology, and cytogenetics); and representatives of medical technology, public health, clinical practice, and consumers. Federal employees will not be considered for membership.

Close attention will be given to minority and female representation; therefore, nominations from these groups are encouraged.

The following information is requested: name, affiliation, address, telephone number, and a current curriculum vitae. Nominations should be sent, in writing, and postmarked by April 17, 1992, to: Mr. James D. Bloom, Centers for Disease Control, 1600 Clifton Road, NE., (E–42), Atlanta, Georgia 30333. Telephone or facsimile submissions cannot be accepted.

Dated: March 11, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160–18–M

Food and Drug Administration

[Docket No. 92F–0056]

Arakawa Chemical Industries, Ltd.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Arakawa Chemical Industries, Ltd., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of hydrogenated aromatic petroleum hydrocarbon resin in coatings on paper and paperboard in contact with fatty foods.

FOR FURTHER INFORMATION CONTACT: Andrew J. Zajac, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–254–9500.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 2B4315) has been filed by Arakawa Chemical Industries Ltd., c/o 1001 G St. NW., suite 500 West, Washington, DC 20001. The petition proposes to amend the food additive regulations in § 176.170 Components of paper and paperboard in contact with aqueous and fatty foods (21 CFR 176.170) to provide for the safe use of hydrogenated aromatic petroleum hydrocarbon resin in coatings on paper and paperboard in contact with fatty foods.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: March 6, 1992.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

[Docket No. 92N–0130]

Drug Export; Antihemophilic Factor (Human), Affinity Chromatography Purified, Solvent Detergent Treated, Method B

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Alpha Therapeutic Corp. has filed an application requesting approval for the export of the biological product Antihemophilic Factor (Human), Affinity Chromatography Purified, Solvent Detergent Treated, Method B to The Federal Republic of Germany.

ADDRESS: Relevant information on this application may be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Boyd Fogle, Jr., Center for Biologics Evaluation and Research (HFB–120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8191.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99–660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of biological products that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Alpha Therapeutic Corp., 5555 Valley Blvd., Los Angeles, CA 90032, has filed an application requesting approval for the export of the biological product Antihemophilic Factor (Human), Affinity Chromatography Purified, Solvent Detergent Treated, Method B to the Federal Republic of Germany. Antihemophilic Factor (Human), Affinity Chromatography Purified, Solvent Detergent Treated, Method B is intended for use in the treatment of congenital, acquired factor VIII deficiency, or Von Willebrand's disease associated with factor VIII deficiency. The applicaion was received and filed in the Center for Biologics Evaluation and Research on February 24, 1992, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 27, 1992, and to provide and additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (section 802 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Biologics Evaluation and Research (21 CFR 5.44).

Dated: March 6, 1992.

Thomas S. Bozzo,

Director, Office of Compliance, Center for Biologics Evaluation and Research.

Indian Health Service; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HG (Indian Health Service) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services, Public Health Service (PHS), Chapter HG, Indian Health Service (IHS), 52 FR 47053–67, December 11, 1987, as most recently amended at 57 FR 4051, February 3, 1992, is amended to reflect the establishment of an organization substructure for the Navajo Area Office to more accuratley reflect current activities in the Area.

Under Chapter HG, Section HG–20, Functions, after the statement for the IHS Area Office (HGF), Information and Resources Management Programs, insert the following:

Navajo Area Office (HGFJ)

Office of the Area Director (HGFJ1).

(1) Plans, develops, and directs the Area Program within the framwork of Indian Health Service (IHS) policy in pursuit of the IHS mission; (2) delivers and ensures the delivery of high quality comprehensive health services; (3) coordinates the IHS activities and resources internally and externally with those of other governmental and non-govermental programs; (4) promotes optimum utilization of health care services through management and delivery of services to American Indians and Alaska Natives; (5) ensures the full application of the principles of Indian preference and Equal Employment Opportunity (EEO); and (6) provides Indian tribes and other Indian community groups with optional ways of participating in the Indian health programs including an opportunity to participate in developing the goals and objectives for the Navajo Area IHS.

Office of Administration and Management (HGFJ2)

(1) Plan, directs, and coordinates Area activities in policy, internal controls, financial mangement, personnel management, third-party reimbursements, contract health service, grants and contracts management, procurement, real and personal property accountability/management, and administrative services; (2) functions as the Area advisor on all organization and mangement policy activities; and (3) provides guidance and assistance to service units in the overall development, planning, and implementation of administrative functions.

Office of Environmental Health and Engineering (HGFJ3).

(1) Establishes policies related to Area health care and sanitation facilities planning, construction, operations, and maintenance; (2) provides leadership, guidance, and coordination to the overall Area facilities management programs; (3) develops and coordinates program requirements for the plannig, design, and evaluation of health care and sanitation facilities; and (4) develops, coordinates, and evaluates technical standards, guides, and plans for health care and sanitation facilities construction requirements within the Area.

Office of Program Planning and Evaluation (HGFJ4)

(1) Serves as the Area's primary staff element and principal source of advice on program planning and evaluation; (2) plans, develops, directs, coordinates, and monitors statistical reporting systems providing data for measuring health status and appraising program activities; (3) maintains, analyzes, and publishes statistical data on morbidity, mortality, and related demographic data concerning the Indian population; (4) provides statistical advice and information to all organizational entities of the Area for projects dealing with policy formulation, budget preparation/justification, program planning/evaluation, health status assessment, health systems description, resource requirements and location, and health research; (5) coordinates communications between the Area, service units, PHS, and HHS on matters involving long-range planning and evaluations of program performance; (6) coordinates activities within the Area which compare the costs of programs with their benefits, including but not limited to, the preparation and implementation of comprehensive program evaluation plans; (7) solicits and monitors evaluation projects consistent with Area priorities; and (8) conducts policy analysis and research for program accountability and evaluation to assist management in program policy decision making.

Office of Health Programs (HGFJ5)

(1) Provides consultation and technical assistance to all operating and management levels of the Area and to tribes in the design and implementation of health program services delivery systems; (2) provides guidance and support to all field activities related to the day-to-day delivery of health care; (3) provides Area-wide leadership to health programs in relation to IHS goals, objectives, policies, and priorities; (4) provides leadership in the development and implementation of health care standards, quality control/assurance, and risk management activities; (5) conducts reviews of health programs; and (6) provides direction, guidance, and coordination for health manpower recruitment activities.

Office of Tribal Affairs (HGFJ6)

(1) Coordinates the development of optional and supportive relationships with the local tribal government; (2) provides advice on the effect and impact of IHS policies, plans, programs, and operations on tribal operations and relationships; (3) provides guidance on new methods and techniques for Indian community participation in and management of their health programs; and (4) provides technical assistance to the tribe in such areas as resource development, health planning, health board, and staff training.

Navajo Area service Units (HGFJA Through HGFJE, HGFJG, HGFJH, and HGFJJ)

Chinle Service Unit (HGFJA); Crownpoint Service Unit (HGFJB); Fort Defiance Service Unit (HGFJC); Gallup Service Unit (HGFJD); Kayenta Service Unit (HGFJE); Tuba City Service Unit (HGFJG); Winslow Service Unit (HGFJH); and Shiprock Service Unit (HGFJJ). (1) Plans, develops, and directs health programs within the framework of IHS policy and mission; (2) promotes activities to improve and maintain the health and welfare of the service population; (3) delivers quality health services with available resources; (4) coordinates service unit activities and resources with those of other governmental and non-governmental programs; (5) participates in the development and demonstration of alternative means and techniques of health services management and health care delivery; (6) provides Indian tribes and other Indian community groups with optimal means of participating in service unit programs; and (7) encourages and supports the development of individual and tribal entities in the managment of the service unit.

Under Section HG-30, Order of Succession, following item number (5) add: During the absence or disability of the Area Director of the Navajo Area Office, or in the event of a vacancy in that office, the first Area official listed below who is available shall act as the Area Director, except that during a period of planned absence, the Area Director may specify a different order of succession. The order of succession will be:

(1) Chief Medical Officer, Office of the Area Director.
(2) Executive Officer, Office of the Area Director.
(3) Associate Director, Office of Environmental Health and Engineering.
(4) Program Analysis Officer, Office of Program Planning and Evaluation.
(5) Area Nurse Consultant, Nursing Services Division.
(6) Tribal Affairs Officer, Office of Tribal Affairs.

Section HG-40 Delegations of Authority

Add the following new paragraph: All delegations and redelegations of authority made to IHS Area Offices which were in effect immediately prior to this reorganization, and which are consistent with the reorganization of January 18, 1989 shall continue in effect pending further redelegation.

Dated: March 11, 1992.

Everett R. Rhoades,

Assistant Surgeon General Director.

BILLING CODE 4160-16-M

Social Security Administration

Redelegation of Authority to Report to the Congress and to Publish in the Federal Register Proposed Changes in the Social Security Number Card

Section 274A(d)(3)(A) of the Immigration and Nationality Act (the Act) states that the President may not implement a "major change" in the national employment verification system unless the President notifies the Congress of the change and publishes the substance of such a change in the **Federal Register.** 8 U.S.C. 1324a(d)(3)(A). The Act also defines the term "major change" to include a change in the Social Security number card. 8 U.S.C. 1324a(d)(3)(D). On February 10, 1992, the President delegated to the Secretary of Health and Human Services (the Secretary) the authority to notify the Congress of a change in the Social Security number card and to publish the substance of such a change in the **Federal Register,** to the extent required by section 274A(d)(3)(A) of the Act. The Secretary was authorized to redelegate these functions.

Notice is hereby given that the Secretary has redelegated to the Commissioner of Social Security (the Commissioner):

(1) The authority to prepare and transmit to the Committee on the Judiciary and the Committee on Ways and Means of the House of Representatives and to the Committee on the Judiciary and the Committee on Finance of the Senate a written report regarding the substance of any proposed change in Social Security number cards, to the extent required by section 274A(d)(3)(A) of the Act, and

(2) The authority to cause to have published in the **Federal Register** the substance of any change in the Social Security number card so proposed and reported to the designated congressional committees, to the extent required by section 274A(d)(3)(A) of the Act.

(3) The authority redelegated to the Commissioner by this statement may be redelegated by the Commissioner to appropriate officials of the Social Security Administration.

This redelegation to the Commissioner is effective on the date that it is published in the **Federal Register.** I affirm and ratify any actions by the Commissioner which may constitute the exercise of this authority before the date that notice of this redelegation is published in the **Federal Register.**

Dated: March 6, 1992.

Louis W. Sullivan,

Secretary.

BILLING CODE 4190-11-M

[Social Security Acquiescence Ruling 92-2(6)]

Difford v. Secretary of Health and Human Services, 910 F.2d 1316 (6th Cir. 1990), Reh'g Denied, February 7, 1991—Scope of Review on Appeal in a Medical Cessation of Disability Case

AGENCY: Social Security Administration, HHS.

ACTION: Notice of Social Security Acquiescence Ruling.

SUMMARY: In accordance with 20 CFR 422.406(b)(2) published January 11, 1990 (55 FR 1012), the Commissioner of Social Security gives notice of Social Security Acquiescence Ruling 92-2(6).

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: Darlynda Bogle, Litigation Staff, Social Security Administration, 6401 Security Blvd., Baltimore, MD 21235, (410) 965-4237.

SUPPLEMENTARY INFORMATION: Although not required to do so pursuant to 5 U.S.C. 552 (a)(1) and (a)(2), we are publishing this Social Security Acquiescence Ruling in accordance with 20 CFR 422.406(b)(2).

A Social Security Acquiescence Ruling explains how we will apply a holding in a decision of a United States Court of Appeals that we determine conflicts with our interpretation of a provision of the Social Security Act or regulations when the Government has decided not to seek further review of that decision or is unsuccessful on further review.

We will apply the holding of the Court of Appeals decision as explained in this Social Security Acquiescence Ruling to cases at the disability hearing/reconsideration, Administrative Law Judge and Appeals Council levels within the Sixth Circuit. This Social Security Acquiescence Ruling will apply to all determinations and decisions made on or after March 17, 1992. If we made a determination or decision on the medical cessation of your disability between August 10, 1990, the date of the Court of Appeals' decision and March 17, 1992, the effective date of this Social Security Acquiescence Ruling, you may request application of the Social Security Acquiescence Ruling to your claim if you first demonstrate, pursuant to 20 CFR 404.985(b), that application of the Ruling could change our prior determination or decision.

If this Social Security Acquiescence Ruling is later rescinded as obsolete, we will publish a notice in the **Federal Register** to that effect as provided for in 20 CFR 404.985(e). If we decide to relitigate the issue covered by this Social Security Acquiescence Ruling as provided for by 20 CFR 404.985(c), we will publish a notice in the **Federal Register** stating that we will apply our interpretation of the Act or regulations involved and explaining why we have decided to relitigate the issue.

Gwendolyn S. King,

Commissioner of Social Security.

Acquiescence Ruling 92-2(6)

Difford v. *Secretary of Health and Human Services*, 910 F.2d 1316 (6th Cir. 1990), *reh'g denied*, February 7, 1991—Scope of Review on Appeal in a Medical Cessation of Disability Case—Title II of the Social Security Act.

Issue

Whether in deciding the appeal of a determination that an individual's disability has medically ceased, the adjudicator must consider the issue of the individual's disability through the date of the Secretary's final decision, rather than deciding the appeal based on the issue of continuing disability only through the date of the initial cessation determination.

Statute/Regulation/Ruling Citation

Section 223(f) of the Social Security Act (42 U.S.C. 423(f)), 20 CFR 404.1579, 404.1589, 404.1590, 404.1594.

Circuit

Sixth (Kentucky, Michigan, Ohio, Tennessee)

Difford v. *Secretay of Health and Human Services*, 910 F.2d 1316 (6th Cir. 1990), *reh'g denied*, February 7, 1991.

Applicability of Ruling

The court's holding affects only cases at the disability hearing/reconsideration, Administrative Law Judge and Appeals Council levels. Therefore, this Ruling applies only to determinations or decisions made at those levels.

Description of Case

On October 19, 1976, the plaintiff applied for disability benefits. It was determined that he was disabled effective April 2, 1976. In June 1982, he was notified of a proposal to terminate his benefits because current medical records showed that he was no longer disabled. Benefits were terminated as of August 31, 1982. The plaintiff's request for reconsideration was denied and he did not pursue any further appeal.

The plaintiff filed a new application on May 16, 1983. This application was denied initially and throughout the administrative review process, culminating in the Appeals Council denying the plaintiff's request for review on April 13, 1984. The plaintiff did not file any action in court to challenge the final decision of the Secretary.

In June 1984, the plaintiff obtained employment. On January 2, 1985, he injured his knee and back in an accident at work. He had surgery on his right knee in January 1985 and became unemployed.

Because the plaintiff was a member of the *Holden* class (*Holden* v. *Heckler*, 584 F.Supp. 463 (N.D. Ohio 1984), an Ohio class action which successfully challenged the Secretary's former policies and procedures used in continuing disability reviews), he received notice in February 1985 that he had the right to apply for reinstatement of his disability benefits and to have his claim reviewed under the appropriate medical improvement standard. He requested review of his case on March 19, 1985. The Secretary determined, both initially and on reconsideration, that the original termination decision was correct. On January 28, 1988, after considering only the evidence of the plaintiff's condition through June 1982, an Administrative Law Judge issued a decision finding that the plaintiff's disability had ceased as of June 1982 because his condition had medically improved. The Appeals Council denied the request for review. Accordingly, the Administrative Law Judge's decision became the final decision of the Secretary. The plaintiff then sought judicial review.

In affirming the Secretary's cessation decision, the district court noted that the plaintiff had worked for six months after it had been determined that his disability had ceased. The court found that the plaintiff's knee and arthritis impairments as of the time of the Administrative Law Judge hearing were a direct result of his 1985 job-related accident. Therefore, the court concluded that the relevant time frame for consideration of cessation of disability was 1976–1982. The plaintiff then appealed to the United States Court of Appeals for the Sixth Circuit.

Holding

The Sixth Circuit stated that the case turned "on the correct interpretation of certain provisions of section 2(a) of * * * Public Law 98-460, 98 Stat. 1794 (1984), codified at 42 U.S.C. 423(f), which sets the standard of review for termination of disability benefits." Those provisions, in relevant part, provide as follows:

> A recipient of benefits under this title or title XVIII based on the disability of any individual may be determined not to be entitled to such benefits on the basis of a finding that the physical or mental impairment on the basis of which such benefits are provided has ceased, does not exist, or is not disabling only if such finding is supported by—
>
> (1) substantial evidence which demonstrates that—
>
> (A) there has been any medical improvement in the individual's impairment or combination of impairments (other than medical improvement which is not related to the individual's ability to work), and
>
> (B) the individual is now able to engage in substantial gainful activity * * *

* * * * *

Any determination under this section shall be made on the basis of all the evidence available in the individual's case file, including new evidence concerning the individual's prior or current condition which is presented by the individual or secured by the Secretary. (Emphasis added.)

The court held that:

the plain meaning of statutory references to "now" or "current" compels a consideration of an individual's ability to perform substantial gainful activity at the time of the hearing. * * * We note, however, that interpretation of section 423(f) to require assessment of Difford's condition as of the 1988 hearing does not preclude a finding by the Secretary that the length of time of Difford's employment * * * is a period of non-disability for which benefits may be withheld.

910 F.2d at 1320, emphasis added.

Statement as To How Difford Differs From SSA Policy

SSA interprets the term "current," as used in the statutory and regulatory language concerning termination of disability benefits, to relate to the time of the cessation under consideration in the initial determination of cessation. In making any initial determination that a claimant's disability has ceased, SSA considers the claimant's condition at the time SSA is making the initial determination. In deciding the appeal of that cessation determination, the Secretary considers what the claimant's condition was at the time of the cessation determination, not the claimant's condition at the time of the disability hearing/reconsideration determination, ALJ decision or Appeals Council decision. However, if the evidence indicates that the claimant's condition may have again become disabling subsequent to the cessation of his or her disability or that he or she has a new impairment, the adjudicator solicits a new application.

The Sixth Circuit Court of Appeals has found that, in reviewing a cessation determination, SSA must consider the claimant's condition through the date of the Secretary's final determination or decision.

Explanation of How SSA Will Apply This Decision Within the Circuit

This Ruling applies to cases involving claimants who reside in Kentucky, Michigan, Ohio, or Tennessee at the time of the determination or decision at the disability hearing/reconsideration, the Administrative Law Judge or Appeals Council levels.

In making a determination or decision concerning whether or not an individual's disability has ceased, the disability hearing officer, Administrative Law Judge or Appeals Council may not limit consideration to the period of time ending with the date disability was initially determined to have ceased, but must also give consideration to the individual's ability to perform substantial gainful activity through the date on which the appeal determination or decision is being made.

The adjudicator will consider whether the initial cessation determination was correct. If the adjudicator determines that the initial cessation was correct, he or she will then consider whether the claimant has again become disabled at any time through the date of his or her determination or decision as a result of a worsening of an existing impairment or by the onset of a new impairment. If, on the other hand, the adjudicator determines that the initial cessation determination was not correct, the adjudicator will determine if the evidence establishes medical improvement as a basis for termination of benefits as of any time through the date of his or her determination or decision. In every case where it is established that the claimant was not continuously disabled through the date of the appeal determination, the adjudicator will fully explain the basis for the conclusions reached, and will state the month that the claimant's disability ended, and, if applicable, the month a new disability began and any intervening months of nondisability.

BILLING CODE 4190-29-M

[Social Security Ruling SSR 92-3c]

Timely Filing for Attorney Fees Under the Equal Access to Justice Act

AGENCY: Social Security Administration, HHS.

ACTION: Notice of Social Security Ruling.

SUMMARY: In accordance with 20 CFR 422.406(b)(1), the Commissioner of Social Security gives notice of Social Security Ruling 92-3c. This Ruling, based on the Supreme Court's decision in *Melkonyan v. Sullivan*, ____ U.S. ____, 111 S. Ct. 2157 (1991), concerns the timely filing for attorney fees under the Equal Access to Justice Act (EAJA)—whether an administrative decision rendered following a court remand is a "final judgment" within the meaning of the EAJA.

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: Joanne K. Castello, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235, (410) 965-1711.

SUPPLEMENTARY INFORMATION: Although we are not required to do so pursuant to 5 U.S.C. 552(a)(1) and (a)(2), we are publishing this Social Security Ruling in accordance with 20 CFR 422.406(b)(1).

Social Security Rulings make available to the public precedential decisions relating to the Federal old-age, survivors, disability, supplemental security income, and black lung benefits programs. Social Security Rulings may be based on case decisions made at all administrative levels of adjudication, Federal court decisions, Commissioner's decisions, opinions of the Office of the General Counsel, and other policy interpretations of the law and regulations.

Although Social Security Rulings do not have the force and effect of the law or regulations, they are binding on all components of the Social Security Administration, in accordance with 20 CFR 422.406(b)(1), and are to be relied upon as precedents in adjudicating other cases.

If this Social Security Ruling is later superseded, modified, or revoked, we will publish a notice in the **Federal Register** to that effect.

(Catalog of Federal Domestic Assistance Programs Nos. 93.802 Social Security—Disability Insurance; 93.803 Social Security—Retirement Insurance; 93.805 Social Security—Survivor's Insurance; 93.806 Special Benefits for Disabled Coal Miners; 93.807 Supplemental Security Income.)

Dated: March 2, 1992.

Gwendolyn S. King,

Commissioner of Social Security.

Sections 205(g) and 1631(c)(3) of the Social Security Act (42 U.S.C. 405(g) and 1383(c)(3)) Timely Filing for Attorney Fees Under the Equal Access to Justice Act

Melkonyan v. Sullivan, ____ U.S. ____, 111 S. Ct. 2157 (1991)

This Ruling concerns the timely filing for attorney fees under the Equal Access to Justice Act (EAJA)—whether an administrative decision rendered following a court remand is a "final judgment" within the meaning of the EAJA.

The claimant applied for and was denied supplemental security income (SSI) benefits based on disability. He then filed suit in United States District Court, seeking review of the Secretary's final decision denying his application for SSI. While his case was pending, the claimant filed a second application, accompanied by new evidence of disability, and was awarded benefits. The Secretary requested that the court remand the first claim for

reconsideration. The court granted the Secretary's remand motion. On remand, the adverse decision was vacated and the claimant was found disabled as of his original application date.

Over a year later, the claimant applied to the district court for attorney's fees under the EAJA, which permits an award of fees and other expenses to a party prevailing against the United States "in any civil action * * * in any court, "28 U.S.C. 2412(d)(1)(A), when application is made within 30 days of "final judgment in the action," 28 U.S.C. 2412(d)(1)(B). The court denied the request on the ground that the Secretary's decision to deny the first application had been substantially justified. However, the Court of Appeals vacated, concluding that the claimant's application was untimely because the administrative decision on remand was a "final judgment" which started the 30-day period.

The Supreme Court held that the EAJA's plain language makes clear that a "final judgment" for purposes of 28 U.S.C. 2412(d)(1)(B) is a judgment rendered by a court that terminates the civil action for which EAJA fees may be received. EAJA's definition of "final judgment" does not include administrative agencies' decisions.

The Supreme Court also held that a district court may remand a final decision of the Secretary only as provided in sentences four and six of section 205(g) of the Social Security Act: (1) In conjunction with a judgment affirming, modifying, or reversing the Secretary's decision (sentence four); or (2) in light of additional evidence without any substantive ruling as to the correctness of the Secretary's decision, but only if the claimant shows good cause for failing to present the evidence earlier (sentence six). In so holding, the Supreme Court closely examined the legislative history associated with the 1980 Amendments to section 205(g) of the Social Security Act and concluded that Congress intended to limit the courts' authority to enter remand orders.

The Supreme Court was not certain whether the district court's order in this case was a sentence six remand because the record did not clearly indicate what the district court intended by its disposition. Accordingly, the Supreme Court vacated the judgment of the Court of Appeals and remanded the case for the district court to clarify its remand order.

O'Connor, Supreme Court Justice:

A party that prevails against the United States in a civil action is entitled, in certain circumstances, to an award of attorney's fees, court costs, and other expenses. Equal Access to Justice Act (EAJA), 28 U.S.C. 2412. Among other requirements, the prevailing party must submit to the court an application for fees and expenses "within thirty days of final judgment in the action." Section 2412(d)(1)(B). This case requires us to decide whether an administrative decision rendered following a remand from the District Court is a "final judgment" within the meaning of EAJA.

I

In May 1982, petitioner Zakhar Melkonyan filed an application for disability benefits under the Supplemental Security Income (SSI) program established by Title XVI of the Social Security Act, 42 U.S.C. 1381 et seq. Following a hearing, an Administrative Law Judge (ALJ) concluded that petitioner was not disabled within the meaning of the Act. The Appeals Council denied review of the ALJ's decision. In June 1984, petitioner timely filed a complaint in the United States District Court for the Central District of California seeking judicial review pursuant to 42 U.S.C. 1383(c)(3), which incorporates the review provisions of 42 U.S.C. 405(g).

On May 30, 1984, shortly before filing the complaint, petitioner filed a second application for SSI disability benefits accompanied by new evidence of disability. In August 1984, petitioner's *second* application was approved as of the date it was filed. He then sought summary judgment in his action to review the administrative decision denying his *first* application for benefits. The Secretary cross-filed for summary judgment.

While the summary judgment motions were pending, the Secretary requested that the case be remanded to the Appeals Council so the first application could be reconsidered in light of the new evidence. Petitioner initially opposed the Secretary's remand request, arguing that evidence already in the record amply established his disability. Three months later, however, citing failing health and the prospect of increased medical expenses, petitioner moved the court to "either issue [the decision] or remand the cause to the Secretary." App. 9-10. In response, on April 3, 1985, the District Court entered a "judgment" which read in its entirety:

"Defendant's motion ot remand, concurred in by plaintiff, is granted. The matter is remanded to the Secretary for all further proceedings." App. 11.

One month after the remand the Appeals Council vacated the ALJs prior decision and found petitioner disabled as of the date of his orginial SSI application. That decision granted petitioner all the relief he had initially requested.

More than a year later, petitioner applied to the District Court for attorney's fees under EAJA. The Magistrate recommended that the fee application be denied, concluding that the Secretary's decision to deny the first application was "substantially justified" at the time because the original record did not establish that petitioner was disabled. App. 20-21. The District Court agreed and denied the fee request.

The Court of Appeals for the Ninth Circuit vacated the District Court's judgment. It agreed that petitioner was not eligible for attorney's fees under EAJA, but for a different reason. *Melkonyan* v. *Heckler*, 895 F.2d 556 (1990). The Court of Appeals noted that EAJA requires an application for fees to be filed within 30 days of the "final judgment in the action," a term defined in the statute as a "judgment that is final and not appealable." Id., at 557 (citing 28 U.S.C. 2412(d)(2)(G)). In the court's view, its task was to determine when that "final and not appealable" judgment was rendered. 895 F.2d, at 557.

The Court of Appeals recognized that the District Court's order remanding the case to the Secretary was not a "final judgment" because both parties anticipated further administrative proceedings. *Id.*, at 557-558. On remand, the Appeals Council reversed itself and held for petitioner; having won all he had asked for, there was no reason to return to the District Court. Under those circumstances the Court of Appeals concluded that the Appeals Council's decision to award benefits was, in effect, a "final judgment" under EAJA, thereby commencing the 30-day period for filing the fee application. *Id.*, at 558-559. Because petitioner waited more than a year after the Appeals Council's decision, his application was untimely. *Id.*, at 559. We granted certiorari, 498 U.S. ____, 111 S.Ct. 669, 112 L.Ed.2d 662 (1991), and now vacate the judgment of the Court of Appeals.

II

The language of the relevant EAJA statute, section 2412, provides:

"(A) Except as otherwise specifically provided by statute, a court shall award to a prevailing party other than the United States fees and other expenses, * * * incurred by that party *in any civil action* (other than cases sounding in tort), including proceedings for judicial review of agency action, brought by or against the United States *in any court* having jurisdiction of that action, unless the court finds that the position of the United States was substantially justified or that special circumstances make an award unjust.

"(B) A party seeking an award of fees and other expenses shall, within thirty days of *final judgment in the action*, submit to the court an application for fees and other expenses which shows that the party is a prevailing party and is eligible to receive an award under this susbsection." * * *" 28 U.S.C. 2412(d)(1) (A), (B) (emphasis added).

Petitioner argues that his provision is most naturally read to mean that it is *the court before which the civil action is pending* that must render the "final judgment" that starts the running of the 30-day EAJA filing period. Brief for Petitioner 13. We agree. As the highlighted language indicates, subsections (d)(1)(A) and (d)(1)(B) work in tandem. Subsection (d)(1)(A) authorizes the awarding of fees to parties that prevail against the United States in nontort civil actions, subject to qualifications not pertinent here. Subsection (d)(1)(B) explains what the prevailing party must do to secure the fee award. The requirement that the fee application be filed within 30 days of "final judgment in *the action*" plainly refers back to the "civil action * * * in any court" in

(d)(1)(A). The plain language makes clear that a "final judgment" under § 2412 can only be the judgment of a court of law. This reading is reinforced by the contrast between 2412 and 5 U.S.C. 504(a). Section 504 was enacted at the same time as § 2412, and is the only par to the EAJA that allows fees and expenses for administrative proceedings conducted prior to the filing of a civil action. The pertinent language of section 504(a)(2) largely mirrors that of section 2412(d)(1)(B), with one notable exception: it states that a "party seeking an award of fees and other expenses shall, within thirty days of a final *disposition in the adversary adjudication,*" file an application for fees. 5 U.S.C. 504(a)(2). Clearly Congress knew how to distinguish between a "final judgment in [an] action" and a "final disposition in [an] adversary adjudication." One is rendered by a court; the other includes adjudication by an administrative agency.

The Secretary's sole argument to the contrary rests on the 1985 amendments to EAJA, which added a definition of "final judgment" to 2412. Traditionally, a "final judgment" is one that is final and appealable. See Fed.Rule Civ.Proc. 54(a) (" 'judgment' as used in these rules includes a decree and any order from which an appeal lies"); *Sullivan v. Finkelstein,* 496 U.S. ___, ___, 110 S.Ct. 2658, 2665, 110 L.Ed.2d 563 (1990) (" 'final judgments' are at the core of matters appealable under 1291"). Under 2412 as amended, however, a "final judgment" is one that is "final and *not* appealable." 28 U.S.C. 2412(d)(2)(G) (emphasis added). In the Secretary's view, "[t]his significant departure from the usual characteristi[c] of a 'judgment' entered by a court" dictates a different understanding of how the phrase "final judgment" is used in section 2412(d)(1)(B). Brief for Respondent 20. The Secretary argues that under the revised statute, a "final judgment" includes not only judgments rendered by a court, but also decisions made by administrative agencies. *Ibid.*

We reject this argument. Section 2412(d)(1)(B) does not speak merely of a "judgment," it speaks of a "final judgment *in the action.*" As we have explained, the "action" referred to in subsection (d)(1)(B) is a "civil action * * * in any court" under subsection (d)(1)(A). The Secretary's suggested interpretation of "final judgment" does not alter this unambiguous requirement of judgment by a *court.*

As for why Congress added the unusual definition of "final judgment," the answer is clear. "The definition * * * was added in 1985 to resolve a conflict in the lower courts on the question whether a 'judgment' was to be regarded as 'final' for EAJA purposes when it was entered, or only when the period for taking an appeal had lapsed." Brief for Respondent 20 (footnote omitted). The Ninth Circuit had held that the 30-day EAJA filing period began to run when the District Court entered judgment. *McQuiston* v. *Marsh,* 707 F.2d 1082, 1085 (1983). The Seventh Circuit rejected this view, holding that the EAJA filing period should be deemed to begin only after the time for taking an appeal from the District Court judgment had expired. *McDonald* v. *Sshweiker,* 726 F.2d 311, 314 (1983) Accord, *Massachusetts Union of Public Housing Tenants, Inc.* v. *Pierce,* 244 U.S. App.D.C. 34, 36, 755 F.2d 177, 179 (1985).

Congress responded to this split in the federal courts by explicitly adopting and ratifying the *McDonald* approach. S.Rep. No. 98–586, p. 16 (1984) ("The Committee believes that the interpretation of the court in *[McDonald]* is the correct one"). See also H.R.Rep. No. 98–992, p.14 (1984) ("The term 'final judgment' has been clarified to mean a judgment the time to appeal which has expired for all parties"); H.R.Rep. No. 99–120, p. 18 (1985). There simply is no evidence to support the argument the Secretary now advances—that, in defining "final judgment" so as to resolve an existing problem, Congress also intended, *sub silentio,* to alter the meaning of the term to include a final agency decision. We conclude a final agency decision. We conclude that, notwithstanding the 1985 amendment, Congress' use of "judgment" in 28 U.S.C. 2412 refers to judgments entered *by a court of law,* and does not encompass decisions rendered by an administrative agency. Accordingly, we hold that a "final judgment" for purposes of 28 U.S.C 2412(d)(1)(B) means a judgment rendered by a court that terminates the civil action for which EAJA fees may be received. The 30-day EAJA clock begins to run after the time to appeal that "final judgment" has expired.

Our decision in *Sullivan* v. *Hudson,* 490 U.S. 877, 109 S.Ct. 2248, 104 L.Ed.2d 941 (1989), is not to the contrary. The issue in *Hudson* was whether, under 2412(d), a "civil action" could include administrative proceedings so that a claimant could receive attorney's fees for work done at the administrative level following a remand by the District Court. We explained that certain administrative proceedings are "so intimately connected with judicial proceedings as to be considered part of the 'civil action' for purposes of a fee award." Id., at 892, 109 S.Ct., at 2258. We defined the narrow class of qualifying administrative proceedings to be those "where 'a suit has been brought in a court,' and where 'a formal complaint with the jurisdiction of a court of law' *remains pending and depends for its resolution upon the outcome of the administrative proceedings.*" *Ibid.* (emphasis added). Hudson thus stands for the proposition that in those cases where the district court retains jurisdiction of the civil action and contemplates entering a final judgment following the completion of administrative proceedings, a claimant may collect EAJA fees for work done at the administrative level. Ibid. "We did not say that proceedings on remand to an agency are 'part-and parcel' of a civil action in federal district court for all purposes. . . ." *Sullivan* v. *Finkelstein, supra,* 496 U.S., at ___, 110 S.Ct., at 2666–2667.

III

Having decided that EAJA requires a "final judgment" entered by a court, it is obvious that no "final judgment" was entered in this case before petitioner initiated his appeal. Petitioner filed a civil action in District Court under 42 U.S.C. 405(g), seeking review of the Secretary's decision that he was not entitled to disability benefits. Without ruling on the correctness of the Secretary's decision, the District Court remanded the case for further administrative proceedings. On remand, the Appeals Council awarded petitioner the disability benefits he sought. Neither petitioner nor the Secretary returned to District Court for entry of a final judgment. The question we must decide now is whether either party is entitled to do so.

The answer depends on what kind of remand the District Court contemplated. In *Finkelstein,* we examined closely the languang of section 405(g) and identified two kinds of remands under that statute: (1) remands pursuant to the fourth sentence, and (2) remands pursuant to the sixth sentence. See 496 U.S., at ___, 110 S.Ct., at 2663–2665. The fourth sentence of section 405(g) authorizes a court to enter "a judgment affirming, modifying, or reversing the decision of the Secretary, with or without remanding the cause for a rehearing." The parties agree that the remand order in this case was not entered pursuant to sentence four, as the District Court did not affirm, modify, or reverse the Secretary's decision. We concur. The District Court did not make any substantive ruling; it merely returned the case to the agency for disposition, noting that both parties agreed to this course.

The sixth sentense of section 405(g), as we explained in *Finkelstein,* "describes an entirely different kind of remand." Id., at ___, 110 S.CT., at 2664. The District Court does not affirm, modify, or reverse the Secretary's decision; it does not rule in any way as to the correctness of the administrative determination. Rather, the court remands because new evidence has come to light that was not available to the claimant at the time of the administrative proceeding and that evidence might have changed the outcome of the prior proceeding. Ibid.

The statute provides that following a sentence six remand, the Secretary must return to the District Court to "file with the court any such additional or modified findings of fact and decision, and a transcript of the additional record and testimony upon which his action in modifying or affirming was based." 42 U.S.C. section 405(g).[1]

[1] Sentence six of section 405(g) provides in full: "The court may, on motion of the Secretary made for good cause shown before he files his answer, remand the case to the Secretary for further action by the Secretary, and it may at any time order additional evidence to be taken before the Secretary, but only upon a showing that there is new evidence which is material and that there is good cause for the failure to incorporate such evidence into the record in a prior proceeding, and the Secretary shall, after the case is remanded, and after hearing such additional evidence if so ordered, modify or affirm his findings of fact or his decision, or both, and shall file with the court any such additional and modified findings of fact and decision, and a transcript of the additional record and testimony upon which his action in modifying or affirming was based."

Petitioner argues, plausibly, that the court contemplated a sentence six remand. Indeed, it is undisputed that it was consideration of later-acquired evidence that led the Appeals Council ultimately to reverse its earlier decision and declare petitioner eligible for benefits from the date of his original application. Petitioner further argues that this must have been a sentence six remand because section 405(g) authorizes only two kinds of remands—those pursuant to sentence four and those pursuant to sentence six—and the Secretary concedes that this was not a sentence four remand.

The Secretary maintains that this was not a sentence six remand. While acknowledging that the remand request was prompted by the discovery of new evidence of disability, see Brief for Respondent 27–28, the Secretary observes correctly that the sixth sentence of section 405(g) requires a showing of "good cause" for the failure to present the additional evidence in the prior proceeding and that the District Court did not rule explicitly that such a showing had been made. The Secretary also notes that the District Court did not manifest any intent to retain jurisdiction, as would be the case under sentence six, but rather remanded to the agency "for all further proceedings."

The Secretary also disputes petitioner's assumption that sentences four and six set forth the only kinds of remands that are permitted under section 405(g), arguing that the District Court has inherent authority to enter other types of remand orders. *Id.,* at 28–29, n. 23. On this point, we think petitioner has the better of the argument. As mentioned, in *Finkelstein* we analyzed section 405(g) sentence-by-sentence and identified two kinds of possible remands under the statute. While we did not state explicitly at that time that these were the *only* kinds of remands permitted under the statute, we do so today. Under sentence four, a district court may remand in conjunction with a judgment affirming, modifying, or reversing the Secretary's decision. Under sentence six, the district court may remand in light of additional evidence without making any substantive ruling as to the correctness of the Secretary's decision, but only if the claimant shows good cause for failing to present the evident earlier.[2] Congress' explicit delineation in section 405(g) regarding the cirumstances under which remands are authorized leads us to conclude that it intended to limit the district court's authority to enter remand orders to these two types. Cf. *United States* v. *Smith,* 499 U.S. ___, 111 S.Ct. 1180, 113 L.Ed.2d 134 (1991) (expressly enumerated exceptions presumed to be exclusive).

This reading of the statute is dictated by the plain language of section 405(g) and is supported by the legislative history. In amending the sixth sentence of section 405(g) in 1980, Congress made it unmistakably clear that it intended to limit the power of District Courts to order remands for "new evidence" in Social Security cases. Pub.L. 96–265, section 307, 94 Stat. 458. The Senate Report accompanying the amendments explained:

> [U]nder existing law the court itself, on its own motion or on motion of the claimant, has discretionary authority 'for good cause' to remand the case back to the ALJ. It would appear that, although many of these court remands are justified, some remands are undertaken because the judge disagrees with the outcome of the case even though he would have to sustain it under the 'substantial evidence rule.' Moreover, the number of these court remands seems to be increasing.
>
> * * * * *
>
> The bill would continue the provision of present law which gives the court discretionary authority to remand cases to the Secretary, *but adds the requirement that remand for the purpose of taking new evidence be limited to cases in which there is a showing that there was good cause for failure to incorporate it into the record in a prior proceeding.*" S.Rep. No. 96–408, pp. 58–59 (1979) (emphasis added). See also H.R.Rep. No. 96–100, p. 13 (1979), U.S.Code Cong. & Admin.News 1980, pp. 1277, 1336–1337, (same).

Congressman Pickle, one of the Floor managers of the bill, echoed this explanation when he noted in a Floor statement that with the amendment "we have tried to speed up the judicial process so that these cases would not just go on and on and on. The court could remand [them] back down to the ALJ without cause or other reason which was weakening the appeal process at that level." 125 Cong.Rec. 23383 (1979).

The amendment to sentence six, of course, was not intended to limit a District Court's ability to order remands under sentence four. The House Report explains that "[t]his language [amending sentence six] is not to be construed as a limitation of judicial remands currently recognized under the law in cases which the Secretary has failed to provide a full and fair hearing, to make explicit findings, or to have correctly apply [*sic*] the law and regulations." H.R.Rep. No. 96–100, *supra,* at 13. Thus, under sentence four, a District Court may still remand in conjunction with a judgment reversing in part the Secretary's decision.

It is evident from these passages that Congress believed courts were often remanding Social Security cases without good reason. While normally courts have inherent power, among other things, to remand cases, see *United States* v. *Jones,* 336 U.S. 641, 671, 69 S.Ct. 787, 803, 93 L.Ed. 938 (1949), both the structure of section 405(g), as amended, and the accompanying legislative history show Congress' clear intent to limit courts to two kinds of remands in these cases. Cf. *Chambers* v. *Nasco, Inc.,* 500 U.S. ___, 111 S.Ct. 2123, ___ L.Ed.2d ___ (1991) (finding no congressional intent to limit a court's inherent authority to impose sanctions).

In light of the foregoing, we conclude that section 405(g) actions, remand orders must either accompany a final judgment affirming, modifying, or reversing the administrative decision in accordance with sentence four, or conform with the requirements outlined by Congress in sentence six. Construing remand orders in this manner harmonizes the remand provisions of section 405(g) with the EAJA requirement that a "final judgment" be entered in the civil action order to trigger the EAJA filing period 28 U.S.C. 2412(d)(1)(B). In sentence four cases, the filing period begins after the final judgment ("affirming, modifying, or reversing") is entered by the court and the appeal period has run, so that the judgment is no longer appealable. See section 2412(d)(2)(G). In sentence six cases, the filing period does not begin until after the postremand proceedings are completed, the Secretary returns to court, the court enters final judgment, and the appeal period runs.

Although we agree with petitioner that the District Court's remand authority is confirmed to those circumstances specifically defined in section 405(g), we cannot state with certainty that the remand in this case was, as petitioner contends, a sentence six remand. As the Secretary points out, the District Court did not make a finding that "good cause" had been shown, nor did the court seem to anticipate that the parties would return to court following the administrative proceedings. Indeed, it may be that the court treated the joint request for remand as a voluntary dismissal under Fed. Rule Civ. Proc. 41(a), although the parties did not file a signed stipulation, as required by the Rule. Because the record before us does not clearly indicate what the District Court intended by its disposition, we vacate the judgment and remand the matter to enable the District Court to clarify its order. If petitioner is correct that the court remanded the case under sentence six, the Secretary must return to District Court, at which time the court will enter a final judgment. Petitioner will be entitled to EAJA fees unless the Secretary's initial position was substantially justified, a question which was not addressed by the Court of Appeals. If, on the other hand, this was *not* a sentence six remand, it may be that petitioner is not entitled to EAJA fees at all. For example, if the court's order was, in effect, a dismissal under Fed. Rule Civ. Proc. 41(a), the District Court's jurisdiction over the case would have ended at that point, and petitioner would not have been a prevailing party "in [a] civil action" 28 U.S.C 2412(d)(1)(A). Under those circumstances, the Secretary would not return to the District Court and petitioner would not be eligible to receive EAJA fees.

IV

At oral argument the parties discussed the timeliness of petitioner's fee application. EAJA requires prevailing parties seeking an award of fees to file with the court, "*within thirty days of final judgment in the action,*" an application for fees and other expenses. Section 2412(d)(1)(B) (emphasis added). Petitioner claims that this language permits him to apply for fees at any time *up to* 30 days after entry of judgment, and even before judgment is entered, as long as he has achieved prevailing part status. Tr. of Oral Arg. 16–18.

This case is not an appropriate vehicle for resolving the issue. If petitioner is correct that this was a sentence six remand, the District

[2] Sentence six also authorizes the District Court to remand on motion by the Secretary made before the Secreary has filed a response in the action. That subcategory of sentence six remands is not implicated in this case.

Court may determine that the application he has already file is sufficient. Alternatively, petitioner can easily reapply for EAJA fees following District Court's entry of a final judgment. In either case, petitioner will not be prejudiced by having filed prematurely. On the other hand, if this was not a sentence six remand, we have already explained that petitioner would not be entitled to fees, so the timeliness of the application will not be an issue.

The judgment of the Ninth Circuit Court of Appeals is vacated, and the case is remanded to the Court of Appeals with instructions to remand to the District Court for further proceedings consistent with this opinion.

It is so ordered.

Justice O'Connor delivered the opinion for a unanimous Court.

BILLING CODE 4190-25-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N-92-3251; FR-2964-N-02]

Office of the Assistant Secretary for Community Planning and Development; Community Development Technical Assistance Program Announcement of Funding Awards

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Announcement of competition winners.

SUMMARY: In accordance with section 104(a)(4)(c) of the Department of Housing and Urban Development Reform Act of 1989, this announcement notifies the public of funding decisions the Department has made under the Community Development Technical Assistance Program, pursuant to a national competition, to help residents of public housing sites become self-employed. The announcement contains the names and addresses of the award winners and the amounts of the awards.

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: James F. Selvaggi, Office of Technical Assistance, Department of Housing and Urban Development, room 7148, 451 Seventh Street, SW., Washington, DC, 20410; telephone number (202) 708-2090. The TDD number is (202) 708-0564. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: In a Notice published May 1, 1991 (56 FR 20068), the Department announced the availability of up to $2 million in grants to provide technical assistance in support of locally designed projects, to assist residents of public housing sites to become self-employed.

This competition was authorized under Title I, section 107(b)(4) of the Housing and Community Development Act of 1974, and was conducted in accordance with program requirements contained in 24 CFR 570.400 and 570.402 (the Community Development Technical Assistance Program). The purpose of the competition is to provide technical assistance to aid residents of public housing secure the knowledge they need to start, and to successfully operate, small businesses.

Sixty-nine applicants responded to the Notice by the closing date of August 19, 1991; their application were scored and selected for funding according to the "Factors for Award" contained in the May 1, 1991 Notice. The $2 million available permitted full or partial funding of the thirteen most qualified applicants.

In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989 (Pub. L. 102-235, approved December 15, 1989), this document announces the winners of the technical assistance competition to promote self-employment by residents of public housing sites:

1. Chicago Housing Authority, 22 West Madison Street, Chicago, Illinois 60602, Cathy Johnson, 312-567-7718 ..... $200,000
2. Albuquerque Development Capital, 700 4th Street, SW., suite A, Bernalillo County, Albuquerque, New Mexico 87102, Richard Asenap, Department of Human Service, 505-764-1730 50,000
3. Southern Dallas Development Corporation, 1501 Beaumont, Dallas, Texas 75215, Jim Reid, 214-428-7332 200,000
4. Housing Authority of Baltimore City, 417 E. Fayette Street, suite 285, Baltimore, Maryland 21202, Thelma Millard, 301-396-4272 199,502
5. Greater Atlanta Small Business Project, 10 Park Place South, suite 305, Atlanta, Georgia 30303, Maurice Coakley, 404-659-5955 200,000
6. Corporation for Enterprise Development, 777 N. Capital Street, NE., Suite 801, Washington, DC 20002, Rick Carlisle, 919-682-9444 194,191
7. Metropolitan Development and Housing Agency, 701 South Sixth Street, Nashville, Tennessee 37202, Gerald F. Nicely, 615-252-3750 150,000
8. Schenectady Municipal Housing Authority, 375 Broadway, Schenectady, New York 12305, Sharon A. Jordan, 518-372-3346 ... 100,000
9. North Star Community Development Corporation, 325 Lake Avenue South, suite 504, Duluth, Minnesota 55802, Allen Ballantance, 218-727-6690 134,174
10. City of Ann Arbor, Ann Arbor Housing Commission, 727 Miller Avenue, Ann Arbor, Michigan 48103, Conrad Benson, Executive Director, 313-994-2828 100,000
11. Urban League of Pittsburgh, 200 Ross Street, 2nd Floor, Pittsburgh, Pennsylvania 15219, Leon L. Haley, 412-261-1130 200,000
12. Women's Venture, 2324 University Avenue West, Suite 200, St. Paul, Minnesota 55114, Joyce Yamamoto, 612-646-3808 199,519
13. Greensboro Housing Authority, P.O. Box 21287, Greensboro, North Carolina 27420, Elaine T. Ostrowski, 919-275-8501 72,614

Dated: March 11, 1992.

Anna Kondratas,

Assistant Secretary for Community Planning and Development.

BILLING CODE 4210-29-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV-060-02-7122-09-8644]

Intent to Prepare Environmental Impact Statement; Mule Canyon Project, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare an Environmental Impact Statement for a mining Plan of Operations for the Mule Canyon project, Lander County, Nevada; and notice of scoping period and public meetings.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, and to 43 CFR 3809, the Bureau of Land Management (BLM) will be directing the preparation of an Environmental Assessment/Environmental Impact Statement (EA/EIS) for the proposed development of a gold mine in Lander County, Nevada. This EA/EIS will be prepared by contract and funded by the proponent, Gold Fields Mining Company. The BLM invites comments and suggestions on the scope of the analysis.

DATES: Scoping meetings will be held April 7, 1992, from 7-9 p.m. at the VIP's Motor Inn in Battle Mountain, Nevada; and on April 8, 1992, from 7-9 p.m. at the Elko Convention Center in Elko, Nevada; and on April 9, 1992, from 7-9 p.m. at the Airport Plaza Hotel in Reno, Nevada. The purposes of these meetings are to identify issues to be addressed in the EA/EIS, and to encourage public participation in the review process. Representatives of the BLM and Gold Fields Mining Company will be summarizing the Plan of Operations and accepting comments from the audience. Written comments on the Plan of Operations and the scope of the EA/EIS will be accepted until May 31, 1992. A preliminary EA/draft EIS is expected to be completed by October of 1992, at which time the document will be made available for public review and comment.

ADDRESSES: Scoping comments may be sent to: District Manager, P.O. Box 1420, Battle Mountain, NV 89820 Attn: Mule Canyon Mine Coordinator.

FOR FURTHER INFORMATION CONTACT: Pamela English, P.O. Box 1420, Battle Mountain, NV 89820, (702) 635-4000.

SUPPLEMENTARY INFORMATION: Gold Fields Mining Company of Golden, Colorado has submitted to the Battle Mountain District Office of the U.S. Department of the Interior, Bureau of Land Management (BLM), a Plan of Operations (PO). The PO describes proposed mining operations in Lander County, and access to the operations in Eureka County, approximately 12 miles west of Battle Mountain, Nevada. A total of approximately 18 to 54 million tons of ore and 125 to 355 million tons of barren (nongold-bearing) rock may be excavated during the 15 year mine life. Total surface disturbance for all mine facilities would be about 3,600 acres. Key production facilities would include the mine pits, barren rock piles, protore stockpiles, run-of-mine and crushed ore stockpiles, ore crushing, conveying, grinding, and oxidation circuits, heap leach pads and solution ponds, gold extraction and refining equipment, and tailings disposal facilities. Nonprocessing ancillary facilities to support the mining activities include administration, laboratory, warehouse, truck repair and maintenance shop buildings, fuel, oil, reagent and water storage facilities and other small structures required for operations. Processing would include stockpiling, crushing, grinding, oxidation and agitated and heap leaching of ore.

The EA/EIS will address the issues of geology, minerals, soils, water resources, vegetation, wildlife, grazing management, air quality, aesthetic resources, cultural resources, paleontological resources, land use, access, recreation, wilderness, social and economic values, and transportation.

Federal, state, and local agencies and other individuals or organizations who may be interested in or affected by the BLM's decision on the PO are invited to participate in the scoping process. The Authorized Officer will respond to public input and comment as part of the final EA/EIS. The decision regarding the proposal will be recorded as a Decision Record or Record of Decision, which is subject to appeal under 43 CFR 4.

Dated: March 9, 1992.

Michael C. Mitchel,

Acting District Manager.

[FR Doc. 92-6162 Filed 3-16-92; 8:45 am]

BILLING CODE 4310-HC-M

[CO-050-4212-06; COC-53506]

Realty Action; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a planning amendment to the Royal Gorge Management Framework Plan and notice of realty action COC-53506, exchange of public land for private land in Chaffee County, Colorado.

SUMMARY: The following described public lands are to be considered for suitability for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Sixth Principal Meridian, Colorado

T.14 S., R.78 W.,
Sec. 23 S½ SE¼SW¼
Sec. 26 W½ NW¼NE¼, NE¼NW¼.

This aggregates 80 acres in Chaffee County located east of Johnsons Village on Trout Creek.

In exchange for the above, or some part thereof the United States would acquire the following described private land of equal value from Mr. Paul Moltz:

New Mexico Principal Meridian, Colorado

T.50 N., R.8 E.,
Sec. 3, Parcel B in the NE¼SE¼ and the SE¼SE¼.

This privately surveyed parcel includes 45.73 acres in Chaffee County located on the Arkansas River and is accessed directly from State Highway 291 approximately six miles northwest of Salida.

The publication of this notice segregates the public lands described above from the public land laws including the mining laws, except the mineral leasing act and exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976 for a period of 2 years.

An environmental assessment of the proposed action described herein will be made to determine if the action is in the publics best interest and what reservations on the patent are needed.

DATES: Interested parties should submit comments prior to May 15, 1992.

ADDRESSES: Bureau of Land Management, P.O. Box 2200, Canon City, CO 81215.

FOR FURTHER INFORMATION CONTACT: For further information contact Mr. David Hallock, Realty Specialist at 3170 East Main St., Canon City, Colorado (719) 275-0631.

Stuart L. Freer,

Associate District Manager.

BILLING CODE 4310–70–M

Replacement of Fishing Bridge Campsites, Environmental Impact Statement, Yellowstone National Park, Wyoming-Montana-Idaho

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of intent to prepare an environmental impact statement for the replacement of Fishing Bridge Campsites at Yellowstone National Park.

SUMMARY: Under the provisions of the National Environmental Policy Act, the National Park Service is preparing an environmental impact statement for replacement of the campsites from the Fishing Bridge developed area at Yellowstone National Park.

The purpose of the project is to select campsites locations for the 310 campsites removed when the Fishing Bridge campground was closed in 1989. Replacement of campsites removed was deferred until campground occupancy reached 95 percent at all 12 remaining park campgrounds during the summer season (June 25 to August 20) for three years out of a running five-year period. Planning for campsite replacement would be initiated after the second year of 95 percent occupancy. That trigger was reached in 1990, an planning began in March of 1991. This project will result in the selection of the location(s) for the replacement campsites within Yellowstone National Park. The primary purpose of the proposal is to continue the effort toward overall grizzly bear recovery in the greater Yellowstone ecosystem while providing appropriate visitor services and facilities in the park.

Major issues include effects on the grizzly bear population, bear/human conflicts, landscape changes due to the 1988 fires, campsite availability in proportion to visitor traffic at park entrances, and effects on gateway communities.

Alternatives include the proposal (expand the Norris campground by adding 175 sites and a group loop, add 100 sites to the Canyon campground, and convert the existing group camping loop at Grant Village to 35 individual sites) and the no-action alternative. The no-action alternative is the implementation of the 1988 Record of Decision (ROD) for the Fishing Bridge Development Concept Plan (DCP). That ROD proposed two alternatives for campsite replacement: either construction of a new campground at Weasel Creek on Lake Yellowstone (Lodgepole) or replacement of the campsites at existing campgrounds in some combination.

A scoping brochure has been prepared that details the issues identified to date. Scoping brochures will be sent to those individuals formerly on the mailing list for the 1988 Fishing Bridge DCP. The scoping brochure can also be obtained by writing to Superintendent, Yellowstone National Park, Wyoming 82190.

FOR FURTHER INFORMATION CONTACT: Contact Yellowstone National Park (307) 344–7381, extension 2191.

Date: March 3, 1992.

Michael D. Snyder,

Acting Regional Director, Rocky Mountain Region.

Office of Surface Mining Reclamation and Enforcement

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collection of information and related form and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirements should be made directly to the bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1029–0080), Washington, DC 20503, telephone 202–395–7340.

Title: Training, Examination, and Certification of Blasters.

OMB Number: 1029–0080.

Abstract: Section 719 of Public Law 95–87 requires the Secretary of the Interior or the State Regulatory Authority to issue regulations which provide for the training, examination, and certification of persons engaging in blasting or the use of explosives in surface coal mining operations. The information collected is used to determine the adequacy of State prepared programs.

Bureau Form Number: Not applicable.

Frequency: One-time requirement

Descriptions of Respondents: State Governments.

Estimated Completion Time: 4,160 hours.

Annual Responses: 1.

Annual Reporting Burden: 4,160 hours.

Bureau Clearance Officer: Andrew DeVito 202–343–5150.

Dated: February 28, 1992.

John Mosesso,

Chief, Division of Technical Services.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31961 (Sub-No. 1); Finance Docket No. 31961 (Sub-No. 2); Finance Docket No. 31961 (Sub-No. 3)]

Caprail I—Acquisition—Consolidated Rail Corp., Ohio Department of Transportation—Lease—Caprail I Lines in Ohio; Columbus & Ohio River Railroad Co.—Lease and Operation—Ohio Department of Transportation Lines; Corrected Exemption

These notices correct the prior notices served and published in the Federal Register on January 15, 1992 (57 FR 1757). The notice in Sub-No. 1 granted Caprail I (Caprail) authority to acquire about 161.7 miles of Consolidated Rail Corporation (Conrail) line and other railroad property.[1] In verified notices filed December 11, 1991, Columbus & Ohio River Railroad Company (CUOH) and the Ohio Department of Transportation (ODOT) described Caprail as a "a non-carrier special purpose subsidiary of Capcorp Financial, Inc. d/b/a First Capitalcorp, a California corporation."

CUOH and ODOT state that Caprail is actually an affiliate of First Capitalcorp, not a subsidiary. Accordingly, these notices are amended to reflect the change that Caprail is a non-carrier special purpose affiliate of Capcorp Financial, Inc., d/b/a First Capitalcorp.

The parties contemplate that the transaction will be consummated seven days from the filing date of the February 14, 1992, correction notice.

Any comments must be filed with the Commission and served on Kelvin J. Dowd, Slover & Loftus, 1224 Seventeenth Street, NW., Washington, DC 20036.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transactions.

Decided: March 9, 1992.

By the Commission, David M. Knoschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 4510-23-M

Occupational Safety and Health Administration

Maryland State Standards; Approval

1. Background

Part 1953 of title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR part 1902. On July 5, 1973, notice was published in the **Federal Register** (38 FR 17834) of the approval of the Maryland State plan and the adoption of subpart O to part 1952 containing the decision.

The Maryland State Plan provides for the adoption of all Federal standards as State standards after comments and public hearing. Section 1952.210 of Subpart O sets forth the State's schedule for the adoption of Federal standards. By letters dated December 16 and 20, 1991, from Commissioner Henry Koellein, Jr., Maryland Division of Labor and Industry, to Linda R. Anku, Regional Administrator, and incorporated as part of the plan, the State submitted State standards identical to: (1) 29 CFR 1910.1025, appendices A, B, and C, pertaining to amendments and corrections to the Occupational Exposure to Lead Standard for General Industry as published in the **Federal Register** of October 23, 1979 (44 FR 60981), November 30, 1979 (44 FR 68827), November 12, 1982 (47 FR 51117), February 13, 1990 (55 FR 4998), and May 31, 1991 (56 FR 24686); and (2) 29 CFR 1928.1052(c)(i) and 1928.1053(a)(3), pertaining to amendments, corrections, additions, and revisions to the Safety Standards for Stairways and Ladders Used in the Construction Industry as published in the **Federal Register** of August 23, 1991 (56 FR 41793). This standard is contained in COMAR 09.12.31. Maryland occupational safety and health standards were promulgated after a public hearing on the Occupational Exposure to Lead Standard on October 4, 1991, and a public hearing on the Safety Standards for Stairways and Ladders on October 18, 1991. These standards became effective on September 30 and December 23, 1991, respectively.

2. Decision

Having reviewed the State submissions in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and, accordingly, are approved.

3. Location of the Supplements for Inspection and Copying

A copy of the standards supplements, along with the approved plan, may be inspected and copied at the following locations during normal business hours: Office of the Regional Administrator, 3535 Market Street, suite 2100, Philadelphia, Pennsylvania 19104; Office of the Commissioner of Labor and Industry, 501 St. Paul Place, Baltimore, Maryland 21202; and the OSHA Office of State Programs, room N-3700, Third Street and Constitution Avenue, NW., Washington, DC 20210.

4. Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Maryland State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

a. The standard is identical to the Federal standard which was promulgated in accordance with Federal law including meeting requirements for public participation.

b. The standard was adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective March 17, 1992.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Philadelphia, Pennsylvania, this 22nd day of January 1992.

Linda R. Anku,

Regional Administrator.

[FR Doc. 92-6184 Filed 3-16-92; 8:45 am]

BILLING CODE 4510-26-M

OSHA Training Institute Education Centers

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for proposals.

SUMMARY: The Occupational Safety and Health Administration (OSHA) conducts short-term technical training in occupational safety and health through the OSHA Training Institute in Des Plaines, Illinois. In recent years, the number of private sector personnel and Federal personnel from agencies other than OSHA requesting training has increased beyond the capacity of the OSHA Training Institute to meet the demand. Therefore, OSHA proposes a pilot project to test the feasibility of using other training or educational institutions to conduct OSHA Training Institute courses for private sector personnel and for Federal personnel from agencies other than OSHA. This notice announces the opportunity for interested organizations to submit applications to become OSHA Training Institute Education Centers. Applications will be rated on a competitive basis and approximately two organizations will be selected to participate in the pilot project. Complete application instructions are contained in this notice.

Authority for this program may be found in sections 21 (b) and (c) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 670).

DATES: Applications must be received by May 15, 1992.

ADDRESSES: Applications must be submitted to the Division of Training and Educational Programs, Office of Training and Education, Occupational Safety and Health Administration, U.S. Department of Labor 1555 Times Drive, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Ronald Mouw, Chief, Division of Training and Educational Programs, or Zigmas Sadauskas, Director, OSHA Training Institute, Office of Training and Education, Occupational Safety and Health Administration, U.S. Department of Labor, 1555 Times Drive, Des Plaines, Illinois 60018, telephone (708) 297-4810.

SUPPLEMENTARY INFORMATION:

Background

The OSHA Training Institute conducts 73 short-term technical training courses in OSHA standards, policies and procedures for persons responsible for enforcing or directly supporting the OSH Act, private sector employers and employees, and Federal personnel from agencies other than OSHA. Its primary responsibility is to the first group: Federal and State compliance officers and State consultation program staff. Private sector and Federal personnel from agencies other than OSHA receive training on an "as available" basis.

In recent years the demand for training has increased from all three groups. Resources of the OSHA Training Institute have not increased at a rate which can keep up with the demand. As the number of Federal and State personnel engaged in enforcement or consultation being trained has increased, opportunities for training for private sector personnel and Federal personnel from agencies other than OSHA have remained static or decreased.

In order to meet the increased demand for its courses, the OSHA Training Institute will conduct a pilot project to test the feasibility of using public or private colleges and universities or other nonprofit training organizations to conduct five OSHA Training Institute courses for private sector personnel and Federal personnel from agencies other than OSHA.

Scope

The OSHA Training Institute will enter into nonfinancial agreements with approximately two colleges, universities or other nonprofit training organizations to conduct OSHA courses for private sector personnel and Federal personnel from agencies other than OSHA. These organizations will be selected through a nationwide competitive process. This notice solicits applications from organizations interested in participating in the pilot project.

Applicants selected to participate as OSHA Training Institute Education Centers will be expected to present four general industry OSHA courses: Course 204, Machinery and Machine Guarding Standards; Course 501, A Guide to Voluntary Compliance in Safety and Health; Course 521, OSHA Guide to Voluntary Compliance in the Health Area; and Course 600, Collateral Duty Course for Other Federal Agencies; or one construction industry course: Course 500, Basic Instructor Course in Occupational Safety and Health Standards for the Construction Industry. Applicants may propose to offer only the construction course or only the general industry courses. If an applicant wishes to apply for both construction and general industry, a separate proposal will be required for each. Additional information about each of these courses is in the appendix to this notice.

Applicants will be selected based upon their occupational safety and health experience, their nonacademic training background, the availability of classroom and lodging facilities, and access to nationwide transportation. OSHA will support the program by providing curriculum outlines, masters of student handouts, access to OSHA Training Institute audiovisual materials, and orientation to OSHA course presentation. OSHA will also provide assistance in presenting and/or answering questions on OSHA policy.

The pilot project will be two years in duration. In addition to regular, ongoing monitoring, OSHA will conduct an evaluation of the project during the second year. The results of the evaluation may lead to expansion of the number of courses the OSHA Training Institute Education Center is asked to present, discontinuation of one or more courses, or an additional competition to select more OSHA Training Institute Education Centers.

Eligibility

Any nonprofit public or private college or university is eligible to apply. Any other nonprofit organization that can demonstrate that training or education is part of its mission and that more than 50 percent of its staff and dollar resources is devoted to training or education is also eligible to apply.

Financial Considerations

Organizations selected as OSHA Training Institute Education Centers will not be provided funding by OSHA to support this effort. The Centers will be expected to support their OSHA training through their normal tuition and fee structures.

Length of Project

The pilot project will start October 1, 1992, and will run for two years.

OSHA Training Institute Education Center Responsibilities

Each OSHA Training Institute Education Center will be responsible for the following.

1. Arranging to have instructors assigned to teach OSHA courses attend OSHA orientation.
2. Scheduling courses. Courses are to be scheduled on a year-round basis, with each course being offered more than once a year.
3. Publicizing the availability of courses.
4. Registering students.
5. Purchasing, or otherwise obtaining, audiovisual materials for use in courses.
6. Reproducing handouts for students.
7. Conducting courses in accordance with materials and instruction provided by OSHA.
8. Monitoring courses to ensure that OSHA course outlines are being followed.
9. Collecting course evaluation data from students in accordance with OSHA procedures.
10. Maintaining student registration and attendance records.
11. Issuing OSHA course completion certificates to students. These certificates, which will be supplied by OSHA, certify that a student has completed training in a particular course.
12. Providing the OSHA Training Institute with registers of successful course completers.
13. Providing the OSHA Training Institute with a schedule showing the dates, times, and locations of every OSHA course to be offered.
14. Maintaining clearly identifiable records of tuition and/or fees collected from OSHA course students.
15. Arranging for the availability of appropriate accommodations for students.

OSHA Training Institute Responsibilities

The OSHA Training Institute will be responsible for the following:

1. Providing OSHA Training Institute Education Center instructors with orientation to how the OSHA Training Institute teaches OSHA courses.
2. Providing a detailed course outline for each OSHA course to be presented by the OSHA Training Institute Education Center.
3. Providing a master copy of the student handouts for each course to be presented.
4. Providing OSHA course completion certificates to be issued to students completing courses.
5. Lending audiovisual materials for the courses to OSHA Training Institute Education Center instructors in accordance with established library lending policies.
6. Providing answers for and technical assistance on questions of OSHA policy.
7. Monitoring the performance of OSHA Training Institute Education Centers through on-site visits, including unannounced attendance at courses, and examining records of registrations, course attendance, tuition collections and personnel records concerning qualifications of staff assigned as instructors.
8. Evaluating the effectiveness of the OSHA Training Institute Education Centers.

Applicaton and Selection Procedures

Eligible organizations wishing to be considered for selection as an OSHA Training Institute Education Center should prepare an application in accordance with the instructions contained in this notice.

Applications are to be submitted in triplicate to the OSHA Office of Training and Educational Programs, 1555 Times Drive, Des Plaines, Illinois 60018. Applications should not be bound or stapled and should only be printed on one side of the page. All applications must be received no later than 4:30 p.m. Central Daylight Time, May 15, 1992.

OSHA will convene a panel of OSHA staff to review and rate the applications. Following the panel review, OSHA staff may conduct an on-site review of highly rated applicants before making a selection. The final selections will be made by the Assistant Secretary.

All applicants will be notified in writing of their selection or nonselection. It is anticipated that final selections will be made by August 1, 1992. OSHA will enter into a nonfinancial agreement with each successful applicant. The agreement will cover the responsibilities of both parties.

Appeals

There is no appeal procedure for unsuccessful applicants. Any applicant may request a copy of the documentation of its own review by writing to the OSHA Office of Training and Education, Division of Training and Educational Programs, 1555 Times Drive, Des Plaines, Illinois 60018.

Content of Applications

Each application must address each of the following points.

1. Identifying Information

Provide the name and address of the applicant organization. If the mailing address is a post office box, also provide the street address. Provide the name, title, and telephone number of the contact person who can answer questions about the application.

2. Authority to Apply

Provide a copy of the resolution by the Board of Directors, Board of Regents, or other governing body of the applicant organization approving the submittal of an application to OSHA to become an OSHA Training Institute Education Center.

3. Nonprofit Status

Include evidence of the nonprofit status of the applicant organization. A letter from the Internal Revenue Service or a statement included in a recent audit report is preferred. In the absence of either of these, a copy of the articles of incorporation showing the nonprofit status will be accepted.

4. Status as a Training Organization

This section applies only to applicants that are not colleges or universities.

Show that training or education is a principal activity of the applicant organization. Through audit reports, annual reports, or other documentation, demonstrate that for the last two years more than 50 percent of the applicant's funds have been used for training and education activities and that more than 50 percent of its staff resources have also been used for this purpose.

5. Occupational Safety and Health Experience

Describe the applicant's relevant course offerings for the last two years. Include copies of catalogs and other recruitment materials that provide descriptive material about courses. For each course, include the dates the course was offered and the number of students who completed the course. Also include descriptive material similar to the information contained in the appendix: Course description, objectives, topic outline, number of hours, and laboratories or other practical hands-on exercises included in the course.

6. Staff Qualifications

Describe the qualifications of staff teaching occupational safety and health courses. Indicate the professional qualifications of each, such as Certified Safety Professional (CSP), Professional Engineer (PE), or Certified Industrial Hygienist (CIH). Include resumés of current staff and position descriptions and minimum hiring qualifications for all positions, whether filled or vacant, which may be assigned to conduct OSHA classes.

7. Classroom Facilities

Describe classroom facilities available for presentations of the courses. Include number of students accommodated, desk arrangements, and availability of audiovisual equipment. Also describe appropriate laboratory facilities and other facilities available for hands-on exercises. Indicate provisions for accessibility for persons which disabilities.

8. Recruitment and Registration

Explain procedures for recruiting students from Federal agencies other than OSHA and from the private sector. Describe registration procedures including provisions for cancellation, furnishing enrollees with hotel information, and tuition or fee collection.

9. Accommodations

Provide a representative listing of hotels available for student accommodation and give sample room rates. Explain how students will be transported between the hotels and classes. Also describe the food service and restaurants available both in the area in which the classes will be held and the area where the hotels are located.

10. National Accessibility

Describe the accessibility of the training facility for students from all parts of the country. Include such items as distance from a major airport, number of airlines serving the airport, transportation from the airport to hotels, and distance from the interstate system.

11. Tuition

Provide a copy of the applicant organization's tuition and fee schedule. Explain how tuition and/or fees will be computed for each course, referencing the schedule.

12. Nondiscrimination

Provide copies of the applicant organization's nondiscrimination policies covering staff and students. In the absence of a written policy, explain how the applicant will ensure that staff and students are selected without regard to race, color, national origin, sex, age or disability.

13. Off-site Courses

If an applicant plans to conduct courses at sites other than its own facility, explain the circumstances under which such off-site courses will be conducted. Describe the classroom facilities which will be used, staff qualifications if different staff will be used, recruitment and registration procedures, accommodation arrangements, and accessibility to transportation. Failure to complete this section of the application will not prohibit a successful applicant for applying to OSHA for permission to conduct off-site courses at a later date.

Review Criteria

Construction and general industry applications will be reviewed separately. A panel made up of OSHA staff with expertise in training in each area will be convened for each category.

In addition to considering the factors listed below, the reviewers will also consider geographic coverage. The pilot project is intended to serve students from all parts of the country. Therefore, no more than one OSHA Training Institute Education Center will be awarded in any state. It is also unlikely that awards will be made in adjoining states. If an organization submits applications for both construction and general industry and is awarded both, it will be considered one OSHA Training Institute Education Center.

Applicants must document eligibility and authority from their governing boards in accordance with application contents items 2, 3 and 4 above. Applicants failing to provide such documentation will not receive a full review.

The following criteria will be used by the panels in their review of applications.

1. Occupational Safety and Health Training Experience

a. Evidence that occupational safety and health training or education has been an ongoing program within the applicant organization. Reviewers will examine the number of different occupational safety and health courses offered by the applicant organization over the past two years, the length of the courses, the number of students completing each course, and the number of times each course was offered. Successful applicants will also include samples of course announcements.

b. Qualifications of personnel teaching occupational safety and health courses. These include academic training in occupational safety and health subjects, professional certification, practical experience in the field of occupational safety and health, and training experience. Training experience is defined as experience in training workers or managers in nonacademic situations.

2. Adequacy of Training Facilities

Potential for accommodating classes of 25 to 40 students on a year-round basis in settings comparable to those of the OSHA Training Institute. Items considered will include classroom layout, e.g. desks or tables for students, availability of audiovisual equipment, reproduction facilities for handouts, and availability of appropriate laboratory and/or hands-on facilities. Accessibility for persons with disabilities will also be considered.

3. Recruitment and Registration Procedures

Reasonableness of the applicant's procedures for recruiting and registering students. Methods of reaching potential students, ease of registration, provisions for cancellations, and system for informing students of available accommodations and materials necessary for the course, if any, are among the items which will be reviewed.

4. Accommodations and Transportation

Availability of lodging and restaurant facilities and access to nationwide transportation. Accommodations, preferably national hotel/motel chains, and restaurants should be reasonably priced and should be within a few miles of the training facility. A major airport with regular service to all parts of the country should be within a reasonable driving time from the hotel and training location. Interstate highways should also be within reasonable distance.

5. Tuition

Conformance of proposed tuition and/or fees with the established policies of the applicant and reasonableness of the charges.

6. Nondiscrimination

Adherence of the applicant's policies with Federal requirements.

In addition, OSHA will review proposals to conduct off-site courses against the criteria above.

Proposal Conferences

The OSHA Office of Training and Education will hold two proposal conferences. These are intended to provide potential applicants with information about the OSHA Training Institute including a tour of the facility, OSHA Training Institute courses and methods of instruction, and administrative requirements for OSHA Training Institute Education Centers. They will also feature question and answer sessions about the documentation expected in applications.

The proposal conferences will be held from 9:30 a.m. to 12:30 p.m. on March 27 and April 2, 1992, at the OSHA Office of Training and Education, 1555 Times Drive, Des Plaines, Illinois 60018. Persons interested in attending one of these conferences should contact Ronald Mouw, Chief, Division of Training and Educational Programs, or Helen Beall, Training Specialist, at (708) 297-4810 to obtain information about local hotel accommodations and transportation. It is not necessary to register for the conferences.

Signed at Washington, DC this eleventh day of March, 1992.

Dorothy L. Strunk,

Acting Assistant Secretary of Labor.

Appendix

Course 204, Machinery and Machine Guarding Standards

1. Course Description

The course familiarizes the student with various types of common machinery and related safety standards. Guidance is provided with respect to the hazards associated with various types of machinery. The course presents an approach to machine inspection that enables participants to recognize hazards such as those created by points of operation, ingoing nip points, rotating parts, and flying chips or sparks, and provides some options to achieve abatement. Field trips are provided to enhance students' knowledge of machine guarding standards. Equipment is demonstrated to familiarize students with related safety standards. The OSHA Training Institute awards 4.8 CEU's for this course.

2. Course Objectives

Students completing this course should be able to:

a. Identify common machines found within a broad spectrum of industries;

b. Identify hazards that occur in or on machinery;

c. Select the appropriate OSHA standard that applies to a hazard; and

d. Present options to achieve abatement.

3. Course Topics

a. Introduction, pretest and pretest review, posttest and posttest review—4 hours.

b. Class visits to machine shops and review of visits—12 hours.

The class is taken on two visits (3 hours each) to private sector facilities with extensive and varied metalworking operations. The first trip follows discussion of 29 CFR 1910.211 and 29 CFR 1910.212 (see g. below) and exposes students to lathes, mills, boring machines and screw machines. The second trip follows 29 CFR 1910.217 (see m. below) and exposes them to mechanical power presses. After returning to the classroom, the class researches and reviews the standards that apply to the processes witnessed.

c. Hazards and standards workshop—3 hours.

In this workshop, written hazard conditions are researched, and standards are reviewed and referenced. Oral review also incorporates policy relating to specific conditions.

d. Inspection field trip to a machine shop works operation and inspection writeup—6 hours.

Students are given an opportunity to apply hazard recognition concepts on a site inspection at an operating facility with a variety of machine operations, including woodworking equipment. They evaluate and document any machinery and machine guarding hazards (3 hours) and then return to the classroom to research the standards for

citation references. They present an oral report on their findings.

e. Robotic safeguarding—1 hour.

f. Review of 29 CFR 1910, subpart O, machinery and machine guarding—1 hour.

g. Review of 29 CFR 1910.211 and 29 CFR 1910.212, guarding and devices—2 hours.

h. 29 CFR subpart J, 1910.147, control of hazardous energy (lockout/tagout)—2 hours.

i. 29 CFR subpart S, 1910.332–1910.335, electrical safety-related work practices—1 hour.

j. 29 CFR 1910.213, woodworking—2 hours.

k. 29 CFR 1910.215, abrasive wheels—2 hours.

l. 29 CFR 1910.216, mills and calenders—1 hour.

m. 29 CFR 1910.217, mechanical power presses—0 hours.

n. 29 CFR 1910.218, forging—1 hour.

o. 29 CFR 1910.219, power transmission—1 hour.

p. 29 CFR 1910.242–29 CFR 1910.244, portable tools—1 hour.

Course 500, Basic Instructor Course in Occupational Safety and Health Standards for the Construction Industry

1. Course Description

The course is designed for students in the private sector who are interested in developing safety and health programs in the construction industry. Special emphasis is placed upon those areas in construction that are the most hazardous, using OSHA standards as a guide. Course participants are briefed on effective instructional approaches and the effective use of visual aids and handouts. The course features demonstrations and hands-on use of various construction tools and equipment. Successful completion of this course qualifies the student to conduct both a 10-hour and a 30-hour construction safety and health course and to issue OSHA cards to participants certifying course completion. The OSHA Training Institute awards 2.5 CEU's for this course.

2. Course Objectives

Students completing this course should be able to:

a. Define construction terms found in OSHA standards;

b. Present effective safety and health training programs in accordance with OSHA construction standards, regulations, and guidelines;

c. Identify hazards and determine appropriate standards;

d. Prepare reports citing the conditions found; and

e. Identify methods to abate hazards.

3. Course Topics

a. Introduction, pretest and pretest review, overview of the OSH Act and OSHA, introduction to OSHA standards, posttest and posttest review—4 hours.

b. Safety programs, inspections, targeting and penalties—1 hour.

c. Training techniques—2 hours.

d. 29 CFR 1904, recordkeeping—1 hour.

e. 29 CFR 1926, subpart D, hazard communication—1 hour.

f. 29 CFR 1926, subpart E, health hazards in construction and personal protective equipment—3 hours.

g. 29 CFR 1926, subpart F, fire protection and prevention—1 hour.

h. 29 CFR 1926, subparts G, O and W, motor vehicles—1 hour.

i. 29 CFR 1926, subparts H, rigging—1 hour.

j. 29 CFR 1926, subpart I, tools—1 hour.

k. 29 CFR 1926, subpart K, electrical—2 hours.

l. 29 CFR 1926, subpart L, scaffolds—2 hours.

m. 29 CFR 1926, subparts M and X, walking and working surfaces and ladders—1 hour.

n. 29 CFR 1926, subpart N, cranes—1 hour.

o. 29 CFR 1926, subpart P, trenching—2 hours.

p. 29 CFR 1926, subpart Q, concrete—1 hour.

Course 501, A Guide to Voluntary Compliance in Safety and Health

1. Course Description

This course is intended for private sector personnel from all types of industries. It presents detailed information on how the provisions of the OSH Act may be implemented in the workplace. The primary focus is on the basics of the Act. The course includes an introduction to general industry standards and provides an overview of the requirements of the more frequently referenced standards. Segments of the course cover rights and responsibilities under the Act, contested citations, recordkeeping, and Voluntary Protection Programs. Successful completion of the course qualifies the student to conduct both a 10-hour and a 30-hour voluntary compliance course and to issue OSHA cards to participants certifying course completion. The OSHA Training Institute awards 2.5 CEU's for this course.

2. Course Objectives

Students completing this course should be able to:

a. Locate OSHA safety and health standards, policies, and procedures;

b. Describe the use of OSHA standards and regulations to supplement an on-going safety and health program;

c. Identify common violations of OSHA standards;

d. Describe appropriate abatement procedures for selected safety hazards; and

e. Describe how to conduct internal training on OSHA regulations.

3. Course Topics

a. Pretest and review, posttest and review, and overview of the training outreach program—2 hours.

b. Introduction to OSHA standards and hazard violation workshop—2 hours.

The hazard violation workshop introduces the students to the format of the OSHA standards. They are shown how the numbering system works, then must identify the applicable standard for approximately 40 hazardous conditions.

c. Overview of the OSH Act and 29 CFR 1903, inspections, citations and proposed penalties—2 hours.

d. 29 CFR 1904—recordkeeping—1 hour.

e. 29 CFR 1910, subpart D, walking and working surfaces—2 hours.

f. 29 CFR 1910, subparts E and L, means of egress and fire protection—2 hours.

g. 29 CFR 1910, subpart H, hazardous materials—2 hours.

h. 29 CFR 1910, subpart I, personal protective equipment—1 hour.

i. 29 CFR 1910, subpart J, lockout/tagout—½ hour.

j. 29 CFR 1910, subpart N, material handling—1 hour.

k. 29 CFR 1910, subpart O, machine guarding—2 hours.

l. 29 CFR 1910, subpart Q, welding—2 hours.

m. 29 CFR 1910, subpart S, electrical standards and work practices—2½ hours.

n. 29 CFR 1910, subpart Z, hazard communication—1½ hours.

o. 29 CFR 1910, subpart Z, introduction to industrial hygiene—1½ hours.

Course 521, OSHA Guide to Voluntary Compliance in the Health Area

1. Course Description

This course is designed for private sector personnel who are interested in increasing their knowledge of industrial hygiene practices and related OSHA regulations and procedures. Topics covered include permissible exposure limits, OSHA health standards, respiratory protection, engineering controls, hazard communication, sampling instrumentation, and workplace health program elements. There are workshops in health hazard recognition, air contaminant sampling, and the use of OSHA standards. The OSHA Training Institute awards 2.5 CEU's for this course.

2. Course Objectives

Students completing this course should be able to:

a. Define terms relating to OSHA health requirements;

b. Recognize potential health hazards in the workplace;

c. Perform basic health hazard evaluation using OSHA sampling procedures;

d. Recommend acceptable strategies for controlling hazardous conditions; and

e. Describe the elements required for an effective workplace health protection program.

3. Course Topics

a. Air contaminant sampling—1 hour.

b. Air sampling laboratory—1 hour.

Students are provided hands-on training in how to precalibrate and postcalibrate medium flow and low flow sampling equipment using OSHA procedures.

c. Compliance with air contaminant standards—2 hours.

d. Compliance with hazard communication—2 hours.

e. Compliance with hazardous waste standards—2 hours.

f. Compliance with the asbestos standard—2 hours.

g. Compliance with the bloodborne disease standard—1 hour.

h. Compliance with the noise standard—2 hours.

i. Compliance with the respirator standard—2 hours.

j. Compliance with ventilation standards and ventilation laboratory—2 hours.

Students are provided hands-on training in how to use velometers and ventilation smoke tubes to evaluate ventilation systems.

k. Detector tube sampling—1 hour.

l. Elements of a workplace health program—1½ hours.

m. Hazard violation workshop—2 hours.

Students are presented written workplace scenarios describing hazards and are to determine which OSHA health standards apply and why.

n. Health hazard recognition—1 hour.

o. OSHA ergonomic guidelines—1 hour.

p. OSHA recordkeeping for health—1 hour.

Course 600, Collateral Duty Course for Other Federal Agencies

1. Course Description

This course introduces Federal agency collateral duty (part-time) safety and health personnel to the OSH Act, Executive Order 12196, 29 CFR 1960, and 29 CFR 1910. It enables them to recognize basic safety and health hazards in their own workplaces, and to effectively assist agency safety and health officers with inspection and abatement efforts. A mock workplace inspection is conducted and student findings are reviewed. The OSHA Training Institute awards 2.2 CEU's for this course.

2. Course Objectives

Students completing this course should be able to:

a. Describe the OSH Act, 29 CFR 1960, and 29 CFR 1910;

b. Describe major provisions of Executive Order 12196;

c. Identify selected safety and health hazards and the corresponding OSHA standards;

d. Describe abatement methods for selected safety and health hazards; and

e. Explain and apply workplace inspection procedures consistent with established OSHA policies, procedure, and directives.

3. Course Topics

a. Course opening and course closing—2 hours.

b. Hazard communication—1 hour.

c. Inspection field trip, writeup and review—5 hours.

Students are introduced to the process of site inspection, i.e., what hazardous conditions or activities may be observed in the work environment. They are taken to an active government facility, and evaluate and document any observed hazards. After returning to the classroom, they research and select the standards applicable to the observed hazards. Presentations of findings are made to the class.

d. Introduction to accident investigation—1 hour.

e. Introduction to the OSH Act, Executive Order 12196, and 29 CFR 1960—2 hours.

f. Introduction to OSHA standards and hazard violation workshop and review—2 hours.

The hazard violation workshop introduces the students to the format of the OSHA standards. They are shown how the numbering system works, then must identify the applicable standard for approximately 40 hazardous conditions.

g. Office safety—1 hour.

h. 29 CFR 1910, subpart D, walking and working surfaces—1 hour.

i. 29 CFR 1910, subparts E and L, means of egress and fire protection—1 hour.

j. 29 CFR 1910, subpart H, hazardous materials—1 hour.

k. 29 CFR 1910, subpart I, personal protective equipment—1 hour.

l. 29 CFR 1910, subpart N, material handling—1 hour.

m. 29 CFR 1910, subpart O, machine guarding and portable tools—1 hour.

n. 29 CFR 1910, subpart Q, welding, cutting and brazing—1 hour.

o. 29 CFR 1910, subpart S, electrical standards—1 hour.

p. 29 CFR 1910, subpart Z, introduction to industrial hygiene—1 hour.

BILLING CODE 4510-26-M

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Chemical and Thermal Systems; Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following three meetings:

Name: Special Emphasis Panel in Chemical and Thermal Systems.

Date & Time: April 3, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 1243, 1800 G St., NW.

Contact: Drs. Merrill K. King and Michael M. Chen, Program Directors, 202–357–9806.

Date & Time: April 6, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 523, 1800 G St., NW.

Contact: Drs. Charles Maldarelli and Robert M. Wellek, Program Directors, 202–357–9506.

Date & Time: April 13–14, 1992; 8:30 a.m. to 5 p.m.

Place: Electric Power Research Institute, 10th Floor, 1019 19th St., NW., Washington, DC.

Contact: Dr. Farley Fisher, Program Director, 202–357–9542, NSF, 1800 G Street, NW., Washington, DC 20550.

Types of Meetings: Closed.

Purpose of Meetings: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C 552 b. (c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 12, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-20457]

Environmental Assessment: Finding of No Significant Impact and Notice of Opportunity for Hearing Related to Amendment of Materials License 04-23285-01, University of California, Los Angeles

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: NRC plans to issue an amendment to NRC License No. 04-23285-01, authorizing the University of California, Los Angeles (UCLA), to use hydrogen-3 (tritium) for *in vivo* studies of the red-footed booby (*Sula sula*), wedge-tailed shearwater (*Puffinus pacificus*), red-tailed tropicbird (*Phaethon rubricauda*), and sooty tern (*Sterna fuscata*) in their native habitat.

FOR FURTHER INFORMATION CONTACT: Dr. Donna-Beth Howe, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 504–2635.

Environmental Assessment

Identification of the Proposed Action

The proposed action is to amend NRC Byproduct Material License 04–23285–01, issued to UCLA on November 17, 1989. The license currently authorizes personnel from UCLA to perform tritiated water studies in a limited number of desert tortoises (*Gopherus agassizi*) at specific U.S. government sites in California. It does not authorize releases of byproduct material for any other field studies. The proposed amendment would authorize UCLA personnel (1) to use a bunker on Johnston Island as a temporary job site for the use and storage of tritiated water and tritium contaminated waste during the study; (2) to transfer the tritiated water and tritium contaminated waste to UCLA; and (3) to inject tritiated water in 30 adult birds from each of the following tropical seabird species: The red-footed booby (*Sula sula*), wedge-tailed shearwater (*Puffinus pacificus*), red-tailed tropicbird (*Phaethon rubricauda*), and sooty tern (*Sterna fuscata*). The birds' nesting sites are located on U.S. Government property at

Johnston Atoll in the Pacific Ocean. The proposed study involves injection of tritium into the birds as part of a large scientific study comparing the flight proficiency of four different species of seabirds with the biological productivity of the water over which each species forages. Since three species belong to a single guild of flocking birds and the fourth species never joins a flock, the study also examines the effects of flocking behavior in energy expenditure during flight and feeding activities. The study involves the tropical seabirds' release of tritiated water and water vapor directly into the environment. Accordingly, pursuant to 10 CFR 51.21, NRC has prepared this assessment of the resulting environmental impact.

The non-site-specific aspects of the tropical seabird study (i.e., possession of the preinjection tritiated water prior to shipment to Johnston Atoll, use and subsequent laboratory analysis of tritiated biological samples, waste disposal, and health and safety aspects of tritium use at UCLA) are performed under the authority of UCLA's license issued by the State of California.

Background

By letter dated November 12, 1991 (and attachments), the University of California, Los Angeles (UCLA or applicant) Radiation Safety Office representative requested an NRC amendment to perform hydrogen-3 labeled water (tritiated water) studies on four species of tropical seabirds, i.e., the red-footed boody (*Sula sula*), wedge-tailed shearwater (*Puffinus pacificus*), red-tailed tropicbird (*Phaethon rubricauda*), and sooty tern (*Sterna fuscata*), in their natural habitat. The United States Department of the Interior, Fish and Wildlife Service, Johnston Atoll, conditionally authorized the performance of the studies on Johnston Atoll pending NRC approval of the amendment request. The tritiated studies cannot begin until NRC amends UCLA's license to authorize the studies.

The field studies will extend over eight months (March-October 1992). The tropical seabirds will be injected with tritiated water, held 1 to 2 hours until the water equilibrates, have blood samples taken, and then be released. The birds will be recaptured 1 to 5 days later, have a second blood sample taken to measure body-water turnover as related to energy expenditure during flight and feeding activities, and be released again. All blood samples will be returned to UCLA for analysis.

Each bird will be marked with dye and have a U.S. Fish and Wildlife Service leg band. The U.S. Fish and Wildlife Service at Johnston Atoll has approved the bird capture methods used in the study.

Need for the Proposed Action

The previously authorized desert tortoise tritiated water studies (see Amendment 2) permitted UCLA researches to study the energy needs of an endangered species over a period of a year as the animals went through different levels of biological activities and seasonal stresses. The more complex tropical seabird tritiated water studies involve collecting quantitative data to determine the energy expenditure not only for each of the four species during a feeding flight at a particular point in their breeding cycle, but also of a population consisting of multiple species with distinct differences in normal feeding and flocking behaviors and flight proficiencies. This quantitative information will improve the scientific understanding of energy dynamics within an entire tropical ocean seabird community. The tropical ocean aspect of the study is of further importance because the standing stock of organisms affecting the prey-fish community of the seabirds is lower for tropical oceans than for temperate and polar seas. This study may enable researchers to identify and monitor factors that affect the population sizes of the tropical seabirds not only for Johnston Atoll, but also for tropical oceans.

Environmental Impacts of the Proposed Action

The Affected Environment.

The study site, Johnston Atoll National Wildlife refuge, is a coral atoll near the center of the North Pacific between the Hawaiian Islands and the Marshall Islands. The atoll is a broad shallow platform of approximately 50 square miles with a marginal reef emergent on the northwest. Located 1300 kilometers southwest of Honolulu, it is the only shallow water and dry land area for millions of square miles of ocean. The study will be conducted at nesting areas on three of the four islands emerging from the lagoon, i.e., Johnston Island (625 acres), Sand Island (22 acres), and East Island (18 acres). The islands are low in relief and covered with sand produced by coral rubble being worn down by wave action. They are sparsely vegetated with grasses, *scaevola* bushes, *casurina* trees, and a few coconut palms. Although the rainfall at the atoll averages 71 centimeters (28 inches) per year, there is no ground water run off because of the sandy soil. There are no water wells on the atoll.

Johnston Atoll is an unincorporated territory of the United States and both a military installation operationally controlled by the Defense Nuclear Agency and a part of the Hawaiian and Pacific Island National Wildlife Refuge System. The atoll was used for a series of high-altitude nuclear weapons tests in the late 1950's and early 1960's. There are approximately 1300 people living on Johnston Island and 10 on Sand Island. Only the two U.S. Fish and Wildlife Service biologists at the atoll and personnel approved by their office have access to East Island during the seabird nesting season. Everyone on the atoll lives and works there. The general public does not have access to the atoll. The food and supplies used by the workers on the atoll arrive by boat or plane. Although commercial airplanes land at the Johnston Island runway, only individuals with prior authorization are permitted to deplane. Because the atoll is a national wildlife refuge, the U.S. Fish and Wildlife Service prohibits all individuals on the atoll from harassing, willfully disturbing, hunting, trapping, capturing, killing or taking the eggs of any seabird. During the seabird nesting season, Johnston Island residents are not permitted access to East Island or nesting areas on Sand Island.

Johnston Atoll not only provides land for the seabirds to roost on but the turbulence caused by its physical presence in the warm flowing stream of the North Equatorial current brings nutrients to the surface downstream and creates a rich marine and microscopic plant life feeding ground for the seabirds. The deep surrounding ocean is virtually a biological desert because few nutrients rise to the surface and the microscopic plant life is too sparse to support marine creatures.

There are approximately 40–60 breeding pairs of red-footed boobies (found in waters with abundant standing stock of organisms) nesting on East and Sand Islands; three to four thousand breeding pairs of wedge-tailed shearwaters, (found in waters of intermediate levels of food stocks) nesting on Sand Island; several thousand breeding pairs of red-tailed tropicbirds (also found in waters of intermediate levels of food stocks) nesting on Johnston, East, and Sand Islands; and 50 to 100 thousand breeding pairs of sooty terns (found in waters of the lowest relative levels of food stocks) nesting on East and Sand Islands.

Study Subjects

Red-footed Booby

The adult red-footed booby has a mass of approximately 1000 grams (g) and wing spread of 150 centimeters (cm). It is the largest seabird in the study, but the smallest number of the booby family (sulidae). The red-footed booby prefers to nest in shrubs but, due to the lack of vegetation on East and Sand Islands, most adults nest on flat ground. The booby makes a shallow nest lined with bits of vegetation and lays one egg. The minimum space between nests within a colony is one or two meters. The egg hatches after 40 days and the chick fledges in three months. The adults leave the island during the day to forage and they spend the night either on the nest or on the water offshore.

Wedge-tailed Shearwater

The adult has a mass of approximately 500 g and a wingspan of 95 cm. It is the largest of two shearwater species breeding on the atoll. The adults are burrow nesters and dig a burrow in the soft sand that is supported by the roots of the lepturus grass. Shearwaters are highly colonial and nest in dense aggregations. A single egg is laid in a chamber at the end of the burrow. The egg hatches approximately 50 days later and the chick fledges three to four months later. The adults feed in flocks during the day, leaving and returning to the nest at night. At night, the adults are either on the nest or on the water offshore.

Red-tailed Tropicbird

The adult has a mass of approximately 600 g and a wingspan of 110 cm. It is the second largest species in the study. The adults nest in areas concealed from the direct sun. Usually their nests are beneath *Scaevola* bushes or *Casurina* trees, but, on Johnston Island, a few nest beneath man-made structures. While the red-tailed tropicbirds are not believed to be highly social (they are the only non-flocking seabird in the study), the scarcity of vegetation results in the birds being found in close proximity to one another and their nest sites a minimum of one meter apart. Their nest consists of a shallow depression in the coral substrate with no nesting material. The single egg hatches in approximately 40 days and the chick fledges four months later. Adults leave the island to forage during the day and at night are either on the nest or on the water offshore.

Sooty Tern

The adult has a mass of approximately 200 g and wingspan of 85 cm. It is the smallest of the four species in the study, but the most abundant seabird on the atoll with breeding pairs present year-round with peak numbers in the spring and summer nesting season. The sooty terns prefer areas clear of vegetation. Although they don't have a "nest", they nest on flat open ground laying a single egg in a small depression in the sand. They are highly social and nest in dense colonies. The single egg hatches in approximately 30 days and the chick fledges two months later. At night, the adults are either on the nest or on the wing at sea.

General

The red-footed booby, wedge-tailed shearwater, red-tailed tropicbird, and sooty tern have a number of common behavioral traits that are important to the study and the environmental assessment. They are all colonial and nest in localized groups. This allows the researchers to capture most of the study subject from a few small areas (approximately 50 square meter areas) on each island. All are relatively easy to capture: The wedge-tailed shearwaters and red-tailed tropicbirds can be approached and picked up; and the red-footed boobies and sooty terns can be captured with a long handled net. All capture methods are approved by the Fish and Wildlife Service.

All are highly philopatric: They return each year to breed on the same island and most return to the same nest year after year. Once in their nesting island, breeding birds remain on their nest, i.e., within an area of less than a square meter, they neither visit other parts of the island nor other islands. Each nesting pair lays only one egg; both adults incubate the egg until it hatches; and both adults feed the chick until it fledges. The chicks are confined to the nesting site until they fledge. After fledging, all three birds may leave the atoll until the next breeding season.

They are pelagic (i.e., ocean or sea) feeders: They must leave the atoll to find food at sea and spend long periods of time at sea. They may travel from tens of kilometers (km) (red-footed boobies) to 500 km (sooty terns) from the atoll to forage for food. Since all of the birds forage during the day, this reduces the amount of time spent on the islands or flying over populated areas during the day. They have no natural predators on the atoll.

None of seabirds species in the study are endangered species and none are expected to come in direct contact with the two endangered species found on the atoll (i.e., the Hawaiian monk seal [*Monachus schavinslandi*] or the green sea turtle [*Chelonia mydas*]).

The seabirds included in the tritiated water study will be nesting adults and will receive only one injection of tritiated water. The injection will be given within two weeks after the lone chick hatches. All of the seabird species on the proposed study have similar metabolic rates. The effective half-life of tritium is estimated to range from 1.7 days for the sooty tern to 2.7 days for the red-footed booby. Therefore, each adult will go through 10 tritium half-lives (from 17 to 27 days) well before the chicks fledge and the adults leave the atoll nesting sites for the year.

Although only one adult from each nesting pair will receive the tritiated water injection, the sex of the adult receiving the injection will not be known because it is impossible to determine the sex of any of the four species by external appearance or egg incubation or chick feeding behavior. Each injected bird will be marked with dye on a small area of its feathers to show it was injected and each bird can be individually identified by its unique Fish and Wildlife Service leg band number.

Study Protocol

Oxygen-18, a naturally occurring nonradioactive isotope of oxygen, is added to tritium to produce tritiated water with a higher oxygen-18 level than that found naturally in air (i.e., 0.2 percent of air oxygen). This permits double-labeled studies (i.e., hydrogen and oxygen turnover and carbon dioxide production) on the blood samples, better quantification of body water turnover, and thus energy-expenditure data for the seabird in its native environment. The oxygen-18 is activated to fluorine-18 in a cyclotron after the blood samples are collected and returned to UCLA. The oxygen-18 portion of they study, which will be carried out in an enclosed laboratory setting, neither involves byproduct material nor results in radioactive releases at the study sites, and will not be discussed further.

The study protocol calls for a single injection of 1 microcurie of tritium per gram of mass per bird in 30 adult seabirds each of the red-footed booby, wedge-tailed shearwater, red-tailed tropicbird and sooty tern breeding populations on Johnston Atoll. The injection of 1 microcurie per gram was chosen to minimize the amount of radioactive material used and maximize the probability that the blood sample would contain enough activity for

"counting statistics" purposes. Each seabird will be injected within two weeks of egg hatching to minimize the variables associated with feeding chicks of different ages. An initial blood sample will be taken 1 to 2 hours after injection with tritiated water to form a metabolic baseline. The next blood sample will be taken 2 to 5 days later depending on when the seabird returns from its feeding trip.

A total of 69 millicuries of tritium will be used over the duration of the tritiated water studies. All 120 birds will not be injected at the same time because of differences in breeding cycle and incubation periods. The total millicuries of tritium present in the nesting areas will be further reduced due to the tritium biological half-lives and different feeding patterns for each species. Therefore, the total amount of tritium present at one time in the nesting areas is expected to be less than 69 millicuries.

The study protocol also includes several nonradioactive components. Some birds will have activity recorders placed on their legs to monitor the time they spend flying when they are away from their nests. A representative number of birds from each species will be placed in a metabolic chamber to measure their resting metabolic rates. Wing morphology for all species will be described and studied. The tritiated water portion of the study will be performed first, and there will be a delay of at least 12 days before the nonradioactive metabolic chamber tests are performed. This will allow at least 4 to 6 effective half-lives to pass between the two phases of the study.

The data from the radioactive (i.e., field metabolic rates in free-living birds) and nonradioactive components will be combined to provide an extensive description of flight behavior, wing morphology and energetics for each species and the population.

Pathways to the Environment

The seabirds lose tritiated water by respiration (exhaled water vapor) and direct losses in feces (guano). The primary losses is thought to be in water vapor in the exhaled breath. The water vapor should be immediately carried away by wind for those seabirds in open spaces. In the case of guano dropped in the water, the tritium will be diluted by seawater. Guano on the island will dry in a matter of hours and the tritium will become water vapor that is carried off by the wind. Since the shearwaters nest in burrows, there may be tritium absorbed by the burrow walls. Shearwaters leave the nest to defecate, therefore, tritiated guano will not be deposited in the burrows. Although shearwaters may make burrows 2 meters long, those used in the study will have to be easily caught. Therefore, easily reachable shearwaters with shorter burrows are expected to be preferentially selected for the study. This will reduce the human tritium exposure during capture efforts that would result from the low levels of tritium that may concentrate in the burrows.

Assuming all 120 seabirds are injected with tritium, the total released to the environment will be 69 millicuries. Due to the feeding patterns of seabirds, i.e., they must fly great distances to find food, and their roosting patterns, i.e., they are either on the next or at sea at night, the tritium is expected to be released to a much larger area than the nesting sites. Due to the large area in which the tritium will be released and the dynamic nature of the environment, the tritium is not expected to bioconcentrate, but to be distributed in water vapor, plants, sand, and seawater. Sun, wind, rain, and seawater will act to further disperse the tritium beyond the nesting, flight, and feeding sites.

Pathway to Humans

Several factors, such as geographic isolation of Johnston Atoll, restrictions of access to east and Sand Islands, and the short duration of the individual bird studies, make it unlikely that the tritiated birds will come in direct contact with the general public. The Commanding Officer at Johnston Atoll prescribed regulations that reflect and support Federal laws and National Wildlife Refuge regulations. These regulations prohibit harassment, hunting, trapping, capture, or killing of the seabirds. The seabirds have no natural predators on the atoll. Although coconut palms are the only food chain plant on the atoll, they are not used as a food source. There are no food chain animals on the islands. Some fish and lobsters are caught and eaten by recreational fisherman and divers. The atoll has no wells and its fresh water is produced by a desalinization plant on Johnston Island. The seabirds injected on Johnston Island will be from nesting sites downwind from the desalinization plant. Any incorporation of tritium into the drinking water, coconuts, fish, and lobsters would be minimal because it could only occur, if ever, after dilution and biodispersion on the air and seawater.

The study calls for selecting nesting sites for the red-tailed tropicbirds, the only birds to be studied on Johnston Island, so that they are away from residential and recreational areas. Because of the small size of the islands, residents may pass by or work near nesting sites. The seabirds' behavior that keeps them either at their nesting site or at sea foraging also prevents them from visiting other islands or other sites on their own island. This greatly reduced interaction between injected seabirds and workers on the atoll. The seabirds in the study all nest in relatively crowded areas which reduces the size of the study site for each species to an approximately 50 square meter site. This concentration of study subjects also aids in physically separating them from the human population.

UCLA personnel who handle the tritiated water, collect samples, and inject birds have procedures and equipment to minimize their exposure to tritium to below the 10 CFR part 20 limits. Instruction and written procedures address proper receipt, survey, transportation, and handling of tritium and tritium contaminated waste and how to handle spills and other emergency situations. Further, these individuals are subject to UCLA's bioassay program to monitor their tritium uptake from all sources.

Dose and Effect on Red-footed Boobies, Wedge-tailed Shearwaters, Red-tailed Tropicbirds and Sooty Terns in the Tritiated Water Study

The adult red-footed boobies will each receive one injection of one millicurie of tritiated water. The initial concentration of tritiated water is expected to be 1.5 microcuries per milliliter of body water. The biological half-life of tritium for the red-footed booby is estimated to be 2.7 days and the estimated maximum radiation dose to a single adult is approximately 1.1 rads. The 30 adult bird sample size for the tritium part of the study results in 50 to 75 percent of the red-footed booby colony mated pairs being affected by the study. However, UCLA personnel believe this number of red-footed boobies should be injected with tritiated water because (1) the food foraging and flocking characteristics of the red-footed booby make it important to retain the species in the study, (20 the sample size is necessary to obtain statistically valid scientific data and (3) the small red-footed booby colony on Johnston Atoll represents a small percentage of the total world population of red-footed boobies.

Each adult wedge-tailed shearwater in the study will receive 0.5 millicuries of tritium. The biological half-life of tritium in this species is estimated to be 2.2 days and the estimated maximum radiation dose to a single adult is approximately 0.9 rads. Each adult red-tailed tropicbird will receive 0.5 millicuries of tritium. The estimated biological half-life is 2.3 days and the estimated maximum radiation dose to each adult is approximately 0.9 rads. For each sooty tern, the injections will have 0.2 millicuries of tritium; the estimated biological half-life is 1.7 days; and the maximum radiation dose is approximately 0.7 rads.

Most radiation biology studies are done using gamma radiation and small mammals. No information is currently available for seabirds. The internal beta dose from the tritiated water to each seabird is well below the 30 roentgens (gamma) that may cause reduced reproductive potential in mammals and the 800 rads (gamma) radiation dose expected to kill 50 percent of a song sparrow population, the LD (lethal dose) 50. The radiation doses to the seabirds are not expected to cause either acute or stocastic effects.

Effects On Other Species

Other plant and animal species in the area should not be adversely affected by the release of tritiated water into the environment. The seabirds have no natural predators or scavengers living on the atoll. Birds that die on land will decompose. Seabirds that die at sea will be eaten by scavengers such as planktonic decomposers, scavenger seabird species, and sharks. The seabirds are not expected to carry tritium with them when they leave the atoll at the end of their breeding season because the tritium will be biologically eliminated from the birds by then. The seabirds are not expected to come in direct contact with the two endangered species (the monk seal and the green turtle) because of their different biological life cycles and habitats. Since the tritium exposure levels in the seabirds are not high enough to cause either short- or long-term effects in the seabirds, the even lower levels of tritium dispersed in the environment should not have acute nor long term effects on other species in the study area.

Conclusions

Based on the foregoing assessment, the NRC staff concludes that the environmental effects of using tritium for the *in vivo* studies of wild red-footed boobies, wedgetailed shearwaters, red-tailed tropicbirds, and sooty terns are expected to be extremely small. The concentrations of tritium released by the seabirds into the unrestricted areas will be well below the limits specified in 10 CFR part 20. Thus, the estimated doses to Johnston and Sand Island residents, the general public, and UCLA personnel at Johnston Island are insignificant. Based on these considerations, this action will not result in significant effects on the quality of the human environment or the environment of endangered species, such as the monk seals or green turtles.

The estimated doses to the seabirds do not cause acute effects in the birds and are not expected to cause long-term effects. Therefore, in accordance with 10 CFR 51.31, a Finding of No Significant Impact is considered appropriate for this proposed action.

Alternatives to the Proposed Action

As required by section 102(2)E of the National Environmental Protection Act of 1969, as amended (NEPA) (42 U.S.C. 4322(2)E), possible alternatives to the proposed action have been considered. The first alternative is to use time-energy-budget experiments to determine energy expenditures. The time-energy-budget data obtained by using a metabolic chamber at Johnston Atoll will be used to determine resting metabolic rates. These experiments cannot duplicate the energy expenditures of the seabirds when they are searching for food. Therefore, this alternative cannot be used in this study to quantitate the energy expenditure of the seabirds during foraging activities.

A second alternative is to use duterium instead of tritium in the doubly-cabled water method. While this could theoretically provide the same information, the use of deuterim is impractical at this time. It is more difficult to measure deuterium accurately; deuterium requires a much longer analysis time, i.e., a few months vs. one week for tritium; larger volumes of deuterium water that would have to be injected into the seabirds to assure good statistical analysis may adversely affect the animal; and similarly the larger blood sample sizes needed from each seabird could also adversely affect the animals. Therefore, this alternative cannot be used in this study.

This last alternative to the proposed action is the denial of the license amendment request. This would result in UCLA having to abandon its attempt to study tritiated-body water in the four seabird species and would adversely affect the collection of quantitative energy expenditure data needed to understand the relationships between wing morphology, flocking, and prey fish availability in the tropical oceans. The study is designed to provide information needed to manage and protect the seabird colonies on Johnston Atoll.

There are no currently available alternatives to quantifying the body water turn-over data and energy expenditure determinations obtained from the study. The applicant will do double-labeled studies on the blood samples by measuring activated oxygen-18 levels. The oxygen-18 study does not involve byproduct material. Both the tritium and the oxygen-18 data are needed to interpret the body water data.

The benefits to be gained from denial would be no release of radioactive material to the environment. This is not a significant benefit because the estimated concentrations in unrestricted areas and resulting doses to humans from the studies will be insignificant. Further, the quantities of released materials are insignificant when considered in relationship to the amounts of radioactivity released at Johnston Atoll during the atmospheric weapons testing in the 1950's and 1960's.

The benefit of denying the license amendment request would be no excess radiation exposure above normal background at Johnston Atoll to the individual red-footed boobies, wedge-tailed shearwaters, red-tailed tropicbirds and sooty terns involved in the study. The benefit and the risk to the seabirds from he additional radiation exposure have to be weighed against the scientific information needed to manage and protect the seabirds that is to be obtained from this study (i.e., quantitative energy expenditure information for four different species of seabirds with differences in normal feeding and flocking behaviors and flight proficiencies at a common point in their nesting and survival activities).

Agencies and Persons Contacted

In performing this assessment, the staff contacted UCLA.

Finding of No Significant Impact

The Commission has determined, under NEPA and the Commission's regulations in 10 CFR part 51, that this proposed amendment to amend Byproduct Material License 04–23285–01 to permit: (1) Use of a bunker on Johnston Island as a temporary job site for the use and storage of tritiated water and tritium contaminated waste during the study; (2) the transfer of the tritiated water and tritium contaminated waste to UCLA; and (3) the injection of tritiated water into 30 red-footed boobies, 30 wedge-tailed shearwaters, 30 red-tailed tropicbirds, and 30 sooty terns, if granted, would not have a significant effect on the quality of the human environment or the tritiated red-footed boobies, 30 wedge-tailed shearwaters, 30 red-tailed tropicbirds, or 30 sooty terns, and that and

environmental impact statement is not required. This determination is based on the foregoing environmental assessment performed in accordance with the procedures and criteria in part 51, "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions."

For further details of this Action, see the application for license amendment, dated November 12, 1991, and other related correspondence. The documents (in Docket No. 030-20457) may be examined or copied, for a fee, in the Commission's Region V Public Document Room, 1450 Maria Lane, suite 210, Walnut Creek, California 94596.

Notice of Opportunity for a Hearing

Any person whose interest may be affected by the issuance of this amendment may file a request for a hearing. Any request for hearing must be filed wit the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555 within 30 days of publication of this notice in the **Federal Register** and must be served on the NRC staff by mail addressed to the Executive Director for Operations, U.S. Nuclear Regulatory Commission, Washington, DC 20555 or by delivery to the Executive Director for Operations, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852; and must be served on the applicant by mail or delivery to University of California, Los Angeles Radiation Safety Office, 10833 Le Conte Avenue, Los Angeles, California 90024. The request for a hearing must comply with the requirements set forth in the Commission's regulations, 10 CFR part 2, subpart L, "Informal Hearing Procedures for Adjudications in Material Licensing Proceedings." Subpart L of 10 CFR part 2 may be examined or copied for a fee in the Commission's Region V Public Document Room, 1450 Maria Lane, suite 210, Walnut Creek, California 94596 or in the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555.

As required by 10 CFR part 2, subpart L (10 CFR 2.1205), the request for a hearing must describe in detail: (1) The interest of the requestor in the proceeding; (2) how that interest may be affected by the results of the proceedings, including the reasons why the requestor should be permitted a hearing, with particular reference to the factors set out in paragraph (g) of 10 CFR 2.12055; (3) the requestor's areas of concern about the licensing activity that is the subject matter of the proceeding; and (4) the circumstances establishing that the request for a hearing is timely in accordance with paragraph (c) of 10 CFR 2.1205.

The factors in 10 CFR 2.1205(g) that must be addressed in the request for hearing include: (1) The nature of the requestor's right under the Atomic Energy Act of 1954 to be made a party to the proceeding; (2) the nature and extent of the requestor's property, financial, or other interest in the proceeding; and (3) the possible effect of any order that may be entered in the proceeding upon the requestor's interest.

Dated at Rockville, Maryland this 11th day of March 1992.

For the U.S. Nuclear Regulatory Commission.

Michael A. Lamastra,

Acting Chief, Medical, Academic, and Commercial Use Safety Branch, Division of Industrial and Medical Nuclear Safety, NMSS.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Subcommittee on Plant Operations; Meeting

The ACRS Subcommittee on Plant Operations will hold a meeting on April 1, 1992, in room P-110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, April 1, 1992—8:30 a.m. Until the Conclusion of Business

The Subcommittee will continue its review of the NRC staff's evaluation of risk from Shutdown and low-power operations at U.S. commercial nuclear power plants as well as the associated activities of the nuclear industry.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made. During the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, the nuclear industry, their respective consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Official, Mr. Paul Boehnert (telephone 301/492-8558) between 7:30 a.m. and 4:15 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: March 10, 1992.

Sam Duraiswamy

Chief, Nuclear Reactors Branch.

BILLING CODE 7590-01-M

[Docket No. 50-423]

Northeast Nuclear Energy Co.; Partial Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Northeast Nuclear Energy Company, et al. (the licensee) to withdraw a portion of its March 28, 1990 application for proposed amendment to Facility Operating License NPF-49 for the Millstone Nuclear Power Station, Unit No. 3, located at the licensee's site in New London County, Connecticut.

The proposed amendment would have modified Technical Specification (TS) 3/4.8.1, "A.C. Sources," to include provisions to eliminate the fast, cold, repetitive starting of diesel generators. Additional changes in TS 3/4.8.1 and its Bases have been proposed regarding instrumentation and test standards. In addition, TS 3/4.8.2, "D.C. Sources" would be changed to clarify the remedial measure for inoperability of the required full capacity battery chargers.

In the portion of the proposal which was withdrawn, it was proposed that Surveillance Requirement 4.8.1.1.2.a.6 (a monthly surveillance test) would be modified to specify error bands in loading the diesel generator in lieu of the existing requirement to load the diesel generator greater than or equal to a given value. Also, it was proposed that Surveillance Requirement 4.8.1.1.2.g.7 (a 24-hour run test) be modified to specify an indicated target value in lieu of existing requirement to load the diesel generator greater than or equal to a given value.

The Commission has previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on August 13, 1990 (55 FR 32985). However, by letter dated November 22, 1991, the licensee withdrew the above described portion of the proposed change.

For further details with respect to this action, see the application for amendment dated March 28, 1990, with supplemental information provided by letter dated July 24, 1990, and the licensee's letter dated November 22, 1991, which withdrew a portion of the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room located at the Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut 06360.

Dated at Rockville, Maryland, this 9th day of March 1992.

For the Nuclear Regulatory Commission.

Vernon L. Rooney,

Senior Project Manager, Project Directorate I-4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 92-6204 Filed 3-16-92; 8:45 a.m.]

BILLING CODE 7590-01-M

[Docket No. 50-423]

Northeast Nuclear Energy Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 64 to Facility Operating License No. NPF-49 issued to Northeast Nuclear Energy Company, et al., which revised the Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 3, located in New London County, Connecticut. The amendment is effective as of the date of issuance.

The amendment changes Technical Specification (TS) 3/4.8.1, "A.C. Sources," to include provisions to eliminate the fast, cold, repetitive starting of the diesel generators. Additional changes in TS 3/4.8.1 and its Bases concern instrumentation and test standards. In addition, TS 3/4.8.2, "D.C. Sources" is changed to clarify the remedial measure for inoperability of the required full capacity battery chargers.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 13, 1990 (55 FR 32985). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action see (1) the application for amendment dated March 28, 1990, as supplemented July 24, 1990, and November 22, 1991, (2) Amendment No. 64 to License No. NPF-49, (3) the Commission's related Safety Evaluation, and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555 and at the local public document room located at the Learning Resources Center, Thames Valley Technical College, 574 New London Turnpike, Norwich, Connecticut 06360. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Document Control Desk.

Dated at Rockville, Maryland this 9th day of March 1992.

For the Nuclear Regulatory Commission.

Vernon L. Rooney,

Senior Project Manager, Project Directorate I-4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

POSTAL RATE COMMISSION

[Docket No. A92-9; Order No. 920]

Fabyan, Connecticut 06245 (Helen Thomas, et al., Petitioners); Order Accepting Appeal and Establishing Procedural Schedule Under 39 U.S.C. 404(b)(5)

Issued March 11, 1992.

Docket Number: A92-9.

Name of Affected Post Office: Fabyan, Connecticut 06245.

Name(s) of Petitioner(s): Helen Thomas and others.

Type of Determination: Closing.

Date of Filing of Appeal Papers: March 6, 1992.

Categories of Issues Apparently Raised:

1. Effect on the community (39 U.S.C. 404(b)(2)(A)).
2. Effect on postal services (39 U.S.C. 404(b)(2)(C)).
3. Economic savings (39 U.S.C. 404(b)(2)(D)).

Other legal issues may be disclosed by the record when it is filed; or, conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition, in light of the 120-day decision schedule (39 U.S.C. 404(b)(5), the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the petitioner. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memoranda previously filed.

The Commission Orders

(A) The record in this appeal shall be filed on or before March 23, 1992.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the **Federal Register**.

By the Commission.

Charles L. Clapp,

Secretary.

Appendix—Docket No. A92-9 Fabyan, Connecticut 06245

March 6, 1992—Filing of Petition.
March 11, 1992—Notice and Order of Filing of Appeal.
March 31, 1992—Last day of filing of petitions to intervene (*see* 39 CFR 3001.111(b)).
April 10, 1992—Petitioner's Participant Statement or Initial Brief (*see* 39 CFR 3001.1151 (a) and (b)).

April 30, 1992—Postal Service Answering Brief (*see* 39 CFR 3001.115(c)).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-30452; International Series No. 371; File Nos. SR-Amex-90-25 and SR-Amex-91-01]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Changes Relating to the Listing of Index Warrants and Options Based on the Eurotop 100 Index

I. Introduction and Background

On November 16, 1990 and February 4, 1991, respectively, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] proposed rule changes to list options and warrants based on the Eurotop 100 Index ("Eurotop 100 Index" or "Index"). Notice of the proposals appeared in the Federal Register on December 19, 1990 and March 8, 1991, respectively.[3] No comments were received on the proposed rule changes. This order approves those proposals.

[1] 15 U.S.C. 78s(b) (1982).

[2] 17 CFR 240.19b-4 (1990).

[3] The proposed rule changes were published for comment in Securities Exchange Act Release Nos. 28693 (December 12, 1990), 55 FR 52115 and 28929 (March 1, 1991), 56 FR 9088. Subsequently, the Amex submitted additional information and clarifications to the Commission regarding its proposals to list options and warrants based on the Eurotop 100 Index. *See* Securities Exchange Act Release No. 28935 (March 4, 1991), 56 FR 10448 (Amendment No. 1 to SR-Amex-90-25, the Amex's index option proposal); letter from Barbara D. Salmanson, Special Counsel, Options Division, Amex, to Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division of Market Regulation ("Division"), SEC, dated December 3, 1990; letter from Barbara D. Salmanson, Special Counsel, Options Division, Amex, to Howard Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated February 21, 1991, including, among other things, rules for the Eurotop 100 Index ("Eurotop 100 Rules"); letter from Barbara Salmanson, Special Counsel, Options Division, Amex, to Howard Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated April 18, 1991; letter from Barbara Salmanson, Special Counsel, Amex, to Howard Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated April 22, 1991, including 1991/1992 Specifications for the Eurotop-100 Index ("1991/1992 Specifications"); telefax from Barbara Salmanson, Special Counsel, Options Division, Amex, to Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated April 23, 1991 (April 23, 1991 Amex telefax); letter from Nathan Most, Vice President, New Products Division, to Thomas Gira, Branch Chief, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated June 3, 1991; telefax from Ellen T. Kander, Special Counsel, Derivative Securities, Amex, to Howard L. Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated January 10, 1992 ("January 10, 1992 Telefax"); telefax from Ellen T. Kander, Special Counsel, Derivative Securities, Amex, to Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated January 28, 1992; letter from Ellen T. Kander, Special Counsel, Derivative Securities, Amex, to Thomas Gira, Branch Chief, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated February 12, 1992; letter from Ellen T. Kander, Special Counsel, Derivative Securities, Amex, to Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated February 21, 1991; and letter from Clifford J. Weber, New Products Specialist, New Products Development, Amex, to Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated March 4, 1992. The description of the Eurotop 100 Index contained in this order reflects the additional information and clarifications provided by the Amex.

II. Description of the Proposals

The Amex proposes to list index warrants based on the Eurotop 100 Index, an index that is designed to represent substantial segments of the European stock market. The Amex is submitting its proposal to list Eurotop 100 warrants pursuant to the requirments of a 1986 Commission approval order ("Index Warrant Approval Order") that, among other things, permitted the Exchange to list index warrants based on established market indices, both foreign and domestic.[4] Additionally, the Amex proposes to list for trading standardized European-style options (exercisable at expiration only) based on the Eurotop 100 Index pursuant to Exchange rules applicable to the trading of index options.

A. Description of the Index

The Amex proposes to list warrants and options based on the Eurotop 100 Index, a weighted index [5] developed and maintained by the European Options Exchange ("EOE") that is comprised of 100 European stocks from nine countries.[6] The Eurotop 100 Index, which is denominated in European Currency Units ("ECUs"), is designed to measure the collective performance of the most actively-traded stocks on the major European stock exchanges. In order to ensure that the Eurotop 100 reflects this active segment of the European stock market, there are specific Eurotop 100 Index Rules that determine: (1) The countries represented in the Index; (2) the base weighting of the countries in the Index; (3) the stocks from each country represented in the Index; and (4) the weighting of the stocks in the Index.

First, the Eurotop 100 Rules provide that only European countries with significant stock exchanges are eligible

[4] Securities Exchange Act Release No. 28132 (October 3, 1988), 53 FR 39832.

[5] The Eurotop 100 Index is neither price-weighted nor capitalization-weighted. Instead, as described below, the EOE utilizes a weighting process based on the relative capitalizations of each component country's primary stock market and the relative Gross National Product ("GNP") of each country to determine each country's representation in the Eurotop 100 Index. The EOE uses another process based on share price and trading volume to determine the weighting of each stock included in the Eurotop 100 Index.

[6] As of December 27, 1991, the nine countries were: United Kingdom, France, Germany, Switzerland, Italy, the Netherlands, Sweden, Spain, and Belgium. *See* January 10, 1992, Telefax, *supra* note 3.

to be represented in the Index. Specifically, a country must be a European member of the Organization of Economic Cooperation and Development ("OECD"),[7] and the capitalization of the country's primary stock exchange must be at least 2.5% of the aggregate market capitalization of the primary stock exchanges of all the countries that are included in the Eurotop 100 Index.[8]

Second, the Eurotop 100 Rules provide that country weightings within the Index are determined according to the relative stock market capitalizations and GNPs of the countries included in the Eurotop 100 Index. Specifically, 90% of a country's weighting is determined based on the percentage share of the aggregate capitalization of the primary stock exchanges of the countries contained in the Eurotop 100 Index represented by the primary stock exchange of that country.[9] The remaining 10% of a country's weighting is based on its percentage share of the total GNP of all Eurotop 100 Index countries.[10] The EOE employs a mathematical formula that combines these two relative percentages (*i.e.*, market capitalization and GNP) to arrive at the "base" weighting for each country.[11] In addition, in order to ensure that one country does not dominate the Eurotop 100 Index, the Eurotop 100 Rules provide that biennially each country's base weighting is adjusted so that it is no more than twice the average weighting of the countries included in the Index [(*i.e.*, 2 × (100 divided by the number of countries in the Index)]. Thereafter, a country's actual weighting could increase beyond its base weighting if its Index securities outperform those from other Index countries. Accordingly, so long as nine countries remain in the Eurotop 100 Index, no country can have a base weighting greater than 22%, although a country's actual weighting could increase beyond 22% after the biennial revision.[12]

The countries currently included in the Eurotop 100 Index and their weightings as of December 27, 1991, are as follows: United Kingdom, 27%; Germany, 14%; France, 14%; Switzerland, 10.5%; Spain, 9%; the Netherlands, 8%; Sweden, 8%; Italy, 6%; and Belgium, 3.5%.

Third, the Eurotop 100 Rules provide that only liquid issues are eligible to be included in the Index. Specifically, the Eurotop 100 Rules are designed to select those stocks that have the highest monetary trading volume over the past three calendar years on the primary stock exchange of their home country.[13] Under the rules, the EOE ranks the stocks for each country according to their cumulative effective turnover for the past three calendar years.[14] After ranking the stocks for each country on this basis, then starting with the stock with the highest cumulative turnover for this period, the EOE selects stocks from each country to correspond to the base weighting that has been established for the country in the Eurotop 100 Index. For example, because Belgium currently has a country base weighting of 4%, the four Belgian stocks with the highest turnover over the most recent three-year period were selected for inclusion in the Eurotop 100 Index.

Fourth, after the component stocks from each country are selected, they are weighted based on their comparative turnovers. Thus, if stock *XYZ* comprises 40% of the total effective turnover of the stocks selected from that country for inclusion in the Eurotop 100 Index, and the country has a Eurotop 100 Index base weighting of 4%, then the weighting of *XYZ* would be 1.6% of the Eurotop 100 Index. The Index weighting for *XYZ* (1.6%) is equal to 40% of the country's total weighting within the Index, 4%. The number of shares of *XYZ* included in the Eurotop 100 Index is calculated so that the value of the selected shares, in ECUs, will equal 1.6% of the overall value of the Eurotop 100 Index.[15] As a result, the number of shares of each of the issues contained in the Eurotop 100 Index varies widely. For example, the number of shares of the 10 Italian stocks included in the Eurotop 100 Index ranges from 34 shares to 812 shares. By contrast, all of the 10 Swiss stocks included in the Eurotop 100 Index are represented by less than two shares of stock.[16]

In order to ensure that the Eurotop 100 Index will remain representative of the most actively-traded stocks on the major European stock exchanges, the EOE reviews country weightings biennially. Any changes in country selections and weightings, if appropriate, will be made in April of even numbered years based on the relative capitalizations and GNPs at the end of the previous year. At such time, countries may be added or deleted based on the Eurotop 100 Index eligibility criteria.[17] Adjustments to country weightings, however, only will be made when the base weighting for one or more countries must be changed by at least two percent.

By contrast, the EOE will review Eurotop 100 Index stock selections and stock weightings on an annual basis based on the monetary share volumes of the stocks over the three prior calendar years. As a result of the stock review in 1991 by the EOE, nine stocks in the Eurotop 100 Index were replaced.[18]

Additionally, there are specific Eurotop 100 Index Rules designed to account for corporate actions that involve one or more component companies, such as mergers and certain other corporate actions by component companies, such as stock dividends or rights offerings.[19] Consistent with the

[7] OECD is an organization of 24 countries in North America, Western Europe and the Pacific, formed to promote world trade and the world economy.

[8] The primary stock exchanges of the countries contained in Eurotop 100 Index are as follows: United Kingdom, London Stock Exchange ("LSE"); Germany, Frankfurt Stock Exchange; France, Paris Bourse; Switzerland, Zurich Stock Exchange; Italy, Milan Stock Exchange; the Netherlands, Amsterdam Stock Exchange; Sweden, Stockholm Stock Exchange; Spain, Madrid Stock Exchange; and Belgium, Brussels Stock Exchange.

[9] The aggregate market capitalization calculation is based on the capitalization of each component country's primary stock market, represented in U.S. dollars, at the end of the prior year.

[10] This calculation is based on the most recent GNP figures published by the OECD for a full calendar year, expressed in ECUs.

[11] *See* Eurotop Rules, *supra* note 3, at appendix 2.

[12] As described in more detail below, because the stocks in the Index were selected based on these country weightings at one point in time, the actual weightings of each country in the Eurotop 100 Index fluctuates based on changes in stock prices and currency values.

[13] The Eurotop Rules also provide that certain stocks are excluded from consideration for inclusion in the Index. Specifically, investment company stocks and securities that are not available for investment by foreigners are ineligible to be included in the Index. In addition, if more than one class of stock of the same company meets the selection criteria, only the class with the largest effective share volume will be included.

[14] Under the Eurotop 100 Rules, the cumulative effective turnover for a stock is the value (in local currency) of the actual number of shares traded during the three most recent years. See Eurotop 100 Rule 1.6, *supra* note 3.

[15] For example, if the aggregate Index value is 100,000 ECUs, then *XYZ* would represent 1.6% of 100,000 ECU or 1,600 ECU. If the stock is priced at 25 in its home country and the exchange rate between the home country currency ("HC") and the ECU is two (ECU/HC=2), then there would be 30 shares of *XYZ* stock in the Index. *See* April 23, 1991 Amex telefax, *supra* note 3. In addition, the number of shares of each stock is rounded to the nearest whole number, except when the number is less than one. In which case, the number is rounded to the nearest tenth of a share. See Eurotop 100 Index Rule 1.7, *supra* note 3.

[16] See January 10, 1992 Telefax, *supra* note 3.

[17] Any periodic adjustment to the selection and weighting of countries will occur, if necessary, immediately after the third Friday in April of any even dated year.

[18] These stocks were replaced because after updating the cumulative effective turnover data by adding 1990 turnover data and deleting 1987 turnover data, nine other companies had higher cumulative turnovers. The new selections become effective April 22, 1991. See Attachment B to April 18, 1991 Letter, *supra* note 3.

[19] Operational adjustments to the weightings of stocks to correct the Eurotop 100 Index value will be

Continued

design and operation of the Eurotop 100 Index, the Eurotop 100 Rules provide that any necessary changes will be done in such a way as to result in minimal changes in the value of the Eurotop 100 Index.[20] In this regard, the EOE maintains a list of potential replacement stocks for each country.

The EOE, for purposes of calculating the Eurotop 100 Index, will use the last sale price of each component stock in its own home currency, reported by the principal stock exchange in its home country. On an instantaneous and continuous basis, the value of each component stock in its respective home country currency first will be converted into either German marks or U.S. dollars and then into ECUs, based on the German mark or U.S. dollar/ECU lowest asked price at that moment as quoted by the foreign exchange institutions whose quotes are disseminated by Reuters PLC.[21] Accordingly, Index values will reflect the last available component stock prices converted into EDUs. Nonetheless, in the event there is no price change in a component stock, its value will be continuously updated to reflect any changes in the home currency/U.S. dollar or German mark/ECU exchange rates.

The EOE proposes to calculate the official Eurotop 100 Index value from 11 a.m. to 5:30 p.m. Central European Time ("C.E.T.") (5 a.m. to 11:30 a.m. E.S.T.), at which time trading has ceased on the primary markets in all Eurotóp 100 Index countries. Currently, the EOE disseminates the Eurotop 100 Index value every 15 seconds to all EOE data vendors, which include Quotron, Reuters, and Bridge Information Service. If at 11 a.m. C.E.T. (5 a.m. E.S.T.), 75 or more of the Eurotop 100 Index's component stocks are open for normal trading, then the Eurotop 100 Index values published until 5:30 p.m. C.E.T. (11:30 a.m. E.S.T.) that day will be considered "Official Index Values."[22]

An official settlement value for the Eurotop 100 Index is calculated each month for use in connection with financial products based on the Eurotop 100 Index. The settlement value is calculated on the third Friday of the month provided that all relevant stock exchanges customarily are open for normal, regulated trading on that day.[23] The settlement value of the Eurotop 100 Index will be based on the average of the index values calculated at 5 minute intervals between 12:30 p.m. and 1 p.m. C.E.T. (6:30 a.m. and 7 a.m. E.S.T.)

B. Applicable Warrant Rules

Consistent with the Index Warrant Approval Order, the Amex represents that Eurotop 100 Index warrant issues will conform to the listing guidelines contained in section 106 of the Amex Company Guide. Specifically, Section 106 provides that: (1) The issuer of Index warrants must have assets in excess of $100 million and otherwise substantially exceed the size and earning requirements in section 101(a) of the Company Guide;[24] (2) the term of the warrants shall be for a period ranging from one to five years from the date of issuance; and (3) the minimum public distribution of such issues shall be one million warrants together with a minimum of 400 public holders, and have an aggregate market value of $4 million.

The Amex proposes that these warrants will be direct obligations of their issuer subject to cash-settlement during their term. The Amex intends to list both American-style warrants (*i.e.*, exercisable throughout their life) and European-style warrants (*i.e.*, exercisable only on their expiration date). Upon exercise of a Eurotop 100 Index warrant, or at the warrant's expiration date if not exercisable prior to such date, the holder of a warrant resembling a put option would receive payment in U.S. dollars to the extent that the Eurotop 100 Index has declined below a pre-stated cash settlement value while the holder of a warrant resembling a call option would receive payment in U.S. dollars to the extent that the Index has increased above the pre-stated cash settlement value. Warrants that are out-of-the-money at the end of the stated term will expire worthless.

Consistent with the Index Warrant Approval Order, trading in Eurotop 100 Index warrants will be subject to several safeguards designed to ensure investor protection. Specifically, pursuant to Commentary .02 to Amex Rule 411, the Exchange has recommended to its members that they should sell Eurotop 100 Index warrants only to options-approved accounts. In addition, the options suitability standard of Amex Rule 923 will apply to recommended Index warrant transactions.[25] Moreover, a Senior Registered Options Principal or Registered Options Principal will be required to approve and initial a discretionary order in Eurotop 100 Index warrants on the day the order is entered. Furthermore, the Amex, prior to the commencement of trading of Eurotop 100 Index warrants, will distribute a circular to its membership calling attention to the specific risks associated with warrants based on the Eurotop 100 Index.

C. Applicable Options Rules

The Amex proposes to trade standardized European-style options (exercisable only at expiration) based on the Eurotop 100 Index. Options on the Eurotop 100 Index will be governed by current Exchange rules applicable to the trading of index options.[26] These rules govern matters such as disclosure, account approval and suitability, position and exercise limits,[27] margin, and trading halts and suspensions.[28]

taken only when the action by a company would otherwise change the value of the underlying portfolio by more than one ECU (0.09 Eurotop 100 Index point). See Eurotop 100 Index Rule 4.6.1, *supra* note 3.

[20] *See* Eurotop 100 Rules 4.5 (Operational Adjustments to the Selection of Stocks) and 4.6 (Operational Adjustments to the Weighting of Stocks), and Appendix 4 to the Eurotop 100 Rules (The Weighting of Stocks in the Event of Merger of Stocks Included in the Eurotop 100), *supra* note 3.

[21] For most home country currencies, the German mark rather than the U.S. dollar is used as the intermediary currency because it provides a more constant crossing rate. Reuters displays real-time currency quotes from approximately 1,100 contributors worldwide on a 24-hour basis. Contributors are largely banks and other foreign exchange dealers. See March 4, 1992 Letter, *supra* note 3.

[22] If more than 25 of the Eurotop 100 Index's component stocks are not open for normal trading at 11 a.m. C.E.T. (5 a.m. E.S.T), however, then the Eurotop 100 Index values published until 5:30 p.m. C.E.T. (11:30 E.S.T.) will be considered "partial index values." Similarly, the publication of Eurotop 100 Index values may commence as soon as the first primary stock exchange for a component country commences trading. Index values published between this time and the time of publication of the first Official Index Value (*i.e.* between 9:30–11 a.m. C.E.T. or 3:30–5 a.m. E.S.T.) will be considered "pre-opening index values."

[23] If this is not the case, then the settlement value will be calculated on the first preceding day during which all the relevant stock exchanges customarily are open for normal trading.

[24] Section 101(a) of the Amex Company Guide requires the issuer to have stockholders' equity of at least $4,000,000 and pre-tax income of at least $750,000 in its last fiscal year, or in two of its last three fiscal years.

[25] Amex Rule 923 prohibits any member, member organizations, or registered employee thereof from recommending any options transaction to any customer unless such person making the recommendation has reasonable grounds to believe that the entire recommended transaction is not unsuitable for such customer and the person has a reasonable basis for believing that the customer has such knowledge and financial experience to be able to evaluate the transaction's risks.

[26] See Amex Rules 900C–980C.

[27] Pursuant to Exchange rule 904 (b), the Exchange proposes to establish a position limit of 25,000 contracts on the same side of the market for the Eurotop 100 Index contracts, provided that no more than 15,000 of such contracts will be permitted in the series of the nearest expiration month.

[28] Amex Rule 117 provides for a one hour trading halt in all securities traded on the Amex if the Dow

Continued

The closing Eurotop 100 Index value on December 30, 1991, was 459.07. The Exchange believes that this value would be at too high a level to sustain successfully options trading in the U.S. market. Accordingly, the Exchange proposes to base trading in its Index options on a reduced level of the Eurotop 100 Index. Specifically, the Exchange proposes to divide the Eurotop 100 Index value by 5 for the purposes of trading options on the Index. The multiplier for the Eurotop 100 Index is 100.[29]

The reduced value Eurotop 100 Index that will serve as the basis for the Amex's Eurotop 100 Index option contract will be based on the Eurotop 100 Index value it receives from the EOE and will be disseminated on a continuous basis through the Options Price Reporting Authority ("OPRA"). Additionally, all trade and quotation data regarding Eurotop 100 Index options will be disseminated to vendors through OPRA.

The Amex, pursuant to Amex Rule 903C, intends to list up to three near-term expiration months, one additional series in the March quarterly cycle and five additional long-term options series, with consecutive June and December expirations extending into successive years. The Exchange proposes 2½-point strike price intervals for near-term options when the reduced Index value is below 200; when the reduced Index value is 200 or greater the Amex proposes to implement 5-point strike price intervals. Additionally, the Amex proposes strike price intervals for long-term options at either 25 or 50 point intervals depending on the then current volatility of the Eurotop 100 Index.

The options will expire on the Saturday following the third Friday of the expiration month. The last trading day in an options series normally will be the second to last business day preceding the Saturday following the third Friday of the expiration month (normally a Thursday), except in the event of a holiday at the Amex.[30] For settlement purposes, the Eurotop 100 Index value will be based on the average of the official values for the Eurotop 100 Index at five minute intervals between 12:30 p.m. and 1 p.m. C.E.T. on Expiration Friday. Accordingly, the Index settlement value will be determined between 6:30 to 7 a.m. E.S.T. on the morning of Expiration Friday. In the event that a primary exchange ordinarily is not open for trading on an Expiration Friday, however, the Index settlement value will be calculated on the first preceding day when all the primary exchanges are open.[31]

The Eurotop 100 Index will be valued in U.S. dollars even though the Eurotop 100 Index is comprised entirely of European stocks. The Exchange will assign a value of one U.S. dollar to each 100 decimal points of the Eurotop 100 Index. Thus, as the Eurotop 100 Index value reflects changes in the ECU prices of the component stocks, the premiums of Index options will change in U.S. dollars, without regard to fluctuations in the ECU/U.S. dollar exchange rate. This index valuation method is designed for investors that primarily are concerned with changes in the ECU price levels of the European market and not in the combined effect of price movements in the European stock market and changes in the ECU/U.S. dollar exchange rate. Moreover, the proposed valuation method permits the options premiums to be quoted in U.S. dollars and the trading accounts to be denominated in U.S. dollars. Accordingly, all Exchange, Options Clearing Corporation ("OCC") and clearing member systems will be able to accommodate the trading, clearance and settlement of the Eurotop 100 Index options without alteration.

III. Discussion

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6(b)(5) of the Act.[32] Specifically, the Commission finds that the trading of options and warrants on the Eurotop 100 Index will serve to protect investors, promote the public interest, and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with European stock investments.[33] The trading of options and warrants on the Eurotop 100 Index, however, raises several concerns, namely, issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the Amex adequately has addressed these concerns.

A. Index Design and Structure

The Commission finds that classifying the Index as broad-based, and, thus, permitting Exchange rules applicable to the trading of broad-based index options to apply to Eurotop 100 Index options is appropriate given the large capitalization, broad diversification, and mature markets of the component stocks of the Eurotop 100 Index. Moreover, for both the Eurotop 100 Index options and warrants, the broad-based design of the Index significantly minimizes the potential for manipulation of the Index.

First, the total capitalization of the Eurotop 100 Index is U.S. $957 billion.[34] Second, the stocks in the Eurotop 100 Index are from a wide range of European industry sectors. Although the Eurotop 100 Index component stocks are not selected to achieve a specified

Jones Industrial Average ("DJIA") declines 250 points from its previous day's closing value and a two hour trading halt if the DJIA declines 400 points from its previous day's closing value. Additionally, Amex Rule 918C permits the Exchange to halt or suspend trading in options on a stock index if, among other reasons, unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. See Securities Exchange Act Release No. 28198 (October 19, 1989), 53 FR 41637.

[29] An index multiplier is a number which determines the total settlement dollar value of each point of the underlying index.

[30] In the event of a Thursday holiday in the U.S., the last trading day for Index options will fall on the previous business day, usually the Wednesday prior to expiration. Settlement of the Index options will continue to be based on Friday's opening prices. See February 12, 1992 Letter, *supra* note 3.

[31] When there is a holiday in Europe on Expiration Friday, necessitating an earlier determination of Index settlement value (*i.e.* Thursday), the Amex will correspondingly cease trading in expiring options series on Wednesday instead of Thursday.

[32] 15 U.S.C. 78f(b)(5) (1988).

[33] Pursuant to Section 6(b)(5) of the Act, the Commission must predicate approval of any new option or warrant proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options or warrants on the on the Eurotop 100 Index will provide investors with a hedging vehicle that should reflect the overall movement of the European stock market. The Commission also believes that these options and warrants will provide investors with a means by which to make investment decisions in the European equity market, allowing them to establish positions or increase existing positions in European stocks in a cost effective manner.

[34] *See* April 10, 1991 Letter, *supra* note 3. The market capitalization of the Eurotop 100 Index is larger than the capitalization of all the other foreign stocks indices that the Commission has reviewed except the Europe, Australia, Far East ("EAFE") Index. Specifically, when reviewed by the Commission: (1) the Toronto Futures Exchange's Toronto Stock Exchange 35 Index had a market capitalization of $115 billion; (2) the Financial Times-Stock 100 ("FT–SE 100") Index had a market capitalization of $521.6 billion; (3) the Sydney Futures Exchange's All Ordinaries Index had a market capitalization of $110.7 billion; (4) the CAC–40 Index had a market capitalization of approximately $146.5 billion; (5) the International Market Index ("IMI") had a market capitalization of $445 billion; and (6) the EAFE Index had a market capitalization of $5,104 billion.

industry representation, 24 industry groups are represented in the Eurotop 100 Index and the three largest industry groups, banking, international oils, and holding companies, comprise only 14.32%, 10.08%, and 8.58%, respectively, of the Eurotop 100 Index.[35] Third, the Eurotop 100 Index is comprised of 100 stocks, with no particular stock or group of stocks dominating the Index. For example, the ten most highly weighted stocks in the Index account for only 19.12% of the Index's value. Fourth, the component stocks of the Eurotop 100 Index are actively traded in their home markets. In this regard, as described above, the stock selection and weighting procedures for the Index ensure that stocks in the Eurotop 100 Index are actively traded. As a result, the median and mean monthly trading volume figures for the 100 issues are 3.65 million and 9.76 million shares, respectively. Finally, the Commission believes that the Eurotop 100 Index Rules governing, among other things, the selection of countries included in the Index, the stocks included in the Index, and the periodic review of the composition and weighting of the Index will serve to ensure that the Index maintains its broad representative sample of actively-traded European stocks. Accordingly, the Commission finds that the Eurotop 100 Index is a broad-based index.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Eurotop 100 Index options and warrants, can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance provisions are applicable to options accounts. Accordingly, because the Eurotop 100 Index options will be subject to the same regulatory regime as the other standardized options currently traded on the Amex, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Eurotop 100 Index options.

The Commission also notes that the delay between the cessation of trading in Index options and the determination of the Index value for settlement does not raise novel issues. The Commission previously has approved stock index options for trading where the index settlement value for expiring options is determined on the day after trading in the options cease.[36]

The Commission also notes that, consistent with the Index Warrant Approval Order, specific Amex rules and procedures that address the special concerns attendant to the secondary trading of index warrants will be applicable to Eurotop 100 Index warrants. In particular, by imposing the special suitability, disclosure, and compliance requirements noted above, the Amex has addressed adequately the potential public customer concerns that could arise from the derivative nature of Eurotop 100 Index warrants. Moreover, the Amex plans to distribute a circular to its membership calling attention to the specific risks associated with warrants on the Eurotop 100 Index, and, pursuant to the Amex listing guidelines, only substantial companies capable of meeting their warrant obligations will be eligible to issue Eurotop 100 warrants.

Warrants, unlike standardized options, do not have a clearinghouse guarantee but are instead dependent upon the individual credit of the issuer. This heightens the possibility that an exerciser of warrants may not be able to receive full cash settlement upon exercise. To some extent this risk is minimized by the Exchange's standard that warrant issuers possess at least $100,000,000 in assets. In any event, financial information regarding the issuers of Eurotop 100 warrants will be disclosed or incorporated in the prospectuses accompanying the offerings of the warrants.

There is a systemic concern, however, that broker-dealers or broker-dealer subsidiaries issuing index warrants or providing a hedge for the issuer will incur position exposure. This position exposure, if left partially hedged or dynamically hedged, could not only create a risk of non-performance but added a systemic risk in that the broker-dealer will have to hedge dynamically the position exposure to minimize losses should the market turn against it. To date, warrant issuances have been so small in relation to the broker-dealer issuer's (or underwriter's) total equity positions as not to raise significant concerns. Nevertheless, the Exchange should continue to monitor this area.

C. Surveillance

In evaluating new derivative instruments, the Commission, consistent with the protection of investors, considers the degree to which the derivative instrument is susceptible to manipulation. The ability to obtain information necessary to detect and deter market manipulation and other trading abuses is a critical factor in the Commission's evaluation. It is for this reason that the Commission has required an effective surveillance sharing agreement between an exchange listing or trading a derivative product and the exchange trading the stocks underlying the derivative contract that specifically enables officials to surveil trading in the derivative product and underlying stocks.[37] Such agreements provide an important deterrent to manipulation because they facilitate the availability of information that may be necessary to detect a potential manipulation if it were to occur. For foreign stock index derivative products, these agreements are especially needed to facilitate the obtaining of regulatory, surveillance and other information from foreign jurisdictions.

The Commission has considered the adequacy of surveillance sharing arrangements in the context of several types of derivative products, including derivative products based on stock indices comprised of component securities from one country ("single country indices") and indices comprised of component securities from several countries ("multi-country indices"). In the context of derivative products based on single country indices, the Commission consistently has required the U.S. exchange that proposes to trade a derivative product to establish an effective surveillance sharing arrangement with the primary foreign stock market where the underlying securities are traded. For example, the Commission approved the trading of derivative instruments based on the FT-SE 100 Index and the CAC-40 Index which are broad-based indices representative of the U.K. and French stock markets, respectively. In these two instances the Commission still required that there be an effective surveillance sharing agreement between the U.S. exchange and the underlying foreign exchange because the indices were limited to one country, thus enabling a potential manipulation to be based on the securities of a single market.[38]

In the context of derivative products based on multi-country indexes, such as the Eurotop 100 Index, the Commission considers several factors in evaluating whether these instruments are readily susceptible to manipulation. Effective surveillance sharing agreements is one factor in this evaluation. In many cases, without effective surveillance sharing agreements, the Commission is unable to approve these proposed products. The Commission, however, recognizes that the construction of an index, including he diversification and active and deep market for component securities, can mitigate against the need to require that effective surveillance sharing agreements be concluded with all of the markets whose securities underlie that index. Indeed, the Commission has approved or commented favorably upon derivative products based on the International Market Index ("IMI") and the Europe, Australia, Far East ("EAFE") Index, where coverage was less than 100%. In both such cases, however, the countries with a major index weighting were covered by effective surveillance sharing agreements and no single uncovered country's securities accounted for more than a small percentage of the index's weighting.[39] This made it very unlikely that a successful manipulation could be based on the markets that did not have effective surveillance sharing agreements with the derivative exchange.

Accordingly, with respect to the Eurotop 100 Index, the Commission believes that various factors, as described below, render the Index not readily susceptible to manipulation, although the weighting of the securities of the countries in the Eurotop 100 Index for which the Amex has effective surveillance sharing agreements equate to only approximately one-half of the Index's value. Specifically, the Index contains several features that make it difficult to engage in intermarket abuses (such as manipulation or frontrunning) using Eurotop 100 Index warrants or options and trading in the underlying cash markets. As noted above, the Index is comprised of the most highly-capitalized, actively-trade securities from primary markets in nine different countries. Accordingly, because the Index component securities are spread over nine countries, are diversified by industry sector, and, as described above in greater detail, are adjusted in accordance with specific, complex rules designed to maintain specific weightings and relationships, the Commission believes it would be considerably more difficult to affect the Index value because to do so would require influencing simultaneously several foreign markets. Moreover, the susceptibility of the Index to manipulation is reduced further by the Index settlement value calculation method, which uses an average of prices over a 30-minute period.

In addition, as noted above, while the Amex does not have effective surveillance sharing agreements with all of the countries comprising the Index, no single uncovered country's securities account for 20% or more of the Index's weighting and no two uncovered countries' securities account for 30% or more of the Index's weighting. In particular, the Commission notes that the Amex has concluded effective surveillance agreements with the relevant self-regulatory organizations in the U.K., France, and the Netherlands, three of the larger components of the Index.[40]

In this regard, the Commission emphasizes that if there were a country accounting for 20% or more of the Index that was not covered by an effective surveillance sharing agreement (or two countries accounting for 30%) it would be difficult for the Commission to reach the conclusions contained in this order.[41]

In sum, the Commission believes that the Index is not readily susceptible to manipulation, and that if a manipulation were nonetheless to occur, it could be easily detected. As noted above, the component securities of the Index also are spread over nine countries, the Index is broad-based, a 30-minute settlement calculation method is used, a substantial portion of the Index is covered by effective surveillance sharing agreements, and the weighting of the securities of any country without an effective surveillance sharing agreement is small.[42]

---

[35] *See*, April 1991 Letter, *supra* note 3.

[36] For example, the settlement value for expiring options on the Japan Index is determined at the close of the Friday afternoon Tokyo Stock Exchange trading session (1 a.m. E.S.T.), although trading in the expiring contracts ceases on Thursday at 4:15 E.S.T., eight hours and 15 minutes earlier. See Securities Exchange Act Release No. 28475 (September 25, 1990), 55 FR 40492 (order approving File No. SR-Amex-89-16). Similarly, the CBOE lists a version of the S&P 500 index option, the NSX, whose settlement is based on the opening prices of stocks on the day after trading in the options cease. See Securities Exchange Act Release No. 24367 (April 17, 1987), 52 FR 13600 (order approving CBOE proposal to list NSX options). Likewise, the settlement value of expiring options on the New York Stock Exchange Composite Index is calculated based on the opening prices of the index's component stocks on expiration Fridays, although trading in the options cease on the Thursday before expiration Friday. *See* Securities Exchange Act Release No. 25804 (June 15, 1988), 53 FR 23474.

[37] The Commission believes that the ability to obtain relevant surveillance information, including, among other things, the identity of the ultimate purchasers and sellers of securities, is an essential and necessary component of an effective surveillance agreement.

[38] The Commission has approved the listing of FT-SE 100 warrants on the CBOE, Amex, NYSE, and the Pacific Stock Exchange ("PSE") and has approved a proposal from the CBOE to trade options based on the FT-SE 100. *See* Securities Exchange Act Release Nos. 27769 (March 6, 1990), 55 FR 9380 (order approving File No. SR-Amex-90-3); 28106 (June 12, 1990), 55 FR 24955 (order approving File No. SR-PSE-90-15); 28369 (August 30, 1990), 55 FR 37380 (order approving SR-NYSE-90-37); 28627 (November 19, 1990) (order approving File No. SR-CBOE-90-17, CBOE warrant proposal). 28634 (November 20, 1990), 55 FR 48729 (order approving File No. SR-MSE-90-12); and 29722 (September 23, 1991), 56 FR 49809 (File No. SR-CBOE-91-07, CBOE option proposal). Additionally, the Commission has approved the listing of CAC-40 warrants on the Amex, NYSE, PHLX, PSE, MSE and CBOE. See Securities Exchange Act Release Nos. 28544 (October 17, 1990), 55 FR 42792 (order approving File Nos. SR-Amex-90-06, SR-NYSE-90-36, SR-PHLX-90-25 and SR-PSE-90-18); 28587 (October 30, 1990), 55 FR 46505 (order approving File No. SR-CBOE-90-16) and 28701 (December 13, 1990), 55 FR 52916 (order approving SR-MSE-90-10). In addition, in light of unique circumstances, the Commission has approved some U.S. exchange proposals to trade derivative products based on the Japanese equity market without the presence of direct surveillance sharing arrangements between these exchanges and the Tokyo Stock Exchange. In these instances, the Commission concluded that the absence of such surveillance sharing agreements did not make the trading of such Japanese-based derivative instruments readily susceptible to manipulation because of a variety of factors, including among others, the contract design, the existence of a Memorandum of Understanding between the SEC and the Japanese Ministry of Finance ("MOF") which could provide the Commission with information that would be covered by an effective surveillance sharing agreement, and the history of cooperation between the SEC and the MOF. *See* Securities Exchange Act Release No. 30256 (January 16, 1992), 57 FR 2797.

[39] See Securities Exchange Act Release No. 28653 (March 21, 1988), 54 FR 12705 (order approving an Amex proposal to list and trade options based on the IMI) and letter from Jonathan G. Katz, Secretary, SEC, to Dr. Paula Tosini, Director, Division of Economic Analysis, Commodity Futures Trading Commission, dated October 11, 1988 (letter not objecting to the designation of the Chicago Mercantile Exchange as a contract market to trade EAFE stock index futures).

[40] See Letter Agreement between The Securities Association, Ltd. regarding surveillance related to Amex index options, dated July 6, 1988; Agreement between the Amex and the London Stock Exchange, dated, July 1, 1991; Memorandum of Understanding Concerning the Listing of Securities Linked with an Index and the Furnishing of Information for the Purpose of Regulation and Enforcement between the Societe Des Bourse Francaises and the Amex, dated October 4, 1990 and Administrative Agreement between the U.S. Securities and Exchange Commission and the Commission des Operations de Bourse de France, dated December 14, 1989, 45 SEC Docket 728, January 12, 1990; and Memorandum of Understanding Concerning the Provision of Information for the Purpose of Regulation and Enforcement between the Amsterdam Stock Exchange and the Amex, dated January 8, 1991.

[41] The Commission also notes that the Amex will apply its existing index warrant and index options surveillance procedures to trading in the Eurotop 100 Index options and warrants.

[42] In the event that the percentage weightings of the countries included in the Index changed so that a country without an effective surveillance sharing arrangement comprised greater than 20% of the Index, then the Commission would consider the Amex's determination to continue to list additional

Continued

While reaching this conclusion, the Commission nevertheless continues to believe strongly that surveillance sharing agreements between the Amex and all the exchanges trading component securities of the Index would be useful in deterring potential manipulations or other improper or illegal trading involving Eurotop 100 Index options and warrants. Accordingly, the Commission believes it is worthwhile for the Amex and the relevant foreign exchanges to continue to work together to consummate formal effective surveillance sharing agreements as soon as practicable.[43]

E. Market Impact

The Commission believes that the listing and trading of Eurotop 100 Index warrants and options on the Amex will not adversely affect the securities markets in the U.S. or Europe. First, existing Amex stock index warrant and option rules and surveillance procedures will apply to warrants and options based on the Index. Second, the Commission notes that the Eurotop 100 Index is broad-based and diversified and includes highly capitalized securities, no one of which dominates the Index, that are traded actively on leading European stock exchanges. Third, the Amex has established reasonable position and exercise limits for the Eurotop 100 Index options that will serve to minimize potential manipulation and other market impact concerns. Fourth, the risks to investors of contra-party non-performance will be minimized because the Index options will be issued and guaranteed by OCC just like other standardized options traded in the United States and the Index warrants will only be issued by large issuers capable of meeting their warrant obligations. Finally, Eurotop 100 Index options already trade on the EOE, so the listing of Eurotop 100 Index options and warrants on the Amex would not represent the introduction of a new derivative product based on European markets. Accordingly, the Commission believes that the introduction of warrants and option on the Eurotop 100 Index by the Amex should not have a significant effect on the underlying European securities markets or U.S. securities markets.

IV. Conclusion

For the reasons set forth above, the Commission finds that the proposed rule changes are consistent with the requirement of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5) and the rules and regulations thereunder.

It therefore is ordered, pursuant to section 19(b)(2) of the Act,[44] that the proposed rule changes (SR–Amex–90–25 and SR–Amex–91–01) are approved.

For the Commision, by the Division of Market Regulation, pursuant to delegated authority.[45]

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; American Stock Exchange, Inc; Chicago Board Options Exchange, Inc.; and New York Stock Exchange, Inc.; Order Approving Proposed Rule Changes Relating to the Listing of Index Warrants and Index Options Based on the FT-SE Eurotrack 200 Index

March 11, 1992.

I. Introduction and Background

The American Stock Exchange, Inc. ("Amex"), the Chicago Board Options Exchange, Inc. ("CBOE"), and the New York Stock Exchange, Inc. ("NYSE") (collectively, the ("Exchanges")) have submitted to the Securities and Exchange Commission ("SEC" or "Commmission"), pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] proposed rules changes to list warrants based on the Financial Times-Stock Exchange ("FT–SE") Eurotrack 200 Index ("Eurotrack 200 Index" or "Index"). Additionally, the CBOE submitted a proposed rule change to list options based on the Eurotrack 200 Index.[3] The proposed rule changes were published for comment in various releases.[4] No comments were received on the proposed rule changes. This order approves these proposals.

II. Description of the Proposals

The Exchanges propose to list index warrants based on the Eurotrack 200 Index, a capitalization-weighted index that is comprised of 200 major European securities and is intended to represent the overall performance of the European stock market.[5] Additionally, the CBOE proposes to list for trading cash-settled, European-style options (exercisable only on the last business day prior to the option's expiration) based on the Eurotrack 200 Index.[6]

The Eurotrack 200 Index is a combination of two stock indexes, the Eurotrack 100 Index and the FT–SE 100 Index.[7] The Eurotrack 100, Eurotrack 200, and FT–SE 100 Indexes, which are all designed and operated by the LSE, are administered by two Index Steering Committees, one for the FT–SE 100 Index and one for the Eurotrack Indexes.[8] These committees are composed of representatives from various international and U.K. financial institutions.[9]

As of January 21, 1992, the countries included in the Index and their percentage weighting were: United Kingdom, 42.74%; Germany, 15.16%; France, 13.54%; Netherlands, 6.54%; Switzerland, 7.13%; Italy, 5.67%; Spain, 3.89%; Belgium, 2.67%; Sweden, 1.63%; Ireland, 0.6%; Norway, 0.18%; and Denmark, 0.25%.

The FT–SE 100 Index component of the Eurotrack 200 Index is an internationally-recognized, capitalization-weighted stock index based on the prices of 100 of the most highly capitalized British stocks traded on the LSE.[10] The Commission

[1] 15 U.S.C. 78s(b) (1982).

[2] 17 CFR 240.19b–4 (1989).

[3] On May 31, 1991, the CBOE amended its Eurotrack 200 Index option proposal to provide that options contracts on the Eurotrack 200 Index will be traded on a reduced Index value. Specifically, the CBOE proposes that the Index options will be computed at one-tenth of the value of the full value Eurotrack 200 Index. *See* letter from Robert P. Ackermann, Vice President, Legal Services, CBOE, to Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division of Market Regulation ("Division"), SEC, dated May 31, 1991. On August 15, 1991, the CBOE amended its proposal to provide that the Index value for settlement purposes will be based on the average of the Index values at one-minute intervals from 11:00 to 11:20 a.m. London time (excluding the three highest and three lowest values). Previously, only the highest and lowest values were excluded. *See* letter from Robert P. Ackermann, Vice President, Legal Services, CBOE, to Howard Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated August 15, 1991 ("Amendment No. 1 Letter"). Because these amendments are minor and technical in nature they have not been separately noticed for comment.

[4] See Securities Exchange Act Release Nos. 29043 (April 4, 1991), 56 FR 14551 (notice of File No. SR–CBOE–91–09, the CBOE's Index option filing); 29079 (April 15, 1991), 56 FR 16134 (notice of File No. SR–CBOE–91–13, the CBOE's Index warrant filing); 29176 (May 8, 1991), 56 FR 22500 (notice of File No. SR–NYSE–91–13); and 29280 (May 31, 1991), 56 FR 26446 (notice of File No. SR–Amex–91–10).

[5] The Exchanges submitted additional data to the Commission regarding their Eurotrack 200 Index proposals. See London Stock Exchange, Five Year History—FT–SE Share Indices ("Five Year History"), 1991; letters from Robert P. Ackermann, Vice President, Legal Services, CBOE, to Howard L. Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated April 20, 1991 ("April 20, 1991 Letter") and May 8, 1991; letter from William J. Barclay, Ph.D., Vice President, Strategic Planning and International Development, CBOE, to Howard L. Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated May 1, 1991; letter from Joseph Levin, Vice President, Research, CBOE, to Howard L. Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated May 29, 1991; Memorandum from Tom Nolan, CBOE, to Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated July 24, 1991; letter from Ellen T. Kander, Special Counsel, Options Division, Amex, to Thomas Gira, Branch Chief, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated January 21, 1992 ("January 21, 1992 Letter"); and letter from William J. Barkley, Ph.D., Vice President, Strategic Planning and International Development, CBOE, to Thomas Gira, Branch Chief, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, dated February 20, 1992 ("February 20, 1992 Letter").

[6] The stocks in the Eurotrack 200 Index from the United Kingdom and the Republic of Ireland are traded over SEAQ and the stocks from the other European countries are traded over SEAQI. SEAQ's and SEAQI's quotations of the stocks traded on the LSE are available to all exchanges listing those stocks, but the system is solely that of the LSE and its dealers and does not reflect markets from the other exchanges.

[7] The Exchanges have submitted proposals to list warrants based on the Eurotrack 100 Index and the CBOE also has submitted a proposal to list and trade options based on the Eurotrack 100 Index. See Securities Exchange Act Release Nos. 29075 (April 4, 1991), 56 FR 14553 (notice of File No. SR–CBOE–91–06, the CBOE's Eurotrack 100 Index option filing); 29078 (April 15, 1991), 56 FR 16132 (notice of File No. SR–CBOE–91–14, the CBOE's Eurotrack 100 Index warrant filing); 29177 (May 8, 1991), 56 FR 22501 (notice of File No. SR–NYSE–91–12); and 29251 (May 30, 1991), 56 FR 26170 (notice of File No. SR–Amex–91–11). The Pacific Stock Exchange ("PSE") also has submitted a proposal to list Eurotrack 100 Index warrants. See Securities Exchange Act Release No. 29051 (November 16, 1991), 56 FR 59314.

[8] See Five Year History, supra note 5, at 93.

[9] The Index Steering Committees are responsible for, among other things, establishing rules to determine, review, and modify the compositions of these indexes, as well as how the various indexes are calculated. Additionally, the LSE has appointed two independent auditors to oversee the technical integrity of the FT–SE Indexes.

[10] The FT–SE 100 Index is composed of companies from 29 different industry groups, no one of which dominates the FT–SE 100 Index. The total capitalization of the FT–SE 100 Index, as of October 30, 1991, was $521.6 billion.

previously has approved the listing of FT–SE 100 Index warrants on the CBOE, Amex, NYSE, PSE, and the Midwest Stock Exchange ("MSE") [11] and has approved a proposal from the CBOE to trade options based on the FT–SE 100 Index.[12]

To qualify for inclusion in the FT–SE 100 Index, a company must satisfy the following conditions: (1) it must not be regarded as an overseas resident company for U.K. tax purposes; (2) it must not be a subsidiary of another Index constituent; (3) it must pay a dividend (except for existing constituents); and (4) it must have at least 25% of its shares publicly held. The FT–SE 100 Index Steering Committee conducts a quarterly review of the FT–SE 100 Index to ensure that its component stocks are representative of the state of the equity market for the largest U.K. companies.

The FT–SE 100 Index is calculated by taking the summation of the multiple of the market price for each stock in the Index times the number of shares of that stock outstanding. This sum total is then divided by another number, termed the "divisor," to produce the Index value. The market price for each constituent stock is calculated by taking the mid-point between the highest bid and lowest offer for each stock. The divisor of the Index is continuously adjusted to reflect changes in market capitalization.

The FT–SE 100 Index is updated each minute from 8:30 a.m. to 4:30 p.m. (London time), during the "Mandatory Quote Period" for SEAQ (3:30 a.m. to 11:30 a.m. Eastern Standard Time ("E.S.T."). [13] The FT–SE 100 Index is published daily in the Financial Times and is available real-time on Reuters, Telerate and other market information systems which disseminate information on a minute-by-minute basis.[14]

The Eurotrack 100 Index is a capitalization-weighted index based on 100 stocks from 11 European countries other than the United Kingdom that is designed to be a real-time index of major continental European securities. In order to ensure that the Eurotrack 100 Index reflects this active segment of the European stock market, the FT–SE Eurotrack Indexes Steering Committee has adopted several rules that: (1) determine the weighting of the countries in the Eurotrack 100; (2) determine the companies eligible for inclusion in the Eurotrack 100; and (3) ensure that the Eurotrack 100 remains representative of its objectives.[15]

First, Rule 2.2 of the Eurotrack 100 Ground Rules provides that the Eurotrack 100 Index must have a high correlation with and track closely the major benchmark indices for Continental Europe. Specifically, the Eurotrack 100 Ground Rules provide that "the FT–AWI Europe Excluding the U.K. Index ("FT–A Index") country weights will be the weights that the Eurotrack 100 Index will try to match on a quarterly basis." [16] Accordingly, as of January 21, 1992, the countries and their weightings in the Eurotrack 100 Index were: Germany, 26.47%; France, 23.65%; Netherlands, 11.42%; Switzerland, 12.45%; Italy, 9.9%; Spain, 6.8%; Belgium, 4.66%; Sweden, 2.84%; Ireland, 1.04%; Denmark, 0.44%; and Norway, 0.32%.[17] Even though it is the objective that the FT–SE Eurotrack 100 Index country weightings should match the FT–A Index country weightings, some countries that are represented in the FT–A Index are underrepresented or not represented in the FT–SE Eurotrack 100 Index because of a lack of liquidity in certain SEAQI stocks from such countries.[18]

Second, in order to qualify for inclusion in the Eurotrack 100 Index, a company must satisfy the following conditions: (1) there must be a firm quote for the stock on SEAQ or SEAQI;[19] (2) the market capitalization of the stock must represent at least 0.125% of the total market capitalization of continental European companies quoted on SEAQI or SEAQ; (3) it must

[11] See Securities Exchange Act Release Nos. 27769 (March 6, 1990), 55 FR 9380 (order approving File No. SR–Amex–90–3); 28106 (June 12, 1990), 55 FR 24955 (order approving File No. SR–PSE–90–15); 28399 (August 30, 1990), 55 FR 37390 (order approving SR–NYSE–90–37); 28627 (November 19, 1990) (order approving SR–CBOE–90–17); and 28634 (November 20, 1990), 55 FR 49729 (order approving File No. SR–MSE–90–12).

[12] See Securities Exchange Act Release No. 29722 (September 23, 1991), 56 FR 49809 (File No. SR–CBOE–91–07) ("FT–SE 100 Option Approval Order").

[13] See Five Year History, *supra* note 5, at 2. During the "Mandatory Quote Period," LSE market makers are required to display their quotes to the market and all trades must be reported to the LSE within three minutes of their execution.

[14] *Id.* at 3.

[15] See Ground Rules for the Management of the FT–SE Eurotrack 100 Index, Five Year History supra, note 5, at 109 ("Eurotrack 100 Ground Rules").

[16] *Id.* The FT–A Index includes substantially more component securities than the Eurotrack 100 Index. Based on 1991 data, the FT–A Index contained 644 securities.

[17] See January 21, 1992 Letter, supra note 5.

[18] Presently, Denmark is underrepresented and Austria is not represented at all. See Five Year History *supra*, note 5, at 30.

[19] The term "firm quote on SEAQ or SEAQI" refers to the requirement that each stock included in the Eurotrack 100 Index have a Mandatory Quote Period during which time all market makers (of which there must be at least three for each stock) must display "firm" prices at which they are committed to deal.

have at least 25% of its stock publicly held;[20] and (4) it must be available for ownership by non-domestic investors. The companies in each of the constituent countries that meet the above criteria are then selected in order to track the relative market capitalizations of the European stock markets, as reflected in the FT–A Index.[21]

Third, the Eurotrack 100 Ground Rules provide for a quarterly review process that is designed to ensure that the Eurotrack 100 Index remains representative of the non-U.K. European companies with the greatest capitalization that are traded on SEAQI and that the Index continues to track the FT-A Index. During the review process eligible stocks with SEAQI firm quotes and component securities whose market capitalizations have fallen significantly will be inserted to or deleted from the Index. Additionally, there are Eurotrack 100 Index rules that are applicable if a corporate event makes it necessary to modify the Eurotrack 100 Index before the next quarterly review period or if a highly capitalized European stock commences trading on SEAQI.[22]

The Eurotrack 100 Index is calculated by taking the summation of the product of the price of each constituent stock and the number of its shares outstanding and dividing this summation by the total market capitalization of the Eurotrack 100 Index ("the Divisor") on the base date, October 28, 1990. As with the FT–SE 100 Index, the stock prices are derived by taking the mid-point between the highest bid and lowest offer for each stock displayed on SEAQ or SEAQI. In addition, for purposes of calculating the Eurotrack 100 Index, stock prices from the constituent companies are converted from their local currency into U.S. dollars and then converted into Deutschemarks.[23] The Eurotrack 100 Index is updated each minute between 9:45 a.m. to 3:30 p.m. London time (4:45 a.m. to 10:30 a.m. E.S.T.) and is available real-time on Reuters, Telerate and other market information systems which disseminate information on a real-time basis.[24]

As mentioned earlier, the Eurotrack 200 Index is a combination of the FT–SE 100 Index and the Eurotrack 100 Index. Accordingly, the qualifications for the inclusion of securities in the Eurotrack 200 Index, and the rules regarding insertions, deletions, and adjustments to the Index, and the periodic review of the Index, among other things, are governed by the rules for the management of the FT–SE 100 and Eurotrack 100 Indexes. As such, any changes to the Eurotrack 200 Index will be the result of identical changes to either the FT–SE 100 or Eurotrack 100 Indexes.

The Eurotrack 200 Index is calculated by multiplying the price of each constituent stock of the Eurotrack 100 and FT–SE 100 Indexes, converted into European Currency Units ("ECUs"), by the number of shares outstanding.[25] The value of the Index stocks that also are in the FT–SE 100 Index, however, are reduced by a "Weight Restraint Factor ("WRF"). The WRF is applied to the FT–SE 100 Index component stocks in order to match the weight of the United Kingdom in the Eurotrack 200 Index to the weight of the United Kingdom in the Financial Times-Actuaries ("FT–A") Europe Index.[26] A new WRF is calculated each quarter.[27] After making this adjustment for the FT–SE 100 Index stocks, the index calculator then divides the sum of the product of the price times shares outstanding, for all Index stocks, by the total market capitalization of the Index ("the divisor") on the base date, February 25, 1991. On February 25, 1991, the value of the Index was 1000.00. The divisor is adjusted to reflect certain corporate actions in constituent companies, such as stock dividends, and to maintain the continuity of the Index.

The Index will be calculated during an Official Index Period ("OIP"), which will run from 9:45 a.m. to 3:30 p.m., London time (4:45 a.m. to 10:30 E.S.T.).[28] An Official Index Closing Price ("OICP") for the Eurotrack 200 Index will normally be calculated at 3:30 London Time each day (10:30 E.S.T.). The OICP will be used to set the opening value of the Index the following day.

B. Rules Applicable to Eurotrack 200 Index Warrants

The Exchanges propose to trade Eurotrack 200 Index warrants pursuant to the requirements of their generic Index Warrant Approval Orders, that, among other things, permit the Exchanges to list index warrants based on established market indexes, both foreign and domestic.[29] Accordingly, the Exchanges represent that the Eurotrack 200 Index warrant issues will conform to their respective index warrant listing guidelines.[30] Specifically, the listing guidelines of the Exchanges require that: (1) the issuer shall have assets in excess of $100,000,000 and otherwise substantially exceed the Exchange's size and earnings requirements; (2) the term of the warrants shall be for a period ranging from one to five years from the date of issuance; [31] and (3) the minimum public distribution of such issues shall be 1,000,000 warrants together with a minimum of 400 public holders, and have an aggregate market value of $4,000,000.[32]

[20] However, if a country is deemed to be underrepresented, a stock from that country will still be considered eligible provided that at least 10% of the stock is held in public hands. See Eurotrack 100 Ground Rules in Five Year History, *supra* note 5, at 109.

[21] *Id.*

[22] For example, if a stock obtains a firm quote on SEAQI, or a non-index stock takes over a stock with a firm quote, and has more than 1.5% of the Eurotrack 100 Index's total market capitalization, then it will enter the Eurotrack 100 Index in one month or at the time of the next quarterly review, whichever is earlier. In addition, if the SEAQ or SEAQI quote for a component security becomes non-firm, then the stock will be removed from the Eurotrack 100 Index the next day. Should a stock be deleted, the highest capitalized stock eligible from the most underweight country (comparing the FT–A and Eurotrack 100 Indexes) will be used to replace the deleted stock. *See id.* at 111.

[23] The foreign exchange rates used to calculated the Eurotrack 100 Index are supplied by Telerate, Inc.

[24] See Five Year History, *supra* note 5, at 3.

[25] As with the FT–SE 100 and Eurotrack 200 Indexes, the prices used are derived by taking the mid-point between the highest bid and the lowest offer displayed on SEAQ and SEAQI. Stock prices are converted from home currency prices into U.S. dollars, then converted from U.S. dollars into ECU. The foreign exchange rates used in the calculation of the Eurotrack 200 Index are supplied by Telerate Inc. See Five Year History, *supra* note 4, at 105.

[26] The FT–A Europe Index is one of a family of indexes designed and maintained by the World Index Policy Committee ("WIPC"). The WIPC has eight members: one representative from the Financial Times Limited, Goldman, Sachs & Co., and County NatWest Securities Limited; one from each of three independent international investment management and advisory firms; and one actuary each from the Institute of Actuaries and the Faculty of Actuaries. For additional information regarding the FT–A Europe Index, see Securities Exchange Act Release No. 28708 (December 18, 1990), 55 FR 53050 (Amex proposal to list warrants based on the FT–A Europe Index, File No. SR-Amex-90-30).

[27] As of January 1, 1992, the WRF was .98105. Over the past five years, the WRF has ranged from .745 in June 1986 to .88 in December 1990.

[28] The OIP covers the time period when all the quotes for stocks within the Index are firm (*i.e.*, the Mandatory Quote Period). For a discussion of "firm" quotes, see *supra* note 19.

[29] *See* Securities Exchange Act Release Nos. 28152 (October 3, 1988), 53 FR 39832 ("Amex Index Warrant Approval Order"); Securities Exchange Act Release No. 28556 (October 19, 1990), 55 FR 43233 ("CBOE Index Warrant Approval Order"); and 28153 (June 26, 1990), 55 FR 27734 ("NYSE Index Warrant Approval Order") (collectively, "Index Warrant Approval Orders").

[30] *See* Section 106 of the Amex Company Guide; Section 703.17 of the NYSE Listed Company Manual; and CBOE Rule 31.5(E).

[31] The NYSE rules provide for a minimum term of one year, but do not impose a five-year limitation on the duration of an index warrant.

[32] In addition, if permitted by their regulatory framework, any of these Exchanges may propose to trade Eurotrack 200 Index warrants on an unlisted trading privilege basis, but to do so, an exchange would have to make a separate application under Section 12(f) of the Act for each such warrant issue.

The Exchanges also represent that the Eurotrack 200 Index warrants will be direct obligations of their issuer subject to cash-settlement during their term, and either exercisable throughout their life (*i.e.*, American style) or exercisable only on their expiration date (*i.e.*, European style). Upon exercise, or at the warrant expiration date (if not exercisable prior to such date), the holder of a warrant structured as a "put" would receive payment in U.S. dollars to the extent that the Eurotrack 200 Index has declined below a pre-stated cash settlement value. Conversely, holders of a warrant structured as a "call" would, upon exercise or at expiration, receive payment in U.S. dollars to the extent that the Eurotrack 200 Index has increased above the pre-stated cash settlement value. If "out-of-the-money" at the time of expiration, the warrants would expire worthless.

Because index warrants are derivative in nature and closely resemble index options, the Exchanges have proposed safeguards that are designed to meet the investor protection concerns raised by the trading of index warrants. First, the Exchanges propose to apply their options suitability standards to Eurotrack 200 Index warrant recommendations and the requirement that discretionary orders in Eurotrack 200 Index warrants be approved on the day entered by a Senior Registered Options Principal ("SROP") or a Registered Options Principal ("ROP"). In addition, the Exchanges have recommended that the Eurotrack 200 Index warrants only be sold to options approved accounts. Moreover, the Exchanges, prior to the commencement of trading of Eurotrack 200 Index warrants, will distribute circulars to their memberships calling attention to the specific risks associated with warrants on the Eurotrack 200 Index and any additional sales practice requirements that will be imposed.

C. Rules Applicable to Eurotrack 200 Index Options

With regard to the listing and trading of Eurotrack 200 Index option contracts, the CBOE proposes that: (1) existing CBOE rules applicable to the trading of index options should be applicable to Eurotrack 200 index options; (2) Index option contracts will be traded on a reduced value of the Eurotrack 200 Index; (3) special procedures will apply for the establishment of Eurotrack 200 Index option settlement values; and (4) Eurotrack 200 Index options will be traded and settled in U.S. dollars.

First, existing CBOE rules applicable to index options shall be applicable to Eurotrack 200 Index options. The proposed Eurotrack 200 Index options will be very similar to the two broad-based Standard and Poor's Index options presently listed for trading on the CBOE, including applicable position and exercise limits, expiration months, strike price intervals, and the index multiplier. Specifically, the CBOE proposes to establish the same position limits used for existing stock index options, *i.e.*, 25,000 contracts on each side of the market, provided that no more than 15,000 of such contracts are in series in the nearest expiration month.

The CBOE intends to list up to three near-term expiration months, one additional series in the March quarterly cycle and five additional long-term options series, with consecutive June and December expirations extending into successive years.[33] The proposed Eurotrack 200 Index options will expire on the Saturday following the third Friday of the expiration months. The CBOE also proposes to amend its Rule 24.9 (Terms of Option Contracts) to provide for the European exercise of Eurotrack 200 Index options.

In addition, the CBOE proposes to apply several rules which were amended to accommodate the trading of FT-SE 100 Index options on the CBOE.[34] First, pursuant to CBOE Rule 24.6 (Days and Hours of Business) a designee of the CBOE Board of Governors will be allowed to determine the days and hours of trading of Eurotrack 200 Index options.[35] Second, during those periods when the LSE's trading hours do not coincide with the CBOE's trading hours, CBOE officials will only be able to halt trading in Index options pursuant to CBOE Rule 24.7 (Trading Halts and Suspensions) when unusual conditions or circumstances detrimental to the maintenance of fair and orderly markets are present.[36] Third, the CBOE's price continuity rule, Interpretation .02 to CBOE Rule 8.7 (Obligations of Market Makers), may be waived by two floor officials when the LSE is not trading.[37]

Second, the CBOE plans to list options on the Eurotrack 200 Index that will be computed at one-tenth of the value of the Eurotrack 200 Index disseminated by the LSE. The CBOE proposes to base its option contract on a fraction of the value calculated by the LSE because the CBOE believes that the existing Eurotrack 200 Index level is too high for successful options trading in the U.S. market. At the present time, the CBOE lists long-term reduced value index options computed at one-tenth of the value of the Exchange's Standard and Poor's 100 and 500 Indexes ("OEX" and "SPX", respectively).[38] As a result of CBOE rounding procedures, however, the reduced value Eurotrack 200 Index may vary slightly from the value of the full value Index.[39]

Third, special procedures have been established to determine the Eurotrack 200 Index value for settlement purposes. The Eurotrack 200 Index value at expiration ("CIV") will be calculated based on SEAQ and SEAQI prices between 11:00 and 11:20 a.m. London time (6 a.m. and 6:20 a.m. E.S.T.) on the day following the last day of trading in the expiring contracts. The LSE will calculate and disseminate a separate CIV for exercise based on the average of the Index values (excluding the three highest and three lowest) for each minute in the interval from 11 a.m. and 11:20 a.m. London time (6 a.m. to 6:20 a.m. E.S.T.).[40] The CBOE's CIV will

[33] Telephone conversation between William J. Barkley, Ph.D., Vice President Strategic Planning and International Development, CBOE and Mark McNair, Attorney, Branch of Options Regulations, Office of Options and Exchange Regulation, Division, SEC, dated March 10, 1992.

[34] *See* FT-SE 100 Option Approval Order, *supra* note 12.

[35] The CBOE has stated that the trading hours for Eurotrack 200 Index options initially will coincide with the CBOE's normal trading hours of 8:30 a.m. to 3:15 p.m. (Chicago time), and that, if the CBOE decides to modify these trading hours, it will notify the SEC through a rule filing submitted pursuant to Section 19(b)(3)(A) of the Act. See February 20, 1992 Letter, *supra* note 5.

[36] Because the time period during which the Eurotrack 200 Index will be calculated only will overlap the CBOE's trading hours from 9:30 a.m. to 10:30 a.m. E.S.T., the CBOE believes it would be inappropriate to apply other provisions of CBOE Rule 24.7 to Eurotrack 200 Index options during the remainder of the CBOE trading day. Specifically, Rule 24.7 provides that the CBOE should consider halting trading in an index option when: (1) trading has been halted or suspended in underlying stocks whose weighted value represents 20% or more of the index value; and (2) the current calculation of the index derived from the current market prices of the stocks is not available.

[37] Interpretation .02 to CBOE Rule 8.7 prohibits market makers, except in unusual circumstances, from purchasing an option at more than $.25 below parity and from making bids $1 less than or offers $1 greater than the preceding transaction price.

[38] See Securities Exchange Act Release No. 28809 (December 10, 1990), 55 FR 51517. These long-term options on reduced value indexes, called OEX LEAPS and SPX LEAPS, trade independent of and in addition to regular OEX and SPX options traded on the CBOE.

[39] The CBOE proposes to use the same procedure in rounding that it currently uses for its reduced value OEX and SPX options. Specifically, the CBOE will divide the calculated value provided by the LSE by ten and round the resulting quotient to the nearest one-hundredth. The CBOE states that the digits one through four will be rounded down to the next number and the digits five through nine will be rounded up to the next number.

[40] Therefore, the LSE's Eurotrack 200 Index settlement value will be the average of fifteen separate prices taken over a twenty-one minute period. See Amendment No. 1 Letter, *supra* note 3.

represent an amount in U.S. dollars equal to a one-tenth fraction of the LSE's CIV.

Normally, trading in expiring contract months will cease on a Thursday at 4:15 p.m. E.S.T. Therefore, the CIV for exercise of the proposed options will be determined during the Friday morning LSE trading session, that is, between 6:00 a.m. and 6:20 a.m. E.S.T. on a Friday morning. If a stock does not trade during this interval, or if it fails to open for trading, the last available price for the stock will be used in the calculation of the Index as is done currently for CBOE-listed index options. When expirations are moved according to Exchange holidays, such as when the CBOE is closed on the Friday before expiration, the last trading day for expiring options will be Wednesday and the CIV for exercise will be calculated during the Thursday trading session on the LSE, even if the LSE is open on Friday. If the LSE is closed on the friday before expiration but the CBOE open, then the last trading day for expiring options on the CBOE will be moved up to Wednesday as if the CBOE had a Friday holdiay and the CIV for exercise will be determined during the Thursday trading session on the LSE.

Fourth, the CBOE plans to trade U.S. dollar denominated Eurotrack 200 Index options, even through the Eurotrack 200 Index is valued in ECUs and is comprised entirely of Eurotrack stocks. The Exchange will assign a value of one U.S. dollar to each 100 decimal points of the Eurotrack 200 Index. Thus, while the Eurotrack 200 Index reflects changes in ECU prices of the component stocks, the value of Index option premiums will change in U.S. dollars, without regard to fluctuations in the ECU/U.S. dollar exchange rate. This Index valuation method is designed for investors that primarily are concerned with changes in the ECU price levels of the European market and not in the combined effect of price movements in the European stock market and changes in the ECU/U.S. dollar exchange rate.

Moreover, the proposed valuation method permits the options premiums to be quoted in U.S. dollars and the trading accounts to be denominated in U.S. dollars. Accordingly, all CBOE, Options Clearning Corporation and clearing member systems will be able to accommodate the trading, clearance and settlement of the Eurotrack 200 Index options without alteration.

Discussion

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6(b)(5) of the act.[41] Specifically, the Commission finds that the trading of options and warrants on the Eurotrack 200 Index will serve to protect investors, promote the public interest, and help to remove impediments to a free and open securities market by providing investors with a means to hedge exposure to market risk associated with European stock investments.[42] The trading of options and warrants on the Eurotract 200 Index, however, raises several concerns, namely, issues related to index design, customer protection, surveillance, and market impact. The Commission believes, for the reasons discussed below, that the Exchanges adequately have addressed these concerns.

A. Index Design and Structure

The Commission finds that classifying the Index as broadbased, and, thus, permitting the CBOE's rules applicable to the trading of broad-based index options to apply to Eurotrack 200 Index options is appropriate given the large capitalization, broad diversification, and mature markets of the component stocks of the Eurotrack 200 Index. Moreover, for both the Eurotrack 200 Index options and warrants, the broad-based design of the Index significantly minimizes the potential for manipulation of the Index.

First, the total capitalization of the Eurotrack 200 Index, as of April 1991, was U.S. $807 billion.[43] Second, the stocks in the Eurotrack 200 Index are from a wide range of European industry sectors. Although the Eurotrack 200 Index component stocks are not selected to achieve a specified industry representation, 25 industry groups are represented in the Eurotrack 200 Idex and the three largest industry groups, banking and financial institutions, oil production and refining, and utilities, comprise only 13.16%, 12.75%, and 10.12%, respectively, of the Eurotrack 200 Index.[44] Third, the Eurotrack 200 Index is comprised of 200 stocks, with no particular stock or group of stocks dominating the index. For example, the ten most highly weighted stocks in the Index account for only 21.84% of the Index's value. Fourth, the component stocks of the Eurotrack 200 Index are actively traded. In this regard, as described above, the stock selection and weighting procedures for the Index ensure that stocks in the Eurotrack 200 Index are actively traded. As a result, during December 1991, the average daily SEAQ trading volume for the Eurotrack 200 component stocks from the U.K. and Ireland was 320,000 shares and the average daily SEAQI trading volume for the Eurotrack 200 component stocks from the other countries comprising the Index was 210,000 shares. Finally, the Commission believes that the Eurotrack 200 Ground Rules governing, among other things, the selection of countries included in the Index, the stocks included in the Index, and the periodic review of the composition and weighting of the Index will serve to ensure that the Index maintains its broad representative sample of actively-traded European stocks. Accordingly, the Commission finds that the Eurotrack 200 Index is a broad-based index.

B. Customer Protection

The Commission believes that a regulatory system designed to protect public customers must be in place before the trading of sophisticated financial instruments, such as Eurotrack 200 Index options and warrants, can commence on a national securities exchange. The Commission notes that the trading of standardized exchange-traded options occurs in an environment that is designed to ensure, among other things, that: (1) The special risks of options are disclosed to public customers; (2) only investors capable of evaluating and bearing the risks of options trading are engaged in such trading; and (3) special compliance provisions are applicable to options accounts. Accordingly, because the Eurotrack 200 Index options will be subject to the same regulatory regime as the other standardized options currently traded on the CBOE, the Commission believes that adequate safeguards are in place to ensure the protection of investors in Eurotrack 200 Index options.

The Commission also notes that the delay between the cessation of trading in Index options and the determination of the Index value for settlement does not raise novel issues. The Commission previously has approved stock index options for trading where the index settlement value for expiring options is determined on the day after trading in the options cease.[45]

The Commission also notes that, consistent with the Index Warrant Approval Orders, specific rules and procedures that address the special concerns attendant to the secondary trading of index warrants will be applicable to Eurotrack 200 Index warrants. In particular, by imposing the special suitability, disclosure, and compliance requirements noted above, the Exchanges have addressed adequately the potential public customer concerns that could arise from the derivative nature of Eurotrack 200 Index warrants. Moreover, the Exchanges plan to distribute circulars to their memberships calling attention to the specific risks associated with warrants on the Eurotrack 200 Index, and, pursuant to the Exchanges' listing guidelines, only substantial companies capable of meeting their warrant obligations will be eligible to issue Eurotrack 200 Index warrants.

Warrants, unlike standardized options, do not have a clearinghouse guarantee but are instead dependent upon the individual credit of the issuer. This heightens the possibility that an exerciser of warrants may not be able to receive full cash settlement upon exercise. To some extent this risk is minimized by the Exchanges' standard that warrant issuers possess at least $100,000,000 in assets. In any event, financial information regarding the issuers of Eurotrack 200 Index warrants will be disclosed or incorporated in the prospectuses accompanying the offering of the warrants.

There is a systemic concern, however, that broker-dealers or broker-dealer subsidiaries issuing index warrants or providing a hedge for the issuer will incur position exposure. This position exposure, if left partially hedged or dynamically hedged, could not only create a risk of non-performance but add a systemic risk in that the broker-dealer will have to hedge dynamically the position exposure to minimize losses should the market turn against it. To date, warrant issuance have been so small in relation to the broker-dealer issuer's (or underwriter's) total equity positions as not to raise significant concerns. Nevertheless, the Exchanges should continue to monitor this area.

C. Surveillance

In evaluating new derivative instruments, the Commission, consistent with the protection of investors, considers the degree to which the derivative instrument is susceptible to manipulation. The ability to obtain information necessary to detect and deter market manipulation and other trading abuses is a critical factor in the Commission's evaluation. It is for this reason that the Commission has required an effective surveillance sharing agreement between an exchange listing or trading a derivative product and the exchange trading the stocks underlying the derivative contract that specifically enables officials to surveil trading in the derivative product and underlying stocks.[46] Such agreements provide an important deterrent to manipulation because they facilitate the availability of information that may be necessary to detect a potential manipulation if it were to occur. For foreign stock index derivative products, these agreements are especially needed to facilitate the obtaining of regulatory, surveillance and other information from foreign jurisdictions.

The Commission has considered the adequacy of surveillance sharing arrangements in the context of several types of derivative products, including derivative product based on stock indices comprised of component securities from one country ("single country indices") and indices comprised of component securities from several countries ("multi-country indices"). In the context of derivative products based on single country indices, the Commission consistently has required the U.S. exchange that proposes to trade a derivative product to establish an effective surveillance sharing arrangement with the primary foreign stock market where the underlying securities are traded. For example, the Commission approved the trading of derivative instruments based on the FT-SE 100 Index and the CAC-40 Index which are broad-based indices representative of the U.K. and French stock markets, respectively. In these two instances the Commission still required that there be an effective surveillance sharing agreement between the U.S. exchange and the underlying foreign exchange because the indices were limited to the one country, thus enabling a potential manipulation to be based on the securities of a single market.[47]

In the context of derivative products based on multi-country indexes, such as the Eurotrack 200 Index, the Commission considers several factors in evaluating whether these instruments are readily susceptible to manipulation. Effective surveillance sharing agreements is one factor in this

---

[41] 15 U.S.C 78f(b)(5) (1988).

[42] Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new option or warrant proposal upon a finding that the introduction of such new derivative instrument is in the public interest. Such a finding would be difficult for a derivative instrument that serve no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns. In this regard, the trading of listed options or warrants on the Eurotrack 200 Index will provide investors with a hedging vehicle that should reflect the overall movement of the European stock market. The Commission also believes that these options and warrants will provide investors with a means by which to make investment decisions in the European equity market, allowing them to estublish positions or increase existing positions in European stocks in a cost effective manner.

[43] See April 26, 1991 Letter, *supra* note 5, the market capitalization of the Eurotrack 200 Index is larger than the capitalization of all the other foreign stocks indices that the Commission has reviewed except the Europe, Australia, Far East ("EAFE") Index. Specifically, when reviewed by the Commission: (1) the Toronto Futures Exchange's Toronto Stock Exchange 35 Index has a market capitalization of $115 billion; (2) the Financial Times-Stock 100 ("FT-SE 100") Index had a market capitalization of $521.6 billion; (3) the Sydney Futures Exchange's All Ordinaries Index had a market capitalization of $110.7 billion; (4) the CAC-40 Index had a market capitalization of approximately $146.5 billion; (5) the International Market Index ("IMI") had a market capitalization of $445 billion; and (6) the EAFE Index had a market capitalization of $5,104 billion.

[44] See February 20, 1992 Letter, *supra* note 5.

[45] For example, the settlement value for expiring options on the Japan Index is determined at the close of the Friday afternoon Tokyo Stock Exchange trading session (1 a.m. E.S.T.), although trading in the expiring contracts ceases on Thursday at 4:15 E.S.T., eight hours and 15 minutes earlier. *See* Securities Exchange Act Release No. 28475 (September 25, 1990), 55 FR 40402 (order approving File No. SR-Amex-90-16). Similarly, the CBOE lists a version of the S&P 500 Index option, the NSX, whose settlement is based on the opening prices of stocks on the day after trading in the options cease. *See* Securities Exchange Act Release No. 24367 (April 17, 1987), 52 FR 13000 (order approving CBOE proposal to list NSX options). Likewise, the settlement value of expiring options on the New York Stock Exchange Composite Index is calculated Based on the opening prices of the index's component stocks on expiration Fridays, although

[46] The Commission believes that the ability to obtain relevant surveillance information, including, among other things, the identity of the ultimate purchasers and sellers of securities, is an essential and necessary component of an effective surveillance agreement.

[47] As previously discussed, the Commission has approved the listing of FT-SE 100 Index warrants on the CBOE, Amex, NYSE, and PSE and has approved a proposal from the CBOE to trade options based on the FT-SE 100. See *supra* notes 11 and 12. Additionally, the Commission has approved the listing of CAC-40 warrants on the Amex, NYSE, PHLX, PSE, MSE and CBOE. See Securities Exchange Act Release Nos. 28544 (October 17, 1990), 55 FR 42782 (order approving File Nos. SR-Amex-90-08, SR-NYSE-90-36, SR-PHLX-90-25 and SR-PSE-90-16); 28587 (October 30, 1990), 55 FR 46595 (order approving File No. SR-CBOE-90-16) and 28703 (December 13, 1990), 55 FR 52916 (order approving SR-MSE-90-10). In addition, in light of unique circumstances, the Commission has approved from U.S. exchange proposals to trade derivative products based on the Japanese equity market without the presence of direct surveillance sharing arrangements between these exchanges and the Tokyo Stock Exchange. In these instances, the Commission concluded that the absence of such surveillance sharing agreements did not make the trading on such Japanese-based derivative instruments readily susceptible to manipulation because of a variety of factors, including among others, the contract design, the existence of a Memorandum of Understanding between the SEC and the Japanese Ministry of Finance ("MOF") which could provide the Commission with information that would be covered by an effective surveillance sharing agreement, and the history of coöperation between the SEC and the MOF. *See* Securities Exchange Act Release No. 30256 (January 16, 1992), 57 FR 2707.

evaluation. In many cases, without effective surveillance sharing agreements, the Commission is unable to approve these proposed products. The Commission, however, recognizes that the construction of an index, including the diversification and active and deep market for component securities, can mitigate against the need to require that effective surveillance sharing agreements be concluded with all of the markets whose securities underlie that index. Indeed, the Commission has approved or commented favorably upon derivative products based on the International Market Index ("IMI") and the Europe, Australia, Far East ("EAFE") Index, where coverage was less than 100%. In both such cases, however, the countries with a major index weighting were covered by effective surveillance sharing agreements and no single uncovered country's securities accounted for more than a small percentage of the index's weighting.[48] This made it very unlikely that a successful manipulation could be based on the markets that did not have effective surveillance sharing agreements with the derivative exchange.

Accordingly, with respect to the Eurotrack 200 Index, the Commission believes that various factors, as described below, renders the Index not readily susceptible to manipulation, although the weighting of the securities of the countries in the Eurotrack 200 Index for which the Exchanges have effective surveillance sharing agreements equate to only 62.8% of the Index's value. Specifically, the Index contains several features that make it difficult to engage in intermarket abuses (such as manipulation or frontrunning) using Eurotrack 200 Index warrants or options and trading in the underlying cash markets. As noted above, the Index is comprised of the most highly-capitalized, actively-trade securities from primary markets in twelve different countries. Accordingly, because the Index component securities are spread over twelve countries, are diversified by industry sector, and, as described above in greater detail, are adjusted in accordance with specific, complex rules designed to maintain specific weightings and relationships, the Commission believes it would be considerably more difficult to affect the Index value because to do so would require influencing simultaneously several foreign markets. Moreover, the susceptibility of the Index to manipulation is reduced further by the Index settlement value calculation method, which uses an average of prices over a 20-minute period.

In addition, as noted above, while the Exchanges do not have effective surveillance sharing agreements with all of the countries comprising the Index, no single uncovered country's securities account for 20% or more of the Index's weighting and no two uncovered countries' securities account for 30% or more of the Index's weighting. In particular, the Commission notes that the Exchanges have concluded effective surveillance agreements with the relevant self-regulatory organizations in the U.K., France, and the Netherlands, three of the larger components of the Index.[49] In this regard, the Commission emphasizes that if there were a country accounting for 20% or more of the Index that was not covered by an effective surveillance sharing agreement (or two countries accounting for 30%) it would be difficult for the Commission to reach the conclusions contained in this order.[50]

In sum, the Commission believes that the Index is not readily susceptible to manipulation, and that if a manipulation were nonetheless to occur, it could be easily detected. As noted above, the component securities of the Index also are spread over twelve countries, the Index is broad-based, a 20-minute settlement calculation method is used, a substantial portion of the Index is covered by effective surveillance sharing agreements, and the weighting of the securities of any country without an effective surveillance sharing agreement is small.[51]

While reaching this conclusion, the Commission nevertheless continues to believe strongly that surveillance sharing agreements between the exchanges and all the exchanges trading component securities of the Index would be useful in deterring potential manipulations or other improper or illegal trading involving Eurotrack 200 Index options and warrants. Accordingly, the Commission believes it is worthwhile for the Exchanges and the relevant foreign exchanges to continue to work together to consummate formal effective surveillance sharing agreements as soon as practicable.[52]

D. Market Impact

The Commission believes that the listing and trading of Eurotrack 200 Index warrants on the Exchanges and Eurotrack 200 Index options on the CBOE will not adversely affect the securities markets in the U.S. or Europe. First, the Exchanges' existing stock index warrant and option rules and surveillance procedures will apply to warrants and options based on the Index. Second, the Commission notes that the Eurotrack 200 Index is broad-based and diversified and includes highly capitalized securities, no one of which dominates the Index, that are traded actively on leading European stock exchanges. Third, the CBOE has established reasonable position and exercise limits for the Eurotrack 200 Index options that will serve to minimize potential manipulation and other market impact concerns. Fourth, the risks to investors of contra-party non-performance will be minimized because the Index options will be issued and guaranteed by OCC just like other standardized options traded in the United States and the Index warrants will only be issued by large issuers capable of meeting their warrant obligations. Accordingly, the Commission believes that the introduction of warrants and option on the Eurotrack 200 Index by the Exchanges should not have a significant effect on the underlying European securities markets or U.S. securities markets.

[48] See Securities Exchange Act Release No. 26653 (March 21, 1989), 54 FR 12705 (order approving an Amex proposal to list and trade options based on the IMI) and letter from Jonathan G. Katz, Secretary, SEC, to Dr. Paula Tosini, Director, Divisions of Economic Analysis, Commodity Futures Trading Commission, dated October 11, 1988 (letter not objecting to the designation of the Chicago Mercantile Exchange as a contract market to trade EAFE stock index futures).

[49] See Agreements between the London Stock Exchange and the CBOE, Amex, and NYSE, each dated, July 1, 1991; Memorandum of Understanding Concerning the Listing of Securities Linked with an Index and the Furnishing of Information for the Purpose of Regulation and Enforcement between the Societe Des Bourse Francaises and the CBOE, Amex, and NYSE dated October 9, 1991, October 4, 1990, and October 9, 1990, respectively and Administrative Agreement between the U.S. Securities and Exchange Commission and the Commission des Operations de Bourse de France, dated December 14, 1989, 45 SEC Docket 726, January 12, 1990; and Memorandum of Understanding Concerning the Provision of Information for the Purpose of Regulation and Enforcement between the Amsterdam Stock Exchange and the CBOE, Amex, and NYSE, dated May 30, 1991, January 9, 1991, and July 1, 1991, respectively.

[50] The Commission also notes that the Exchanges will apply their existing index warrant and index options surveillance procedures to trading in the Eurotrack 200 Index options and warrants.

[51] In the event that the percentage weightings of the countries included in the Index changed so that a country without an effective surveillance sharing arrangement comprised greater than 20% of the Index, then the Commission would consider the Exchanges' determination to continue to list additional warrants or options series after such a change.

[52] In this regard, the Exchanges agree to report yearly to the Commission over the next three years detailing their efforts to secure effective surveillance sharing agreements with the uncovered countries. See letter from William J. Barkley, Ph.D., Vice President Strategic Planning and International Development, CBOE, to Howard Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated March 4, 1992; Telephone conversation between Howard Baker, Senior Vice President, Amex, and Mark McNair, Attorney, Branch of Options Regulation, Office of Options and Exchange Regulation, Division, SEC, March 5, 1992; and telephone conversation between Edward A. Kwalwasser, Executive Vice President, Regulatory Group, NYSE and Howard Kramer, Assistant Director, Office of Options and Exchange Regulation, Division, SEC, dated March 10, 1992.

IV. Conclusion

For the reasons set forth above, the Commission finds that the proposed rule changes are consistent with the requirement of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5) and the rules and regulations thereunder.

It Therefore is Ordered, pursuant to Section 19(b)(2) of the Act,[53] that the proposed rule changes (SR–Amex–91–10, SR–NYSE–91–13, SR–CBOE–91–09, and SR–CBOE–91–13) are approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[54]

Margaret H. McFarland,

Deputy Secretary

[Release No. 34–30454; File No. SR–CSE–92–02]

Self-Regulatory Organizations; Filing of Proposed Rule Change by Cincinnati Stock Exchange, Inc., Relating to Unlisted Trading Privileges

March 9, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 19, 1992, the Cincinnati Stock Exchange, Inc. ("CSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CSE proposes to amend its by-law governing unlisted trading privileges ("UTP") [1] to state that the Exchange may seek and continue UTP not only on issues eligible to be listed on the CSE, but also on those issues primarily traded on the New York Stock Exchange, Inc. ("NYSE") or the American Stock Exchange, Inc. ("Amex"). [2]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to facilitate the Exchange's full participation in the National Market System, while avoiding duplication of regulatory effort, by assuring that securities primarily traded on the NYSE and the Amex are eligible for UTP on the CSE.[3] When the CSE adopted its present listing standards, they included no distinction between initial listing requirements and maintenance standards. Its UTP standards, in turn, merely cross-referenced its listing standards. The result was that many large and widely followed issues which, despite the issuer's financial difficulties, continued to be listed and traded on the primary exchanges, appeared to be ineligible for UTP trading on the CSE because they would not be eligible to become listed on the CSE. The Exchange does not wish to adopt stricter listing requirements than the requirements applied by the primary markets; although for stocks not traded on the NYSE or Amex, the CSE contemplates no change in its present standards.[4]

The proposed rule change is consistent with section 6(b) of the Act, and in particular with section 6(b)(5), in that it is designed to promote just and equitable principles of trade, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC

[1] See CSE Article IV, Sec. 2.

[2] For the exact language of the proposed rule change, see File No. SR–CSE–92–02.

[3] Section 12(f) under the Act sets forth the Commission's authority to extend UTP to a security upon request by a national securities exchange. 15 U.S.C. 781(f) (1988).

[4] The Commission notes that it will not process an exchange's UTP application for a security for which the requesting exchange does not have the authority to list and trade. The CSE, therefore, must have in place listing standards for the specific type of security to be traded pursuant to UTP, even though such security is listed and trading on either the NYSE or the Amex.

20549. Copies of such filing will also be available for inspection and copying at the CSE. All submissions should refer to File No. SR-CSE-92-02 and should be submitted by April 7, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-30467; File No. SR-NYSE-92-04]

Self-Regulatory Organizations; Filing of Proposed Rule Change by New York Stock Exchange, Inc. Relating to Amendments to Rule 407, Transactions—Employees to Exchange, Member Organizations or Certain Non-Member Organizations, and Rescission of Rule 406(2), Accounts of Members and Allied Members

March 11, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 21, 1992, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments of NYSE rule 407 and rescission of NYSE rule 406(2).[1]

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend NYSE rule 407 and to rescind NYSE rule 406(2). Rule 407 requires members and member organizations to obtain the prior written consent of employers to open securities and commodities accounts for employees of other members, member organizations, the Exchange and other specified financial institutions, *e.g.*, banks and insurance companies.

Rule 407 also require that certain associated persons obtain written consent from their employers prior to opening securities or commodities accounts outside the number or member organization. In addition, such persons are required to have duplicate confirmations and monthly statements sent to appropriate supervisory persons at their member organization employer.

Generally, the requirements of rule 407 are intended to facilitate a member's or member organization's supervision of its employees by providing the employed with information regarding employees' private securities transactions. The rule serves to help protect against conflicts of interest which might arise from such private securities transactions and assists the member or member organization in monitoring transactions for violations of insider trading rules and use of manipulative or deceptive devices.

The proposed amendments to NYSE rule 407 will eliminate the requirement that a member or member organization receive the employer's prior written consent to carry margin accounts of employees of financial institutions (other than the Exchange or other member organizations). Limiting this requirement to employees of Exchange members and member organizations and of the Exchange is appropriate because the Exchange's overall supervisory requirements do not extend to employees of other financial institutions.

Other amendments to NYSE rule 407 will make it clear that the provisions of the rule apply to all accounts in which members, allied members or employees associated with a member or member organization have a financial interest or the power to make investment decisions, regardless of where they are maintained (*e.g.*, at another member or member organization, or a domestic or foreign non-member broker-dealer, investment adviser, bank or other financial institution).

The proposed amendments will also provide that the requirements to provide reports to employers will not be applicable to certain enumerated transactions (*e.g.*, mutual funds), unless specifically requested by the employer.

In addition, NYSE rule 406(2) will be rescinded as the basic requirements applicable to members and allied members set forth therein will be incorporated by the amendments in NYSE rule 407.

2. Statutory Basis

The proposed rule change is consistent with the requirements of section 6(b)(5) of the Act, which requires that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade and, in general, to protect investors and the public interest.

In addition, the proposed rule change is consistent with section 6(b)(6) of the Act in that it is intended to aid members and member organizations in monitoring transactions by their employees that may violate the Act or the rules of the Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

[8] 17 CFR 200.30-3(a)(12) (1991).

[1] The text of the proposed rule change was attached to the filing as Exhibits A and B. A copy is available at the NYSE and at the Commission.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and will written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No. SR-NYSE-92-04 and should be submitted by April 7, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margart H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-30453; File No. SR-NYSE-92-03]

Self-Regulatory Organizations; Filing of Proposed Rule Change by New York Stock Exchange, Inc. Relating to Amendment to Rule 411(b) Regarding the Entry of Odd-Lot Orders

March 9, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 20, 1992, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and exchange Commission ("Commission") a proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule change consists of amendments to rule 411(b) pertaining to the entry of odd-lot orders.[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Exchange rule 411(b) currently provides that when a person enters multiple odd-lot orders [2] in the same stock which aggregate to 100 shares or more, the orders must be aggregated into round-lots where possible for execution in the round-lot auction market. The language of rule 411(b), however, covers only those situations where a person enters orders for his own account or for accounts in which he has an actual monetary interest. The rule does not cover situations where multiple odd-lot orders are entered at the same time by a person who manages, or makes investment decisions for, a number of accounts.

The Exchange believes that it would be appropriate to extend the aggregation concept to provide that a person making a single investment decision as to the entry of multiple odd-lot orders for accounts over which he has investment discretion must aggregate the orders into round-lots whenever possible. For example, a money manager may make a single investment decision on behalf of multiple managed accounts which involve the purchase or sale of hundreds or thousands of shares utilizing odd-lots in the same security. In the absence of an aggregation requirement, such orders are not exposed to the auction market, even though the orders may total multiple round-lots, and even though there may be contra side buying or selling interest in the round-lot market.[3]

The proposed amendment to rule 411(b), however, would provide an exception to the proposed aggregation requirement. Under the exception, odd-lot orders entered by someone with investment discretion over multiple accounts which total less than 300 shares would not be required to be aggregated. This exception could be utilized once per trading day by anyone exercising investment discretion.

The Exchange believes that it is appropriate for multiple odd-lot orders entered as a result of a single investment decision to be aggregated into round-lots so that such orders may be executed in the round-lot market in accordance with traditional auction market principles.

The basis under the Act for this proposed rule change is section 6(b)(5), which requires that the rules of the Exchange be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest. The Exchange believes that in the instances outlined above, orders should be aggregated into round-lots so that such orders may be executed in accordance with auction market principles.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from members, Participants or Others

Comments were neither solicited nor received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

[1] For the exact text of the proposed rule change, *see* File No. SR-NYSE-92-03.

[2] An odd-lot order is a market order to purchase or sell a security in an amount less than the unit of trading (*i.e.*, 100 shares for stocks—*see* NYSE rule 55).

[3] *See* NYSE rule 124 for the method of executing odd-lot orders on the Exchange.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the NYSE. All submissions should refer to File No. SR–NYSE–92–03 and should be submitted by April 7, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Two Proposed Rule Changes Relating to Floor Member (Series 15) Examination

March 11, 1992

I. Introduction

On September 10, 1991, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and rule 19b-4 thereunder,[2] two proposed rule changes relating to the Exchange's Floor Member (Series 15) Examination.

The proposed rule changes were noticed in Securities Exchange Act Release No. 30062 (December 11, 1991), 56 FR 65769 (December 18, 1991). No comments were received on either proposal.

[4] 17 CFR 200.30-3(a)(12) (1991).

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b-4 (1988).

II. Background

The Series 15 Examination was created by the Exchange in 1982 as the basic test to be administered to all NYSE Floor Members. The Series 15 Exam is a qualifications examination required pursuant to NYSE Rule 304A (Member and Allied Member Examination Requirements) and is intended to ensure that Exchange Floor Members have the basic knowledge necessary to perform their functions and responsibilities. Additional qualification examinations must be successfully completed by members prior to receiving Exchange approval to act as specialists, registered competitive market-makers, competitive traders or Floor officials.[3]

III. Description of the Proposal

The first proposed rule change (File No. SR-NYSE-91-28) consists of the revised Content Outline for the Exchange's Series 15 Examination. The Series 15 Exam Content Outline was revised by the Exchange in conjunction with a committee comprised of the different categories of Exchange Floor Members.

The second proposed rule change (File No. SR-NYSE-91-29) includes the Exam Specifications for the Series 15 Examination which detail the areas covered by the 100 question examination and break down the proportion of examination questions culled from each area.

IV. Commission's Findings and Conclusion

After careful review, the Commission has determined that the proposed rule changes relating to the Content Outline, the Exam Specifications, and the Series 15 examination are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange. In particular, for the reasons set forth below, the Commission believes that the proposed rule changes are consistent with the section 6(c)(3)(B) requirement that an exchange may bar a natural person from becoming a member if such natural person does not meet such standards of training, experience and competence as are prescribed by the rules of the Exchange.

In addition, the Commission believes that the proposed rule changes are consistent with sections 15(b)(7)[4] which stipulates that prior to effecting any transaction in, or inducing the purchase or sale of, any security, a registered broker or dealer must meet certain standards of operational capability, and that such broker or dealer (and all natural persons associated with such broker or dealer) must meet certain standards of training, experience, competence, and such other qualifications as the Commission finds necessary or appropriate in the public interest or for the protection of investors.

To begin, the Commission has determined that the Content Outline accurately sets forth, in an organized and informative manner, the pertinent subject areas and corresponding NYSE Rules covered by the Series 15 Exam. The Commission believes that the Content Outline will provide a useful study aid for prospective Floor members when preparing for the examination.

Further, the Commission believes that the Exam Specifications, which detail the substantive areas covered by the exam and break down the number of examination questions culled from each area, have been designed so that Floor members who successfully complete and exam possess the knowledge, skills and abilities to carry out their job responsibilities. In this regard, the Commission believes that the applicable weights afforded each substantive subject area represent fairly the level of knowledge required of specific NYSE rules and procedures.

Finally, the Commission has determined that the examination itself adequately tests the level of knowledge necessary to efficiently carry out the individual's obligations as a Floor member. In reviewing the examination, the Commission focused on the level of difficulty and comprehensiveness of the specific examination questions. The Commission believes that the questions cover a sufficiently broad range of areas and, after assessing the depth of knowledge required to pass the examination, the Commission concludes that the examination should sufficiently reflect the requisite minimum knowledge a prospective Floor member must possess to comply with both Exchange and Commission rules and regulations. By ensuring this requisite level of knowledge, the Exchange can remain confident that its Floor members have demonstrated an acceptable level of securities knowledge.

[3] For example, Compliance Supervisors, as that term is defined in NYSE Rule 342.13(b), must successfully complete the Compliance Official Qualifications (Series 14) Examination which is administered by the Exchange.

[4] 15 U.S.C. 78o(b)(7) (1988).

It is Therefore Ordered, pursuant to section 19(b)(2)[5] of the Act, that the proposed rule changes (File Nos. SR-NYSE-91-28 and 91-29) are approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval to Proposed Rule Change by Philadelphia Stock Exchange, Inc. Relating to New Listing Guidelines—Rule 803

March 11, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. § 78s(b)(1), notice is hereby given that on January 13, 1992, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons, and is granting accelerated approval to the Phlx's proposal.[1]

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its current listing standards provided in Phlx Rule 803 to provide listing standards for new hybrid products.[2]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

(a) *Listing Guidelines* The proposed rule change will revise the Exchange's listing standards to include criteria for certain new types of securities which cannot be easily categorized under existing criteria for common or preferred stocks, bonds, or warrants. Recently there has been a surge of new types of securities and securities products proposed by issuers and underwriters for listing and trading on securities exchanges. Because of the different corporate objectives that the new products are designed to achieve, these securities may take various forms and are often comprised of features of more than one category of currently listed securities.

In order to provide flexibility in its rules to accommodate these new multi-faceted issues and to avoid numerous future amendments to the Exchange's listing standards, the Phlx is submitting this proposal to amend rule 803 to allow the Exchange to consider listing or trading new securities on a case-by-case basis in light of the suitability of the issue for auction market trading. These new criteria are not intended to accommodate the listing of securities that raise significant new regulatory issues as these products would require separate filings with the Commission pursuant to rule 19b–4 of the Act.[3]

Under this proposal, the new criteria will apply to major issuers having assets of $100 million and stockholders' equity of $10 million. Additionally, issuers will be required to have had pre-tax income of at least $100,000 in three of the last four fiscal years. Issuers not meeting this earnings criteria will be required to have assets in excess of $200 million and stockholders' equity of $10 million or, alternatively, assets in excess of $100 million and stockholders' equity of $20 million.

The proposal would require a minimum distribution of 1,000,000 trading units with a minimum of 400 holders. When trading is expected to occur in larger than average trading units (for example, a $1,000 principal amount), a minimum of 100 holders will be sufficient. The aggregate market value of issues listed under this proposal must be at least $20 million.

Where such an issue contains cash settlement provisions, settlement will be required to be made in U.S. dollars. And, where the instrument contains mandatory redemption provisions, the redemption price must be at least $3 per unit.

(b) *Membership Circular.* Prior to trading any of these new securities that may be listed or for which the Exchange might receive unlisted trading privileges, the Phlx will evaluate the nature and complexity of the issue and, when appropriate, distribute a circular to the membership. This circular would provide guidance with regard to member firm compliance responsibilities when handling transactions in such securities. In determining whether such a membership circular is necessary, the Exchange will consider such characteristics of the issue as: unit size and term; cash-settlement; exercise or call provisions; characteristics that may affect payment of dividends and/or appreciation potential; whether the securities are primarily of retail or institutional interest; and such other features of the issue that might present special risks not normally associated with securities currently listed or traded on the Exchange.

(2) Statutory Basis

The proposed rule change is consistent with section 6(b)(5) of the Act in that it is designed, among other things, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in the securities industry, to remove impediments to a free and open national market system, and to protect investors and the public interest; and is not designed to permit unfair discrimination

[5] 15 U.S.C. 78s(b)(2) (1988).

[6] 17 CFR 200.30-3(a)(12) (1991).

[1] The Phlx has requested that the Commission approve this proposed rule change on an accelerated basis (*see* File No. SR–Phlx–92–01).

[2] For the exact language of the proposed amendment, *see* File No. SR–Phlx–92–01.

[3] The Commission notes that securities that have raised significant new regulatory issues in the past include unit investment trusts (see Securities Exchange Act Release Nos. 30394 (February 21, 1992), 57 FR 7409 (order approving File No. SR–Amex–90–08); and 30393 (February 21, 1992), 57 FR 7415 (order approving File No. SR–CBOE–90–13)); Americus Trusts (see Securities Exchange Act Release No. 21863 (March 18, 1985), 50 FR 11972 (March 26, 1985) (File No. SR–Amex–84–35)); currency warrants (see Securities Exchange Act Release No. 24555 (June 5, 1987), 52 FR 22570 (June 12, 1987) (File No. SR–Amex–87–15) (proposal to list warrants on foreign currencies)); index warrants (see Securities Exchange Act Release No. 26152 (October 3, 1988), 53 FR 39832 (October 12, 1988) (order approving File No. SR–Amex–87–27) (listing guidelines for foreign currency and index warrants) and Securities Exchange Act Release No. 27565 (December 22, 1989), 55 FR 376 (January 4, 1990) (File No. SR–Amex–89–22) (proposal to list index warrants based on the Nikkei Stock Average)); and unbundled stock units ("USUs") (see File Nos. SR–NYSE–88–39 and 88–40 (proposals to list USUs and constituent securities, subsequently withdrawn by the NYSE)).

between customers, issuers, brokers, or dealers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received.

III Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Phlx. All submissions should refer to File No. SR-Phlx-92-01 and should be submitted by April 7, 1992.

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

The Commission finds that the Phlx's proposal to amend its rule 803, in order to provide listing guidelines to accommodate certain new types of securities which cannot be readily categorized under the Phlx's existing listing standards, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5) of the Act.[4] Specifically, the Commission believes the proposal is consistent with the section 6(b)(5) requirement that the rules of an exchange be designed to promote just and equitable principles of trade and not to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission believes that the proposed guidelines applicable to the listing of new, innovative securities will provide the flexibility desired by the Phlx, while helping to ensure that only the more financially substantial companies are eligible to have their new products listed on the Exchange. The proposed amendments to Rule 803, therefore, should provide a more efficient and expedient process for listing new securities, and should protect investors and the public interest by ensuring that the financial products listed on the Exchange (or traded via unlisted trading privileges) have met predetermined financial criteria set forth by the Exchange,[5] an important consideration due to the additional or contingent financial obligations created by these instruments.

In addition, the Commission believes that the portion of the proposed amendments relating to the membership circular addresses the additional regulatory concerns raised by these products. These novel products, by combining features of debt, equity, and securities derivative products, may be more risky and complex that straight stock, bond, or equity warrants. The Commission believes, therefore, that the portion of the proposed rule change requiring the Exchange to evaluate the nature and complexity of each issue in order to determine whether to distribute a membership circular indicating member firm compliance responsibilities should provide the Phlx with the ability to address, in a flexible manner, any potential sales practice problems and questions that may arise in connection with these new issues. Moreover, the Commission believes that the distribution of this circular should help to ensure that only customers with an understanding of the specific risks attendant to the trading of particular securities products trade these products on their brokers' recommendations. As a result, the membership circular requirement will help to ensure that investors and the public interest are protected when the new products are traded on the Exchange.

Finally, the Commission believes that the proposed rule change is consistent with the requirements of section 6(b)(5) of the Act because it relates only to those securities which are similar to products currently listed for trading on the Exchange. If a new product raises novel or significant regulatory issues, the Phlx must file a proposed rule change so that the Commission would have an opportunity to review the regulatory structure for the product.[6]

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. The Commission has approved substantially similar proposed rule changes submitted by the American Stock Exchange, Inc. ("Amex"), the New York Stock Exchange, Inc. ("NYSE"), the Cincinnati Stock Exchange, Inc. ("CSE"), the Chicago Board Options Exchange, Inc. ("CBOE"), the Pacific Stock Exchange, Inc. ("PSE") and the Boston Stock Exchange, Inc. ("BSE"), all of which adopted listing criteria for hybrid securities.[7] In addition, the Commission recently approved proposals submitted by the PSE, the NYSE, and the Midwest Stock Exchange ("MSE") to adopt listing criteria to trade CVRs, which are akin to the type of hybrid products the Phlx proposal would include.[8] The Commission did not receive any comments on those proposals, or on the Amex, NYSE, CSE, PSE, CBOE or BSE hybrid products filings. In light of the lack of new regulatory issues raised by the Phlx proposal, the Commission believes it is in the public interest to approve it on an accelerated basis so that the Phlx will be able to compete with the other exchanges for hybrid securities.

It is Therefore Ordered, pursuant to Section 19(b)(2) of the Act [9] that the proposed rule change is hereby approved.

[4] 15 U.S.C. 78f (1988).

[5] This standard, however, would not preclude the Phlx from submitting specific standards for other companies to have similar securities traded on the Exchange.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to the Election of Chairman and Vice Chairmen of its Board

March 11, 1992.

I. Introduction

On January 9, 1992, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and rule 19b-4 thereunder,[2] a proposed rule change relating to the election of the Chairman and Vice Chairman of its Board.

The proposed rule change was noticed in Securities Exchange Act Release No. 30269 (January 21, 1992), 57 FR 3238 (January 28, 1992). No comments were received on the proposal.

II. Description of the Proposal

The Phlx proposes to amend its By-Law Article IV, Section 4-2 (Election of Chairman and Vice Chairmen of the Board) in order to limit the offices of Chairman and Vice Chairman of the Board to two consecutive two-year terms and four consecutive one-year terms, respectively. The proposal, however, provides that each officeholder may seek re-election to office after a one year interval.[3]

III. Discussion and Conclusion

After careful consideration, the Commission finds that the proposed rule change is consistent with section 6(b) of the Act and the rules and regulations thereunder applicable to a national securities exchange. In particular, for the reasons set forth below, the Commission believes that the proposal is consistent with the section 6(b)(5) [4] requirement that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to foster cooperation with persons engaged in regulating, clearing, settling and processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. In addition, the Commission finds that the proposed rule change is consistent with section 6(b)(3) of the Act because it assures a fair representation of Exchange members in the selection of its directors and the administration of its affairs.

The Commission believes that by limiting the number of terms the Chairman and Vice Chairmen may serve, the proposal should increase the diversity of the Exchange's Board. Essentially, the proposal will provide the opportunity for different individuals to hold these offices, thereby ensuring a continuing influx of new ideas to the Board which should enhance the governance of the Board. Further, the resultant diversity of the Board should facilitate fair representation of all categories of Exchange members in the administration of the Exchange. Finally, if the members of the Exchange determine that a particular individual is best suited for the office, but the proposal precludes that individual from being elected for an additional term, only one year must pass before the individual can seek to be re-elected.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 1585]

Advisory Committee on Historical Diplomatic Documentation; Meeting

The Advisory Committee on Historical Diplomatic Documentation will meet on March 26 and 27, 1992, at 9:30 a.m. in the Dean Acheson Auditorium of the Department of State.

The Committee, which was established by Public Law 102-138, sec. 198 of October 28, 1991, advises the Department of Stae on matters concerning the preparation, declassification, and publication of the Foreign Relations of the United States historical documentary series. The Committee also reviews procedures for the Department's declassification review of documents older than 30 years and their transfer to the National Archives and Records Administration for public inspection.

The meeting will be in open session from 9:30 a.m. on the morning of Thursday, March 26, 1992, until noon of that day. From 12:30 p.m. Thursday, March 26 until Friday, March 27, at 4 p.m., the meeting will be closed to the public in accordance with section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463). It has been determined that discussions during these portions of the meeting will involve consideration of matters not subject to public disclosure under 5 U.S.C. 552(C)(1), and that the public interest requires that such activities will be withheld from disclosure.

Questions concerning the meeting should be directed to William Z. Slany, Executive Secretary, Advisory Committee on Historical Diplomatic Documentation, Department of State, Office of the Historian, Washington, DC. 20520, telephone [202) 663-1123.

Dated: March 12, 1992.

William Z. Slany,

Executive Secretary.

BILLING CODE 4710-11-M

[Public Notice 1584]

Study Group 1 of the U.S. Organization for the International Radio Consultative Committee (CCIR); Meeting

The Department of State announces that Study Group 1 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will hold an open meeting on April 8, 1992, at the Herbert C. Hoover Building, IRAC Conference room 1605, 14th & Constitution Avenue, NW. Washington DC, starting at 9:30 a.m.

Study Group 1, Spectrum Management Techniques is concerned with the development of principles and techniques for effective spectrum management, methods for solving spectrum sharing problems, techniques for spectrum monitoring and general spectrum utilization applications.

The purpose of this meeting is to prepare for the meeting of Study Group 1 scheduled for May 27–29, 1992.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Requests for further information should be directed to Dr. William F. Utlaut, Institute for Telecommunication Sciences, Department of Commerce/NTIA, 325 Broadway, Boulder, Colorado 80303–3328, phone (303) 497–3500.

Dated: March 6, 1992.

Warren G. Richards,

Chairman, U.S. CCIR National Committee.

BILLING CODE 4710–07–M

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402–2801; (15) 751–6779.

SUPPLEMENTARY INFORMATION: Under Title IV of the Clean Air Act Amendments, Sec. 402, Pub. L. 101–549, 104 Stat. 2586, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J. W. Dickey, to be TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydor Projects, W. M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

BILLING CODE 4910–13–M

Safety Belts; Proposed Technical Standard Order

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of and requests comments on a proposed technical standard order (TSO) pertaining to safety belts. The proposed TSO prescribes the minimum performance standards that safety belts must meet to be identified with the marking "TSO–C22g." This notice is necessary to give all interested persons an opportunity to present their views on the proposed TSO.

DATES: Comments must identify the TSO file number and be received on or before June 19, 1992.

ADDRESSES: Send all comments on the proposed technical standard order to: Technical Analysis Branch, AIR–120, Aircraft Engineering Division, Aircraft Certification Service—File No. TSO–C22g, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, or deliver comments to the Federal Aviation Administration, room 335, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Ms. Bobbie J. Smith, Technical Analysis Branch, AIR–120, Aircraft Engineering Division, Aircraft Certification Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 267–9546.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they desire to the above specified address. Comments received on the proposed technical standard order may be examined, both before and after the comment closing date, in room 335, FAA Headquarters Building (FOB–10A), 800 Independence Avenue, SW., Washington, DC 20591, weekdays except Federal holiday, between 8:30 a.m. and 4:30 p.m. All communications received on or before the closing date for comments specified above will be considered by the Director of the Aircraft Certification Service before issuing the final TSO.

Background

Proposed TSO–C22g would revise the requirement for the rated strength of safety belts that are intended to restrain the movement of an occupant's pelvis. Only synthetic webbing materials would be allowed and the webbing width would not be allowed to be less than 45.7mm (1.8 inches) where it contacts an occupant. The proposed TSO would allow a single buckle release and would require an operational reliability test of the buckle latching mechanism. The proposed TSO is intended for use in general aviation and transport category airplanes where applicable. The proposed TSO references the Society of Automotive Engineers, Inc. (SAE), Aerospace Standard (AS) 8043, "Torso Restraint System," dated March 1986, for the minimum performance standards. SAE AS 8043 is also referenced in TSO–C114, "Torso Restraint Systems," dated March 27, 1987.

How to Obtain Copies

A copy of the proposed TSO–C22g may be obtained by contacting the person under "For Further Information Contact." Aerospace Standard 8043, may be purchased from the Society of Automotive Engineers, Inc., 400 Commonwealth Drive, Warrendale, PA 15096.

Issued in Washington, DC, on March 10, 1992.

John K. McGrath,

Manager, Aircraft Engineering Division, Aircraft Certification Service.

BILLING CODE 4910–13–M

Devices That Prevent Blocked Channels Used in Two-Way Radio Communications Due to Unintentional Transmissions

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of and requests comments on a proposed technical standard order (TSO) pertaining to devices that prevent blocked channels used in two-way radio communications due to unintentional transmissions. The proposed TSO prescribes the minimum performance standards that devices, for preventing blocked channels used in two-way radio communications due to unintentional transmissions, must meet in order to be identified with the marking "TSO–C128."

DATES: Comments must identify the TSO file number and be received on or before June 19, 1992.

ADDRESSES: Send all comments on the proposed technical standard order to: Technical Analysis Branch, AIR–120, Aircraft Engineering Division, Aircraft Certification Service—File No. TSO–C128, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591. Or deliver comments to: Federal Aviation Administration, room 335, 800

Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Ms. Bobbie J. Smith, Technical Analysis Branch, AIR-120, Aircraft Engineering Division, Aircraft Certification Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 267-9546.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they desire to the above specified address. Comments received on the proposed technical standard order may be examined, before and after the comment closing date, in room 335, FAA Headquarters Building (FOB-10A), 800 Independence Avenue, SW., Washington, DC 20591, weekdays except Federal holidays, between 8:30 a.m. and 4:30 p.m. All communications received on or before the closing date for comments specified above will be considered by the Director of the Aircraft Certification Service before issuing the final TSO.

Background

Proposed TSO-C128 is a new TSO that contains a technical solution to unintentional radio transmissions. These transmissions may be caused by a jammed microphone push-to-talk button or by equipment malfunction that results in a continuous transmission from the associated transmitter. This problem is often referred to as the "stuck-mike" problem.

Disruption to voice communications in the ATC system presents the potential for degrading flight safety, e.g., the loss of separation standards between aircraft, near mid-air collisions, delays and potentially disastrous disruptions of traffic flow. These communication disruptions may also occur in areas where traffic density is low and the growth of air traffic (and communications) has increased the number of disruption incidents. The proposed TSO provides a method of obtaining FAA approval to manufacture devices that are to be used in conjunction with the airborne equipment for preventing unintentional radio transmissions.

How to Obtain Copies

A copy of the proposed TSO-C128 may be obtained by contacting "For Further Information Contact." TSO-C128 references RTCA, Inc., RTCA/DO-207, dated January 25, 1991, for minimum performance standards; RTCA/DO-160C, dated December 4, 1989, for the environmental standard; and RTCA/DO-178A for the computer software requirements. RTCA documents may be purchased from the RTCA, Inc., 1140 Connecticut Avenue, NW., suite 1020, Washington, DC 20036.

Issued in Washington, DC, on March 10, 1992.

John K. McGrath,

Manager, Aircraft Engineering Division, Aircraft Certification Service.

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of Grants and Denials of Applications for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR part 107, subpart B), notice is hereby given of the exemptions granted in May 1990-December 1991. The modes of transportation involved are identified by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
970-X	DOT-E 970	Callery Chemical Company, Pittsburgh, PA.	49 CFR 173.21(b), 173.300, 173.302(g).	To authorize use of DOT Specification 3AA2015 or 3AA2400 cylinders, for the transportation of a flammable poisonous gas. (Modes 1 2.)
3121-X	DOT-E 3121	U.S. Department of the Army, Falls Church, VA.	49 CFR 173.336(a), 177.841(b)	To authorize an additional thermally insulated trailer design for shipment of nitrogen tetroxide, classed as a poison A. (Mode 1.)
3187-X	DOT-E 3187	PPG Industries, Inc., Pittsburgh, PA.	49 CFR 173.119(m), 173.21(b), 173.218, 173.221(a)(3).	To authorize shipment of flammable liquids or organic peroxides in various non-DOT and DOT Specification containers. (Mode 1.)
4884-X	DOT-E 4884	Union Carbide Industrial Gases, Inc., Danbury, CT.	49 CFR 173.119(m), 173.136, 173.247, 173.251, 173.302(a)(1), 173.304, 173.3a, 175.3, 178.61.	To authorize shipment of certain liquefied and nonliquefied compressed gases and a flammable liquid in a stainless steel cylinder complying with all requirements of DOT Specification 4BW, except for being fabricated from Type 304 or Type 316 stainless steel. (Modes 1, 2, 3, 4.)
6518-X	DOT-E 6518	Union Carbide Chemicals & Plastics Company Inc., Charleston, WV.	49 CFR 172.101, 172.302, 173.119, 173.134, 173.154.	To authorize additional English steel portable tanks identical to those presently authorized for shipment of certain flammable liquids and solids. (Modes 1, 3.)
6637-X	DOT-E 6637	Russell-Stanley Corporation, Red Bank, NJ.	49 CFR 173.119(a), 173.119(b), 173.119(m), 173.154, 173.221, 173.245(a)(26), 173.249(a)(1), 173.250(a)(1), 173.257(a)(1), 173.263(a)(28), 173.265(d)(6), 173.266(b)(8), 173.272(i)(9), 173.276(a)(10), 173.277(a)(6), 173.287(c)(1), 173.289(a)(1), 173.292(a)(1), 173.346(a), 173.357(b), 173.358(a), 173.359(a), 173.359(b), 178.19.	To modify exemption to provide for shipment of 15% sodium persulfate solution, classified as oxidizer, in DOT Specification 34 polyethylene drums. (Modes 1, 2, 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6658-X	DOT-E 6658	U.S. Department of Energy, Washington, DC.	49 CFR 173.65	To renew, and modify exemption to provide for cargo-only aircraft as an additional mode of transportation. (Mode 1.)
6765-X	DOT-E 6765	Air Products and Chemicals, Inc. Allentown, PA.	49 CFR 172.203, 173.316, 173.320, 176.30, 176.76(h), 177.840, 178.338.	To authorize reinspection and testing of the portable tank once every 5 years in accordance with 49 CFR 173.32(e) at a pressure of 1.25 times the sum of the design pressure, the static head and 14.7 (Modes 1, 3.)
6769-X	DOT-E 6769	E.I. du Pont de Nemours and Company, Inc., Wilmington, DE.	49 CFR 173.314, 173.315	To authorize the shipment of blends of 20-50% chlorodifluoromethane and 80-50% dimethyl ether in DOT Specification 105A600W tank cars and MC-331 cargo tanks with replacement outlet valves. (Modes 1, 2.)
7011-X	DOT-E 7011	Russell-Stanley West, Inc., Rancho Cucamonga, CA.	49 CFR 173.154, 173.217, 173.239a, 173.245, 173.245b(a)(6), 173.365.	To authorize an optional two-inch, spin welded flange with two-inch bung on non-DOT specification polyethylene container with a removable head, having a rated volumetric capacity not exceeding 57 gallons. (Modes 1, 2, 3.)
7023-X	DOT-E 7023	PVS Chemicals, Inc., (NY) Buffalo, NY.	49 CFR 173.245(a), 173.263(a), 173.264(a), 173.266, 173.268(f)(5), 173.272(g), 173.272(i)(24), 173.3a.	To modify exemption to increase the internal inspection of teflon lined tote containers to every two years. (Mode 1.)
7052-X	DOT-E 7052	Duracell, Inc., Bethel, CT	49 CFR 172.101, 172.400, 175.3	To modify paragraph 8F to provide for shipment of up to 3 grams of lithium instead of 2 grams of lithium. (Modes 1, 2, 3, 4.)
7458-X	DOT-E 7458	Ekchwerks Company, Eastlake, OH.	49 CFR 173.304(a)(2), 178.42	To renew, and to authorize shipment of certain commodities presently shipped in DOT Specification 3E cylinders and update cylinder criteria. (Modes 1, 2, 3.)
7517-P	DOT-E 7517	DPC Industries, Inc., Houston, TX	49 CFR 173.314(c)	To become a party to exemption 7517. (Mode 1, 2, 3.)
7648-X	DOT-E 7648	Sunwest Aviation, Ogden, UT	49 CFR 172.204(c), 172.300(a), 172.400(a), 173.91(a), 173.91(i), 175.3, 175.35(a).	To modify the exemption to increase the number of flares to be transported per test flight to eight. (Mode 4.)
7768-X	DOT-E 7768	Sonoco Plastic Drum, Inc., Lockport, IL.	49 CFR 173.154, 173.217, 173.245b, 173.365, 178.19.	To authorize a 25 gallon capacity polyethylene removable head drum to provide for injection-molded process and to modify test criteria. (Modes 1, 2, 3.)
7811-X	DOT-E 7811	Baxter Diagnostics Inc., Burdick & Jackson Division, Muskegon, MI.	49 CFR 173.119(a)(23), 173.125, 173.245(a)(18), 173.346(a)(21), 173.347(a)(8), 175.3, 178.210.	To authorize a larger capacity DOT Specification 12A fiberboard box with handholes for shipment of certain corrosive, flammable, or class B poisonous liquids. (Modes 1, 2, 3.)
8053-X	DOT-E 8053	Eastman Kodak Company, Rochester, NY.	49 CFR 173.148(a), 175.3	To renew and authorize cargo vessel as an additional mode of transportation. (Modes 1, 2, 4.)
8096-X	DOT-E 8096	Scott Specialty Gases, Plumsteadville, PA.	49 CFR 173.302(a)(1), 173.304, 175.3, 178.42.	To authorize certain liquified gases; authorize additional type tubing and alloy in construction and modify certain test criteria for non-DOT specification steel cylinders similar to DOT Specification 3E. (Modes 1, 2, 3, 4, 5.)
8151-X	DOT-E 8151	Ropak Corporation, La Mirada, CA	49 CFR 178.19, Part 173, Subparts D, and F.	To renew and modify exemption to provide for new removable head covers equipped with special fittings installed on five-gallon plastic pail for shipment of corrosive and flammable liquids. (Modes 1, 2, 3.)
8214-P	DOT-E 8214	Morton Bendix, Inc., Maryville, TN	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To become a party to exemption 8214 (Modes 1, 2, 3, 4.)
8214-X	DOT-E 8214	TG (U.S.A.) Corporation, Perryville, MO.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To modify exemption to provide for an additional fiberboard box as outside packaging for use in transporting airbags. (Modes 1, 2, 3, 4.)
8214-X	DOT-E 8214	Morton International, Ogden, UT	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (Modes 1, 2, 3, 4.)
8215-X	DOT-E 8215	Olin Corporation—Winchester Group, East Alton, IL.	49 CFR 173.101, 173.107, 173.154, 173.184, 173.60, 173.74, 173.78, 173.93.	To authorize shipment of scrap nitrocellulose, wet not to exceed 20% water, classed as flammable solid, in non-DOT specification containers. (Modes 1, 2.)
8225-X	DOT-E 8225	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.256, 173.266, 176.340, Part 173, Subpart F.	To authorize use of new high density polyethylene resin Paxon 7004 in the manufacture of the 8225 tanks. (Modes 1, 2, 3.)
8236-X	DOT-E 8236	TRW Safety Systems/Mesa, Mesa, AZ.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize additional inflators and modules for passenger restraining systems classed as flammable solids. (Modes 1, 2, 3, 4.)
8287-X	DOT-E 8287	Rohm and Haas Company Philadelphia, PA.	49 CFR 173.245(a)(16), 173.245(a)(26), 178.19-4(c), 178.35a-2(b).	To authorize shipment of a corrosive liquid in a DOT Specification 6D/2S1 composite container or DOT Specification 34 drum equipped with a bung vent, or in a DOT Specification 12B fiberboard box with no more than four inside polyethylene bottles with vented closures. (Modes 1, 2, 3.)
8307-X	DOT-E 8307	U.S. Department of Energy, Washington, DC.	49 CFR 173.21, 173.247, 173.25(b), 175.3.	To renew and modify exemption to include an additional non-pyrotechnic smoke generator. (Modes 1, 2, 3, 4.)
8396-X	DOT-E 8396	Aztec Catalyst Company, Elyria, OH.	49 CFR 173.119, 173.21, 173.221	To authorize an alternate Type MC-307 cargo tank for shipment of organic peroxide solution, n.o.s. (Mode 1.)
8450-X	DOT-E 8450	LTV Aerospace and Defense Company, Dallas, TX.	49 CFR 173.92	To modify a non-DOT specification container used for shipment of rocket motors by drilling six 2-inch drain holes in the bottom to prevent accumulation of rainwater. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8472-X	DOT-E 8472	Ohmart Corporation, Cincinnati, OH	49 CFR 173.302, 175.3	To authorize an additional model of a non-DOT specification devide described as ionization chamber for transportation of argon, classed as compressed gas. (Modes 1, 2, 3, 4, 5.)
8570-X	DOT-E 8570	Snyder Industries, Inc., Lincoln, NE	49 CFR 173.118a, 173.119, 173.266, 173.365, 176.340, 178.19, 178.253, Part 173, Subpart F.	To modify exemption to authorize shipment of certain material classed as Poison B in polyethylene portable tanks. (Modes 1, 2, 3.)
8706-X	DOT-E 8706	Petro-Steel, Corsica, SD	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize modification of cargo tank by allowing increased diameters, varying thickness of metal, and moving head gasket. (Mode 1.)
8710-X	DOT-E 8710	Akzo Chemicals, Inc., Chicago, IL	49 CFR 173.119, 173.21, 173.221	To authorize transport of solutions of an organic peroxide in cargo tanks complying with DOT Specification MC-307 and MC-312. (Mode 1.)
8710-X	DOT-E 8710	Akzo Chemicals, Inc., Chicago, IL	49 CFR 173.119, 173.21, 173.221	Authorizes shipment of an organic peroxide classed as a flammable liquid, in a DOT Specification MC-307/312 cargo tank equipped with temperature and pressure sensing devices. (Mode 1.)
8723-X	DOT-E 8723	IRECO, Incorporated, Salt Lake City, UT.	49 CFR 172.101, 173.114a(h)(3), 173.154, 176.415, 176.83.	To authorize a combustible liquid as an additional commodity contain in bulk containers for shipment by water. (Modes 1, 2.)
8723-X	DOT-E 8723	IRECO, Incorporated, Salt Lake City, UT.	49 CFR 172.101, 173.114a(h)(3), 173.154, 176.415, 176.83.	To authorize certain cargo units identified under DOT-E 4453 to be included for use under DOT-E 8723 for shipment of certain blasting agents in bulk. (Modes 1, 2.)
8723-X	DOT-E 8723	Atlas Powder Company, Dallas, TX	49 CFR 172.101, 173.114a(h)(3), 173.154, 176.415, 176.83.	To authorize an additional non-DOT specification polythylene portable tanks for shipment of blasting agents and oxidizers. (Modes 1, 2.)
8735-X	DOT-E 8735	Leica Corporation, Rochester, MI	49 CFR 178.19, Part 173, Subpart D, F.	To modify the exemption to provide for vented closures for DOT Specification 34 polyethylene drums. (Modes 1, 2, 3.)
8786-X	DOT-E 8786	Gas Spring Corporation, Colmar, PA.	49 CFR 173.306(f)(2)(iii), 173.306(f)(3), 175.3.	To authorize burst to charge ratio of 3.5 for gas cylinders that contain 30 cubic inches or less of gas. (Modes 1, 2, 3, 4, 5.)
8839-X	DOT-E 8839	Poly Processing Company, Inc., Monroe, LA.	49 CFR 172.101, 173.114a(h)(3), 173.266, 173.268, 176.415, 176.83, 178.19, Part 173, Subpart D, F.	To authorize marking by etching or stamping of the certification into the polyethylene of the portable tanks and to modify periodic testing requirements. (Modes 1, 2, 3.)
8874-X	DOT-E 8874	B&F Medical Products, Inc., Toledo, OH.	49 CFR 173.119, 173.121, 173.273, 173.302, 173.304, 173.328, 173.332, 173.333, 173.336, 173.337, 173.346, 175.3, 178.46.	To convert exemption originally issued as a manufacture, mark and sell to a shipper type exemption authorizing shipment in non-DOT cylinders, of certain hazardous materials authorized for shipment in DOT Specification 3AL cylinder. (Modes 1, 2, 3, 4, 5.)
8878-X	DOT-E 8878	Amalgamet Canada—Division of Premetalco, Inc., Toronto, Ontario, Canada.	49 CFR 173.245	To authorize cargo vessel as an additional mode oi transportation. (Mode 1.)
8891-X	DOT-E 8891	BIC Corporation, Milford, CT	49 CFR 173.21, 173.308, 175.3	To renew, and to authorize water, passenger and cargo aircraft as additional modes of transportation. (Modes 1, 2, 3, 4.)
8901-X	DOT-E 8901	Soweco, Inc., Amarillo, TX	49 CFR 173.357	To authorize shipment of chloropicrin, in polyethylene bottles overpacked in non-DOT specification triple-wall, A-A-C flute, corrugated fiberboard boxes. (Mode 1.)
8921-X	DOT-E 8921	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.125, 173.266, 176.340, Part 173, Subpart F.	To modify exemption to provide for shipment of certain oxidizers and blasting agents as additional commodities authorized for transportation in bulk containers. (Modes 1, 2, 3.)
8921-X	DOT-E 8921	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.125, 173.266, 176.340, Part 173, Subpart F.	To modify exemption to provide for an additional non-DOT specification polyethylene portable tank not to exceed 330 gallons capacity enclosed in a steel jacket wire cage or a fiberboard overpack. (Modes 1, 2, 3.)
8932-X	DOT-E 8932	Aztec Catalyst Company, Elyria, OH.	49 CFR 173.119(m), 173.221	To authorize an alternate type MC-307 cargo tank for shipment of organic peroxide solution, n.o.s. (Mode 1.)
8942-X	DOT-E 8942	Poly Processing Company, Inc., Monroe, LA.	49 CFR 173.114a(h)(3), 173.266, 173.268, 176.415, 176.83, 178.19, 178.251, 178.253, Part 173, Subpart D, F.	To authorize marking by etching or stamping the certification into the polyethylene of the portable tanks and to modify periodic testing requirements. (Modes 1, 2, 3.)
9061-X	DOT-E 9061	SSI Group, Limited (dba The Speleoshoppe), Fairdale, KY.	49 CFR 172.504, 173.178	To authorize shipment of small quantity of a flammable solid labeled Flammable Solid and Dangerous When Wet but without a Flammable Solid W placard on the vehicle. (Modes 1, 2.)
9066-X	DOT-E 9066	Inflation Systems, Inc., Auburn Hill, MI.	49 CFR 171.11 (see paragraph 8.d.).	To renew and provide for additional models of air bag inflators. (Modes 1, 2, 3, 4.)
9066-X	DOT-E 9066	Volvo Cars of North America, Rockleigh, NJ.	49 CFR 171.11 (see paragraph 8.d.).	To modify exemption to include an additional non-DOT specification fiberboard box as an outside container for transportation of airbags. (Modes 1, 2, 3, 4.)
9116-X	DOT-E 9116	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.256, 173.266, 176.340, 178.19, 178.253, Part 173, Subpart F.	To authorize an alternative use of a modified top closure on a polyethylene portable tank for shipment of certain corrosive materials, flammable liquids or oxidizers. (Modes 1, 2, 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9116-X	DOT-E 9116	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.256, 173.266, 176.340, 178.19, 178.253, Part 173, Subpart F.	To delete special test requirements for polyethylene portable tanks for shipment of certain corroive, flammable, or oxidizer liquids. (Modes 1, 2, 3.)
9150-X	DOT-E 9150	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.256, 173.266, 176.340, 178.19, 178.253, Part 173, Subpart F.	To authorize use of a new high density polyethylene resin in the tank manufacture. (Modes 1, 2, 3.)
9162-X	DOT-E 9162	Sun Pipe Line Company, Longview, TX.	49 CFR 173.119, 173.304, 173.315	To authorize use of a non-DOT specification container, for transportation of flammable liquids or flammable gases. (Mode 1.)
9164-X	DOT-E 9164	Fabricated Metals, Inc., San Leandro, CA.	49 CFR 173.119(b)(6)	To increase upper flash point limit for flammable liquids from 73 degree F to 100 degree F contained in non-DOT specification steel portable tanks of 345 gallon capacity. (Modes 1, 2.)
9164-X	DOT-E 9164	Fabricated Metals, Inc., San Leandro, CA.	49 CFR 173.119(b)(6)	To authorize resin solution, classed as flammable liquid, as an additional commodity. (Modes 1, 2.)
9168-X	DOT-E 9168	All-Pak, Inc., Buffalo, NY	49 CFR 172.504, 173.118, 173.244, 173.3, 173.345, 173.346, 173.359, 173.370, 173.377, 175.3, 175.33, Part 172, Subpart E.	To authorize manufacture, marking and sale of specially designed composite type packaging, for shipment of small quantities of various flammable, corroive, and poison B liquids and solids without affixing POISON, CORROSIVE, or FLAMMABLE labels. (Modes 1, 2, 4.)
9316-X	DOT-E 9316	Fluoroware, Inc., Chaska, MN	49 CFR 173.268, 173.28(k) 173.299, 178.35, 178.35a, Part 173, Subpart F.	To amend exemption to include 5 gallon teflon/polyethylene composite containers for shipment of corrosive material. (Modes 1, 2, 3.)
9348-X	DOT-E 9348	DURACELL, Inc., Bethel, CT	49 CFR 173.206, 175.3, 175.85, Part 107, Appendix B.	To authorize lithium/manganese dioxide batteries to be raised from 2 grams of lithium to 3 grams of lithium per battery. (Modes 1, 2, 4, 5.)
9367-X	DOT-E 9367	Stone Container Corporation, Schaumburg, IL.	49 CFR 173.182, 173.217, 173.245b.	To modify exemption to include poison B solid as an additional commodity collapsible in polyethylene-lined woven polyethylene bulk bags. (Modes 1, 2, 3.)
9374-X	DOT-E 9374	Poly Processing Company, Inc., Monroe, LA.	49 CFR 173.114a(h)(3), 173.119, 173.256, 173.266, 173.268, 176.415, 176.83, 178.19, 178.253, Part 173, Subpart F.	To authorize marking by etching or stamping the certification into the polyethylene of the portable tanks and to modify periodic testing requirements. (Modes 1, 2, 3.)
9393-X	DOT-E 9393	Sexton Can Company, Inc., Cambridge, MA.	49 CFR 173.304(a), 175.3, 178.65	To authorize cargo aircraft as additional mode of transportation for shipment of certain nonflammable gases in non-DOT specification cylinder. (Modes 1, 2, 3, 4.)
9400-X	DOT-E 9400	Poly Processing Company, Inc., Monroe, LA.	49 CFR 173.114a(h)(3), 173.119, 173.125, 173.268, 176.415, 176.83, 178.19, 178.253, Part 173, Subpart F.	To authorize marking by etching or stamping the certification into the polyethylene of the portable tanks and to modify periodic testing requirements. (Modes 1, 2, 3.)
9401-X	DOT-E 9401	Arbel-Fauvet-Rail, Paris, France	49 CFR 173.123, 173.315, 178.245	To authorize shipment of ethylchloride, classed as a flammable liquid as an additional commodity. (Modes 1, 2, 3.)
9401-X	DOT-E 9401	Arbel-Fauvet-Rail, Paris, France	49 CFR 173.123, 173.315, 178.245	To authorize shipment of various flammable and nonflammable gases in non-DOT specification IMO type 5 portable tanks containing two surge buffles. (Modes 1, 2, 3.)
9418-X	DOT-E 9418	West Texas Fabrication, Odessa, TX.	49 CFR 173.119, 173.245, 178.253	To authorize shipment of four portable tanks, not to exceed 110 gallons capacity each mounted on a truck chassis for shipment of various flammable & corroive liquids (oil well treatment compounds). (Mode 1.)
9426-X	DOT-E 9426	Rheem Container Corporation, Danbury, CT.	49 CFR 178.19, Part 173, Subpart D, F.	To authorize a different cover design for removable head polyethylene drums for shipment of certain corrosive materials and flammable liquids. (Modes 1, 2, 3.)
9533-X	DOT-E 9533	B.A.G. Corporation, Dallas, TX	49 CFR Part 173, Subpart E, F	To authorize an increase in capacity of the super sack from 2260 pounds to capacity not to exceed 300 pounds. (Modes 1, 2, 3.)
9579-X	DOT-E 9579	IRECO, Incorporated, Salt Lake City, UT.	49 CFR 173.154(a)(18)	To modify exemption to provide for an additional non-DOT specification tank for transportation of ammonium nitrate solution containing not less than 15% water, classed as an oxidizer. (Mode 1.)
9618-X	DOT-E 9618	ENPAC Corporation, Jacksonville, FL.	49 CFR 173.3(c)	To authorize manufacture, marking and sale of polyethylene, removable head, salvage drums of 90-gallon capacity for overpacking damaged or leaking packages of hazardous materials, or for packing hazardous materials that have spilled or leaked, for repackaging or disposal. (Modes 1, 2.)
9623-X	DOT-E 9623	IRECO, Incorporated, Salt Lake City, UT.	49 CFR 177.835(c)(3)	To authorize an additional type trailer equipped with a dromdary compartment (storage box) for shipment of explosives. (Mode 1.)
9632-X	DOT-E 9632	Arbel-Fauvet-Rail, Douai, Cedex, France.	49 CFR 173.315, 178.245	To authorize shipment of ethylchloride, classed as a flammable liquid as an additional commodity. (Modes 1, 2, 3.)
9637-X	DOT-E 9637	Connelly Containers, Inc., Bala-Cynwyd, PA.	49 CFR 173.245b, 173.365	To authorize rail as an additional mode of transportation. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9638-X	DOT-E 9638	Allied-Signal Aerospace Company, Tempe, AZ.	49 CFR 173.304(a)(1), 175.3, 178.44.	To modify exemption to include alternate toroid (bent-tube design) manufacturing process to produce non-DOT specification welded pressure vessels for shipment of on-flammable gas. (Modes 1, 4, 5.)
9677-X	DOT-E 9677	Allied Universal Corporation, Miami, FL.	49 CFR 173.263(a)(15)	To authorize shipment of hydrochloric acid in non-DOT specification polyethylene bottles of one-gallon capacity, overpaced in 55-gallon drums. (Mode 1.)
9690-X	DOT-E 9690	Snyder Industries, Inc., Lincoln, NE	49 CFR 173.119, 176.340, 178.19, 178.253, Part 173, Subpart F.	To authorize shipment of certain poison B solids and liquids as additional commodities for shipment in non-DOT specification polyethylene portable tanks. (Modes 1, 2, 3.)
9694-X	DOT-E 9694	Midland Manufacturing Corp., Skokie, IL.	49 CFR 173.315(l)(13), 173.33(f)(9), 173.33(h)(5)(i).	To authorize use of MC-331 cargo tanks equipped with alternative safety relief valves for shipment of chlorine. (Mode 1.)
9694-X	DOT-E 9694	Midland Manufacturing Corp., Skokie, IL.	49 CFR 173.315(l)(13), 173.33(f)(9), 173.33(h)(5)(i).	To authorize retest of angle valves on MC-331 cargo tanks, used for chlorine transportation, at twelve month intervals. (Mode 1.)
9701-X	DOT-E 9701	Trimeg Holdings, Limited, Calgary, Alberta, Canada, CN.	49 CFR 172.331, 173.154, 173.164, 173.178, 173.182, 173.204, 173.217, 173.234, 173.245b, 173.366.	To authorize shipment of arsenical mixture solid, n.o.s., classed as poison B in non-DOT specification flexible bulk bags. (Modes 1, 2, 3.)
9733-X	DOT-E 9733	North American Packaging Corporation, Danbury, CT.	49 CFR 173.164	To modify exemption to authorize the manufacture, mark, and sell of a 5 gallon capacity DOT Specification 35 drum, not to exceed 50 lbs. total weight, for packaging of material classed as oxidizers. (Modes 1, 2, 3.)
9736-X	DOT-E 9736	Aqua-Tech, Inc., Port Washington, WI.	49 CFR Part 173, Subparts D, E, F, H.	To authorize reuse of DOT-17H steel drums a maximum of three times before reconditioning, for shipment of various liquid or solid hazardous substances and wastes packed in inside plastic, glass, earthenware or metal container, not exceeding 1-gallon capacity for disposal, repackaging or reprocessing (Mode 1.)
9761-X	DOT-E 9761	Systron Donner Corporation, Concord, CA.	49 CFR 173.304(a)(1), 175.3, 178.47.	To authorize construction of additional welded non-DOT specification cylinder with two discharge ports, relocation of mounting bracket and increase service pressure to 2000 cubic inch. (Modes 1, 4.)
9768-X	DOT-E 9768	Defense Technology and Procurement Agency, Berne, Switzerland.	49 CFR 172.101, 173.57, 173.79, 173.93, 175.3.	To authorize additional Class A explosives for shipment by cargo aircraft. (Mode 4.)
9797-X	DOT-E 9797	LTV Missiles and Electronics Group, Dallas, TX.	49 CFR 173.302, 173.304(a)(2)	To authorize shipment, in a single container, of two flight radiator panels containing anhydrous ammonia, classed as nonflammable gas. (Mode 1.)
9797-X	DOT-E 9797	LTV Missiles and Electronics Group, Dallas, TX.	49 CFR 173.302, 173.304(a)(2)	To authorize shipment of a non-DOT container consisting of space erectable radiator system panels together with a radiator-evaporator assembly container certain flammable and nonflammable gas. (Mode 1.)
9797-X	DOT-E 9797	LTV Missiles and Electronics Group, Dallas, TX.	49 CFR 173.302, 173.304(a)(2)	To authorize shipment, in a single container, of two flight radiator panels containing anhydrous ammonia, classed as nonflammable gas. (Mode 1.)
9805-X	DOT-E 9805	Stone Container Corporation, Schaumburg, IL.	49 CFR 173.182, 173.217, 173.245b.	To modify exemption to include poison B solid as an additional commodity in collapsible polyethylene lined woven polypropylene bulk bags. (Modes 1, 2, 3.)
9817-X	DOT-E 9817	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.125, 173.266, Part 173, Subpart F.	To authorize an additional outer packaging. (Mode 1.)
9819-X	DOT-E 9819	Halliburton Services, Duncan, OK	49 CFR 173.119, 178.253, Part 173, Subpart F.	To authorize additional non-DOT specification stainless steel portable tanks with a capacity for 160 and 345 gallons for shipment of certain flammable or corrosive liquids. (Mode 1.)
9844-X	DOT-E 9844	Theodor Fries Gesellschaft MBH & Co., Sulz, Ausstria.	49 CFR 173.266(a), 178.19	To authorize shipment of hydrogen peroxide, classed as oxidizer in DOT-34 Specification 55 gallon molded polyethylene drum. (Modes 1, 2, 3.)
9846-X	DOT-E 9846	Flexcon and Systems, Inc., Lafayette, LA.	49 CFR 172.331, 173.154, 173.164, 173.178, 173.182, 173.204, 173.217, 173.234, 173.245b, 173.366.	To authorize increase in capacity of polyethylene-lined woven polypropylene bags form 2200 pounds to 2300 pounds for shipment of certain hazardous materials. (Modes 1, 2.)
9865-X	DOT-E 9865	Atlas Powder Company, Dallas, TX	49 CFR 173.65	To authorize transport of an aqueous solution of a Class A explosive in a DOT Specification 17H drum with a DOT Specification 25 polyethylene liner in temperature controlled vans. (Mode 1.)
9884-X	DOT-E 9884	Puritan-Bennett Corporation, Indianapolis, IN.	49 CFR 173.316, 178.57-(8)(c), 178.57-2.	To authorize an additional model of a non-DOT specification cylinder for transportaion of oxygen, pressurized liquid. (Mode 1.)
9912-X	DOT-E 9912	Poly Processing Company & Poly Cal Plastics, Inc., Monroe, LA.	49 CFR 173.114a(h)(3), 173.119, 173.125, 173.266, 176.415, 176.83, 178.19, 178.253, Part 173, Subpart F.	To authorize marking by etching or stamping the certification into the polyethylene of the portable tanks and to modify periodic testing requirements. (Modes 1, 2, 3.)
9975-X	DOT-E 9975	Allied-Signal, Inc., Morristown, NJ	49 CFR 173.154(a)	To modify exemption to increase pounds per container from 200 pounds to a maximum of 500 pounds. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10019-X	DOT-E 10019	Structural Composites Industries, Inc., Pomona, CA.	49 CFR 173.302(a)(1), 175.3	To authorize shipment of compressed air with up to 40% volume oxygen content as an authorized hazardous material in non-DOT specification cylinders. (Modes 1, 2, 3, 4, 5.)
10020-X	DOT-E 10020	Allwaste, Inc., Washington, DC	49 CFR 173.245b	To authorize an additional roll-n/roll-off container for the shipment of certain solid waste corrosive materials or flammable sludge materials. (Mode 1.)
10050-X	DOT-E 10050	Ceodeux, S.A., Linigen, Luxembourg, G.D.	49 CFR 173.237(a)	To authorize air and water as additional modes and decrease valve cycle requirement to 5,000 for pneumatically operated valves on cylinders containing poision B materials. (Mode 1.)
10050-X	DOT-E 10050	Ceodeux, S.A., Linigen, Luxembourg, G.D..	49 CFR 173.237(a)	To renew, authorize cargo vessel and cargo only aircraft as additional modes of transportation, to decrease required valve cycles from 50,000 to 5,000 and to modify certain special provisions. (Mode 1.)
10090-X	DOT-E 10090	Clawson Tank Company, Clarkson, MI.	49 CFR 173.266, 178.19, 178.253, Part 173, Subparts D and F.	To authorize minor modifications to the frame, the provision for some additional small top openings, and a reduction in the wall thickness of the polyethyle IBC component. (Modes 1, 2.)
10090-X	DOT-E 10090	Clawson Tank Company, Clarkson, MI.	49 CFR 173.266, 178.19, 178.253, Part 173, Subparts D and F.	To authorize cargo vessel as additional mode of transportation for shipment of certain corrosive or flammable liquids of hydrogen peroxide solutions in polyethylene portable tanks. (Modes 1, 2.)
10096-X	DOT-E 10096	Energia E. Industries Aragoneses, S.A., Madrid, Spain.	49 CFR 173.163	To renew and authorize 40 foot freight containers. (Modes 1, 2, 3.)
10103-X	DOT-E 10103	General Motors Corporation, Warren, MI.	49 CFR Parts 100-177	To renew and modify exemption to provide for an additional air bag module and rail as an additional mode of transportation. (Mode 1.)
10120-X	DOT-E 10120	American Cyanamid Company, Wayne, NJ.	49 CFR 173.377	To modify exemption to include organic phosphate mixture containing both terbufas and phorate not to exceed 21% by weight of combined active ingredients, classed as Poison B. (Mode 1.)
10134-X	DOT-E 10134	Fluid Systems Div. of Allied-Signal Aerospace Co., Tempe, AZ.	49 CFR 173.302, 175.3, 178.44	Request modification to formula used in wall stress calculation for pressure vessels used for shipping argon and helium mixture, classed as nonflammable gas. (Modes 1, 2, 3, 4, 5.)
10142-X	DOT-E 10142	Tuscarora Plastics, Inc., Reston, VA.	49 CFR 173.119(a)(23), 173.245(a)(18), 178.210.	To authorize shipment of those flammable liquids and corrosive liquids authorized to be shipped in a DOT Specification 12A or 12B fiberboard box. (Modes 1, 2, 3, 4.)
10170-X	DOT-E 10170	Cleveland Steel Container, Cleveland, OH.	49 CFR 178.16-7, Part 173. Subpart E.	To authorize water as an additional mode of transportation. (Modes 1, 2, 3.)
10172-X	DOT-E 10172	Hoover Group, Inc., Beatrice, NE	49 CFR 178.19, 178.253, Part 173, Subparts D and F, Section 173.266.	To authorize a minimum wall thickness for polyethylene tanks 0.140 inches instead of the present requirements of 0.196 for the shipment of corrosive liquids, flammable liquids or oxidizers. (Modes 1, 2.)
10172-X	DOT-E 10172	Hoover Group, Inc., Beatrice, NE	49 CFR 178.19, 178.253, Part 173, Subparts D and F, Section 173.266.	To modify exemption to provide for a small polyethylene portable tank and to authorize additional type resins for material of construction. (Modes 1, 2.)
10174-X	DOT-E 10174	Ethyl Corporation, Baton Rouge, LA.	49 CFR 173.206	To renew exemption originally issued on an emergency basis to authorize shipment of metallic sodium in a tank car tank conforming to DOT 105A500W without safety valve and opening blind flanged. (Mode 2.)
10176-X	DOT-E 10176	Eveready Battery Company, Inc., Westlake, OH.	49 CFR 172.101, 172.400, 175.3	To modify exemption to increase gram content to 1-½ for lithium batteries; authorize UN4G fiberboard box and revise labeling, marking and placarding requirements. (Modes 1, 2, 3, 4.)
10176-X	DOT-E 10176	Eveready Battery Company, Inc., Westlake, OH.	49 CFR 172.101, 172.400, 175.3	To modify exemption to provide for alternative type packaging for transportation of lithium batteries. (Modes 1, 2, 3, 4.)
10196-X	DOT-E 10196	Penox Technologies Inc., Pittston, PA.	49 CFR 173.316, 178.57-2, 178.57-8(c).	To authorize shipment of liquid oxygen in insulated non-DOT Specification cylinders constructed of 24 gauge steel with a baffle plate allowing 90% filling capacity not to exceed 50 psig. (Modes 1, 4.)
10207-X	DOT-E 10207	Atlantic Research Corporation, Gainsville, VA.	49 CFR 173.88(e)(2)(ii), 173.92(b)	To authorize shipment of additional rocket motor with igniter installed and in a propulsive state. (Modes 1, 3.)
10256-X	DOT-E 10256	Comdyne I, Inc., West Liberty, OH	49 CFR 173.302(a)(1), 173.304(a)	To authorize manufacture, marking and sale of a non-DOT specification fiber reinforced plastic full wrapped composite cylinder, for shipment of certain hazardous materials. (Modes 1, 3, 4.)
10256-X	DOT-E 10256	Comdyne I, Inc., West Liberty, OH	49 CFR 173.302(a)(1), 173.304(a)	To authorize manufacture, marking and sale of a non-DOT specification fiber reinforced plastic full wrapped composite cylinder, for shipment of certain hazardous materials. (Modes 1, 3, 4.)
10267-X	DOT-E 10267	Belick Enterprises, Inc., Schaumburg, IL.	49 CFR 178.212, Part 173, Subpart F.	To modify exemption to provide for additional modes of transportation and additional commodities as authorized by Part 173 to be shipped in DOT Specification packaging. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10320-X	DOT-E 10320	Worthington Cylinder Corporation, Columbus, OH.	49 CFR 173.303(a)	To modify exemption to authorize the manufacture, marking and sell of smaller cylinders for acetylene. (Modes 1, 3.)
10335-X	DOT-E 10335	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.34(d), 175.3	To authorize air, water and rail as additional modes. (Modes 1, 4.)
10354-X	DOT-E 10354	BASF Corporation, Parsippany, NJ	49 CFR 179.200-18(b)	To renew exemption orginally issued on an emergency basis to authorize shipment of hydrocloric acid in DOT Specification 111A100W tank car tanks equipped with an orifice plate in line with the safety relief device. (Mode 2.)
10354-X	DOT-E 10354	BASF Corporation, Parsippany, NJ	49 CFR 179.200-18(b)	To renew exemption orginally issued on an emergency basis to authorize shipment of hydrocloric acid, corrosive material DOT Specification 111A100W5 tank car tanks equipped w/a relief set at 135 psi. (Mode 2.)
10376-X	DOT-E 10376	Minnesota Commercial Railway Company, Chicago, IL.	49 CFR 174.67(j)	To reissue exemption originally issued on an emergency basis to authorize DOT Specification 105A500W tank car tanks loaded with carbon dioxide, refrigerated liquid, to remain standing with unloading. (Mode 2.)
10399-X	DOT-E 10399	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.22(a), 174.3, 175.3, 176.3, 177.801.	To reissue exemption originally issued to authorize shipment of a specific device described as rocket ammunition with smoke projectile, Class B explosive by motor vehicle and cargo aircraft only. (Modes 1, 4.)
10399-X	DOT-E 10399	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.22(a), 174.3, 175.3, 176.3, 177.801.	To authorize cargo vessel and rail freight as additional modes of transportation for shipment or rocket ammunition with smoke projectile, classed as Class B explosive instead of Class A explosives. (Modes 1, 4.)
10402-X	DOT-E 10402	Astrotech Space Operations, L.P., Silver Spring, MD.	49 CFR 173.336	To reissue exemption originally issued on an emergency basis to authorized shipment of Nitrogen tetroxide, classed as a poison A, contained in specially designed stainless steel pipe column. (Mode 1.)
10413-X	DOT-E 10413	Harcros Chemicals, Inc., Dallas, TX	49 CFR 173.163	To authorize the one-time shipment of sodium chlorate in 400 non-DOT specification metal drums. (Mode 1.)
10424-X	DOT-E 10424	Pennsylvania Engineering Company, Philadelphia, PA.	49 CFR 173.34(e)(9), (e)(10)	To reissue exemption originally issued on an emergency basis to authorize shipment of mixture of ethylene oxide & dichlorofiloursmethane classed as nonflammable gas in DOT Specification 4BA240 cylinders. (Mode 1.)
10427-X	DOT-E 10427	Astrotech Space Operations, L.P., Silver Spring, MD.	49 CFR 173.145, 173.276, 173.301, 173.302, 173.336, 173.92.	To authorize shipment of a flight-ready spacecraft assembly containing 1 or more of either solid propellant rocket motor, monomethydrazine, anhydrous hydrazine, gaseous helium, nitrogen tetroxide. (Mode 1.)
10428-X	DOT-E 10428	Astrotech Space Operations, L.P., Silver Spring, MD.	49 CFR 173.145, 173.276, 173.336	To authorize shipment of a specialy designed propellant transfer cart, containing either monomethylhydrazine, anhydrous hydrazine, or nitrgen tetroxide. (Mode 1.)
10436-X	DOT-E 10436	Sandox Chemicals Corp., Charlotte, NC.	49 CFR 173.365	To reissue exemption originally issued on an emergency basis to authorize shipment of Dinitrochlorobenzene, classed as a poison B in DOT Specification MC-307 stainless steel cargo tanks. (Mode 1.)
10449-X	DOT-E 10449	Tren-Fuels, Inc., Austin, TX	49 CFR 173.301(d)(2), 173.302(a)(3).	To reissue exemption originally issued on an emergency basis to authorize shipment of compressed natural gas, classed as a flammable gas in DOT Specification 3AAX cylinders. (Mode 1.)
10453-X	DOT-E 10453	E. I. du Pont de Nemours and Company, Inc., Wilmington, DE.	49 CFR 173.300(i)	To reissue exemption originally issued on an emergency basis to authorize a change in the definition of dispersant and refrigerated gases. (Modes 1, 2.)
10468-X	DOT-E 10468	Clawson Tank Company, Clarkson, MI.	49 CFR Part 173, Subparts D and F.	To renew exemption originally issued on emergency basis to authorize manufacture, marking and sale of non-DOT specification polyethylene portable tanks, for shipment of certain corrosive liquids, flammable liquids or an oxidizer. (Modes 1, 2.)
10469-X	DOT-E 10469	U.S. Department of Defense, Falls Church, VA.	49 CFR 172.101	To authorize the transportation of ammunition for cannon with smoke projectile as a Class B explosive. (Modes 1, 2, 3, 4.)
10497-X	DOT-E 10497	General Electric Company, Princeton, NJ.	49 CFR 173.336, 177.834(m), 179.300.	To renew exemption originally issued on an emergency basis to authorize shipment of nitrogen tetroxide in non-DOT specification stainless steel tank. (Modes 1, 3.)
10498-X	DOT-E 10498	El Dorado Chemical Company, St. Louis, MO.	49 CFR 179.3, 179.4	To authorize shipment of nitric acid (98%) in DOT Specification 111A60ALW2 and 103A-ALW tank car tanks equipped with a nonapproved valve arrangement. (Mode 2.)
10531-X	DOT-E 10531	LCP Chemicals, Edison, NJ	49 CFR 173.29	To authorize the transportation of DOT Specification 105A500W tank car tanks which are overdue for tank and safety valve tests. (Mode 2.)
10541-P	DOT-E 10541	Aerojet Propulsion Division, Sacramento, CA.	49 CFR 173.92	To become a party to exemption 10541. (Mode 1.)
10636-X	DOT-E 10636	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only shipment of scrap steel contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10084-X	DOT-E 10082	K.T. Specialties, Inc., Corona, CA	49 CFR 173.119 (a), (m), 173.346(a), 178.340, 178.342, 178.343, Part 173, Subpart F as applicable.	To become a party to exemption 10082. (Mode 1.)
10697-X	DOT-E 10697	Liquid Air Corporation, Walnut Creek, CA.	49 CFR 173.301(d)(2), 173.302(a)(3).	To authorize the transportation of certain flammable compressed gas mixtures in DOT Specification 3AAX steel cylinders. (Mode 1.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10241-N	DOT-E 8127	Ercros North America, Inc., White Plains, NY.	49 CFR 171.12(d), 173.127, 173.184, 178.224.	To authorize shipment of nitrocellulose, alcohol wet, classed as a flammable liquid, and nitrocellulose, water wet, classed as a flammable solid, in non-DOT specification 125 liter capacity fiberboard drums. (Modes 1, 2, 3.)
9445-N	DOT-E 9445	Petroleum Construction, Inc., Santa Paula, CA.	49 CFR 173.119(a), 173.119(m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tank motor vehicles, for shipment of waste materials. (Mode 1.)
9817-N	DOT-E 9817	Hoover Group, Inc., Beatrice, NE	49 CFR 173.118a, 173.119, 173.125, 173.266, Part 173, Subpart F.	To authorize the manufacture, marking and sale of a non-DOT specification limited-life polyethylene portable tank closed in a steel jacket for the transportation of certain flammable liquids, corroive materials or an oxidizer (Mode 1.)
9847-N	DOT-E 9847	FIBA Leasing Co.—Mass Oxygen Equipment Co., Inc. Westboro, MA.	49 CFR 173.302(c), 173.34(e), 175.3.	To permit FIBA to retest DOT Specifications 3A and 3AA, 9-58 inch diameter cylinders by means other than the hydrostatic retest required in 49 CFR 173.34(e). (Modes 1, 2, 3, 4.)
9965-N	DOT-E 9965	HazMat Environmental Group, Inc., Buffalo, NY.	49 CFR 172.331	To authorize shipment of polychlorinated biphenyls, classed as ORM-E, in motor vehicles bearing placards in lieu of marking the bulk packaging. (Mode 1.)
10046-N	DOT-E 10046	Eveready Battery Company, Inc., Cleveland, OH.	49 CFR Parts 100-177	To authorize shipment of specified type of lithium cell excepted from the requirements of the Department's Hazardous Materials Regulations. (Modes 1, 2, 3, 4, 5.)
10119-N	DOT-E 10119	Crow Executive Air Charter, Inc., Millbury, OH.	49 CFR 172.101, 173.54, 175.30	To authorize carriage of certain explosives by cargo aircraft only. (Mode 4.)
10141-N	DOT-E 10141	General Electric Company, Pleasanton, CA.	49 CFR 173.421(d), 173.421-1(a), Part 107, Subpart B, Appendix B.	To authorize packagings of rhenium metal and alloys containing rhenium to be transported as "limited quantity" radioactive materials without prescribed marking requirements and certification statements. (Modes 1, 2, 3, 4.)
10148-N	DOT-E 10148	Pro-Tech—Tube Inc., Kansas City, MO.	49 CFR 173.387(b)(2)(iii), 175.3	To authorize shipment of a viable microorganism classed as an etiologic agent in an inner container surrounded with an absorbent material impregnated with a germicidal pesticidal substance overpacked in a metal tube. (Modes 1, 2, 3, 4, 5.)
10153-N	DOT-E 10153	American Cyanamid Company, Wayne, NJ.	49 CFR 173.377(h)	To authorize the use of large, collapsible polypropylene-lined woven polypropylene bulk bags having a capacity of 1102.3 pounds each, and top and bottom outlets, for shipment of a poison B solid. (Mode 1.)
10164-N	DOT-E 10164	Moli Energy, Limited, Burnaby, B.C., Canada.	49 CFR 173.1015	To authorize transport of depleted lithium cells which originally contained more than 12 grams of lithium. (Mode 1.)
10210-N	DOT-E 10210	Gowan Company, Yuma, AZ	49 CFR 173.359(b)(1)	To authorize shipment of a methyl parathion mixtures and parathion mixtures in DOT Specification 5C stainless steel drums 15 gallons capacity. (Mode 1.)
10211-N	DOT-E 10211	CP Industries, Incorporated, McKeesport, PA.	49 CFR 173.302, 173.304, 175.3	To authorize the carriage of certain explosives by cargo aircraft only. (Modes 1, 2, 3, 4, 5.)
10228-N	DOT-E 10228	Koch Industries, Inc., Wichita, KS	49 CFR 173.119, 173.304, 173.315	To authorize the use of a non-DOT specification container described as a mechanical displacement meter prover for the shipment of flammable liquids and flammable gases. (Mode 1.)
10230-N	DOT-E 10230	Georgia Box, Inc., Jackson, GA	49 CFR 173.128, 173.132, 173.266, Part 173 Subpart F.	To authorize manufacture, marking, and sale of a non-DOT single-trip blow molded high density polyethylene portable tank having a wood pallet, foam transiton base, corrugated cover for hydrogen peroxide solution classed as oxidizer, various corrosive materials and flammable liquids. (Modes 1, 2, 3.)
10232-N	DOT-E 10232	Sexton Can Company, Inc., Cambridge, MA.	49 CFR 173.304	To authorize transport of refrigerant gases in a container conforming in part with the DOT Specification 2Q. (Modes 1, 2, 3, 4, 5.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10255–N	DOT–E 10255	Sexton Can Company, Inc., Cambridge, MA.	49 CFR 173.304, 175.3, 178.33a–2, 178.33a–6, 178.33a–7, 178.33a–8, 178.33a–9.	To authorize manufacture, marking, and sale of a non-DOT specification drawn and ironed container similar to the DOT specification 2Q cylinder for shipment of non-flammable and flammable liquefied compressed gases authorized for shipment in a DOT specification 2Q cylinder. (Modes 1, 2, 3, 4.)
10259–N	DOT–E 10259	Phillips Petroleum Company, Bartlesville, OK.	49 CFR 173.141	To authorize shipment of mercaptans, classed as flammable liquids, in DOT specification 57 portable tanks constructed of 316 stainless steel with a service pressure of 40 psig. (Modes 1, 2, 3.)
10260–N	DOT–E 10260	Olin Hunt Specialty Products, Inc., West Paterson, NJ.	49 CFR 173.266	To authorize transport of a hydrogen peroxide solution, in a cylindrical steel overpack, straight sided, enclosing a polyethylene container of 101 liters capacity. (Modes 1, 2, 3.)
10261–N	DOT–E 10261	Olin Hunt Specialty Products, Inc., West Paterson, NJ.	49 CFR 173.272	To authorize use of a non-DOT specification container consisting of an inner polyethylene bottle with an FRP outer housing, for the transportation of sulfuric acid solutions, not exceeding 98% concentration. (Modes 1, 2, 3.)
10262–N	DOT–E 10262	Tay Textiles Limited, Dundee, Scotland.	49 CFR 173.245b	To authorize the manufacture, marking and sale of large, collapsible polyethylene-lined, woven polypropylene bulk bags having a capacity of approximately 2205 pounds each, and top and bottom outlets, for shipment of corrosive solids. (Modes 1, 2, 3.)
10266–N	DOT–E 10266	Mobil Pipe Line Company, Dallas, TX.	49 CFR 173.119	To authorize use of a non-DOT specification container, for shipment of certain flammable liquids and flammable gases. (Mode 1.)
10267–N	DOT–E 10267	Belick Enterprises, Inc., Schaumburg, IL.	49 CFR 178.212, Part 173, Subpart F.	To authorize manufacture, marking and sale of a non-DOT specification paper-faced expanded polystyrene board box for use in the shipment of nitric acid. (Mode 1.)
10272–N	DOT–E 10272	Olin Corporation, Charleston, TN	49 CFR 172.101 Table, Column 1, 173.315.	To authorize the use of insulated and lined DOT Specification MC 331 cargo tank motor vehicles to transport aqueous hypochlorous acid solutions of 50% or less concentration. (Mode 1.)
10273–N	DOT–E 10273	Georgia-Pacific Corporation, Schenectady, NY	49 CFR 173.154, 173.217, 173.245b, 173.365.	To authorize manufacture, marking and sale of non-reusable, fiberboard bulk boxes having an inside lining of 0.0065-inchminimum thickness polyethylene film. (Mode 1.)
10277–N	DOT–E 10277	Amtrol, Inc., West Warwick, RI	49 CFR 175.30, 178.51, Part 173 Subpart G.	To authorize manufacture, marking and sale of non-DOT specification cylinder conforming in part with the DOT Specification 4BA. (Modes 1, 2, 4.)
10278–N	DOT–E 10278	Taymar Limited, Stockport, Cheshire, England.	49 CFR 173.304(d), 178.33	To authorize shipment of certain flammable gases in a nonrefillable, non-DOT Specification inside container conforming with the DOT Specification 2P except for diameter and capacity. (Modes 1, 3.)
10279–N	DOT–E 10279	Flexcon Industries, Randolph, MA	49 CFR 173.306(g)(1), Part 172, Subparts D, E.	To authorize manufacture, marking and sale of non—DOT specification steel water pump system tank with an outside diameter not exceeding 26 inches. (Modes 1, 2, 3.)
10291–N	DOT–E 10291	Tankbouw Rootselaar B.V., Holland	49 CFR 173.315, 178.245	To authorize use of a non-DOT specification IMO Type 5 portable tank, for shipment of certain flammable and nonflammable compressed gases. (Modes 1, 2, 3.)
10292–N	DOT–E 10292	Kerrco Incorporation, Hastings, NE	49 CFR 173.119, 173.125, 173.266, Part 173 Subpart F.	To authorize manufacture, marking and sale of a non-DOT specification rotationally molded, linear low density polyethylene portable tank, for the shipment of corrosive liquids, flammable liquids or an oxidizer. (Modes 1, 2, 3.)
10295–N	DOT–E 10295	Sherex Chemical Company, Inc., Dublin, OH.	49 CFR 173.134	To authorize use of a DOT Specification 17C metal drum with inside non-DOT specification metal containers, for shipment of pyrophoric liquids, n.o.s. (Modes 1, 3.)
10297–N	DOT–E 10297	Tropigas De Puerto Rico, Inc., Caguas, PR.	49 CFR 173.134(L)(1), (2), (3), 175.30, Part 107 Appendix B.	To authorize rebuilding, and selling of DOT Specification 4B, 4BA and 4BW cylinders, for shipment of certain hazardous materials. (Modes 1, 2, 3, 4, 5.)
10298–N	DOT–E 10298	North Star Air Cargo, Inc., Anchorage, AK.	49 CFR 172.101, column (6)(b), 173.119, 175.320.	To authorize shipment of liquid fuels classed as flammable or combustible liquids in non-DOT specification seal drums (rollagons) up to 500 gallon capacity by cargo aircraft only. (Mode 4.)
10303–N	DOT–E 10303	Ketchum Air Service Inc., Anchorage, AK.	49 CFR 172.101 (Hazardous Materials Table, Column 6(a), 173.306, 175.30, 175.25(a)(1), (2).	To authorize carriage of small amounts of liquefied petroleum gas aboard small, float equipped, passenger carrying aircraft. (Mode 5.)
10305–N	DOT–E 10305	Union Carbide Chemicals and Plastics Company, Inc., Danbury, CT	49 CFR 173.31(c)(1), Reteet Table 1	To authorize use of DOT Specification 105A300W tank car tanks converted to DOT Specification 111A100W2 tank car tanks with an extended retested interval. (Mode 2.)
10306–N	DOT–E 10306	Alaska Marine Lines, Seattle, WA	49 CFR 176.83	To waive the requirement that explosives must be the last cargo loaded and first cargo unloaded from a vessel in each port. (Mode 3.)
10316–N	DOT–E 10316	McDonnell Douglas Corporation, St. Louis, MO.	49 CFR 173.87	To authorize transportation of various Class C explosives in the same outside packaging in quantities greater than those authorized in 49 CFR 173.87. (Mode 1.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10318–N	DOT–E 10318	Sonoco IBC, Lavonia, GA	49 CFR 173.119, 173.125, 173.266, part 173, Subpart F.	To authorize manufacture, marking and sale of nonreusable non-DOT specification blow molded, polyethylene portable tank enclosed in a steel frame, for shipment of corrosive materials, flammable liquids, or an oxidizer. (Modes 1, 2.)
10319–N	DOT–E 10319	Amtrol, Inc., West Warwick, RI	49 CFR 173.302(a)(1), 173.306(g)	To authorize manufacture, marking and sale of a non-DOT specification pressure vessel (water pump system tank) for use in the shipment of compressed air and nitrogen. (Modes 1, 2, 3.)
10320–N	DOT–E 10320	Worthington Cylinder Corporation, Columbus, OH.	49 CFR 173.303(a)	To authorize manufacture, marking and sale of non-DOT specification steel cylinders comparable to DOT Specification 8AL except the steel shell is made to a DOT Specification 4BW for the shipment of acetylene. (Modes 1, 3.)
10321–N	DOT–E 10321	Wrothington Cylinders Corporation, Columbus, OH.	49 CFR 173.302, app. B, 173.34	To authorize the shipment of a nonliquefied flammable gas in DOT Specifications 4BA 240, 4BA 260, 4BW 240, and 4BW 260 steel cylinders and 4E 240, 4E 260 aluminum cylinders. (Mode 1.)
10323–N	DOT–E 10323	Solkatronic Chemicals, Inc. Morrisville, PA.	49 CFR 173.24, 173.300, 173.34	To authorize the use of a non-DOT specification full-opening head salvage cylinder of 8 gallons capacity for overpacking damaged or leaking packages of pressurized and non-pressurized hazardous materials. (Mode 1.)
10325–N	DOT–E 10325	Marley Industries, Paris, France	49 CFR 173.315, 178.245–(1)(b), 178.245–5(b).	To authorize use of non-DOT specification IMO portable tanks with openings not grouped in one location on tank for shipment of liquified non-flammable gas and flammable gas. (Modes 1, 2, 3.)
10326–N	DOT–E 10326	Allied-Signal Aerospace Company, Tempe, AZ.	49 CFR 173.302(a)(2), 175.3, 178.44.	To authorize the use of a non-DOT specification welded pressure vessel comparable to a DOT Specification 3HT cylinder with certain exceptions. (Modes 1, 2, 3, 4, 5.)
10327–N	DOT–E 10327	CTI-Cryogenics Division of Helix Technology Corp., Waltham, MA.	49 CFR 173.306(f)(1), 173.306(f)(2), 173.306(f)(3), 175.3.	To authorize the use of a refrigeration system and components that are filled with dry helium gas at pressures specified ents in paragraph 7.a. (Modes 1, 2, 4, 5.)
10330–N	DOT–E 10330	Fluoroware, Inc., Chaska, MN	49 CFR 173.119, 173.268, 173.299, 178.19, 178.35, 178.35(a), Part 173 Subpart F.	To authorize manufacture, marking and sale of non-DOT specification rotationally modeled, teflon PFA inner container enclosed in a outer stainless steel shell for the shipment of corrosive liquids, flammable liquids or oxidizers. (Modes 1, 2, 3.)
10334–N	DOT–E 10334	Chevron Pipe Line Company, Midland, TX.	49 CFR 173.119, 173.304, 173.315	To authorize the use of a non-DOT specification container described as mechanical displacement meter provers mounted on trailers with configurations, for transportation of flammable liquids and flammable gases. (Mode 1.)
10335–N	DOT–E 10335	U.S Department of Defense, Falls Church, VA.	49 CFR 173.34(d), 175.3	To authorize shipment of bromotrifluoromethane in DOT Specification 4BA400 or 4BW400 cylinders equipped with fusible pressure relief devices. (Modes 1, 4.)
10336–N	DOT–E 10336	Morton International, Inc., Ogden, UT.	49 CFR 173.93(a)(9)	To authorize the transportation of propellant explosives, solid in packagings larger than those authorized in 49 U.S. CFR 173.93. (Mode 1.)
10343–N	DOT–E 10343	Cryogenic Services, Inc., Canton, GA.	49 CFR 178.57–8(c)	To authorize shipment of liquid oxygen in an insulated non-DOT specification cylinder conforming with 49 CFR 178.57 except 178.57–2 and 178–57–8(c). (Mode 1.)
10344–N	DOT–E 10344	U.S Department of Defense, Falls Church, VA.	49 CFR 172.101, 173.1015	To authorize transportation of depleted lithium batteries from U.S. military bases oversees to the United States for disposal. (Modes 1, 3.)
10345–N	DOT–E 10345	Luxfer USA Limited, Riverside, CA	49 CFR 173.302(a)(1), 175.3	To manufacture, mark and sell non-DOT specification cylinders containing nonflammable gases to be used as self-contained underwater breathing apparatus. (Modes 1, 2, 3, 4, 5.)
10346–N	DOT–E 10346	Weyerhaeuser Company, Tacoma, WA.	49 CFR 174.67(i), 174.67(j)	To authorize tank car tanks loaded with chlorine to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10347–N	DOT–E 10347	PPG Industries, Inc., Pittsburgh, PA	49 CFR 173.247	To authorize shipment of trimethylacetal chloride in DOT Specification 34 containers of 55 gallons capacity. (Modes 1, 2, 3.)
10349–N	DOT–E 10349	Uniroyal Chemical Company, Inc., Middlebury, CT.	49 CFR 173.31(b), (c)	To authorize a one-time shipment of styrene monomer residue in a DOT Specification 103W tank car tank which is overdue for reteet and for cleaning prior to scraping. (Mode 2.)
10352–N	DOT–E 10352	Muller, AG, Verpackungen, CH–4142 Munchenstein, Switzerland.	49 CFR 175.3, 178.116–8(a), 178.116–7(a), Part 173, Subparts D, E, F and H.	To authorize the manufacture, marking and sale of non-DOT specification steel drums, for transportation of various hazardous materials. (Modes 1, 2, 3, 4.)
10355–N	DOT–E 10355	Chemteck Industries, Inc., St. Louis, MO.	49 CFR 173.264	To authorize transport of hydrochloric acid solutions in a DOT Specification 111A100W5 tank car tank equipped with an ethylene chlorotrifluoroethylene lining. (Mode 2.)
10356–N	DOT–E 10356	FMC Corporation, Gastonia, NC	49 CFR 173.154	To authorize shipment of a lithium metal dispersion in hexane or cyclohexane in DOT Specification 4BW240 cylinder by motor vehicle. (Mode 1.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10358–N	DOT–E 10358	Betco Corporation, Toledo, OH	49 CFR 173.245	To authorize the shipment of compound, cleaning, liquid, classed as a corrosive material, in 5-gallon plastic bags overpacked on–DOT specification fiberboard box. (Mode 1.)
10359–N	DOT–E 10359	High Pressure Integrity, Inc., New Orleans, LA.	49 CFR 173.246, 173.3a, 175.3	To authorize shipment of bromine trifluoride in non DOT specification, nonrefillable cylinders. (Modes 1, 2, 3, 4.)
10360–N	DOT–E 10360	ICI Americas Inc., Agricultural Products, Wilmington, DE.	49 CFR 173.346	To authorize the transportation of a Class B poison in a polyethylene packaging not authorized in 49 CFR. (Mode 1.)
10361–N	DOT–E 10361	American Cyanamid Company, Wayne, NJ.	49 CFR 173.377(a), 175.3, 178.19, 178.251, 178.252.	To authorize shipment of certain dry organic phosphate compound mixtures, classed as Poison B, in a non–DOT specification polyethylene (PE) portable tank. (Modes 1, 2.)
10362–N	DOT–E 10362	Jefferson Smurfit Corp./Container Corp. of America, Carol Stream, IL.	49 CFR 173.245(b), 173.365	To manufacture, mark and sell composite type packaging consisting of fiberboard box and inner polyethylene bulk bag for transportation of certain corrosive solids and Poison B solids. (Mode 1.)
10364–N	DOT–E 10364	Hoechst Celanese Corporation, Somerville, NJ.	49 CFR 173.3–C(1)	To authorize a one-time shipment of a corrosive liquid in approximately 550 non–DOT specification 55-gallon metal drums overpacked in polyethylene, removable head, salvage drums not to exceed 95-gallon capacity. (Mode 1.)
10365–N	DOT–E 10365	U.S. Department of Energy, Washington, DC.	49 CFR 178.121–1(b)	To authorize the use of model 30A or 30B cylinders, containing radioactive material, with 21PT–1A and 21PF–1B overpacks without a maximum gross weight limit. (Mode 1.)
10366–N	DOT–E 10366	LTV Energy Products Co., Garland, TX.	49 CFR 173.119, 173.304, 173.315	To authorize manufacture, marking and sale of non-DOT specification container described as a mechanical displacement meter prover mounted on a twin axle trailer, for transportation flammable liquids or flammable gases. (Mode 1.)
10372–N	DOT–E 10372	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.119, 173.24, 173.302, 173.304, 173.327, 173.328, 173.34, 173.346.	To authorize the use of a non-DOT specification stainless steel, full removable head "Salvage" cylinder of 78 gallon capacity for overpacking damaged or leaking packages of pressurized and non-pressurized hazardous materials. (Mode 1.)
10373–N	DOT–E 10373	Day & Zimmermann, Inc. (DZI), Parsons, KS.	49 CFR 173.56(b), (c)(1), 173.86(b)	To authorize shipment of explosive projectiles, Class A explosives in specially designed military packaging, exceeding weight limitsbes. (Modes 1, 2.)
10374–N	DOT–E 10374	Soltralentz, S.W., Drulingen, France	49 CFR 173.119, 173.125, 173.245, 173.249, 173.249a, 173.250a, 173.256, 173.257, 173.262, 173.263, 173.264, 173.265, 173.266, 173.269, 173.292, 173.297, 173.299a.	To authorize manufacture,marking and sell of non-DOT specification blow molded, polyethylene portable tank enclosed in a steel frame, for the shipment of corrosive materials, flammable liquids, or an oxidizer. (Modes 1, 2, 3.)
10380–N	DOT–E 10380	Hydra Rig, Inc., Fort Worth, TX	49 CFR 49 CFR 173.320	To authorize manufacture, marking and sale non-DOT specification cryogenic portable tanks. (Mode 3.)
10381–N	DOT–E 10381	Defence Technology and Procurement Agency, CH–3000 Berne 25, Switzerland.	49 CFR 175.3, 49 CFR 172.101, column (6)(b).	To authorize the transportation of rocket warheads classed as Class A explosives on cargo aircraft. (Mode 4.)
10382–N	DOT–E 10382	ICI Americas, Inc., Wilmington, DE	49 CFR 173.245(a)	To authorize the shipment of ethyl phosphonothioic dichloride, anhydruous in DOT Specification 105S300W tank car tanks. (Mode 2.)
10383–N	DOT–E 10383	Chevron Pipe Line Company, Beaumont, TX.	49 CFR 173.304, 173.315	To authorize use of a non-DOT specification container described as a mechanical displacement meter provers for the shipment of a flammable gas. (Mode 1.)
10384–N	DOT–E 10384	Great Lakes Chemical Corporation, El Dorado, AR.	49 CFR 173.315	To authorize the use of MC331 Cargo tanks to transport compressed gas, n.o.s., classed as flammable gas in truck load quantities. (Mode 1.)
10386–N	DOT–E 10386	Hill Construction Chemical, Inc., Tulsa, OK.	49 CFR 173.1200(a)(8), 173.306(a)(3), 178.33a–2.	To authorize the manufacture, marking and sale of non-DOT specification inside metal container conforming with the DOT Specification 2Q except for size, for shipment of certain hazardous materials. (Mode 1, 3, 4, 5.)
10387–N	DOT–E 10387	Olin Corporation—Defense Systems Group, East Alton, IL.	49 CFR 173.102	To authorize the transportation of starter cartridges, Class C explosive, in DOT Specification 17H steel drums. (Mode 1.)
10388–N	DOT–E 10388	The Coca-Cola Company, Atlanta, GA.	49 CFR 173.119(b)(4), 178.210–10	To authorize shipment of certain flammable liquids in polyethylene terephthalate bottles of one-gallon capacity, packed no more then four to a DOT–12B65 fiberboard box. (Mode 1, 2, 3.)
10389–N	DOT–E 10389	Great Lakes Chemical Corporation, El Dorado, AR.	49 CFR 174.67(i)	To authorize tank car tanks loaded with chlorine to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10390–N	DOT–E 10390	Container Products, Incorporated, Southfield, MI.	49 CFR 175.3, 178.100–5, 178.80–7, 178.81–7, 178.82–7, 178.83–7, 178.86–6, 178.98–5, 178.99–5.	To authorize the manufacture, marking and sale of non-DOT specification steel drums, in compliance with DOT Specification 5 and 6 series drums except that the rolling hoops are constructed of round pipe sections. (Mode 1, 2, 3, 4.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10391–N	DOT–E 10391	Wim Vos International Transport BV, Netherlands.	49 CFR 178.70–11	To authorize shipment of flammable liquids in IMO portable tanks with alternative safety relief valves. (Mode 1, 2, 3.)
10392–N	DOT–E 10392	Riblet Plastics, Bristol, IN	49 CFR 173.119, 173.125, 173.245, 173.249, 173.249(a), 173.250(a), 173.256, 173.257, 173.262, 173.263, 173.264, 173.265, 173.266, 173.269, 173.272, 173.276, 173.277, 173.283, 173.287, 173.288, 173.289, 173.292, 173.297, 173.299(a).	To authorize manufacture, mark and sale of non-DOT specification rotationally molded, linear low density polyethylene portable tank, enclosed within a protective metal frame for the shipment of corrosive liquids, flammable liquids or an oxidizer. (Modes 1, 2.)
10393–N	DOT–E 10393	Olin Chemicals, Stamford, CT	49 CFR 173.276(a)(4), 173.276(a)(6)(i), 179.202–14.	To authorize shipment of hydrazine aqueous solutions, classed as a corrosive material in those tank cars and cargo tanks specified under Section 173.276(a)(4), 173.276(a)(6)(i) and 179.202–14 without the current restriction regarding molybdenum content. (Modes 1, 2.)
10394–N	DOT–E 10394	Olin Corporation, Stamford, CT	49 CFR 173.263(a)(12), 179.202–8(b).	To authorize use of DOT specification tank cars made from Type 316 stainless steel for the shipment of not exceeding 42% active sodium chlorite. (Mode 2.)
10396–N	DOT–E 10396	Chevron Pipe Line Company, Salt Lake City, UT.	49 CFR 173.119	To authorize use a non-DOT specification container described as a mechanical displacement meter prover for the shipment of a flammable liquid. (Mode 1.)
10400–N	DOT–E 10400	Martin Marietta Ordnance Systems, Inc., Milan, TN.	49 CFR 173.56(a)	To authorize the transportation of granedes fuzes installed, in partitioned fiberboard cartons overpacked in wooden boxes and palletized. (Modes 1, 3.)
10406–N	DOT–E 10406	The Ensign-Bickford Company, Simsbury, CT.	49 CFR 173.65	To authorize the transportation of desensitized PETN in polyethylene bottles overpacked in DOT Specification 12H fiberboard boxes. (Mode 1.)
10409–N	DOT–E 10409	AT Plastics, Inc., Brampton, Ontario, CN.	49 CFR 173.182, 173.234, 178.241	To authorize manufacture, marking and sale of non-DOT specification duplex wall polyethylene film bags, in compliance with DOT Specification 44P except for marking for the shipment of oxidizer solids. (Modes 1, 2, 3.)
10410–N	DOT–E 10410	Freeman Chemical Corporation, Health, OH.	49 CFR 173.221	To authorize transportation of t-butyl hydroperoxide (TBHP) not more than 72% with water in a DOT Specification 57 portable tank. (Mode 1.)
10412–N	DOT–E 10412	Hoechst Celanese Corporation, Dallas, TX.	49 CFR 173.119(a)(3)	To authorize a one-time shipment of diethylamine (DEA) and triethylamine (TEA) in DOT Specification 17E, 20/18 gauge, steel drums having a capacity of 55-gallons. (Mode 1.)
10413–N	DOT–E 10413	Harcros Chemicals, Inc., Dallas, TX	49 CFR 173.163	To authorize the one-time shipment of sodium chlorate in 400 non-DOT specification metal drums. (Mode 1.)
10419–N	DOT–E 10419	Wayne County Department of Public Services, Wyandotte, MI.	49 CFR 174.67(i)	To authorize tank car tanks loaded with chlorine to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10430–N	DOT–E 10430	M1 Engineering Limited, Bradford, West Yorkshire, EN.	49 CFR 172.203, 173.318, 173.320, 176.30, 176.76(h), 178.338.	To authorize the manufacture, marking and sale of vacuum insulated, non-DOT specification portable tank in an ISO frame for the transportation of certain refrigerated liquids. (Modes 1, 2, 3.)
10431–N	DOT–E 10431	Bowater Drums Limited, Cheshire, United Kingdom.	49 CFR 173.127, 173.175, 173.184, 178.224.	To authorize manufacture, marking and sale for a non-DOT specification fiber drum, similar to a DOT Specification 21C except the bottom head may be made of low density polyethylene, for the transportation of certain flammable liquids and flammable solids. (Modes 1, 2, 3.)
10434–N	DOT–E 10434	S.C. Johnson & Son, Inc., Racine, WI.	49 CFR 173.245	To authorize shipment of corrosive liquids in an individually shrink-wrapped non-DOT specification fiberboard box containing one inside non-rigid, double-wall bag with a capacity at exceeding 5 gallons. (Mode 1, 2, 3.)
10438–N	DOT–E 10438	Vulcan, Emballages, Inc., Lachine, Quebec, Canada.	49 CFR 173 Subpart D, 173 Subpart F, 178.19.	To manufacture, mark and sell a non-DOT specification removable head polyethylene container, without overpack having a rated capacity of up to 5 gallons for transportation of corroeive liquids classed as corroeive materials and flammable liquids with a flash point above 20%. (Mode 1, 2, 3.)
10440–N	DOT–E 10440	Mass Systems, Inc., Baldwin Park, CA.	49 CFR 173.304(a)(1), 175.3, 178.47.	To authorize use of a non-DOT approved stainless steel in the construction of a cylinder patterned after a DOT 4DS specification cylinder for shipment of nonflammable gas. (Mode 1, 2, 4, 5.)
10442–N	DOT–E 10442	Whittaker Ordnance, Inc., Hollister, CA.	49 CFR 172,101, 173.154, 173.65, 173.95.	To authorize the transportation of waste materials contaminated with small quantities of explosives in specially authorized packagings for incineration. (Mode 1.)
10455–N	DOT–E 10455	Shell Chemical Company, Houston, TX.	49 CFR 173.119(m)	To authorize transportation of material classed as flammable liquid in a manifold consisting of ¾" steel pipe fittings attached to a ¾" ball valve and pressure gauge, placed in the opening of a DOT Specification 5B, nominal 43 gallon drum, overpacked inside an 85 gallon non-DOT salvage drum. (Modes 1, 3).
10456–N	DOT–E 10456	General Chemical Corporation, Parsippany, NJ.	49 CFR 173.274	To authorize the use of DOT Specification 111A60W7 tank car tanks for the transportation of fluosulfonic acid. (Mode 2).

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10457–N	DOT–E 10457	Tatcher Company, Salt Lake City, UT.	49 CFR 173.315(i)(13), 173.33(f)(9), 173.33(h)(4)(ii), 173.33(h)(5)(i).	To authorize the use of MC 331 cargo tanks equipped with angle valves, excess flow valves and pressure relief valves not presently authorized in the regulations. (Mode 1.)
10458–N	DOT–E 10458	MARSULEX Inc., North York, Ontario, Canada.	49 CFR 174.67(j), Part 107, Appendix B, Subpart B.	To authorize the use of DOT Specification 111A100W2 tank car tanks loaded with sulfuric acid, classed as a corrosive material, to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10460–N	DOT–E 10460	W.H. Stewart Company, Oklahoma City, OK.	49 CFR 173.420(a)(2)(i)	To authorize the use of non-DOT specification containers, for transportation of radioactive materials. (Mode 1.)
10461–N	DOT–E 10461	Cryolor S.A., Vigy, France	49 CFR 172.203, 173.318, 173.320, 176.30, 176.76(h), 178.338.	To authorize the manufacture, marking and sale of a vacuum insulated, non-DOT specification portable tank in an IS0 frame, for the transportation of certain refrigerated liquid. (Modes 1, 3.)
10463–N	DOT–E 10463	Allied Universal Corporation, Miami, FL.	49 CFR 173.277(1)	To authorize the shipment of hypochlorite solution in DOT Specification 2E90 1-gallon polyethylene bottles overpacked in a non-DOT specification polyethylene drum with refill. (Mode 1.)
10465–N	DOT–E 10465	EPOPLEX, Maple Shade, NJ	49 CFR 173.245(17)	To authorize shipment of corrosive liquid mixture containing N–Aminoethylpiperizine, classed as a corrosive material, in a unlined 2$^{5}/_{16}$ gauge DOT Specification 37C80 steel drum of five gallon capacity. (Mode 1.)
10469–N	DOT–E 10469	ICI Américas, Inc., Wilmington, DE	49 CFR 173.271(a)(11), 173.3a	To authorize the use of DOT Specification 105S300W tank car tanks for the transportation of phosphorus trichloride. (Mode 2.)
10471–N	DOT–E 10471	Chevron Resources Company, Hobson, TX.	49 CFR 174.67(b)(3)(i)(j)	To authorize the use of DOT Specification tank car tanks loaded with sulfuric acid and sulfuric acid, spent, classed as corrosive materials to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10473–N	DOT–E 10473	Progressive Technologies, Inc., Omaha, NE.	49 CFR 173.12, 173.25, 173.3(c), 175.3, 178.16, 178.19, 49 CFR Part 173, Subpart D, E, F and H.	To authorize the manufacture, marking and sale of non-DOT specification polyethylene twin-walled 85 gallon capacity drum to be used as a salvage drum, lab pack container and sole use container for shipment of those hazardous materials authorized for shipment in DOT Specification 34 of 35 containers. (Modes 1, 2, 3, 4.)
10475–N	DOT–E 10475	General Cylinder/Div. of Manchester Tank & Equip., Dallas, TX.	49 CFR 178.50–15, 178.50–16, 178.51–15, 178.61–15, 178.61–16.	To authorize the rebuilding and repairing of DOT Specification 4B, 4BA and 4BW steel cylinders, in sizes from 1 pound to 420 pounds, to be used for transportation of flammable gases. (Mode 1.)
10476–N	DOT–E 10476	Syn-Tex B. A. G., Winnipeg, Manitoba, Canada.	49 CFR 172.331, 173.114a, 173.154, 173.164, 173.178, 173.182, 173.204, 173.217, 173.234, 173.245b, 173.365, 173.366, 173.367.	To authorize the manufacture, marking and sale of bulk containers of woven polypropylene with polyethylene liner for transportation of commodities classed as oxidizers and corrosive solids. (Modes 1, 2, 3.)
10477–N	DOT–E 10477	Minnesota Valley Engineering, Inc., New Prague, MN.	49 CFR 173.316, 175.3, 178.57	To authorize the manufacture, marking and sale of a insulated non-Dot specification cylinder conforming with the DOT Specification 4L except that the container is made of type 316L stainless steel. (Modes 1, 2, 3, 4.)
10478–N	DOT–E 10478	Davis Engineering Company, Fresno, CA.	49 CFR 173.119, 178.340–3(a)(1)	To authorize the use of a DOT Specification MC–306 cargo tank motor vehicle constructed of an alternative aluminum alloy for the shell and heads for the transport of an elevated temperature lading. (Mode 1.)
10480–N	DOT–E 10480	Air Products and Chemicals, Inc., Bethlehem, PA.	49 CFR 172.203, 173.318, 173.320, 176.30, 176.76(h), 178.338.	To authorize the use of a vacuum insulated, cold mass shielded, non-DOT specification portable tank for liquefied helium. (Modes 1, 3.)
10481–N	DOT–E 10481	M1 Engineering, Limited, Bradford, West Yorkshire, England.	49 CFR 172.203, 173.318, 173.320, 176.30, 176.76(h), 178.338.	To authorize the use of a vacuum insulated, non-DOT specification portable tanks in an ISO frame for the transportation of certain refrigerated liquids. (Modes 1, 2, 3.)
10483–N	DOT–E 10483	City of Plattsburgh, Plattsburgh, NY	49 CFR 174.67(i), 174.67(j), Part 107, Appendix B.	To authorize tank cars loaded with chlorine to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10486–N	DOT–E 10486	Aeropres Corporation, Shreveport, LA.	49 CFR 173.302, 173.304, 173.305, 173.315.	To authorize the transportation of mixtures of flammable and nonflammable compressed gases in DOT Specification MC 330 and MC 331 cargo tanks. (Mode 1.)
10488–N	DOT–E 10488	TEN–E Packaging Services, Inc., Eagan, MN.	49 CFR 173.119, 178.19, Part 173, Subpart F.	To authorize the manufacture, marking and selling of a non-DOT specification 5-gallon capacity removable head polyethylene drums, for shipment of certain corrosive and flammable liquids. (Mode 1.)
10492–N	DOT–E 10492	Detroit Water and Sewerage Department, Detroit, MI.	49 CFR 174.67(i), 174.67(j), Part 107, Appendix B.	To authorize tank cars loaded with chlorine to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10495–N	DOT–E 10495	First Corporate Air, Inc., Howell, MI	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize the carriage of certain Class A, B and C explosives by cargo-aircraft only. (Mode 4.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10502–N	DOT–E 10502	Thiokol Corporation, Huntsville, AL	49 CFR 172.101, 173.86(e)(2)(ii), 173.92(a), 173.92(b).	To authorize the shipment of rocket motors, high explosives (shaped charges, and detonating fuzes, in a cargo aircraft. (Mode 4.)
10504–N	DOT–E 10504	Solkatronic Chemicals, Inc., Morrisville, PA.	49 CFR 173.119, 173.302, 173.304, 173.328, 173.34, 173.346.	To authorize use of a non-DOT specification full opening head salvage cylinder of 33 gallon capacity for overpacking damaged or leaking packages of pressurized and non-pressurized hazardous materials. (Mode 1.)
10507–N	DOT–E 10507	PVS Technologies, Inc., Detroit, MI	49 CFR 174.67(i)	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without being attended by an unloader. (Mode 2.)
10512–N	DOT–E 10512	Albright & Wilson Americas, Richmond, VA.	49 CFR 173.263(a)(12)	To authorize the construction of tank cars fabricated of ASTM A240 type 316 Ti alloy steel without post weld heat treatment for shipment of 42% sodium chloride solution, classed as corrosive material. (Mode 2.)
10513–N	DOT–E 10513	Great Lakes Chemical Corporation, West Lafayette, IN.	49 CFR 173.154	To authorize shipment of flammable solids, organic peroxide solids, and oxidizers not specifically provided for in non-DOT specification bulk bags overpacked in either a fiberboard box or drum in less than truckload quantities in non-dedicated trailers. (Mode 1.)
10514–N	DOT–E 10514	Liquid Air, Walnut Creek, CA	49 CFR 174.67 (i), (j), Part 107, Appendix 3.	To authorize the use of DOT Specification 105A500W tank car tanks loaded with carbon dioxide, refrigerated liquid, to remain attached to transfer connections when the unloading process is discontinued. (Mode 2.)
10516–N	DOT–E 10516	S.A.F.E. Systems, Inc., Decatur, GA.	49 CFR 173.306(c)(3)	To authorize shipment of approximately 40,571 non-DOT specification cylinders (fire extinguishers), which exceed 35 cubic inches containing a liquified compressed gas (Bromotrifluoromethane). (Mode 1.)
10517–N	DOT–E 10517	Nalco Chemical Company, Naperville, IL.	49 CFR 173.32(e)(1)(ii)	To authorize the retesting of DOT-Specification 57 portable tanks fabricated of stainless steel at five-year intervals. (Modes 1, 2, 3.)
10519–N	DOT–E 10519	Canadian Liquid Air limited, Montreal, Quebec, Canada.	49 CFR 173.119, 173.154, 173.245, 173.246, 173.247, 173.251, 173.264, 173.273, 173.302, 173.304, 173.328, 173.34, 173.346.	To authorize use of a non-DOT specification full opening hinged head, steel salvage cylinder with a teflon lining of approximately 100 gallons (382 liters) capacity for overpacking damaged or leaking packages of pressurized and nonpressurized hazardous materials. (Mode 1.)
10529–N	DOT–E 10529	LND, Inc., Oceanside, NY	49 CFR 173.302, 175.3	To manufacture, mark and sell a non-DOT specification container described as a hermetically sealed electron tube device for shipment of argon, classed as nonflammable gas. (Modes 1, 4, 5.)
10534–N	DOT–E 10534	Olin Corporation, Winchester Division, East Alton, IL.	49 CFR 173.101(a)	To authorize bulk transportation of small arms ammunition of various gauges for disposal, classed as Class C explosives, in non-DOT specification "bath-tub type containers". (Mode 1.)
10535–N	DOT–E 10535	ICI Aerospace & Automotive Products, Byron, BA.	49 CFR 173.214(c)	To authorize transportation of zirconium metal, wet with ethyl alcohol, classed as flammable solid, in polyethylene containers overpacked in strong metal cans and wooden boxes. (Mode 1.)
10536–N	DOT–E 10536	U.S. Department of Energy, Washington, DC.	49 CFR 173.86	To ship various kinds of explosive substances and devices with an interim hazard classification to test facilities. (Modes 1, 2, 3.)
10537–N	DOT–E 10537	Quality Manufacturing of Eunice, Inc., Eunice, LA.	49 CFR 173.154, 173.164, 173.178, 173.182, 173.234, 173.245(b).	To authorize the manufacture, marking and sale of bulk bags having a capacity of approximately 2200 pounds, for shipment of flammable solids, oxidizers and corrosive materials. (Modes 1, 2.)
10539–N	DOT–E 10539	Monsanto Agricultural Company, St. Louis, MO.	49 CFR 173.32c(i)	To authorize a one-time shipment of an IM 101 portable tank which is only filled to approximately 25 percent capacity with chloroacetyl chloride, classed as a corrosive material. (Modes 1, 2, 3.)
10546–N	DOT–E 10546	GPS Industries, City of Industry, CA	49 CFR 176.67 (i) & (j)	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without the physical presence of an unloader. (Mode 2.)
10547–N	DOT–E 10547	Tri-Wall, Louisville, KY	49 CFR 173.154, 173.245(b), 173.365.	To authorize the manufacture, marking and sell of non-DOT specification non-reusable fiberboard bulk box of triple wall corrugated fiberboard construction and mounted to a wood pallet base for shipment of waste solids to hazardous waste landfill disposal sites. (Mode 1.)
10550–N	DOT–E 10550	Chem Lab Products, Inc., Ontario, CA.	49 CFR 176.67 (i) & (j)	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without the physical presence of an unloader. (Mode 2.)
10551–N	DOT–E 10551	Hasa, Inc., Saugus, CA	49 CFR 176.67 (i) & (j)	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without the physical presence of an unloader. (Mode 2.)
10552–N	DOT–E 10552	Hasa of Arizona, Inc., Eloy, AZ	49 CFR 176.67(i), 174.67(j), Part 107, Appendix B.	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without the physical presence of an unloader. (Mode 2.)
10553–N	DOT–E 10553	All Pure Chemical Company, Tracy, CA.	49 CFR 176.67 (i) & (j)	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without the physical presence of an unloader. (Mode 2.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10562–N	DOT–E 10562	U.S. Sack Corporation, Grand Junction, CO.	49 CFR 162.331, 173.154, 173.164, 173.178, 173.182, 173.204, 173.217, 173.234, 173.245b, 173.366.	To authorize manufacture, marking and sale of large, collapsible polyethylene-lined woven polypropylene bulk bags, having a capacity of approximately 2200 pounds each, and top and bottom outlets, for shipment of corroseive solid, flammable solids, oxidizers, and poisons. (Modes 1, 2, 3.)
8577–N	DOT–E 10563	PCR, Incorporated, Gainesville, FL		To authorize shipment of certain materials described as flammable liquid, corroeive, n.o.s. (corrosive to skin only) and corroseive liquids, n.o.s. in DOT-12B65, 12A65 and 12A80 fiberboard boxes with inside glass bottles having a capacity not to exceed one gallon. (Modes 1, 2, 3.)
10573–N	DOT–E 10573	DPC Industries, Inc., Houston, TX	49 CFR 174.67(i)(j)	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without the physical presence of an unloader. (Mode 2.)
10575–N	DOT–E 10575	Airco Industrial Gases, Murray Hill, NJ.	49 CFR 174.67 (i), (j), Part 107, Appendix B, Subpart B.	To authorize the use of tank cars loaded with carbon dioxide, refrigerated liquid, to be remotely monitored and attached to transfer connections during the unloading process. (Mode 2.)
10576–N	DOT–E 10576	Simpson Tacoma Kraft Company, Tacoma, WA.	49 CFR 174.67(i)(j)	To authorize chlorine filled tank cars to stand with unloading connections attached during unloading without the physical presence of an unloader. (Mode 2.)
10588–N	DOT–E 10588	General Electric Company, Wilmington, NC.	49 CFR 173.420	To authorize the shipment of limited quantities of radioactive and corroseive material in 12" ANSI cylinders without valve brazing. (Mode 1.)
10594–N	DOT–E 10594	U.S. Department of Energy, Washington, DC.	49 CFR Parts 172, 173	To authorize shipment of radioactive materials, n.o.s. (uranium mill tailings) under special conditions in non-DOT specification packages without labeling and placarding. (Modes 1, 2.)
10595–N	DOT–E 10595	Allied Universal Corporation, Miami, FL.	49 CFR 176.67 (i), (j), Part 107, Appendix B, Subpart B.	To authorize tank cars loaded with chlorine to be remotely monitored and attached to transfer connections during the unloading process. (Mode 2.)
10596–N	DOT–E 10596	Marathon Pipe Line Company, Houston, TX.	49 CFR 173.119	To authorize the use of three non-DOT specification trailer mounted containers described as mechanical displacement meter provers (serial numbers 130, 253, and 140–1657–2921), for shipment of a flammable liquid. (Mode 1.)
10597–N	DOT–E 10597	Westinghouse Electric Corporation, Pittsburgh, PA.	49 CFR 177.834(1)(2)(i)	To authorize the use of cargo heaters when transporting flammable liquids or flammable gases. (Mode 1.)
10599–N	DOT–E 10599	Roberts Meter Service Company, Longview, TX.	49 CFR 173.119, 173.304, 173.315	To authorize the use of a trailer mounted mechanical displacement meter prover for transportation of flammable liquids. (Mode 1.)
10607–N	DOT–E 10607	Emergency Technical Services Corporation, Schaumburg, IL.	49 CFR 173.302(a)	To authorize a one-time shipment for disposal of damaged, non-leaking detector tubes containing Boron Trifluoride in PVC salvage cylinder overpacks. (Mode 1.)
10608–N	DOT–E 10608	HCI Advance Chemical Distributors, Inc., Catoosa, OK.	49 CFR 176.67(i)(j)	To authorize chlorine filled tank cars to stand with connections attached during unloading without the physical presence of an unloader. (Mode 2.)
10609–N	DOT–E 10609	Steel Cylinder Manufacturing Ltd., Tilbury, Ontario, Canada.	49 CFR 178.37–4(a), 49 CFR Part 173(g)(h).	To authorize the manufacture, marking and sell of billet pierced DOT 3AA cylinders that are made from billets which are not inspected by an independent inspector after parting. (Modes 1, 2, 3, 4, 5.)
10610–N	DOT–E 10610	Hercros Chemicals, Inc., Kansas City, KS.	49 CFR 174.67(j)	To authorize chlorine filled tank cars to stand with unloading connectors attached without the physical presence of an unloader. (Mode 2.)
10618–N	DOT–E 10618	Hughes Aircraft Company, Los Angeles, CA.	49 CFR 172.101, 173.92	To authorize shipment of the communications satellites equipped with nonspillable batteries; a rocket motor, class B explosive together with other hazardous materials aboard a cargo aircraft. (Mode 4.)
10623–N	DOT–E 10623	U.S. Virgin Island Industrial Gases Inc., St. Thomas, VI.	49 CFR 172.203, 173.318, 173.32, 178.76(h), 178.338.	To authorize the use of vacuum-insulated, non-DOT specification portable tanks, for transportation of certain non-flammable cryogenic liquids (Modes 1, 3.)
10639–N	DOT–E 10639	Atlantic Electric, Pleasantville, NJ	49 CFR 179.200–17(a)(b)(iv)	To authorize the transportation of non-DOT specification tank car tanks which are in conformance with DOT Specification 111A60W–1 tank car tanks except for the bottom outlet arrangement. (Mode 2.)
10648–N	DOT–E 10648	Arrow Air, In., Miami, FL	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b).	To authorize the transportation of Class A, B, and C explosives which are forbidden for shipment by cargo air or exceed quantity limitations authorized by cargo air. (Modes 1, 2, 4.)
10656–N	DOT–E 10656	Conference of Radiation Control Program Dir., Inc., Frankfort, KY.	49 CFR 107, appendix B, 172.203(d), 49 CFR Part of Part 172, Paragraph (1), Subparts C, D, E, F, and G, to subpart B.	To authorize shipment of metals and scrap contaminated with small amounts of radioactive materials to be contained in non-DOT specification packaging, without regard to marking, labeling, placarding and certain shipping paper requirements. (Modes 1, 2.)
10665–N	DOT–E 10665	General American Transportation Corporation, Chicago, IL.	49 CFR 173.31	To authorize DOT-Specification 111A100W–1 tank cars used in general service which were converted to 111A100W–2 cars for use in corrosive service to enjoy to periodic retest cycles per 49 CFR section 173.21 table 1 footnote. (Mode 2.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10568–N	DOT–E 10568	Cascade Helicopters, Inc., Cashmere, WA.	49 CFR 173.119	To authorize shipment of gasoline, classed as a flammable liquid in non-DOT specification cargo tanks, comparable to DOT specification MC–306 cargo tanks. (Mode 1.)

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 3330–X	DOT–E 3330	Babcock and Wilcox Company, Lynchburg, VA.	49 CFR 173.214(b), 173.214(d)	To authorize use of non-DOT specification insulated containers overpacked in DOT Specification 17C, 17H, or 37A metal drums, for transportation of certain flammable solid materials. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Thermex Energy Corporation, Dallas, TX.	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Buckley Powder Company, Englewood, CO.	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Mine Equipment & Mill Supply Company, Dawson Springs, KY.	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Buckley Powder Company, Englewood, CO.	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Eldorado Chemical Company, St. Louisd, MO.	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Jorico Services, Inc., Indianola, IA	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Mine Equipment & Mill Supply Company, Dawson Spring, KY.	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 4453–X	DOT–E 4453	Gibson Explosive Products, Dulfield, VA.	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
EE 5206–X	DOT–E 5206	Geenen Explosives, Inc., Kaukauna, WI.	49 CFR 173.114a	To authorize privately operated bulk hopper-type units, for transportation of blasting agents. (Mode 1.)
EE 5206–X	DOT–E 5206	KESCO, Inc., Adrian, PA	49 CFR 173.114a	To authorize privately operated bulk hopper-type units, for transportation of blasting agents. (Mode 1.)
EE 6016–X	DOT–E 6016	Langdon Oxygen Company, Texarkana, TX.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks. (Mode 1.)
EE 6016–X	DOT–E 6016	Langdon Oxygen Company, Texarkana, TX.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks. (Mode 1.)
EE 6016–X	DOT–E 6016	Weiler Welding Company, Incorporated, Dayton, OH.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks. (Mode 1.)
EE 6016–X	DOT–E 6016	Weiler Welding Company, Inc.,	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks. (Mode 1.)
EE 6267–X	DOT–E 6267	Berry Plastics, Inc., Evansville, IN	49 CFR 173.154, 173.217(a)	To authorize use of DOT Specification 12B corrugated fiberboard boxes with inside polyethylene bottles and non-DOT specification double-faced fiberboard boxes, for transportation of certain oxidizing materials. (Modes 1, 2, 3.)
EE 6614–X	DOT–E 6614	Abcana Chemical Company, El Cajon, CA.	49 CFR 173.263(a)(28), 173.277(a)(6).	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corroeive liquids. (Mode 1.)
EE 6614–X	DOT–E 6614	Contiental Chemical Company, Sacramento, CA.	49 CFR 173.263(a)(28), 173.277(a)(6).	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corroeive liquids. (Mode 1.)
EE 6614–X	DOT–E 6614	Abcana Industries, El Cajon, CA	49 CFR 173.263(a)(28), 173.277(a)(6).	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corroeive liquids. (Mode 1.)
EE 6614–X	DOT–E 6614	ABCANA Industries	49 CFR 173.263(a)(28) 173.277(a)(6).	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corroeive liquids. (Mode 1.)
EE 6614–X	DOT–E 6614	Bison Laboratories, Inc., Buffalo, NY.	49 CFR 173.263(a)(28) 173.277(a)(6).	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corroeive liquids. (Mode 1.)
EE 6614–X	DOT–E 6614	Abcana Industries, El Cajon, CA	49 CFR 173.263(a)(28) 173.277(a)(6).	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corroeive liquids. (Mode 1.)
EE 6614–X	DOT–E 6614	Bison Laboratories, Inc., Buffalo, NY.	49 CFR 173.263(a)(28) 173.277(a)(6).	Authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corroeive liquids. (Mode 1.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 6670-X	DOT-E 6670	Airco Electronic Gases, Riverton, NJ.	49 CFR 173.301(d), 173.302	To authorize shipment of tetrafluoromethane, in DOT Specification 3A2400, 3AA2400, 3AX2400 and 3AAX2400 cylinders. (Mode 1.)
EE 6752-P	DOT-E 6752	Ausimont, USA, Inc., Morristown, NJ.	49 CFR 173.301(d)(3) 173.304(a)(2).	To become a party to exemption 6752. (Modes 1, 2, 3.)
EE 6805-P	DOT-E 6805	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.301(d), 173.302(a)(3)	To become a party to exemption 6805. (Mode 1.)
EE 6874-X	DOT-E 6874	Mitsui & Company (USA), New York, NY.	49 CFR 172.101, 173.370(a)(13)	To authorize transport of sodium and potassium cyanides in non-DOT specification wooden boxes. (Modes 1, 2, 3.)
EE 6874-X	DOT-E 6874	Mining Services International Corporation, (MSI) Salt Lake City, UT.	49 CFR 172.101, 173.370(a)(13)	To authorize transport of sodium and potassium cyanides in non-DOT specification wooden boxes. (Modes 1, 2, 3.)
EE 6874-X	DOT-E 6874	Harcros, Inc., Kansas City, KS	49 CFR 172.101, 173.370(a)(13)	To authorize transport of sodium and potassium cyanides in non-DOT specification wooden boxes. (Modes 1, 2, 3.)
EE 6874-X	DOT-E 6874	Goldstone Supply Corp., Sparks, NV.	49 CFR 172.101, 173.370(a)(13)	To authorize transport of sodium and potassium cyanides in non-DOT specification wooden boxes. (Modes 1, 2, 3.)
EE 6874-X	DOT-E 6874	Harcros, Inc., Kansas City, KS	49 CFR 172.101, 173.370(a)(13)	To authorize transport of sodium and potassium cyanides in non-DOT specification wooden boxes. (Modes 1, 2, 3.)
EE 6874-P	DOT-E 6874	Synergistic Performance Corporation, Emeryville, CA.	49 CFR 172.101, 173.370(a)(13)	To become a party to exemption 6874. (Modes 1, 2, 3.)
EE 6971-X	DOT-E 6971	Alltech Associates, Inc., Deerfield, IL.	49 CFR Parts 100–199	To authorize transport of small quantities of reagent chemicals in inside glass bottles packed in metal boxes, overpacked in a strong wooden or fiberboard box. (Modes 1, 2, 3, 4.)
EE 6971-X	DOT-E 6971	Alltech Associates, Deerfield, IL	49 CFR Parts 100–199	To authorize transport of small quantities of reagent chemicals in inside glass bottles packed in metal boxes, overpacked in a strong wooden or fiberboard box. (Modes 1, 2, 3, 4.)
EE 6971-X	DOT-E 6971	Alltech Associates, Deerfield, IL	49 CFR Parts 100–199	To authorize transport of small quantities of reagent chemicals in inside glass bottles packed in metal boxes, overpacked in a strong wooden or fiberboard box. (Modes 1, 2, 3, 4.)
EE 7051-X	DOT-E 7051	Advanced Research Chemicals, Inc., Catoosa, OK.	49 CFR 173.246(a), 175.3	To authorize use of non-DOT specification Teflon bottles overpacked with either a DOT Specification 12A or 12B fiberboard box to transport a corrosive liquid. (Modes 1, 4.)
EE 7052-X	DOT-E 7052	American Meter Company, Philadelphia, PA.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Tauber Electronics, Inc., San Diego, CA.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Wildlife Materials, Inc., Carbondale, IL.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Smith Industries, formerly Lear Siegler, Inc., Grand Rapids, MI.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Computer Components Corporation, Dallas, TX.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Fairchild Defense, Germantown, MD.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Tauber Electronics, Inc., San Diego, CA.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Honeywell, Inc.—Defense Avionics Systems Div., Albuquerque, NM.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Wildlife Materials, Inc., Carbondale, IL.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Fairchild Defense, Germantown, MD.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-X	DOT-E 7052	Smith Industries, (formerly Lear Siegler), Grand Rapids, MI.	49 CFR 172.101, 172.400, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 2, 3, 4.)
EE 7052-P	DOT-E 7052	Advanced Telemetry Systems, Inc., Isanti, MI.	49 CFR 172.101, 172.400, 175.3	To become a party to exemption 7052. (Modes 1, 2, 3, 4.)
EE 7052-P	DOT-E 7052	Household Data Service (HDS), Reston, VA.	49 CFR 172.101, 172.400, 175.3	To become a party to exemption 7052. (Modes 1, 2, 3, 4.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 7476-X	DOT-E 7476	Thompson Tank and Manufacturing Company, Long Beach, CA.	49 CFR 173.119(a), 173.119(m), 173.245(a), 173.346(a), 178.340–7, 178.340–8(c), 178.342–5, 178.343–5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC–307 or MC–312 with certain exceptions, for transportation of flammable, corrosive and poisonous waste materials. (Mode 1.)
EE 7616-X	DOT-E 7616	Kansas City Southern Railway Company & Subsidiarie, Kansas City, MO.	49 CFR 172.200(a), 172.204(a), 172.204(d), 174.12, 174.24(a), 174.25(b)(2), 174.3.	To authorize carrier to certify the shipping papers on behalf of the shipper when transporting certain hazardous materials by rail. (Mode 2.)
EE 7735-X	DOT-E 7735	Northern American Packaging Corporation, Danbury, CT.	49 CFR 173.119, 173.264(a), 173.272(g), 173.346, 173.358, 173.359.	To authorize manufacture, marking and sale of DOT Specification 34 containers, for shipment of flammable liquids and corrosive materials. (Modes 1, 2, 3.)
EE 7774-X	DOT-E 7774	Pipe Recovery Systems, Incorporated, Houston, TX.	49 CFR 173.246, 175.3	To authorize shipment of bromine trifluoride in non-DOT specification cylinders. (Modes 1, 2, 4.)
EE 7808-X	DOT-E 7808	Waterbury Companies, Inc., Waterbury, CT.	49 CFR 173.304, 175.3, 178.33a	To authorize shipment of insecticides and liquefied gas mixtures, in inside nonrefillable aluminum containers comparable to DOT Specification 2D cylinders equipped with integral pressure relief system. (Modes 1, 2, 3, 4.)
EE 7834-X	DOT-E 7834	Magnaflux Corporation, Chicago, IL	49 CFR 173.306(b)(4), 175.3	To authorize transport of nonliquefied sulfur hexafluoride in certain X-ray machines, overpacked in strong wooden or fiberboard boxes. (Modes 1, 2, 3, 4, 5.)
EE 7834-X	DOT-E 7834	Magnaflux Corporation, Chicago, IL	49 CFR 173.306(b)(4), 175.3	To authorize transport of nonliquefied sulfur hexafluoride in certain X-ray machines, overpacked in strong wooden or fiberboard boxes. (Modes 1, 2, 3, 4, 5.)
EE 7834-X	DOT-E 7834	Magnaflux, Chicago, IL	49 CFR 173.306(b)(4), 175.3	To authorize transport of nonliquefied sulfur hexafluoride in certain X-ray machines, overpacked in strong wooden or fiberboard boxes. (Modes 1, 2, 3, 4, 5.)
EE 7887-X	DOT-E 7887	Vulcan Systems, Inc., Colorado Springs, CO.	49 CFR 172.101, 173.111, 175.3, Part 107, Appendix B.	Authorizes the shipment of packages of toy propellant devices as an ORM–D material and excepted from labeling requirements. (Modes 1, 2, 3, 4, 5.)
EE 8006-X	DOT-E 8006	Strombecker Corporation, Chicago, IL.	49 CFR 172.400(a), 172.504 Table 2.	To authorize transport of unlabeled packages of toy paper or plastic caps complying with the requirements of 173.100(p) and 173.109, in motor vehicles with placards, when the gross weight of the caps is 1000 pounds or more. (Mode 1.)
EE 8127-X	DOT-E 8127	Societe Nationale des Poudres et Explosifs, (SNPE) Bergerac, France.	49 CFR 171.12(d), 173.127, 173.184, 178.224.	To authorize use of a non-DOT specification fiberboard drum, for shipment of wet nitrocellulose. (Modes 1, 2, 3.)
EE 8151-X	DOT-E 8151	Ropak West, Inc., La Mirada, CA	49 CFR 178.19, Part 173, Subparts D, and F.	To authorize shipment of liquid hazardous materials, in non-DOT specification removable head polyethylene drums. (Modes 1, 2, 3.)
EE 8214-P	DOT-E 8214	Ford Motor Company, Dearborn, MI.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To become a party to exemption 8214. (Modes 1, 2, 3, 4.)
EE 8214-X	DOT-E 8214	Toyota Motor Sales, Inc., Torrance, CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (Modes 1, 2, 3, 4.)
EE 8214-X	DOT-E 8214	Toyota Motor Sales, U.S.A., Inc., Torrance, CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (Modes 1, 2, 3, 4.)
EE 8214-X	DOT-E 8214	Mazada Motor of America, Inc., Irvine, CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (Modes 1, 2, 3, 4.)
EE 8214-X	DOT-E 8214	Mitsubishi Motor Sales of America, Inc., Cypress, CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (Modes 1, 2, 3, 4.)
EE 8214-X	DOT-E 8214	Mazda Motor of America, Inc., Irvine CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (Modes 1, 2, 3, 4.)
EE 8236-P	DOT-E 8236	Ford Motor Company, Dearborn, MI.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To become a party to exemption 8236. (Modes 1, 2, 3, 4.)
EE 8236-X	DOT-E 8236	Mazda Motor of America, Inc., Irvine CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of a passive restraint system, and the inflator therefore, containing a class B explosive as a flammable solid.
EE 8236-X	DOT-E 8236	Mazda Motor of America, Inc., Irvine CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To authorize transport of a passive restraint system, and the inflator therefore, containing a class B explosive as a flammable solid. (Modes 1, 2, 3, 4.)
EE 8273-P	DOT-E 8273	Mazda Motor of America, Inc., Irvine, CA.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To become a party to exemption 8273. (Modes 1, 2, 3, 4.)
EE 8273-P	DOT-E 8273	Mazda (North America), Inc., Flat Rock, MI.	49 CFR 171.11 (see paragraph 8.d.), 173.153, 173.154, 175.3.	To become a party to exemption 8273. (Modes 1, 2, 3, 4.)
EE 8390-X	DOT-E 8390	Texas Instruments, Inc., Dallas, TX	49 CFR 173.272, 178.210, 173.24a	Authorizes the shipment of 95 percent—98 percent sulfuric acid in DOT Specification 2E polyethylene bottles overpacked in DOT Specification 12A80 fiberboard boxes. (Mode 1.)
EE 8426-X	DOT-E 8426	Ancon Environmental Services, Wilmington, CA.	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340–7, 178.342–5, 178.343–5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC–307/312 with certain exceptions, for transportation of liquid and semi-solid waste materials. (Mode 1.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof

To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC-307/312 with certain exceptions, for transportation of liquid and semi-solid waste materials. (Mode 1.)
EE 8451-P	DOT-E 8451	Day & Zimmerman, Inc., Long Star Division, Texarkana, TX.	49 CFR 173.65, 173.86(e), 175.3	To become a party to exemption 8451. (Modes 1, 2, 4.)
EE 8451-X	DOT-E 8451	Morton International, Odgen, UT	49 CFR 173.65, 173.86(e), 175.3	To authorize transport of not more than 25 grams of high explosives and pyrotechnic material in a specified shipping container, classed as Class C explosive. (Modes 1, 2, 4.)
EE 8453-X	DOT-E 8453	El Dorado Chemical Company, St. Louis, MO.	49 CFR 173.114a	To authorize use of non-DOT specification cargo tanks and DOT Specification MC-308, MC-306, MC-307, or MC-312 stainless steel cargo tanks, to transport blasting agent. (Modes 1, 3.)
EE 8518-X	DOT-E 8518	Universal Engineering, Inc., Benicia, CA.	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize use of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC-307 or MC-312 except for bottom outlet valve variations, for transportation of flammable liquids or corrosive or poison B materials. (Mode 1.)
EE 8518-X	DOT-E 8518	GSX Services of California, Inc., Martinez, CA.	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize use of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC-307 or MC-312 except for bottom outlet valve variations, for transportation of flammable liquids or corrosive or poison B materials. (Mode 1.)
EE 8518-X	DOT-E 8518	Gallighen, Inc., Ventura, CA	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize use of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC-307 or MC-312 except for bottom outlet valve variations, for transportation of flammable liquids or corrosive or poison B materials. (Mode 1.)
EE 8518-X	DOT-E 8518	Speed's Oil Tool Service, Inc., Santa Maria, CA.	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize use of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC-307 or MC-312 except for bottom outlet valve variations, for transportation of flammable liquids or corrosive or poison B materials. (Mode 1.)
EE 8519-X	DOT-E 8519	Polish Ocean Lines, Gdynia, Poland.	49 CFR 176.905(L)	To authorize stowage of motor vehicles with their fuel tanks containing gasoline, classed as a flammable liquid, in the same cargo compartment with other hazardous materials on specially equipped roll-on/roll-off cargo vessels. (Mode 1.)
EE 8554-X	DOT-E 8554	Amos L. Dolby Company, Corsica, PA.	49 CFR 173.114a, 173.154, 173.93	To authorize transport of propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (Modes 1, 3.)
EE 8554-X	DOT-E 8554	Ramec Explosives of Pennsylvania, Incorporation Allentown, PA.	49 CFR 173.114a, 173.154, 173.93	To authorize transport of propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (Modes 1, 3.)
EE 8554-P	DOT-E 8554	Mt. State Bit Service, Inc., Morgantown, WV.	49 CFR 173.114a, 173.154, 173.93	To become a party to exemption 8554. (Modes 1, 3.)
EE 8554-X	DOT-E 8554	Geenen Explosives, Inc., Kaukauna, WI.	49 CFR 173.114a, 173.154, 173.93	To authorize transport of propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (Modes 1, 3.)
EE 8554-X	DOT-E 8554	Olson Explosives, Inc., Deborah, IA	49 CFR 173.114a, 173.154, 173.93	To authorize shipment of batteries containing lithium and other materials, classed as flammable solid. (Modes 1, 3.)
EE 8554-P	DOT-E 8554	Woodard Explosives, Inc., Albuquerque, NM.	49 CFR 173.114a, 173.154, 173.93	To become a party of exemption 8554. (Modes 1, 3.)
EE 8554-X	DOT-E 8554	Olson Explosives, Inc., Decorah, IA	49 CFR 173.114a, 173.154, 173.93	To authorize transport of propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (Modes 1, 3.)
EE 8554-X	DOT-E 8554	Geenen Explosives, Inc., Kaukauna, WI.	49 CFR 173.114a, 173.154, 173.93	To authorize transport of propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (Modes 1, 3.)
EE 8554-X	DOT-E 8554	Olson Explosives, Inc., Decorah, IA	49 CFR 173.114a, 173.154, 173.93	Authorizes the transport of propellant explosives and blasting agents, in DOT Specification MC-306, MC-307, and MC-312 cargo tanks. (Modes 1, 3).
EE 8582-X	DOT-E 8582	Kansas City Southern Railway Company, Kansas City, MO.	49 CFR Parts 100-177	To authorizes transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment (Mode 1).
EE 8582-X	DOT-E 8582	The Iowa Northern Railway Company, Greene, IA.	49 CFR Parts 100-177	To authorizes transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1).
EE 8582-P	DOT-E 8582	Teleco, Peoria, & Western Railway Corproation East, Peoria, IL.	49 CFR Parts 100-177	To become a party to exemption 8582 (Mode 1).
EE 8582-X	DOT-E 8582	Iowa Interstate Railroad, Iowa City, IA.	49 CFR Parts 100-177	To authorizes transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1).

EE 9387-X	DOT-E 9387	HCB States Corporation, Indianapolis, IN.	49 CFR 173.334	To authorize transport of certain mixtures of 2,2-Dichlorovinyl Dimethyl Phosphate (DDVP) and compressed gas in packagings which are not authorized for those mixtures. (Mode 1.)
EE 9388-X	DOT-E 9388	Gulf Central Storage & Terminal Company, Tulsa, OK.	49 CFR 173.314(e)	To authorize use of DOT specification tank cars which have had the amount of liquefied gas loaded into the tank measured by a metering device. (Mode 2.)
EE 9388-X	DOT-E 9388	Cominco American, Incorporated, Spokane, WA.	49 CFR 173.314(e)	To authorize use of DOT specification tank cars which have had the amount of liquefied gas loaded into the tank measured by a metering device. (Mode 2.)
EE 9388-X	DOT-E 9388	Cominco American, Incorporated, Spokane, WA.	49 CFR 173.314(e)	To authorize use of DOT specification tank cars which have had the amount of liquefied gas loaded into the tank measured by a metering device. (Mode 2.)
EE 9480-X	DOT-E 9480	Airco the Boc Group, Inc., Murray Hill, NJ.	49 CFR 173.302(a)(5)	To authorize transport of tetrafluoromethane and mixture thereof IN DOT Specification 3AL cylinders. (Modes 1, 2, 3, 4.)
EE 9610-P	DOT-E 9610	Alliant Techsystems, Inc., Hopkins, MN.	49 CFR 172.203(a), (e), 172.204, 173.29(a), (d), Part 107, Appendix B, Parts 171–188.	To become a party to exemption 9610. (Modes 1, 2.)
EE 9617-X	DOT-E 9617	Buckley Powder Company, Englewood, CO.	49 CFR 177.848(f), Part 107, Appendix B(f).	To authorize transport of a specially defined detonating cord on the same motor vehicle with Class A and C detonators. (Modes 1, 3.)
EE 9617-X	DOT-E 9617	Buckley Powder Company, Englewood, CO.	49 CFR 177.848(f), Part 107, Appendix B(f).	To authorize transport of a specially defined detonating cord on the same motor vehicle with Class A and C detonators. (Modes 1, 3.)
EE 9623-X	DOT-E 9623	Buckley Powder Company, Englewood, CO.	49 CFR 177.835(c)(3)	To authorize transport of a blasting agent or an oxidizer in a DOT Specification MC–306 or MC–307 cargo tank with a storage box containing Class A explosives mounted directly behind the tractor cab. (Mode 1.)
EE 9706-X	DOT-E 9706	Taylor-Wharton Cylinders, Harrisburg, PA.	49 CFR 173.301(h), 173.302, 173.304, 173.34(a)(1), 175.3, 178.37.	To authorize manufacture, marking and sale of non-DOT specification cylinder complying in part with the DOT–3AA specification, for transportation of certain flammable gases, nonflammable gases and poison A materials. (Modes 1, 2, 3, 4.)
EE 9711-X	DOT-E 9711	Konica Business Machines U.S.A., Inc., Windsor, CT.	49 CFR 173.245(a)(12), 175.3	To authorize shipment of a corrosive liquid in a nylon-reinforced polyethylene bag of 5-liter (1.22 gallon) capacity which is placed in an inside corrugated fiberboard carton with not more than two cartons overpacked in a DOT Specification 12B30 corrugated fiberbroad box. (Modes 1, 2, 4.)
EE 9716-X	DOT-E 9716	Corodyne II, Incorporated, West Liberty, OH.	49 CFR 173.302(a)(1), 173.304(a), (d), 175.3.	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic full composite cylinder, for shipment of certain flammable and nonflammable compressed gases. (Modes 1, 2, 3, 4, 5.)
EE 9723-X	DOT-E 9723	Triumvirate, Inc., Boston, MA	49 CFR 177.848(b)	To authorize shipment of "lab-packs" containing cyanides and cyanide mixtures with "lab-packs" containing acids and corrosive liquids in the same transport vehicle. (Mode 1.)
EE 9723-X	DOT-E 9723	Triumvirate Environmental, Inc., Boston, MA.	49 CFR 177.848(b)	To authorize shipment of "lab-packs" containing cyanides and cyanide mixtures with "lab-packs" containing acids and corrosive liquids in the same transport vehicle. (Mode 1.)
EE 9723-X	DOT-E 9723	Triumvirate Environmental, Inc., Boston, MA.	49 CFR 177.848(b)	To authorize shipment of "lab-packs" containing cyanides and cyanide mixtures with "lab-packs" containing acids and corrosive liquids in the same transport vehicle. (Mode 1.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 9723-X	DOT-E 9723	Triumvirate Environmental, Inc., Boston, MA.	49 CFR 177.848(b)	Authorizes the shipment of "lab-packs" containing cyanides and cyanide mixtures with "lab-packs" containing acids and corrosive liquids in the same transport vehicle. (Mode 1.)
EE 9747-X	DOT-E 9747	Aerosol Services Company, Inc., City of Industry, CA.	49 CFR 173.304(d)(3), 173.306, 175.3, 178.33–2, 178.33–7.	Authorizes use of a non-DOT specification packaging, comparable to a DOT–2P except for size and thickness, for shipment of materials authorized in a DOT–2P. (Modes 1, 2, 3, 4.)
EE 9750-X	DOT-E 9750	LaRoche Industries Inc., Atlanta, GA.	49 CFR 173.154(a)(18)	To authorize transport of ammonium nitate solution containing not less than 13% water in DOT specification MC–307 insulated cargo tank or a DOT Specification MC–311 insulated cargo tank. (Mode 1.)
EE 9771-X	DOT-E 9771	Alliant Techsystems Incorporated, New Brighton, MN.	49 CFR 172.101, 173.88	To authorize shipment of unclassed waste explosive scrap, for disposal, packaged in specially designed containers. (Mode 1.)
EE 9771-X	DOT-E 9771	Alliant Techsystems Incorporated, New Brighton, MN.	49 CFR 172.101, 173.88	To authorize shipment of unclassed waste explosive scrap, for disposal, packaged in specially designed containers. (Mode 1.)
EE 9775-X	DOT-E 9775	Rotocast Plastic Products, Inc., Miami, FL.	49 CFR 173.3(c)	To authorize manufacture, marking and sale of a polyethylene, removable head salvage drum of 85-gallon for overpacking of damaged or leaking packages of hazardous materials of no greater than 55-gallon, or for packing hazardous materials that have spilled or leaked, for repackaging or disposal. (Modes 1, 2.)
EE 9841-X	DOT-E 9841	Liquid and Gas Transport BV, Rotterdam-Botlek, Holland.	49 CFR 173.315, 178.245–1(b)	To authorize shipment of flammable gases, non-flammable gases and flammable liquid in a non-DOT specification IMO Type 5 portable tank. (Mode 1, 2, 3.)
EE 9841-P	DOT-E 9841	Stolt Tank Container, Inc., Monrovia, Liberia.	49 CFR 173.315, 178.245–1(b)	To become a party to exemption 9841. (Modes 1, 2, 3.)
EE 9851-X	DOT-E 9851	Trans States Airlines, St. Louis, MO.	49 CFR Parts 100–199	Authorizes a one-time shipment of insulated dewars containing liquid nitrogen to be transported in the cabin of a passenger-carrying aircraft under special conditions. (Mode 5.)
EE 9886-X	DOT-E 9886	Clayton Mark Inc., Rogers, AR	49 CFR 173.306, Part 172, Subpart D, E.	To authorize manufacture, marking and sale of non-DOT specification steel water pump system tank with an outside diameter not exceeding 26 inches and a precharge of compressed air or nitrogen not exceeding 42 psig. (Modes 1, 2, 3.)
EE 9886-X	DOT-E 9886	Clayton Mark Inc., Rogers, AR	49 CFR 173.306, Part 172, Subpart D, E.	To authorize manufacture, marking and sale of non-DOT specification steel water pump system tank with an outside diameter not exceeding 26 inches and a precharge of compressed air or nitrogen not exceeding 42 psig. (Modes 1, 2, 3.)
EE 9902-X	DOT-E 9902	Purusar Corp., Sunnyvale, CA	49 CFR 173.273	To authorize use of a DOT Specification 3AA cylinder having a capacity greater than one (1) gallon for the transportation of sulfur trioxide, unstabilized. (Mode 1.)
EE 9916-X	DOT-E 9916	Petrolite Corporation, St. Louis, MO.	49 CFR 173.124(a)(6)(i), (ii), (vii)	To authorize shipment of ethylene oxide in 4,760 gallon DOT Specification 51 portable tanks with safety relief valves set at 145 psig and a vacuum/perlite insulation system. (Modes 1, 2, 3.)
EE 9926-X	DOT-E 9926	Implementos Agricolas LaLa, N.A., Durango, Mexico.	49 CFR 173.302(a)(1), 173.304(a)(1), 173.304(a)(2), 175.3, 178.65–2, 178.65–5.	To authorize manufacture, marking and sale of nonrefillable, non-DOT specification cylinders designed and manufactured in accordance with DOT–39 specification, except for material of construction. (Modes 1, 2, 3, 4, 5.)
EE 9926-X	DOT-E 9926	Implementos Agricolas LaLa, S.A., Cursoco, Mexico.	49 CFR 173.302(a)(1), 173.304(a)(1), 173.304(a)(2), 175.3, 178.65–2, 178.65–5.	To authorize manufacture, marking and sale of nonrefillable, non-DOT specification cylinders designed and manufactured in accordance with DOT–39 specification, except for material of construction. (Modes 1, 2, 3, 4, 5.)
EE 9941-X	DOT-E 9941	McDonnell Douglas, Huntington Beach, CA.	49 CFR 173.88(e)(2)(ii), 173.92(a)(i), 173.92(b).	To authorize transport of rocket motors in a propulsive state with igniters installed. (Mode 1.)
EE 9941-X	DOT-E 9941	Thiokol Corporation, Huntsville Division, Huntsville, AL.	49 CFR 173.88(e)(2)(ii), 173.92(a)(i), 173.92(b).	To authorize transport of rocket motors in a propulsive state with igniters installed. (Mode 1.)
EE 9941-P	DOT-E 9941	Orbital Science Corporation, Chandler, AZ.	49 CFR 173.88(e)(2)(ii), 173.92(a)(i), 173.92(b).	To become a party to exemption 9941. (Mode 1.)
EE 9969-X	DOT-E 9969	G.C. Industries, Inc., Chatsworth, CA.	49 CFR 173.119, 173.121, 173.123, 173.124, 173.141, 173.145, 173.251, 173.252, 173.255, 173.264, 173.276, 173.302, 173.304, 173.326, 173.333, 173.336, 173.337, 173.352.	To authorize transport of small amounts of liquids and gases in diffusion tubes overpacked in a capped pipe nipples. (Modes 1, 4.)
EE 9969-X	DOT-E 9969	G.C. Industries, Inc., Chatsworth, CA.	49 CFR 173.119, 173.121, 173.123, 173.124, 173.141, 173.145, 173.251, 173.252, 173.255, 173.264, 173.276, 173.302, 173.304, 173.326, 173.333, 173.336, 173.337, 173.352.	To authorize transport of small amounts of liquids and gases in diffusion tubes overpacked in a capped pipe nipples. (Modes 1, 4.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 9969-X	DOT-E 9969	G.C. Industries, Inc., Fremont, CA	49 CFR 173.119, 173.121, 173.123, 173.124, 173.141, 173.145, 173.251, 173.252, 173.255, 173.264, 173.276, 173.302, 173.304, 173.328, 173.333, 173.336, 173.337, 173.352.	Authorizes transport of small amounts of liquids and gases in diffusion tubes overpacked in capped pipe nipples. (Modes 1, 4.)
EE 9990-P	DOT-E 9990	Alliant Techsystems, Inc., Hopkins, MN.	49 CFR 173.113	To become a party to exemption 9990 (Mode 1.)
EE 10103-X	DOT-E 10103	DuLaur Products, Inc., Vassar, MI	49 CFR Parts 100–177	To authorize shipment of a sodium azide-based air bag module, classed as an explosive Power Device Class C, packaged in a foam molded polyethylene copolymers on a high density polyethylene pallet contained by stretch wrapping as an unregulated item. (Mode 1.)
EE 10103-X	DOT-E 10103	N.N/B.-ORION, Inc., Rochester Hills, MI.	49 CFR Parts 100–177	To authorize shipment of a sodium azide-based air bag module, classed as an explosive Power Device Class C, packaged in a foam molded polyethylene copolymers on a high density polyethylene pallet contained by stretch wrapping as an unregulated item. (Mode 1.)
EE 10180-X	DOT-E 10180	Convenience Marine Products, Inc., Grand Rapids, MI.	49 CFR 173.304(a)(2), 173.34(d)	To manufacture, mark and sell cylinders similar to DOT Specification 39 without a relief device to be used as a fire extinguisher charged with a nonflammable liquefied compressed gas. (Modes 1, 3, 4.)
EE 10180-P	DOT-E 10180	Convenience Marine Products, Inc., Grand Rapids, MI.	49 CFR 173.304(a)(2), 173.34(d)	To become a party to exemption 10180 (Modes 1, 3, 4.)
EE 10301-X	DOT-E 10301	Fred Hutchinson Cancer Research Center, Seattle, WA.	49 CFR Parts 100 through 199	To authorize shipment of liquid nitrogen contained in an insulated plastic container to be transported in the cabin of a passenger-carrying aircraft under special conditions, except from party of 49 CFR. (Mode 5.)
EE 10318-X	DOT-E 10318	Sonoco Fibre Drum, Inc., Lombard, IL.	49 CFR 173.119, 173.125, 173.266, Part 173, Subpart F.	To authorize manufacture, marking and sale of nonreusable non-DOT specification blow molded, polyethylene portable tank enclosed in a steel frame, for shipment of corroeive materials, flammable liquids, or an oxidizer. (Modes 1, 2.)
EE 10354-X	DOT-E 10354	BASF Corporation, Parsippany, NJ	49 CFR 179.200–18(b)	To authorize shipment of hydrochloric acid in DOT Specification 111A100W5 tank car tanks equipped with an orifice plate in line with the safety relief device. (Mode 2.)
EE 10354-X	DOT-E 10354	BASF Corporation, Parsippany, NJ	49 CFR 179.200–18(b)	To authorize shipment of hydrochloric acid in DOT Specification 111A100W5 tank car tanks equipped with an orifice plate in line with the safety relief device. (Mode 2.)
EE 10369-N	DOT-E 10369	BAdco Chemical Company, Newark, NJ.	49 CFR 173.24(a)(2), 173.510(a)(5)	To authorize a one-time shipment of hazardous substance, solid, n.o.s. in a DOT Specification 111A100W1 tank car tank with a defective tank shell. (Mode 2.)
EE 10375-N	DOT-E 10375	Soltam, Ltd., Haifi, Israel	49 CFR 172.101 TABLE COLUMN 6(b), 175.30.	To authorize transport of ammunition for cannon with explosive projectile and ammunition for cannon with invert projectile aboard cargo aircraft. (Mode 4.)
EE 10376-N	DOT-E 10376	Minnesota Commercial Railway Company, Chicago, IL.	49 CFR 174.67(j)	To authorize DOT Specification 105A500W tank car tanks loaded with carbon dioxide, refrigerated liquid, to remain standing with unloading connections attached. (Mode 2.)
EE 10376-X	DOT-E 10376	Minnesota Commercial Railway Company, Chicago, IL.	49 CFR 174.67(j)	To authorize DOT Specification 105A500W tank car tanks loaded with carbon dioxide, refrigerated liquid, to remain standing with unloading connections attached. (Mode 2.)
EE 10377-N	DOT-E 10377	LCP Chemicals, Lockport, NY	49 CFR 173.29(c)(2), 179.102–2	To authorize transport of a DOT Specification 105A500W tank car tank with a defective safety relief valve for the transportation of chlorine residue. (Mode 2.)
EE 10378-N	DOT-E 10378	Erman Corporation, Inc., Kansas City, KS.	49 CFR 172.203(c), Part 107, Appendix B to Subpart B, Part 172, Subparts D, E, F.	To authorize the one-time-only transport of a shipment of radioactive contaminated scrap steel contained in a gondola type railcar without regard to specification packaging, marking, labeling, placarding and certain shipping paper. (Mode 2.)
EE 10379-N	DOT-E 10379	Occidental Chemical Corporation, Pasadena, TX.	49 CFR 179.102–2, Part 172, Subparts D, E, F173.31(b).	To authorize transportation of a DOT Specification 105A500W tank car with a defective safety relief valve, equipped with a chlorine "C" kit for the transportation of chlonne. (Mode 2.)
EE 10397-N	DOT-E 10397	Occidental Chemical, Corporation	49 CFR 173.31a, 179.14	To authorize a one-time shipment of vinyl chloride in a DOT Specification 105J300W tank car tank with the double shelf coupler and draft gear on the "A" end, completely detached from the car. (Mode 2.)
EE 10398-N	DOT-E 10398	Allied Signal, Incorporated, Morristown, NJ.	49 CFR 173.29(c)(2), 179.100–15	To authorize transport of a DOT Specification 112S400W tank car tank with a defective safety relief valve for the transportation of a residue of hydrogen fluoride. (Mode 2.)
EE 10399-N	DOT-E 10399	U.S Department of Defense, Falls Church, VA.	49 CFR 173.22(a), 174.3, 175.3, 176.3, 177.801.	To authorize shipment of an explosive item classified and marked as Rocket Ammunition with Smoke Projectile, Class B explosive, and packed in accordance with 173.90. (Modes 1, 4.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 10401-N	DOT-E 10401	United Technologies Corporation, San Diego, CA.	49 CFR 173.113	To authorize transport of a detonating fuze in a packaging which exceeds the 190 pound gross weight limitation in 49 CFR 173.113. (Mode 1.)
EE 10401-X	DOT-E 10401	United Technologies Corporation—Advanced Systems, San Diego, CA.	49 CFR 173.113	To authorize transport of a detonating fuze in a packaging which exceeds the 190 pound gross weight limitation in 49 CFR 173.113. (Mode 1.)
EE 10402-N	DOT-E 10402	Astrotech Space Operations, L.P., Silver Spring, MD.	49 CFR 173.336	To authorize shipment of a non-DOT specification Molecular Sieve Column assemble containing a nitrogen tetroxide mixture overpacked in a non-DOT specification plywood box. (Mode 1.)
EE 10402-X	DOT-E 10402	Astrotech Space Operations, L.P., Silver Spring, MD.	49 CFR 173.336	To authorize shipment of a non-DOT specification Molecular Sieve Column assemble containing a nitrogen tetroxide mixture overpacked in a non-DOT specification plywood box. (Mode 1.)
EE 10403-N	DOT-E 10403	U.S Department of Defense, Falls Church, VA.	49 CFR 172.101, 175.3	To authorize transport by cargo only aircraft of Class A explosives which are forbidden in 172.101. (Mode 4.)
EE 10404-N	DOT-E 10404	Merck & Company, Rahway, NJ	49 CFR 173.314(c)	To authorize shipment of a DOT Specification 105A600W tank car filled with hydrogen chloride, refrigerated liquid less than the required minimum permitted filing density. (Mode 2.)
EE 10422-N	DOT-E 10422	Shapiro Brothers of Illinois, Incorporated, Mt. Vernon, IL.	49 CFR 172.203(d), Part 172, Subparts D, F, Part 173, Subpart I.	To authorize transport of radioactive contaminated scrap steel within a gondola rail car. (Mode 2.)
EE 10423-N	DOT-E 10423	Ferrellgas, Inc., Liberty, MO	49 CFR 173.315(j)(4)	To authorize a one-time shipment of ASME Code "U" stamped storage containers charged with liquefied petroleum gas to over 5 percent of their water capacity. (Mode 1.)
EE 10424-N	DOT-E 10424	Pennsylvania Engineering Company, Philadelphia, PA.	49 CFR 173.34 (e)(9); (e)(10)	To authorize shipment of a specific gas mixture in DOT Specification 4BA240 cylinders retested in accordance with the provisions of 49 CFR 173.34 (e)(9) and (e)(10). (Mode 1.)
EE 10425-N	DOT-E 10425	Chapman Chemical Company, Memphis, TN.	49 CFR 173.245	To authorize use of a non-DOT specification combination packaging equivalent to the DOT Specification 12P/2U combination packaging for shipment of a certain corrosive liquid. (Mode 1.)
EE 10426-N	DOT-E 10426	Matrix Construction, Inc., Anchorage, AK.	49 CFR 172.101 Table, Column 6, 175.90.	To authorize shipment of liquefied petroleum gas in DOT Specification 51 portable tanks exceeding the weight limitations authorized for shipment by cargo aircraft. (Mode 4.)
EE 10427-N	DOT-E 10427	Astrotech Space Operations, L.P., Silver Spring, MD.	49 CFR 173.145, 173.276, 173.301, 173.302, 173.336, 173.92.	To authorize shipment of several types of "Flight-ready" spacecraft each containing one or more hazardous materials in specially designed non-DOT specification transport containers. (Mode 1.)
EE 10428-N	DOT-E 10428	Astrotech Space Operations, L.P., Silver Spring, MD.	49 CFR 173.145, 173.276, 173.336	To authorize shipment of propellant transfer carts each containing a hazardous material in specially designed non-DOT specification ground support transport containers. (Mode 1.)
EE 10429-X	DOT-E 10429	Nalco Chemical Company, Naperville, IL.	49 CFR 177.834(h), Part 107 appendix B(1), Part 173 Subparts D and F.	To reissue exemption originally issued on an emergency basis to authorize shipment of flammable liquids, organic peroxide and corrosive materials in DOT specification 57 portable tanks to be unloaded without being removed from the vehicle. (Mode 1.)
EE 10429-N	DOT-E 10429	Nalco Chemical Company, Naperville, IL.	49 CFR 177.834(h), Part 107 appendix B(1), Part 173 Subparts D and F.	To authorize the discherge of certain flammable and corrosive liquids from DOT specification 57 stainless steel portable tanks without removing the tanks from the vehicle on which it is transported. (Mode 1.)
EE 10435-N	DOT-E 10435	Enviro-Vac, Inc., Houston, TX	49 CFR 173.119 (a), (m), 173.245, 173.346(a), 178.340–7, 178.343–5.	To authorize manufacture, marking and sale of certain non-DOT specification cargo tanks, for transportation of flammable liquids, corrosive material or poison B materials. (Mode 1.)
EE 10436-N	DOT-E 10436	Sandoz Chemical Corp., Charlotte, NC.	49 CFR 173.365	To authorize use of insulated DOT specification MC-307 cargo tanks, for shipment of a certain Class B poison. (Mode 1.)
EE 10444-N	DOT-E 10444	Vulcan Chemicals, Birmingham, AL	49 CFR 173.29(c)(2), 179.102–2	To authorize transport of a DOT specification 105A500W tank car tank with a defective safety relief valve for the transportation of chlorine residue. (Mode 2.)
EE 10445-N	DOT-E 10445	Dow Chemical U.S.A., Freeport, TX	49 CFR 173.29(c)(2), 179.102–2	To authorize transport of a DOT specification 104A500 tank car tank with a defective safety relief valve for the transportation of sulfur dioxide residue. (Mode 2.)
EE 10446-N	DOT-E 10446	Vulcan Chemicals, Birmingham, AL	49 CFR 173.29(c)(2), 179.100–13	To authorize transport of a DOT specification 105A500W tank car tank with defective vapor valves for the transportation of chlorine residue. (Mode 2.)
EE 10448-N	DOT-E 10448	Sultanate of Oman	49 CFR 172.101 table, Column 6b, 175.30.	To authorize shipment of rocket ammunition with explosive projectile, Class A explosive, which are forbidden for transportation by air. (Mode 4.)
EE 10449-N	DOT-E 10449	Natural Gas Company of Texas, Austin, TX.	49 CFR 173.301(d)(2), 173.302(a)(3).	To authorize use of DOT specification 3AA cylinders for compressed natural gases. (Mode 1.)
EE 10449-X	DOT-E 10449	Tren-Fuels, Inc., Austin, TX	49 CFR 173.301(d)(2), 173.302(a)(3).	To authorize use of DOT specification 3AA cylinders for compressed natural gases. (Mode 1.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 10450–N.	DOT–E 10450	British Aerospace PLC Stevenage Herts, United Kingdom.	49 CFR 172.101	To authorize transport of certain Class A and B explosives in cargo aircraft. (Mode 4.)
EE 10453–N.	DOT–E 10453	E.I. du Pont de Nemours and Company, Inc., Wilmington, DE.	49 CFR 173.300(i)	To authorize a change in the definition of dispersant and refrigerant gases. (Modes 1, 2.)
EE 10454–N.	DOT–E 10454	M. Burstein & Co., Inc., Chelsea, MA.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, paragraph (1), Part 172, Subparts D, E, F.	To authorize one-time only transport of a shipment of aluminum scrap, contaminated with a small amount of radioactive material, contained in a closed trailer van without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 1.)
EE 10467–N.	DOT–E 10467	ACF, Industries Incorporated, Earth City, MO.	49 CFR 173.31 (b)(1), 173.31 (b)(3)	To authorize transport of a DOT Specification 105A500W tank car tank with a defective vapor valve for the transportation of chlorine. (Mode 2.)
EE 10467–X.	DOT–E 10467	ACF, Industries Incorporated, Earth City, MO.	49 CFR 173.31 (b)(1), 173.31 (b)(3)	To authorize transport of a DOT Specification 105A500W tank car tank with a defective vapor valve for the transportation of chlorine. (Mode 2.)
EE 10467–X.	DOT–E 10467	ACF, Industries Incorporated, Earth City, MO.	49 CFR 173.31(b)(1), 173.31(b)(3)	To authorize transport of a DOT Specification 105A500W tank car tank with a defective vapor valve for the transportation of chlorine. (Mode 2.)
EE 10468–N.	DOT–E 10468	Clawson Tank Company, Clarkson, MI.	49 CFR 173, Subparts D and F	To authorize the use of a non-DOT Specification rotationally molded, linear low density, high density, or linear medium density polyethylene portable tank, enclosed with a protective wire frame for the shipment of corrosive liquids, flammable liquids or an oxidizer. (Modes 1, 2.)
EE 10468–X.	DOT–E 10468	Clawson Tank Company, Clarkson, MI.	49 CFR 173, Subparts D and F	To authorize the use of a non-DOT Specification rotationally molded, linear low density, high density, or linear medium density polyethylene portable tank, enclosed with a protective wire frame for the shipment of corrosive liquids, flammable liquids or an oxidizer. (Modes 1, 2.)
EE 10474–N.	DOT–E 10474	Occidental Chemical Corporation, Tacoma, WA.	49 CFR 173.31(a), 179.102–2	To authorize transport of a DOT Specification 105A500W tank car tank with a defective safety relief valve for the transportation of chlorine. (Mode 2)
EE 10482–N.	DOT–E 10482	U.S. Department of Energy, Washington, DC.	49 CFR 173.51, 173.65, Part 107, Appendix B(1), Part 172, Subparts D, E.	To authorize one-time shipment of aged picric acid and diethyl ether in a specially designed bomb basket and trailer. (Mode 1.)
EE 10489–N.	DOT–E 10489	U.S. Department of Defense, Washington, DC.	49 CFR 172.101	To authorize the transportation of ammunition for cannon with smoke projectile as a Class B explosive. (Modes 1, 2, 3, 4.)
EE 10491–N.	DOT–E 10491	Occidental Chemical Corporation, Pasadena, TX.	49 CFR 173.31(a), 179.102–2	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective safety relief valve for the transportation of chlorine. (Mode 2.)
EE 10493–N.	DOT–E 10493	Korean Air Line Company, Los Angeles, CA.	49 CFR 173.101 table, Column (6)(b), 175.30.	To authorize the shipment of explosives which are forbidden for transportation by air or are in quantities greater than those prescribed for air transportation. (Mode 4.)
EE 10493–X.	DOT–E 10493	Korean Air Lines Company, Los Angeles, CA.	49 CFR 173.101 table, Column (6)(b), 175.30.	To authorize the shipment of explosives which are forbidden for transportation by air or are in quantities greater than those prescribed for air transportation. (Mode 4.)
EE 10494–N.	DOT–E 10494	Atochem North America, Tacoma, WA.	49 CFR 173.29(c)(2), 179.102–2	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective safety relief valve for the transportation of chlorine residue. (Mode 2.)
EE 10496–N.	DOT–E 10496	Olin Corporation, Stamford, CT	49 CFR 173.29(c)(2), 179.102–2	To authorize transportation of a DOT Specification 105A500W tank car tank with a defective safety relief valve for the transportation of chlorine residue. (Mode 2.)
EE 10497–N.	DOT–E 10497	General Electric Company, Astro Space Division, Princeton, NJ.	49 CFR 173.336, 177.834(m), 179.300.	To authorize shipment of nitrogen tetroxide in non-DOT specification stainless steel tanks. (Modes 1, 3.)
EE 10498–N.	DOT–E 10498	El Dorado Chemical Company, St. Louis, MO.	49 CFR 49 CFR 179.3, 179.4	To authorize shipment of nitric acid (98%) in DOT Specification 111A60ALW2 and 103A–ALW tank car tanks equipped with a nonapproved valve arrangement. (Mode 2.)
EE 10498–X.	DOT–E 10498	El Dorado Chemical Company, St. Louis, MO.	49 CFR 179.3, 179.4	To authorize shipment of nitric acid (98%) in DOT Specification 111A60ALW2 and 103A–ALW tank car tanks equipped with a nonapproved valve arrangement. (Mode 2.)
EE 10498–X.	DOT–E 10498	El Dorado Chemical Company, St. Louis, MO.	49 CFR 179.3, 179.4	To authorize shipment of nitric acid (98%) in DOT Specification 111A60ALW2 and 103A–ALW tank car tanks equipped with a nonapproved valve arrangement. (Mode 2.)
EE 10499–N.	DOT–E 10499	General Electric Company, (GE Nuclear Energy), San Jose, CA.	49 CFR 174.87(a)(1), 174.89	To authorize the placement of an occupied caboose carrying passengers next to the IF–300 cask car, placarded "RADIOACTIVE". (Mode 2.)
EE 10499–X.	DOT–E 10499	General Electric Company, (GE Nuclear Energy), San Jose, CA.	49 CFR 174.87(a)(1), 174.89	To authorize the placement of an occupied caboose carrying passengers next to the IF–300 cask car, placarded "RADIOACTIVE". (Mode 2.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 10505–N.	DOT–E 10505	Consolidated Rail Corporation, Philadelphia, PA.	49 CFR 173.29(c)(2), 179.105–5, 179.14.	To authorize a one-time shipment of Specification 112T340W tank car tank with the head shield, double shelf coupler and draft gear on the "A" end completely detached from the car. (Mode 2.)
EE 10506–N.	DOT–E 10506	Olin Chemicals, Brandenburg, KY	49 CFR 173.29(c)(2), 179–105–5, 179.105–4, 179.14.	To authorize a one-time shipment of liquefied petroleum gas residue in three DOT Specification 112J340W tank car tanks with derailment-damaged coupler restraint systems, thermal protection systems, and tank head puncture resistance systems. (Mode 2.)
EE 10518–N.	DOT–E 10518	Caribbean Refrescos, Inc., Cidra, PR.	49 CFR 178.19–6(a)(1), Part 107, Appendix B(1).	To authorize a one time shipment of approximately 4,600 DOT Specification 34 containers of 5 gallon capacity inadvertently marked 4 gallon capacity. (Modes 1, 3.)
EE 10518–X.	DOT–E 10518	Caribbean Refrescos, Inc., Cidra, PR.	49 CFR 178.19–6(a)(1), Part 107, Appendix B(1).	To authorize a one time shipment of approximately 4,600 DOT Specification 34 containers of 5 gallon capacity inadvertently marked 4 gallon capacity. (Modes 1, 3.)
EE 10522–N.	DOT–E 10522	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 17, Subpart D, E, F.	To authorize the one-time-only transportation of a shipment of scrap steel, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10523–N.	DOT–E 10523	Southern Air Transport, Miami, FL	49 CFR 171.11, 172.101 table, Column 6b, 175.30.	To authorize the shipment of rocket ammunition with explosive projectile, Class A explosive, which is forbidden for transportation by air. (Mode 4.)
EE 10524–N.	DOT–E 10524	Occidental Chemical Corporation, Pasadena, TX.	49 CFR 173.31(b), 179.102–2	To authorize the one-time shipment of chlorine in a DOT Specification 105A500W tank car tank with a defective safety relief valve equipped with a chlorine "C" kit. (Mode 2.)
EE 10526–N.	DOT–E 10526	Buffalo Airways, Inc., Kansas City, MO.	49 CFR 172.101, Column (6)(b), 175.3, 175.320(a).	To authorize aircraft of United States registry to transport Class A explosives (UN 1.1 and 1.2) between points outside the United States. (Mode 4.)
EE 10526–X.	DOT–E 10526	Buffalo Airways, Inc., Kansas City, MO.	49 CFR 172,101, Column (6)(b), 175.3, 175.320(a).	To authorize aircraft of United States registry to transport Class A explosives (UN 1.1 and 1.2) between points outside the United States. (Mode 4.)
EE 10531–N.	DOT–E 10531	LCP Chemicals, Edison, NJ	49 CFR 173.29	To authorize the transportation of DOT Specification 105A500W tank car tanks which are overdue for tank and safety valve tests. (Mode 2.)
EE 10531–X.	DOT–E 10531	LCP Chemicals, Edison, NJ	49 CFR 173.29	To authorize the transportation of DOT Specification 105A500W tank car tanks which are overdue for tank and safety valve tests. (Mode 2.)
EE 10532–N.	DOT–E 10532	Monsanto Chemical Company, St. Louis, MO.	49 CFR 173.119	To authorize a one-time shipment of flammable liquids in a non-DOT specification in-process tank (pressure vessel). (Mode 1.)
EE 10532–X.	DOT–E 10532	Monsanto Chemical Company, St. Louis, MO.	49 CFR 173.119	To authorize a one-time shipment of flammable liquids in a non-DOT specification in-process tank (pressure vessel). (Mode 1.)
EE 10538–N.	DOT–E 10538	National Compressed Steel Corporation, Kansas City, KS.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 173, Subparts D, E, F.	To authorize the transportation of radioactive contaminated scrap steel within a rail car. (Mode 2.)
EE 10540–N.	DOT–E 10540	Sun Refining and Marketing Company, Philadelphia, PA.	49 CFR 173.29(c) (1), (2)	To authorize the transportation of a DOT Specification tank car tank with defective interior heater coils. (Mode 2.)
EE 10541–N.	DOT–E 10541	Aerojet Propulsion Div., Aerojet General Corp., Sacramento, CA.	49 CFR 173.92	To authorize the transportation of rocket motors via highway. (Mode 1.)
EE 10542–N.	DOT–E 10542	Air Charter Systems (ACS), Quebec, CN.	49 CFR 172.101, Column (6)(b), 175.3, 175.320.	To authorize the transportation of explosive bombs in cargo aircraft. (Mode 4.)
EE 10543–N.	DOT–E 10543	U.S. Department of Defense, Washington, DC.	49 CFR 171.11, 172.101, Column (2), 175.3, 175.320.	To authorize the transportation of charges, propelling, for cannon by cargo aircraft. (Mode 4.)
EE 10544–N.	DOT–E 10544	U.S. Department of Defense, Washington, DC.	49 CFR 171.11, 172.101, Column (6)(b), 175.3, 175.320.	To authorize the transportation of certain explosive in cargo aircraft. (Mode 4.)
EE 10545–N.	DOT–E 10545	Vinnell Corporation, Baltimore, MD	49 CFR 172.101, Column (6)(b), 175.3, 175.320.	To authorize the transportation of rocket ammunition with explosive projectile by cargo aircraft. (Mode 4.)
EE 10548–N.	DOT–E 10548	CSX Transportation, Incorporated, Jacksonville, FL.	49 CFR 173.31(a)(5), 179.14	To authorize a one-time shipment of chlorine in DOT Specification 105A500W tank car tanks with damaged coupler restraint systems resulting from a derailment. (Mode 2.)
EE 10557–N.	DOT–E 10557	Union Pacific Railroad Company, Omaha, NE.	49 CFR 173.190, 173.31(a), 173.31(a)(5).	To authorize a one-time shipment of phosphorous in a DOT Specification 111A100W1 tank car tank with a damaged coupler restraint system and puncture damage to the "B" end head, resulting from a derailment. (Mode 2.)
EE 10558–N.	DOT–E 10558	Georgia Gulf Corporation, Plaquemine, LA.	49 CFR 173.31(a), 173.31(a)(5), 179.14.	To authorize a one-time shipment of vinyl chloride in a DOT Specification 105J300W tank car tank with the "B" end coupler and draft gear assembly completely disengaged. (Mode 2.)
EE 10558–X.	DOT–E 10558	Georgia Gulf Corporation, Plaquemine, LA.	49 CFR 173.31(a), 173.31(a)(5), 179.14.	To authorize a one-time shipment of vinyl chloride in a DOT Specification 105J300W tank car tank with the "B" end coupler and draft gear assembly completely disengaged. (Mode 2.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 10561-N.	DOT-E 10561	Department of Health & Human Service Food & Drug, Greenville, NC.	49 CFR Parts 100 through 199	To authorize the shipment of cyanide, dry packed in a plastic bottle in a paper bag overpacked in a sealed plastic bag which is placed in a metal carrying case to be carried in the cabin of a passenger-carrying aircraft under special conditions. (Mode 5.)
EE 10564-N.	DOT-E 10564	Carmar Associates, Incorporated, Pelzer, SC.	49 CFR 173.31(b)(1), 173.31(c)	To authorize the one time shipment of two DOT Specification 111A100W-2 coiled and insulated tank car tanks which are overdue for tanks tests. (Mode 2.)
EE 10565-N.	DOT-E 10565	Olin Chemicals, East Alton, IL	49 CFR 173.29(c)	To authorize the one-time shipment of a tank car tank, containing a residue of sulfuric acid, with a missing manway nozzle cover plate and safety relief device. (Mode 2.)
EE 10566-N.	DOT-E 10566	ICI Explosives Canada North York, Ontario, Canada.	49 CFR 173.29(c), 173.31(b)(1)	To authorize the transportation of a DOT Specification 111A100ALW-2 tank car tank which has the one inch air connection valve assembly broken off above the manway plate. (Mode 2.)
EE 10568-N.	DOT-E 10568	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Parts 172, Subpart D, E, F, G.	To authorize the one time only shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10569-N.	DOT-E 10569	Sun Refining and Marketing Company, Oregon, OH.	49 CFR 173.29(c)(1), 173.29(c)(2)	To authorize the transportation of a DOT Specification 111A100W1 tank car tank with defective interior heater coil. (Mode 2.)
EE 10571-N.	DOT-E 10571	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts D, E, F, G.	To authorize the one-time only transportation of a shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10572-N.	DOT-E 10572	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph 1, Part 172, Subparts D, E, F and G.	To authorize the one-time-only transportation of a shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10574-N.	DOT-E 10574	Olin Corporation, Stamford, CT	49 CFR 173/29(c)(2), 179.102-2	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective safety relief valve for the transportation of chlorine residue. (Mode 2.)
EE 10577-N.	DOT-E 10577	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts D, E, F, G.	To authorize the one-time-only transportation of scrap iron, contaminated with a small amount of radioactive material, contained in gondola rail cars without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10578-N.	DOT-E 10578	The David J. Joseph Company, St. Louis, MO.		To authorize the one-time-only shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10579-N.	DOT-E 10579	Tri—Gas, Incorporated, Jupiter, FL	49 CFR 173.315(a)(1), 173.32(e)	To authorize the transportation of oxygen, nonflammable compressed gas in a non-DOT specification portable tank which is out of retest. (Modes 1, 3.)
EE 10582-N.	DOT-E 10582	Prolerized Steel Corporation, Kansas City, KS.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts D, E, F, and G.	To authorize the one-time transportation of a shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10584-N.	DOT-E 10584	National Compressed Steel Corporation, Kansas City, KS.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts D, E, F, and G.	To authorize the one-time-only transportation of a shipment of scrap steel, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10585-N.	DOT-E 10585	Vulcan Materials	49 CFR 173.31(c)	To authorize the transportation of a DOT Specification 112J340W tank car tank which is overdue for tank test. (Mode 2.)
EE 10586-N.	DOT-E 10586	Korean Air Lines Company Limited, Los Angeles, CA.	49 CFR 172.101 table, column (6)(b), 175.30.	To authorize the shipment of rocket ammunition with explosives projectiles, Class A explosives; booster, Class A explosives; and Rocket motors, Class B explosives, which are forbidden for transportation by air or are in quantities greater than those prescribed for air transportation. (Mode 4.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 10591-N.	DOT-E 10591	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), 173.264, Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only transportation of a shipment of scrap metal, contaminated with a small amount of radioactive material, contained in crushed automobile bodies on a flatbed trailer, without regard to specification packaging, marking, labeling, placarding and certain shipping paper requi. (Mode 1.)
EE 10593-N.	DOT-E 10593	BP Chemicals, Incorporated, Cleveland, OH.	49 CFR 173.314(c)	To authorize a one-time shipment of (13) DOT Specification 112J400W tank car tanks, whose contents exceed the maximum permitted filling density for liquified petroleum gas. (Mode 2.)
EE 10602-N.	DOT-E 10602	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only transportation of a shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10604-N.	DOT-E 10604	Werkzeugmaschinentabrik, Oerlikon-Buhrle AG, Zurich, Switzerland.	49 CFR 173.56, 173.60, 173.79, 173.92.	To authorize the transportation of rocket motors, explosive projectiles, booster, explosive and igniter, rocket motor aboard cargo aircraft. (Mode 4.)
EE 10605-N.	DOT-E 10605	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10612-N.	DOT-E 10612	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 173, Subparts C, D, E, F and G.	To authorize the one-time-only shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car shipped without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10613-N.	DOT-E 10613	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(c), Part 107, Appendix B to Subpart B, Paragraph (1).	To authorize the one-time shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car to be shipped with regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10614-N.	DOT-E 10614	Tri-Gas Inc., Irving, TX	49 CFR 173.318, 176.76(h), 178.338.	To authorize the use of vacuum insulated portable tanks for the transportation of liquid oxygen and liquid nitrogen. (Modes 1, 3.)
EE 10614-X.	DOT-E 10614	Tri-Gas Inc., Irving, TX	49 CFR 173.318, 176.76(h), 178.338.	To authorize the use of vacuum insulated portable tanks for the transportation of liquid oxygen and liquid nitrogen. (Modes 1, 3.)
EE 10614-X.	DOT-E 10614	TRI-GAS Inc., Irving, TX	49 CFR 173.318, 176.76(h), 178.338.	Authorizes the use of vacuum insulated portable tanks for the transportation of liquid oxygen and liquid nitrogen. (Modes 1, 3.)
EE 10615-N.	DOT-E 10615	Occidental Chemical Corporation, Pasadena, TX.	49 CFR 173.31(b), 177.834(1)(2)(i), 179.102-2.	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective angle valve, equipped with a Chlorine. (Mode 2.)
EE 10616-N.	DOT-E 10616	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only shipment of scrap steel, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10617-N.	DOT-E 10617	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only shipment scrap steel, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10620-N.	DOT-E 10620	Great Lakes Chemical Corporation, El Dorado, AR.	49 CFR 173.29(2)(2)	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective angle valve for the transportation of Poison B residue. (Mode 2.)
EE 10621-N.	DOT-E 10621	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only shipment of scrap steel, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10622-N.	DOT-E 10622	Occidental Chemical Corporation, Pasadena, TX.	49 CFR 173.29(c)(2)	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective angle valve, equipped with a Chlorine "C" Kit for the transportation of chlorine residue. (Mode 2.)
EE 10624-N.	DOT-E 10624	Sun Refining and Marketing Company, Philadelphia, PA.	49 CFR 173.29(a)(4), 173.29(c)(1)	To authorize the transportation of a DOT Specification tank car tank with a defective interior heater system for the transportation of petroleum naptha residue. (Mode 2.)
EE 10625-N.	DOT-E 10625	Olin Corporation, McIntosh, AL	49 CFR 173.31(a)	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective safety relief valve equipped with a Chlorine "C" for the transportation of Chlorine residue. (Mode 2.)
EE 10626-N.	DOT-E 10626	Occidental Chemical Corporation	49 CFR 173.29(c)(2)	To authorize shipment of sulfuric acid spent residue in a DOT Specification 111A100W2 tank car tank equipped with a device not of approved design, securing the fill hole cover. (Mode 2.)

EMERGENCY EXEMPTIONS—Continued

EE 10627-N.	DOT-E 10627	The David J. Joseph Company, Houston, TX.	49 CFR 172/203(d), Part 107, Appendix B to Subparts C, D, E, F and G, Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only shipment of scrap steel, contaminated with a small amount of radioactive material, contained in a gondola rail care without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10628-N.	DOT-E 10628	Embassy of the Arab Republic of Egypt, Washington, DC.	49 CFR 172.101, Column (6)(b), 173.92(a), 175.3, 175.320(a).	To authorize the transportation of Class A and B explosives aboard cargo aircraft. (Mode 4.)
EE 10629-N.	DOT-E 10629	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts D, E, F and G.	To authorize the one-time-only shipment of scrap iron, contaminated with a small amount regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10635-N.	DOT-E 10635	The David J. Joseph Company, St. Louis, MO.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subpart D, E, F, and G.	To authorize the one-time-only shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10636-N.	DOT-E 10636	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts C, D, E, F and G.	To authorize the one-time-only shipment of scrap steel contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10638-N.	DOT-E 10638	Borg Compressed Steel Corporation, Tulsa, OK.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts D, E, F and G.	To authorize the one-time-only shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10641-N.	DOT-E 10641	The David J. Joseph Company, Houston, TX.	49 CFR 172.203(d), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subparts D, E, F and G.	To authorize the one-time-only transportation of a shipment of scrap iron, contaminated with a small amount of radioactive material, contained in a gondola rail car without regard to specification packaging, marking, labeling, placarding and certain shipping paper requirements. (Mode 2.)
EE 10642-N.	DOT-10642	Allied-Signal Inc., Morristown, NJ	49 CFR Part 172, Subparts D, E, F, and G.	To authorize the transportation of eight DOT Specification 111A100W tank cars equipped with an air brake equipment support attachment welded directly to the tank shell. (Mode 2.)
EE 10642-X.	DOT-10642	Allied-Signal Inc., Morristown, NJ	49 CFR Part 172, Subparts D, E, F, and G.	Authorizes the transportation of eight DOT Specification 111A100W tank cars equipped with an air brake equipment support attachment welded directly to the tank shell. (Mode 2.)
EE 10662-N.	DOT-10662	Hoechst Celanese, Charlotte, NC	49 CFR Part 173.31(b), 179.100-12(c), 179.100-3.	To authorize the transportation of DOT Specification 105A500W tank car tank with a defective angle valve, equipped with a Chlorine "C" kit for the transportation of sulfur dioxide. (Mode 2.)
EE 10663-N.	DOT-10663	Burlington Northern Railroad, Fort Worth TX.	49 CFR 173.29(c)	To authorize the transportation of a DOT Specification 111A100W1 tank car tank which had the one inch air connection and two inch unloading connection valves broked off in a derailment. (Mode 2.)
EE 10671-N.	DOT-10671	Rhone-Poulenc Basic Chemicals Company, Shelton, CT.	49 CFR 173.29(c)(2), 179.102-2	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective 1 inch liquid angle valve for the transportation of sulphur dioxide residue. (Mode 2.)
EE 10681-N.	DOT-E 10681	LCP Chemicals and Plastics, Incorporated, Edison, NJ.	49 CFR 173.29(c)(2), 179.102-2	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective 1 inch liquid angle value but equpped with a safety "C" kit for the transportation of chlorine residue. (Mode 2.)
EE 10681-X.	DOT-E 10681	LCP Chemicals and Plastics, Incorporated, Edison, NJ.	49 CFR 173.29(c)(2), 179.102-2	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective 1 inch liquid angle value but equipped with a safety "C" kit for the transportation of chlorine residue. (Mode 2.)
EE 10685-N.	DOT-E 10685	Occidental Chemical Corporation, Pasadena, TX.	49 CFR 173.29(c)(2) and 179.102-2.	To authorize the transportation of chlorine residue in a DOT Specification 105A500w tank car tank with a defective safety relief valve equipped with an emergency safety "C" kit, safety. (Mode 2.)
EE 10686-N.	DOT-E 10686	Southern Pacif Transportation Company, Oakland, CA.	49 CFR 173.31(b)(3), 179.100-12(c), 179.100-13, 179.102-2.	To authorize the transportation of a DOT Specification 105A500W tank car tank with a defective safety relief valve, equipped with a chlorine "C" kit, for the transportation of chlorine. (Mode 2.)
EE 10694-N.	DOT-E 10694	Polymet Alloys, Inc., Birmingham, AL.	49 CFR 173.178	To authorize a one-time shipment of calcium silicon, a flammable solid; in non-DOT specification packagings (Modes 1, 2.)
EE 10696-N.	DOT-E 10696	Kuwait Oil Company, Houston, TX	49 CFR 172.101, Column (6)(b), 171.11, 175.3 and 175.320.	To authorize a one-time of certain Class A explosives in cargo aircraft (Mode 4.)
EE 10697-N.	DOT-E 10697	Liquid Air Corporation, Walnut Creek, CA.	49 CFR 173.301(d)(2), 173.302(a)(3).	To authorize the transportation of certain flammable compressed gas mixtures in DOT Specification 3AAX steel cylinders. (Mode 1.)
EE 10701-N.	DOT-E 10701	Public Service Company, Platteville, CO.	49 CFR 177.825(b), Part 107, Appendix B(1).	To authorize the shipment of radioactive material using an alternative route which is not a state designated route, or an interstate. (Mode 1.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 10705-N.	DOT-E 10705	Energy & Environmental Technology Company, Southfield, MI.	49 CFR 173.119	To authorize shipment of a flammable liquid in a non-DOT specification cylindrical steel packaging with a removable end with bolted on for closure. (Mode 1.)
EE 10707-N.	DOT-E 10707	Oregon Metallurgical Corporation, Albany, OR.	49 CFR 173.29	To authorize the transportation of DOT specifications 105A500W tank car tanks, containing a residue of chlorine, which are overdue for tank and safety valve tests. (Mode 2.)
EE 10708-N.	DOT-E 10708	Sun Refining and Marketing Company, Philadelphia, PA.	49 CFR 173.29(c)(1), 174.67(k)	To authorize the transportation of two DOT Specification 111A100W1 tank car tanks, containing a residue of Petroleum naphtha, which have defective interior heating coil. (Mode 2.)
EE 10709-N.	DOT-E 10709	Exxon Chemical Company, Houston, TX.	49 CFR 173.119(m)	To authorize the shipment of certain mixtures of flammable and corrosive liquids in stainless steel DOT Specification 57 portable tanks. (Modes 1, 3.)
EE 10711-N.	DOT-E 10711	Molycorp Incorporated, Washington, PA.	49 CFR 173.31(c)(1)	To authorize the transportation of a residue of sulfuric acid in a DOT Specification 111A100W2 for tank car tank which is overdue for tank test. (Mode 2.)
EE 10720-N.	DOT-E 10720	Martin Marietta Corporation, Denver, CO.	49 CFR 173.301(d), 173.302	To authorize the shipment of a non-DOT specification package containing certain components pressurized with a nonflammable gas. (Mode 1.)
EE 10721-N.	DOT-E 10721	General Electric Company, Wilmington, NC.	49 CFR 173.417(a)(4), 173.471(a), (b), and (c), Part 107, Appendix B to Subpart B, Paragraph (1), Part 172, Subpart D and E.	To authorize the transportation of packagings containing unirradiated, low-enriched uranium fuel elements in packaging that are in variance with the Nuclear Regulatory Commission Certificate of Compliance No. 4986. (Mode 1.)
EE 10722-N.	DOT-E 10722	Occidental Chemical Corporation, Niagara Falls, NY	49 CFR 173.29	To authorize the transportation of a DOT Specification 105A500W tank car tank, containing a chlorine residue, which is overdue for tank and safety value tests. (Mode 2.)

WITHDRAWAL EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
3095-X	Dowell Schlumberger, Inc., Tulsa, OK	49 CFR 173.119(a), 173.245(a), 173.248(a), 173.263(a), 173.264, 173.283, 173.289, 178.342-5, 178.343-5.	To authorize use of a non-DOT specification cargo tank, for shipment of corroive and flammable liquids. (Modes 1, 3.)
4453-X	Seco of Arkanses, Inc., Midland, AR	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 2.)
4453-P	Gary James Trucking, Palmyra, MO	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To become a party to exemption 4453. (Modes 1, 2.)
4631-P	Gary James Trucking, Palmyra, MO	49 CFR 172.114a, 173.304(a)	To become a party to exemption 4631. (Mode 1.)
4803-X	Dowell Schlumberger, Inc., Tulsa, OK	49 CFR 173.245, 173.248, 173.249, 173.263, 173.272, 173.289, 178.343-5.	To authorize use of non-DOT specification cargo tank motor vehicles, for shipment of certain corroive liquids. (Mode 1.)
5208-P	Gary James Trucking, Palmyra, MO	49 CFR 173.114a	To become a party to exemption 5208. (Mode 1.)
6349-X	Union Carbide Industrial Gases Inc., Danbury, CT.	49 CFR 172.101, 173.315(a)	To authorize use of non-DOT specification insulated, containerized portable tanks, for shipment of certain flammable and nonflammable gases. (Modes 1, 2, 3.)
6810-P	Henderson Limited, Inc., Richardson, TX	49 CFR 173.302(a)(1), 173.314(c)	To become a party to exemption 6810. (Mode 1.)
6960-X	Pepsi-Cola Company, Somers, NY	49 CFR Parts 100-199	To authorize use of DOT Specification and non-DOT specification stainless steel drums, tight-head, with rated capacity not exceeding 55 gallons, for transportation of certain corroive liquids. (Modes 1, 2, 3.)
7517-X	Trinity Industries, Inc., Dallas, TX	49 CFR 173.314(c)	To authorize manufacture, marking and sale of non-DOT specification fusion welded tank car tanks, for transportation of nonflammable compressed gases. (Modes 1, 2, 3.)
7526-X	Sherex Chemical Company, Inc., Dublin, OH.	49 CFR 173.134	To authorize transport of certain pyrophoric liquids in non-DOT specification portable tanks. (Modes 1, 3.)
7607-X	Radian Corporation, Herndon, VA	49 CFR 172.101, 175.3	To authorize shipment of hydrogen in certain non-DOT specification seamless stainless steel cylinders. (Mode 5.)
8063-P	Iveco, Inc., Houston, TX	49 CFR 173.304(a)	To become a party to exemption 8063 (Mode 1.)
8126-X	Compagnie des Containers Reservoirs, Paris, France.	49 CFR 173.123, 173.315, 174.63(b)	To authorize use of non-DOT specification portable tanks, for transportation of certain liquefied petroleum gases and other gases classed as flammable gases and a flammable liquid. (Modes 1, 2, 3.)
8337-X	LWD Trucking, Inc., Calvert City, KY	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize the manufacture, marking and sale of non-DOT specification cargo tanks for shipment of flammable or corrosive waste, liquid, or semi-solids. (Mode 1.)
8451-X	Technical Ordnance, Inc., St. Bonifacius, MN.	49 CFR 172.65, 173.86(e), 175.3	Authorizes the transport of not more than 25 grams of high explosives and pyrotechnic materials in a special shipping container. (Modes 1, 2, 4.)
8453-P	Gary James Trucking, Palmyra, MO	49 CFR 173.114a	To become a party to exemption 8453 (Modes 1, 3.)

WITHDRAWAL EXEMPTIONS—Continued

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8509–X	Mobay Corporation, Pittsburgh, PA	49 CFR 173.263(a)(9), 179.201–1	To authorize use of a safety relief valve in lieu of a safety vent in DOT Specification 111A100W5 tank car tanks, for transportation of hydrochloric acid. (Mode 2.)
8516–X	Coast Vacuum Truck Service, Inc., Santa Maria, CA.	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340–7, 178.342–5, 178.343–5.	To authorize use of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC–307 or MC–312 except for bottom outlet valve variations, for transportation of flammable liquids or corrosive or poison B materials. (Mode 1.)
8526–P	Ranger Transportation, Inc., Jacksonville, FL.	49 CFR 177.834(L)(2)(i)	To become a party to exemption 8526 (Mode 1.)
8454–P	Gary James Trucking, Palmyra, MO	49 CFR 173.114a, 173.154, 173.93	To become a party to exemption 8554 (Modes 1, 3.)
8986–P	Gary James Trucking, Palmyra, MO	49 CFR 173.114a(b)(3)	To become a party to exemption 8986 (Mode 1.)
9168–N	Bayfast Packaging Solutions, Pacifica, CA.	49 CFR 172.504, 173.118, 173.244, 173.3, 173.345, 173.346, 173.359, 173.370, 173.377, 175.3, 175.33, Part 172, Subpart E.	To become a party to exemption 9168. (Modes 1, 2, 4.)
9245–X	Contico Container, Norwalk, CA	49 CFR 178.19, Part 173, Subpart D, F	To authorize manufacture, marking and sale of non-DOT specification removable head molded polyethylene containers without overpeck, for transportation of corrosive and flammable liquids. (Modes 1, 2, 3.)
9393–X	Sexton Can Company, Inc., Cambridge, MA.	49 CFR 173.304(a), 175.3, 178.65	To authorize rail and cargo vessel as additional modes of transportation. (Modes 1, 2, 3, 4.)
9407–N	Eastman Kodak Company, Rochester, NY.	49 CFR 173.204(d)	To authorize use of shipping papers bearing a preprinted shippers certificate. (Modes 1, 2, 3, 4, 5.)
9499–X	Cleveland Container Corporation, Cleveland, OH.	49 CFR 178.19, Part 173, Subparts, D, F	To authorize manufacture, marking and sale of 3½, 5, 5½, and 6-gallon capacity DOT Specification 35 removable head polyteylene drums, for shipment of corrosive and flammable liquids. (Modes, 1, 2, 3.)
9513–X	American Cyanamid Company, Wayne, NJ.	49 CFR 173.343, 173.377	To authorize transport of an organic phosphate formulation in bulk motor vehicle. (Mode 1.)
9758–X	Camping Gaz Int'l (nee Application des Gaz S.A.) Paris, France.	49 CFR 173.304(d)(3)(ii), 178.33	To authorize shipment of Butane, Classed as flammable gas, in non-DOT specification nonrefillable metal containers comparable to DOT Specification 2P except for diameter and volume. (Modes 1. 2. 3.)
9769–X	CECOS International, Inc., Livingston, LA	49 CFR 176.83, 177.848	To authorize transport of trifluoromethane, in insulated DOT Specification MC-331 tank motor vehicles, and DOT Specification 105A600W tank cars. (Modes 1, 2, 3.)
9868–N	Atochem North America, Buffalo, NY	49 CFR 173.224	To authorize a dicumyl peroxide solution, classed as an organic peroxide, for shipment in DOT Specification MC–331 or MC–312 cargo tanks. (Mode 1.)
9881–P	LND, Inc., Oceanside, NY	49 CFR 173.302, 175.3	To become a party to exemption 9881. (Modes 1, 2, 3, 4.)
9887–P	Containers and Pressure Vessels, Ltd., of Ireland, Monaghan, Ireland.	49 CFR 172.203, 173.318, 173.320, 176.30, 176.76(H), 177.840, 178.338add.	To become a party to exemption 9887 (Modes 1, 2, 3.)
10051–N	Atlantic Coast Stevedores, Inc., Elizabeth, NJ.	49 CFR 171.12(d), 176.11(a)(2)(i)	To authorize shipment of radioactive materials in accordance with the IMDG Code in lieu of 49 CFR. (Modes 1, 3.)
10068–N	Boliden Mineral AB, Skelleftehamn, Sweden.	49 CFR 173.366	To authorize shipment of arsenic trioxide classed as a Poison B, in flexible, woven, polypropylene intermediate bulk containers with a polyethylene inner liner. (Modes 1, 2, 3.)
10087–N	HLA Engineers, Inc., Dallas, TX	49 CFR 173.124(a)(6)	To authorize shipment of Ethylene oxide classed as a flammable liquid in a 6076 gallon stainless steel DOT Spec 51 portable tank insulated by a 4" polyurethane foam and a 20 gauge stainless steel jacket. (Modes 1, 2, 3.)
10123–N	Swiss Aluminum Ltd., Zurich, Switzerland	49 CFR 173.302, 173.304, 173.305, 175.3, 178,46.	To manufacture, mark, and sell a non-DOT specification ERP cylinder similar to the DOT specification 3AL cylinder for shipment of flammable and non-flammable gases. (Mode 1.)
10167–N	FIBA Compressed Gas Equipment, Westboro, MA.	49 CFR 173.302, 173.304, 173.305, 173.306, 173.34(h).	To authorize repair of DOT Specifications 3A, 3AA, 3B and 3C cylinders by allowing peening off and on of collar/neckrings and replacement of footrings by removal with an air driven abrasive blade leaving the existing tab and stick welding on new footring to tab. (Mode 1.)
10188–N	Chevron U.S.A., Inc., San Francisco, CA	49 CFR 173.119	To authorize shipment of crude oil petroleum classed as a flammable liquid in non-DOT specification, 5-gallons 12-gauge wall-thickness stainless steel containers not to exceed 4 containers in a steel frame, fiberglass reinforced transport cart. (Modes 1, 3.)
10188–P	Chevron Pipe Line Company, San Francisco, CA.	49 CFR 173.119	To become a party to exemption 10188 (Modes 1, 3.)
10188–N	Point Arguello Pipeline Company, San Francisco, CA.	49 CFR 173.119	To become a party to exemption 10188 (Modes 1, 3.)
10220–N	Martin Marietta Corporation, Denver, CO	49 CFR 172.500, 173.77, 177.821	To authorize shipment of space launch hardware, containing detonating cord, Class A explosive in a vehicle without placarding transported over a specially designated route by commercial carrier. (Mode 1.)
10240–N	Ethyl Corporation, Baton Rouge, LA	49 CFR 173.252(a)(4)(ii)	To authorize shipment of bromine, classed as a corrosive material in MC–312 cargo tanks constructed of nickel clad steel of ⅜-inch total thickness. (Mode 1.)

WITHDRAWAL EXEMPTIONS—Continued

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10250–X	Olin Hunt Specialty Products, Inc., West Paterson, NJ	49 CFR 173.266	To authorize transport of a hydrogen peroxide solution, in a cylindrical steel overpack, straight sided, enclosing a polyethylene container of 101 liters capacity. (Modes 1, 2, 3.)
10251–X	Olin Hunt Specialty Products, Inc., West Paterson, NJ.	49 CFR 173.272	To authorize use of a non-DOT specification container consisting of an inner polyethylene bottle with a FRP outer housing, for the transportation of adifuric acid solutions, not exceeding 96% concentration. (Modes 1, 2, 3.)
10299–N	E. I. du Pont de Nemours and Company, Inc., Wilmington, DE	49 CFR 172.2(a), 173.24(c)(1)	To authorize shipment of haz. materials (other than class A or B explosives or radioactive materials) in a package (other than compressed gas cylinder or a package of more than 450 liters capacity) marked with the UN packaging symbol & appropriate markings required by Annex I of the IMDG code. (Modes 1, 2, 3.)
10274–N	Chemtech Industries, Inc., St Louis, MO	49 CFR 173.299	To authorize shipment of etching acid, liquid, n.o.s., classed as a corrosive material in 5000 gallon capacity, lined MC–312 cargo tanks. (Mode 1.)
10276–N	Great Lakes Chemical Corporation El Dorado, AR	49 CFR 173.252(a)(4)	To authorize shipment of bromine, classed as a corrosive material in DOT Specification MC-310 or MC-312 cargo tanks with a polyvinylidene fluoride lining. (Mode 1.)
10294–N	Great Lakes Chemical Corporation, El Dorado, AR.	49 CFR 173.314	To authorize shipment of Bromotrifluoromethane, classed as nonflammable gas, in a DOT Specification 110A500W tank car. (Mode 1.)
10296–N	Explosive Technologies International, Wilmington, DE.	49 CFR 173.14(a)(i)	To authorize shipment of ammonium nitrate-fuel oil mixture, classed as blasting agent, in collapsible polyethylene-lined woven polypropylene bags, with a capacity not to exceed 2,250 pounds each, on pallet constructed of ¾ inch plywood deck with 2 x 5 wooden runners. (Mode 1.)
10299–N	M&T Chemicals Inc., Woodbridge, NJ	49 CFR 173.247	To authorize shipment of Tin Tetrachloride anhydrous, classed as a corrosive material in a DOT Specification 6D/2SL container. (Modes 1, 2, 3.)
10317–N	Southern Air Transport, Inc., Miami, FL	49 CFR 175.30, 172.101 table, column 6b.	To authorize a one-time shipment of rocket ammunition with explosive projectile, Class A explosive, which is forbidden for shipment by aircraft. (Mode 4.)
10322–N	Carleton Technologies, Inc., Orchard Park, NY.	49 CFR 173.302, 175.30, 178.65	To manufacture, mark and sell a non-DOT specification cylinder to be used as part of a pneumatic power supply system used for shipment of nitrogen or helium, classed as compressed gas. (Modes 1, 2, 4.)
10329–N	Thiokol Corporation, Brigham City, UT	49 CFR 173.92(b)	To authorize shipment of a rocket motor, Class B explosive, in a propulsive state with igniters installed, contained in a specially designed packaging configuration. (Mode 1.)
10333–N	Van Leer Nederland B.V. Steel Containers, 3633 AK Vreeland, Netherlands.	49 CFR 178.116–6(a), Part 173 Subparts D, E, F and H.	To manufacture, mark and sell non-DOT specification 55 gallon capacity, 1 millimeter thick drums for shipment of those commodities authorized in DOT specification 17E 20/18 gauge drums. (Modes 1, 2, 3.)
10406–N	Boner, Inc.—Plastic Molding Div., Winnipeg Plant, Winnipeg, Manitoba, CN.	49 CFR 173 Subpart F, 173.119, 173.256, 173.266, 178.19, 178.241.	To manufacture, mark and sell a 105 gallon capacity non-DOT specification reusable polyethylene drum enclosed in a plastic exterior frame for shipment of certain flammable, oxidizer and corrosive liquids. (Modes 1, 2, 3.)
10416–N	Allied Universal Corporation, Miami, FL	49 CFR 173.263	To authorize the transportation of DOT–2E bottles of hydrochloric acid, classed as corrosive material, overpacked in open-head DOT–34 55 gallon drums. (Mode 1.)
10419–P	Hill Brothers Chemical Company, Phoenix, AZ.	49 CFR 174.67(i)	To become a party to exemption 10419 (Mode 2.)
10419–P	Olin Chemicals, Stanford, CT	49 CFR 174.67(i)	To become a party to exemption 10419 (Mode 2.)
10436–X	Sandox Chemicals Corp., Charlotte, NC	49 CFR 173.366	To authorize use of insulated DOT Specification MC–307 cargo tanks, for shipment of a certain Class B poison. (Mode 1.)
10472–N	General Chemical Corporation, Parsippany, NJ.	49 CFR 173.274	To authorize the transportation of fluosulfonic acid, classed as corrosive material, in DOT Specification 111A60W7 stainless steel tank cars. (Mode 2.)
10526–N	Akzo Chemicals Inc., Chicago, IL	49 CFR 173.121	To authorize transportation of carbon disulfide, classed as flammable liquid, in DOT Specification 51 portable tanks. (Modes 2, 3.)
10549–N	Astrotech Space Operations, L.P. Silver Spring, MD	49 CFR 173.145, 173.326, 173.336	To authorize shipment of non-DOT specification propellant transfer tanks containing residual amounts of either monomethylhydrazine classed as a flammable liquid or nitrogen tetroxide, classed as a poison A (Modes 1, 3.)
10560–N	Cryogas Engineering Ltd., Vancouver, B.C., Canada.	49 CFR 172.101, 173.315(a)	To authorize the use of a non-DOT specification cargo tank for transportation of flammable gases. (Mode 1.)
10604–X	Werkzeugmaschinentabrik Oerlikon-Buhrle AG, Zurich, Switzerland.	49 CFR 173.56, 173.60, 173.79, 173.92	To authorize the transportation of rocket motors, explosive projectiles, booster, explosive and igniter, rocket motor aboard cargo aircraft. (Mode 4.)
10630–N	Autotech Composite, Inc., Huntington Beach, CA	49 CFR 173.302(a)(1), 173.304(a), 175.3	To authorize the manufacture, mark and sell of non-DOT specification cylinders for use in transporting flammable and nonflammable gases. (Modes 1, 2, 3, 4, 5.)
10657–N	Bioqual, Inc., Rockville, MD	49 CFR 173.418(c)	To authorize a one time only, short distance, domestic shipment of a radioactive material contained in a specially designed packaging which is only authorized for export and import shipments. (Mode 1.)

Denials

6971–X..... Request by Ultra Scientific, Inc., North Kingstown, RI to authorize an alternative method of packaging for reshippers who are returning the material to the holder of the exemption denied June 3, 1991.

7080–P..... Request by Ronson Aviation, Inc., Trenton, NJ to authorize carriage of non-fissile radioactive materials aboard cargo-only aircraft when the combined transport index exceeds 50.0 and/or the separation criteria cannot be met denied April 3, 1991.

7625–X..... Request by Hydrite Chemical Company Milwaukee, WI to authorize transport of certain hazardous materials in DOT Specification 56 portable tanks denied October 15, 1991.

8306–X..... Request by Caspersen, Inc. Glencoe, IL to authorize carriage of non-fissile radioactive materials packages via motor vehicles when their combined transport index exceeds 50 and/or the separation distance criteria cannot be met denied October 3, 1990.

9144–X..... Request by Cajun Bag & Supply Company Crowley, LA to renew and to authorize cargo vessel as additional mode of transportation denied November 16, 1990.

9350–P..... Request by A. B. Chance Company Centralia, MO to authorize use of a non-DOT specification seamless molded biphenolic epoxy cylinder, for shipment of a nonflammable gas denied December 18, 1990.

9429–N ..... Request by Witch Industries, Inc., South Houston, TX to manufacture, mark and sell non-DOT specification cargo tanks similar to DOT Specification MC–307/312 except for bottom outlet valve variations, for shipment of various flammable or corrosive waste liquids or semi-solids denied March 14, 1991.

9635–N ..... Request by J. J. & A. J., Inc. Anaheim, CA to extend the periodic retest period for 3A, 3AX, 3AA, 3AAX and 3T cylinders from 5 years to 10 years when they successfully pass both the required hydrostatic test and the acoustic emission test denied April 3, 1991.

Denials—Continued

9988–N ..... Request by McDonnell Douglas Corporation St. Louis, MO to authorize shipment of limited quantities of Toluene and Methyl ethyl ketone, classed as Flammable liquid, without shipping papers and without marking the packaging denied June 7, 1991.

10002–N ... Request by Virginia Electric and Power Company Richmond, VA to authorize shipment of Nitrogen and Sulfur Hexafluoride, both classed as Nonflammable gas, without placards although the combined gross weight of the materials exceeds 1000 pounds denied May 31, 1991.

10044–N ... Request by Portersville Sales and Testing, Inc., Portersville, PA to authorize DOT specification 3AAX and 3T cylinders to be periodically retested by acoustic emission equipment instead of hydrostatic retest and to allow latitude in external inspection and other deviations related to acoustic emission testing denied July 12, 1990.

10044–P .... Request Western Sales & Testing of Amarillo, Inc. Amarillo, TX to authorize DOT specification 3AAX and 3T cylinders to be periodically retested by acoustic emission equipment instead of hydrostatic retest and to allow latitude in external inspection and other deviations related to acoustic emission testing denied July 12, 1990.

10063–N ... Request by Spex Industries Edison, NJ to authorize shipment of both solutions of nitric acid and hydrochloric acid in concentrations of 5% or less classed as corrosive materials to be shipped as non-hazardous/non-regulated materials in bottles of 500 ml or less overpacked in Specification 12B fiberboard box denied February 22, 1991.

10124–N ... Request by Arrowhead Industrial Services, Inc. West Orange, NJ to manufacture mark and sell non-DOT specification steel cylinders similar to DOT specification 3T except one end is not concaved to pressure and water capacity below 100 pounds with service pressures from 1800 psi to 2265 psi for shipment of those gases authorized in DOT–3AA and 3T cylinders denied March 21, 1991.

Denials—Continued

10148–N ... Request by Pro-Tech-Tube Inc. Kansas City, MO to authorize shipment of a viable microorganism classed as an etiologic agent in an inner container surrounded with an absorbent material impregnated with a germicidal pesticidal substance overpacked in a metal tube denied july 16, 1991.

10152–N ... Request by Asahi Seisakusho Co., Ltd Saitama-Japan to authorize manufacture marking and sale of a non-DOT cylinder similar to the 3T cylinder for transporting high pressure air, oxygen, helium, oxygen and helium mixture (50% oxygen maximum) classed as nonflammable gases denied March 20, 1991.

10201–N ... Request by Amax Metals Recovery, Inc. Braithwaite, LA to authorize shipment of a spent catalyst, flammable solid, n.o.s., classed as a flammable solid in non-DOT specification 1-ton flexible intermediate bulk containers with a plastic liner denied March 13, 1991.

10215–N ... Request by Champagne Specialties Inc. Fairport, NY to authorize removal & replacement of footrings on cylinders by welding or brazing on DOT 3A, 3AA, 3B, & 3C cylinders used for transport of liquified and non-liquified compressed gases, classed as flammable and nonflammable denied December 6, 1990.

10218–N ... Request by Rederit Otto Danielsen Holte, Denmark to authorize use of a fire hose with a nozzle which is permanently open but is activated with a pump switching in a cargo vessel denied April 10, 1991.

10233–N ... Request by Schultz Werke GmbH & Co. KG D–5418 Selters, Germany to authorize manufacture, marking and sale of a non-DOT specification fiber drum with top and bottom of 46 mm steel for shipment of those materials authorize for shipment in a 21C fiber drum denied December 4, 1990.

10238–N ... Request by Poly Processing Company, Inc. Monroe, LA to authorize manufacture, marking, and sale of 330-gallon on-DOT specification polyethylene tanks for use in the transportation of various flammable, corrosive and oxidizing materials denied May 8, 1991.

Denials—Continued

10243–N ... Request by BD Technology, Inc. Arcadia, CA to authorize shipment of lab packs without writing the hazardous substance in parenthesis, as an additional description, on both the container and shipping document but to mark "RQ" in association with shipping name on manifest and to attach an inventory sheet to shipping papers denied August 27, 1991.

10248–N ... Request by Milan Box Corporation Milan, TN to authorize manufacture, marking and sale of non-DOT specification plywood pallet boxes with a fitted 2 ply, 4 mil polyethylene inner bag for use in transporting flammable liquids and ORM materials denied November 7, 1990.

10264–N ... Request by Reagent Chemical & Research, Inc. Port Neches, TX to authorize use of lead frangible discs on nonpressure tank cars to be used in transporting aqueous hydrochloric acid, classed as corrosive material denied May 31, 1990.

10268–N ... Request by Biefa-Feiser GmbH Attendorn, Germany to authorize manufacture, marking and sale of non-DOT Specification 55 gallon aluminum drums for shipment of allyl isothiocyanate classed as a poison B denied March 21, 1991.

10271–N ... Request by McOCO, Inc. Houston, TX to authorize transport of certain class A, B, and C explosives by cargo air which are forbidden for shipment by air or exceed authorized quantity limitation prescribed for air shipment denied October 30, 1990.

10275–N ... Request by Degussa Corporation Ridgefield Park, NJ to authorize hydrogen peroxide solution not exceeding 52 percent contained in DOT Specification 57 portable tanks to be offered for shipment with other materials in the same truck by common carriers and/or private carriers denied July 12, 1990.

10290–N ... Request By Crown Sheetmetal LTD. Invercargill, New Zealand to authorize manufacture, marking and sale of a non-DOT specification stainless steel cylinder similar to the DOT Specification 4BW cylinder for shipment of liquified petroleum gas classed as flammable gas denied October 30, 1990.

Denials—Continued

10293–N ... Request by Tremco Incorporated Beachwood, OH to authorize shipment of a corrosive liquid classed as a corrosive material, in a 5 gallon laminated composite bag containing 4.5 gallons corrosive liquid on top of a non-hazardous material separated by a 3 mil polyethylene sheet, in a non-DOT 55 gallon 18/20 gauge steel drum denied March 21, 1991.

10304–N ... Request by Fibre Glass-Evercoat Company, Inc. Cincinnati, OH to authorize shipment of methyl ethyl ketone, peroxide, classed as organic peroxide, in 11cc or 40cc securely closed plastic tubes, overpacked in a plastic pail denied March 21, 1991.

10306–N ... Request by Seamless Cylinder International, Inc. Sault Ste. Marie, MI to manufacture, mark and sell DOT specification 4BW cylinders with electric resistance welded seam containing fire extinguisher powder, classed as nonflammable gas with pressurized cylinder filled with nitrogen gas denied March 22, 1991.

10331–N ... Request by Peerless Tube Company, Inc. Bloomfield, NJ to authorize shipment of non-flammable gas in one-piece monobloc non-DOT specification cylinder denied December 13, 1991.

10339–N ... Request by Cryogenic Services, Inc. Canton, GA to authorize the manufacture, mark and sell of non-DOT specification cylinders comparable to DOT specification 4BW, except they are constructed of 304 stainless steel, for shipment of liquified petroleum gas denied November 16, 1990.

10367–N ... Request by Ace Striping Company, Inc. Shreveport, LA to authorize shipment of paint, classed as a flammable liquid, in non-DOT specification metal portable tank denied June 7, 1991.

10371–N ... Request by Bruin Engineered Parts, Inc. Midland, Ontario, Canada to manufacture, mark and sell non-DOT specification cylinders similar to 3E construction with service pressure of 750 psi containing non-flammable gas denied December 13, 1991.

10405–N ... Request by Pestcon Systems, Inc. Raleigh, NC to authorize transportation of aluminum phosphide, classed as a flammable solid, in private-owned pest control vehicles without placards denied June 3, 1991.

Denials—Continued

10417–N ... Request by Ecolab, Inc. St. Paul, MN to manufacture, mark and sell an inner multilayer heat sealed plastic film bag of 2.5 to 5 gallon capacity overpacked in a corrugated box for shipment of corrosive liquids for which DOT 34 and 2U specification container denied September 26, 1991.

10420–N ... Request by Fore Way Express, Inc. Wausau, WI to authorize the transportation of material classed as flammable liquids, solids or gases in enclosed trailers with installed nose mounted heater and thermostat exposed inside the trailer denied September 21, 1990.

10447–N ... Request by Nuclear Assurance Corporation Norcross, GA to authorize transport of irradiated reactor fuel over a route not permitted by 49 CFR 177.825(b) denied August 31, 1990.

10462–N ... Request by McDonnell Douglas Helicopter Company Mesa, AZ to authorize shipment of rocket motors with igniters installed, Class B explosives in DOT approved shipping container and packaging denied September 17, 1991.

10484–N ... Request by Active Aero Charter, Inc. Belleville, MI to authorize carriage of Class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment denied October 9, 1991.

10485–N ... Request by M & M Industries, Inc. Chattanooga, TN to authorize the manufacture, marking and sell of non-DOT specification polyethylene drums with 4" opening for transportation of corrosive, flammable, poison and oxidizer materials for which DOT Specification 34 and 21C containers are authorized denied June 14, 1991.

10503–N ... Request by Photographic Solutions, Inc. Buzzards Bay, MA to authorize the transportation of limited quantities of certain products to be shipped as non-regulated commodities denied March 5, 1991.

10517–N ... Request by Nalco Chemical Company Naperville, IL to authorize the retesting of DOT-Specification 57 portable tanks fabricated of stainless steel at five-year intervals denied April 10, 1991.

Denials—Continued

10533–N ... Request by Ashland Chemical, Inc. Columbus, OH to eliminate the periodic retesting, reinspection and marking requirements for DOT-specification 4BW cylinders authorized for transportation of triethylamine, classed as flammable liquid denied March 16, 1991.

10500–N ... Request by AirVantage, Inc. St. Paul, MN to authorize the transportation of Class A, B, and C explosives which are forbidden for shipment by air or in quantities which exceed those prescribed for shipment by air, by cargo-only aircraft denied October 9, 1991.

10001–N ... Request by Pack-Lite System, Inc. Tulsa, OK to authorize the manufacture, marking and sell of a non-DOT specification polyethylene shipping container for use in transporting various commodities denied September 26, 1991.

10632–N ... Request by Technical Manufactured Products Jasper, GA to authorize the use of 304 stainless steel in construction of specification 4BW cylinders to be used for transportation of liquified petroleum gas denied August 15, 1991.

Issued in Washington, DC, on January 10, 1992.

J. Suzanne Hedgepeth,

Chief, Exemptions Branch Office of Hazardous Materials Exemptions and Approvals.

BILLING CODE 4910–60–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Art Advisory Panel; Closed Meeting

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of closed meeting of Art Advisory Panel.

SUMMARY: Closed meeting of the Art Advisory Panel will be held in Washington, DC.

DATES: The meeting will be held April 8 and 9, 1992.

FOR FURTHER INFORMATION CONTACT: Karen Carolan, CC:AP:AS:4 901 D Street, SW., Washington, DC 20024 Telephone No. (202) 401–4128, (not a toll free number)

Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. app. (1988), that a closed meeting of the Art Advisory Panel will be held on April 8 and 9, 1992, in room 118 beginning at 9:30 a.m., Aerospace Center Building, 901 D Street, SW., Washington, DC 20024.

The agenda will consist of the review and evaluation of the acceptability of fair market value appraisals of works of art involved in federal income, estate, or gift tax returns. This will involve the discussion of material in individual tax returns made confidential by the provisions of section 6103 of title 26 of the United States Code.

A determination as reqired by section 10(d) of the Federal Advisory Committee Act has been made that this meeting is concerned with matters listed in section 552b(c) (3), (4), (6), and (7) of title 5 of the United States Code, and that the meeting will not be open to the public.

The Commissioner of Internal Revenue has determined that this document is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required. Neither does this document constitute a rule subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Shirley D. Peterson,

Commissioner.

BILLING CODE 4830–01–M

Performance Review Board

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of members of Senior Executive Service Performance Review Board.

EFFECTIVE DATE: Performance Review Board effective March 1, 1992.

FOR FURTHER INFORMATION CONTACT: DiAnn Kiebler, HR:H:E, room 3515, 1111 Constitution Avenue, NW., Washington, DC 20224, Telephone No. (202) 566–4633, (not a toll free number).

SUPPLEMENTARY INFORMATION: Pursuant to section 4314(c)(4) of the Civil Service Reform Act of 1978, the members of the Internal Revenue Service's Senior Executive Service Performance Review Board for senior executives other than Regional Commissioners, Assistant Commissioners and executives in Inspection and the Office of the Commissioner are as follows:

Michael Dolan, Deputy Commissioner, Chairperson
Thomas Coleman, Regional Commissioner, Western Region
Walter Hutton, Assistant Commissioner (Information Systems Management)
Leon Moore, Regional Commissioner, Central Region
Inar Morics, Assistant Commissioner (Criminal Investigation)
Judy Van Alfen, Assistant Commissioner (Returns Processing)
Helen White, Assistant to the Commissioner (Equal Opportunity)

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the Federal Register for Wednesday, November 6, 1978 (43FR52122).

Shirley D. Peterson,

Commissioner.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee; Generalized System of Preferences (GSP); the Expiration and Renewal of the GSP Program; Public Hearings and the Solicitation of Public Comments on GSP Renewal; Opportunity for Public Comment on USITC Advice in the Special GSP Review for Central and Eastern Europe

AGENCY: Office of The United States Trade Representative.

ACTION: Solicitation of Public Comments on the Renewal of the Generalized System of Preferences Program and on the USITC Advice in the Special GSP Review.

SUMMARY: The Generalized System of Preferences (GSP) grants duty-free treatment to certain products that are imported from developing countries. The GSP program, which was enacted by Congress in 1974 and reauthorized in 1984, expires on July 3, 1993. The Trade Policy Staff Committee (TPSC) is initiating its consideration of the renewal of the GSP program. In connection with this review, the TPSC will hold public hearings in June 1992 and is soliciting public comments. Interested parties are invited to testify and submit written comments on the renewal of the GSP program. The views of all interested parties will be considered by the TPSC in formulating a proposal to assist Congress in developing options regarding the reauthorization of the GSP program. In addition, this notice solicits public comment on the advice rendered by the U.S. International Trade Commission (USITC) in the Special GSP Review for Central and Eastern Europe.

FOR FURTHER INFORMATION CONTACT: GSP Subcommittee of the Trade Policy Staff Committee, Office of the United States Trade Representative, room 517, 600 17th Street, NW., Washington, DC 20506. The telephone number is (202) 395–6971.

SUPPLEMENTARY INFORMATION:

I. GSP Reauthorization: Background

The GSP program offers limited duty-free access to the U.S. market for certain eligible products that are imported from designated beneficiary developing countries. The GSP program is authorized under title V of the Trade Act of 1974, as amended (the 1974 Act) (19 U.S.C. 2461–2465). The GSP program was renewed in the Tariff and Trade Act of 1984.

In reauthorizing the GSP program in 1984, Congress provided that the program's purpose is to: (1) Promote the development of developing countries, which often need temporary preferential advantages to compete effectively with industrialized countries; (2) Promote the notion that trade, rather than aid, is a more effective and cost-efficient way of promoting broad-based sustained economic development; (3) take advantage of the fact that developing countries provide the fastest growing markets for U.S. exports and that foreign exchange earnings derived by developing countries from exporting under the GSP program can lead to further U.S. exports; (4) allow for the consideration of the fact that there are significant differences among developing countries with respect to their general development and international competitiveness; (5) encourage the providing of increased trade liberalization measures, thereby setting an example to be emulated by other industrialized countries; (6) recognize that a large number of developing countries must generate sufficient foreign exchange earnings to meet international debt obligations; (7) promote the creation of additional opportunities for trade among developing countries; (8) integrate developing countries into the international trading system with its attendant responsibilities in a manner commensurate with their development; and, (9) encourage developing countries (a) to eliminate or reduce significant barriers to trade in goods and services and to investment, (b) to provide effective means under which foreign nationals may secure, exercise and enforce exclusive intellectual property rights, and (c) to afford workers internationally recognized worker rights. Congress further provided that the purposes of the GSP program should be pursued in a manner that conforms to U.S. obligations under the General Agreement on Tariffs and Trade and does not adversely affect U.S. producers and workers.

As provided in the GSP regulations (15 CFR 2007), the GSP Subcommittee of the TPSC conducts an Annual GSP Review each year. The GSP Subcommittee receives and considers petitions filed by interested parties in the private sector to add products to the GSP program, to remove products from the GSP program or to otherwise modify product coverage. It should be noted that the GSP law expressly excludes certain products from even being considered for GSP eligibility, namely certain textile and apparel articles, certain watches, certain footwear and leather goods, import-sensitive electronic, steel and glassware products and any other articles determined to be import sensitive in the context of the GSP program (section 503(c)(1) of the 1974 Act).

In considering modifications to the GSP program, the GSP Subcommittee considers: (1) The effect such action will have on furthering the economic development of developing countries through the expansion of their exports; (2) the extent to which other major developed countries are undertaking a comparable effort to assist developing countries by granting generalized preferences with respect to imports of products of such countries; (3) the anticipated impact of such action on U.S. producers of like or directly competitive products; and (4) the extent of the beneficiary developing country's competitiveness with respect to eligible articles (section 501 of the 1974 Act).

The GSP Subcommittee also considers petitions that seek to have various "country practices" of beneficiary countries reviewed (section 502(b) and (c) of the 1974 Act). The country practice criteria include, for example, market access, barriers to trade in services, worker rights, intellectual property rights and uncompensated expropriation.

In the Annual Review, the GSP Subcommittee implements the so-called competitive need limits (section 504(c) of the 1974 Act). The competitive need limits provide that a country will lose GSP benefits for a particular product if the country provides more than 50 percent of total U.S. imports of the product or more than a fixed dollar amount of a particular product in a calendar year (about $96 million for calendar year 1991). The application of the competitive need limits may be waived under certain conditions (section 504(c)(3) of the 1974 Act), and the GSP Subcommittee considers competitive need limit waiver petitions in the Annual GSP Review. Also, "reduced" competitive need limits may be applied if a beneficiary developing country is found to be "sufficiently competitive" with respect to any eligible article (section 504(c)(2) of the 1974 Act).

Lastly, the GSP Subcommittee considers "de minimis waivers" for low trade products (section 504(d)(2) of the 1974 Act) and redesignation determinations (section 504(c)(5) of the 1974 Act) in the Annual GSP Review. De minimis waivers may be granted to a country that exceeds the 50 percent competitive need limit on a particular product for which total U.S. imports do not exceed about $11 million. Countries that have lost GSP benefits on a product in a prior year become eligible to be "redesignated" for GSP benefits when imports of the product fall below the competitive need limits in a subsequent year.

II. GSP Reauthorization: Public Hearings and the Opportunity for Public Comment

The GSP Subcommittee of the TPSC invites public comments on the renewal of the GSP program. Interested parties may file a written submission on any aspect of the GSP program by May 8, 1992. If an interested party wishes to present oral testimony at the public hearings, then they must submit a request by May 20, 1992 to appear at the hearings. The request to appear at the hearing must include a written version of their oral statement. All submissions, requests or oral statements should be submitted to the GSP Subcommittee, Office of the U.S. Trade Representative, room 517, 600 17th Street, NW., Washington, DC 20506.

A. Written Submissions

Interested parties may file a written submission with the GSP Subcommittee on any aspect of the operation, administration or effect of the GSP program by 5 p.m. Wednesday, May 6, 1992. All written submissions must include an original and fourteen copies (14) in English.

B. Public Hearings

Public hearings on the renewal of the GSP program will be held on a date in June 1992 at a location in Washington, DC to be announced. The hearings will be open to the public and a transcript of the hearings will be made available for public inspection or purchase from the reporting company. No electronic media coverage will be allowed.

All interested parties wishing to make an oral presentation at the hearings must submit the name, address, and telephone number of the witness(es) representing their organization to the GSP Subcommittee by 5 p.m. Wednesday, May 20, 1992. Requests to present oral testimony in connection with public hearings should be accompanied by an original and fourteen (14) copies, in English, of a written version of their oral statement and should be received by 5 p.m. Wednesday, May 20, 1992. Oral testimony before the GSP Subcommittee must be in English and will be limited to ten-minute presentations that summarize or supplement information contained in written submissions or written versions of oral statements submitted for the record.

C. Information Subject to Public Inspection

All submissions will be subject to public inspection by appointment with the staff of the USTR public reading room. Appointments may be made from 10 a.m. to noon and 1 p.m. to 4 p.m. by calling (202) 395–6186.

III. Special GSP Review: Public Comment on USITC Advice

The TPSC initiated a Special GSP Review for Central and Eastern Europe on August 8, 1991 (56 FR 37758). On September 18, 1991, the TPSC extended the deadline for the submission of petitions in the Special GSP Review to October 18, 1991 (56 FR 47266). On December 18, 1991, the TPSC announced the list of products that would be considered for duty-free GSP treatment in the Special GSP Review (56 FR 65750). That notice also announced that the TPSC would seek USITC advice and would provide an opportunity for public comment on the nonconfidential USITC advice in March 1992. The public version of the USITC advice on the products being considered in the Special GSP Review will be available from the USITC on March 17, 1992, by calling the Office of the Secretary of the USITC at (202) 205–1806.

The GSP Subcommittee of the TPSC invites public comments on the nonconfidential USITC advice rendered in the Special GSP Review. Comments on the nonconfidential USITC advice should be submitted to the GSP Subcommittee of the TPSC by 5 p.m. Tuesday, March 31, 1992. All such submissions should conform to the GSP regulations set forth at 15 CFR 2007. All submissions should identify the product of interest in terms of the current numbering and nomenclature of the Harmonized Tariff Schedule of the United States and, if possible, the assigned case number that is contained in the Annex to the December 18 **Federal Register** notice (56 FR 65750).

All submissions must include an original and fourteen copies (14) in English. All submissions will be subject to public inspection by appointment with the staff of the USTR public reading room, except for information granted "business confidential" status pursuant to 15 CFR 2003.6 and other qualifying information submitted in confidence pursuant to 15 CFR 2007.7. If the document contains business confidential information, an original and fourteen (14) copies of a nonconfidential version of the submission along with an original and fourteen (14) copies of the confidential version must be submitted. In addition, the document containing confidential information should be clearly marked "confidential" at the top and bottom of each page of the document. The version that does not contain business confidential information (the public version) should also be clearly marked at the top and bottom of each page (either "public version" or "nonconfidential").

David A. Weiss,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190–01–M

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Former Prisoners of War; Meeting

The Department of Veterans Affairs gives notice under Public Law 92–463 that a meeting of the Advisory Committee on Former Prisoners of War will be held in room 724, at VA Central Office, 801 I St., NW., Washington, DC 20001, from April 29, 1992, through May 1, 1992. The meeting will convene at 9 a.m. each day and will be open to the public. Seating is limited and will be available on a first-come, first-served basis.

The purpose of the Committee is to advise the Secretary of Veterans Affairs on the administration of benefits under title 38, United States Code, for Veterans who are former prisoners of war, and to make recommendations on the need of such veterans for compensation, health care and rehabilitation.

The Committee will receive briefing and hold discussions on various issues affecting health care and benefits delivery, including, but not limited to, the following: education and training of VA personnel involved with former prisoners of war; the status of privately and publicly funded research affecting former prisoners of war; past and current legislative issues affecting former prisoners of war; the various disabilities and sequelae of long-term captivity; and the procedures involved in processing claims for service-connected disabilities submitted by former prisoners of war.

Members of the public may direct questions or submit prepared statements for review by the Committee in advance of the meeting, in writing only, to Mr. J. Gary Hickman, Director, Compensation and Pension Service (21), room 275, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC, 20420. Submitted material must be received at least five business days prior to the meeting. Members of the public may be asked to clarify submitted material prior to consideration by the Committee.

A report of the meeting and a roster of Committee members may be obtained from Mr. Hickman.

Dated: March 4, 1992.

By Direction of the Secretary.

Diane H. Landis,

Committee Management Officer.

[FR Doc. 92–6118 Filed 3–16–92; 8:45 am]

BILLING CODE 8320–01–M

Wage Committee; Meetings

The Department of Veterans Affairs (VA), in accordance with Public Law 92–463, gives notice that meetings of the VA Wage Committee will be held on:

Wednesday, April 8, 1992, at 2 p.m.
Wednesday, April 22, 1992, at 2 p.m.
Wednesday, May 6, 1992, at 2 p.m.
Wednesday, May 20, 1992, at 2 p.m.
Wednesday, June 3, 1992, at 2 p.m.
Wednesday, June 17, 1992, at 2 p.m.

The meetings will be held in room 1161, Veterans Affairs Central Office, 810 Vermont Avenue, NW., Washington, DC. 20420.

The Committee's purpose is to advise the Chief Medical Director on the development and authorization of wage schedules for Federal Wage System (blue-collar) employees.

At these meetings the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules.

All portions of the meetings will be closed to the public because the matters considered are related solely to the internal personnel rules and practices of the Department of Veterans Affairs and

because the wage survey data considered by the Committee have been obtained from officials of private business establishments with a guarantee that the data will be held in confidence. Closure of the meetings is in accordance with subsection 19(d) of Public Law 92–463, as amended by Public Law 94–409, and as cited in 5 U.S.C. 552b(c) (2) and (4).

However, members of the public are invited to submit material in writing to the Chairperson for the Committee's attention.

Additional information concerning these meetings may be obtained from the Chairperson, VA Wage Committee, room 1161, 810 Vermont Avenue, NW., Washington, DC 20420.

Dated: March 6, 1992.

By Direction of the Secretary:

Diane H. Landis,

Committee Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 52
Tuesday, March 17, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 11 a.m., Monday, March 23, 1992.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Benefits proposals regarding the Office of Inspector General.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: March 13, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 3710–GX–M

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of March 16, 23, 30, and April 6, 1992.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of March 16

Tuesday, March 17

8:30 a.m.
Discussion of Readiness to Restart of the General Atomics—Sequoyah Fuels Facility (Public Meeting)

2:00 p.m.
Briefing on Activities of the Center for Nuclear Waste Regulatory Analysis (CNWRA) (Public Meeting)

Thursday, March 19

11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Week of March 23—Tentative

Wednesday, March 25

10:00 a.m.
Annual Briefing on Medical Use of Byproduct Material (Public Meeting)

11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Week of March 30—Tentative

Thursday, April 2

2:00 p.m.
Briefing on International Nuclear Reactor Safety for Russia and Eastern European Block Countries (Public Meeting)

3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Friday, April 3

10:00 a.m.
Briefing by ABB/CE on Status of System 80+ Application for Design Certification (Public Meeting)

Week of April 6—Tentative

Friday, April 10

11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Note: Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

To Verify the Status of Meeting Call (Recording)—(301) 504–1292.

CONTACT PERSON FOR MORE INFORMATION: William Hill (301) 504–1661.

Dated: March 12, 1992.

William M. Hill, Jr.,

Office of the Secretary.

Corrections

Federal Register
Vol. 57, No. 52
Tuesday, March 17, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Forest Service

Management for the Northern Spotted Owl; National Forests in Washington, Oregon, and California

Correction

In notice document 92-5710 beginning on page 8621 in the issue of Wednesday, March 11, 1992, make the following corrections:

On page 8621, in the second column, under **EFFECTIVE DATE**, in the seventh and eighth lines, "April 10, 1991" should read "April 10, 1992", both times it appears.

BILLING CODE 1505-01-D

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP91-229-005]

Panhandle Eastern Pipe Line Co.; Notice of Compliance Filing

Correction

In notice document 92-5473, appearing on page 8448, in the issue of Tuesday, March 10, 1992, the docket number was printed incorrectly, and should read as set forth above.

BILLING CODE 1505-01-D

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL89-48-001]

Wisconsin Power & Light Co.; Filing

Correction

In notice document 92-5643 appearing on page 8655 in the issue of Wednesday, March 11, 1992, in the second column, in the third line of the document, the date should read "March 2, 1992.".

March 17, 1992

Part II

Department of Education

34 CFR Part 770

Library Services and Construction Act State-Administered Program; Final Regulation

DEPARTMENT OF EDUCATION

34 CFR Part 770

RIN 1850-AA39

Library Services and Construction Act; State-Administered Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing the Library Services and Construction Act State-Administered Program. These regulations implement the Library Services and Construction Act (LSCA) Amendments of 1990 (Pub. L. 101-254). These regulations also support a number of components of AMERICA 2000, the President's education strategy.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the Federal Register or later if the Congress takes certain adjournments, with the exception of § 770.41. Section 770.41 will become effective after the information collection requirements contained in that section have been submitted by the Department of Education and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Klassen, Director, Public Library Support Staff, U.S. Department of Education, 555 New Jersey Avenue, NW., (Capitol Building, Room 402L), Washington, DC 20202-5571. Telephone: (202) 219-1303. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: LSCA State-administered programs provide States with funds to assist public libraries, often in cooperation with school or other specialized libraries, to provide information, both to those still in school and to those who have entered the work force. Under LSCA, libraries provide access to challenging subject matter at all levels, and provide a wide range of community programs, such as family literacy activities, adult literacy programs, tutoring programs for those learning English as a second language, story hours for children that contribute to their readiness to enter school, library services to child-care centers, drug prevention programs, and intergenerational programs for latchkey children. Through all of the LSCA activities, libraries are helping to implement AMERICA 2000, the President's strategy for meeting the national education goals.

(a) The LSCA Amendments of 1990, enacted on March 15, 1990, authorize Federal assistance through fiscal year 1994 for Titles I through III of the Act, and make other changes.

1990 Amendments to the Statute

(1) Title I (Library Services) has been amended by expanding the specific purposes for which Title I funds may be used to include intergenerational programs that match older adult volunteers with unsupervised school children after school hours to help them improve their reading skills, mobile library programs for child-care centers, library literacy centers coordinated by the State library administrative agency, and materials and programs aimed at preventing and eliminating drug abuse. Other amendments authorize the State to make subgrants to library systems or networks that include libraries other than public libraries, and assist libraries in making effective use of technology to improve services. Ratable reductions of grants to major urban resource libraries, to the extent that Federal allocations to the State are reduced or the 1990 Census shows the population of the city has decreased, are allowed, along with ratable reductions of maintenance-of-effort for institutional library services and library services to the physically handicapped to the extent that the populations served have declined.

(2) Title II (Public Library Construction) has been amended to allow libraries to acquire substantial technological equipment, whether or not it is part of the construction of a library facility. The amendments have also added a requirement that grantees follow policies and procedures in the construction of public libraries that will promote the preservation of resources to be used in the facilities constructed with Title II funds.

(3) Title III (Interlibrary Cooperation and Resource Sharing) has been amended to allow for the development of the technological capacity of libraries for interlibrary cooperation and resource sharing and provide that public and school libraries that cooperate to make school library resources available to the public when school is not in session may be reimbursed for those expenses. A new section 305 authorizes the use of Title III funds for preservation programs that are to be based on a Statewide preservation cooperation plan that identifies preservation objectives and specifies methods by which the State library administrative agency will work with libraries and other organizations concerned with preservation to develop plans, training, and service programs to ensure that endangered library and information resources are preserved systematically.

(b) On October 17, 1990, the Secretary published a notice of proposed rulemaking (NPRM) for this program in the Federal Register (55 FR 42152).

Major Changes to the Regulations

The following regulatory amendments reflect changes in the authorizing statute resulting from the 1990 amendments to the Act. As a result of these changes, various sections or paragraphs have been renumbered in these regulations. Some of the revisions to these regulations are minor; others are more significant. Among the provisions in the regulations implementing changes in the authorizing statute are the following:

- The definition for "handicapped" is deleted because the Act now contains a definition for "handicapped individual."
- The regulations specify a number of new activities for which State agencies may utilize funds provided under Title I of the Act, including the following:
  - —Intergenerational projects using adult volunteers to help latchkey children develop reading skills;
  - —Library services to child-care centers;
  - —Model library literacy centers to reduce the number of illiterate individuals and enhance their employment opportunities;
  - —Materials and projects aimed at preventing and eliminating drug abuse; and
  - —Making effective use of technology.
- The regulations describe new preservation projects that the Secretary funds under Title III, and permit a State to include in its long-range program a Statewide preservation cooperation plan.
- The regulations permit Title I grantees to make subgrants to library systems or networks that include libraries other than public libraries.
- The regulations permit the use of Title II grant funds for remodeling public libraries to ensure safe working environments.
- The regulations require an assurance that libraries receiving any funds under the Act will not discriminate in providing space for public meetings.
- The regulations permit ratable reductions in expenditures for State institutional library services and library services for the physically handicapped, and in maintenance of support for major urban resource libraries, in certain circumstances.
- The regulations modify the maintenance-of-effort requirements under Title I of the Act by identifying two discrete expenditure categories introduced by the 1990 amendments: State aid to public libraries and library systems and State funds expended directly by the State library administrative agency for statewide development of public library services.

In addition, the regulations provide criteria to be applied by the Secretary in determining whether a request by a State library administrative agency for a waiver of the maintenance-of-effort requirements at section 7(a)(2) of the Act will be granted.

(c) There are some significant changes in these final regulations resulting from the 154 public comments on the NPRM. The changes include the following:

- Guidance is provided in the responses to the commenters' requests for clarification of the terms "Development of public library services" under Title I, and "Information and building technologies" and "Enclosures or structures necessary to house equipment in public library buildings" under Title II.
- Additional guidance is provided to the States in the responses to the comments about how to determine the amount that a State library administrative agency must pay to a Major Urban Resource Library (MURL) if the Title I allocation is reduced or the MURL city's population has decreased.
- The criteria that will be applied by the Secretary in his review and consideration of any requests for waivers of the section 7(a)(2) maintenance-of-effort requirements have been revised to conform more closely to the new maintenance-of-effort provision.
- Minor editorial and technical revisions have been made.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, 25 parties submitted 154 comments on the proposed regulations. There were 4 comments that were not relevant to the NPRM concerning purchase of equipment (34 CFR 80.32); lease of equipment (34 CFR 80.36); recordkeeping (34 CFR 80.42); and nuclear fallout shelters (EO 11490). These commenters will receive direct answers to their comments. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed. An analysis of the comments and of the changes in the regulations since publication of the NPRM is published as an appendix to these final regulations. Substantive issues are discussed under the section of the regulations to which they pertain. One of the substantive issues was the commenters' concern with the meaning of the term "State aid." Under the new section 7(a)(2) maintenance-of-effort provision introduced in the 1990 amendments, State funds utilized for public library services must be identified under two separate categories: State aid and the direct expenditure by State library administrative agencies for the development of public library services. Since a definition of the term "State aid" was not previously proposed, the Secretary is seeking public comment on a definition through the separate NPRM published elsewhere in this issue of the Federal Register.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and to the regulations in 34 CFR part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program. (Please note that Federally recognized Indian tribal governments are not subject to Executive Order 12372.)

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 770

Aging—libraries, Child-care centers, Construction—libraries, Correctional institutions—libraries, Drug abuse, Education, Education of disadvantaged, Grant programs—education, Handicapped, Libraries, Limited English-speaking proficiency, Literacy, Mental health programs—libraries, Network(s), Penal institutions—libraries, Preservation, Prisons—libraries, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Numbers: 84.034 Public Library Services; 84.154 Public Library Construction; 84.035 Interlibrary Cooperation and Resource Sharing.)

Dated: December 5, 1991.

Lamar Alexander,

Secretary of Education.

The Secretary amends title 34 of the Code of Federal Regulations by revising part 770 to read as follows:

PART 770—LIBRARY SERVICES AND CONSTRUCTION ACT STATE-ADMINISTERED PROGRAM

Subpart A—General

Sec.

770.1 The Library Services and Construction Act State-Administered Program.
770.2 Who is eligible to apply for a grant under the State-Administered Program?
770.3 What regulations apply to the State-Administered Program?
770.4 What definitions apply to the State-Administered Program?

Subpart B—What Kinds of Activities Does the Secretary Assist Under This Program?

770.10 What types of projects may be funded under Public Library Services grants?
770.11 What types of projects may be funded under Public Library Construction and Technology Enhancement grants?
770.12 What types of projects may be funded under Interlibrary Cooperation and Resource Sharing grants?

Subpart C—How Does a State Apply for a Grant?

770.20 What must a State do to receive a grant under the State-Administered Program?
770.21 What must a State plan include?
770.22 What must a State include in a basic State plan?
770.23 What must a State include in a long-range program?
770.24 What must a State include in an annual program?

Subpart D—[Reserved]

Subpart E—What Conditions Must Be Met by a State and Its Subgrantees?

770.40 What matching requirements apply to a Public Library Services grant?

770.41 What are the basic maintenance-of-effort requirements for a Public Library Services grant?
770.42 What other maintenance-of-effort requirements apply to a Public Library Services grant?
770.43 What maintenance of Federal support is required for major urban resource libraries (MURLs)?
770.44 What are a State's financial obligations under a Public Library Construction and Technology Enhancement grant?
770.45 What other financial obligation does a recipient have under a Public Library Construction and Technology Enhancement grant?
770.46 What administrative costs are allowable under the State-Administered Program?

Subpart F—What Are the Administrative Responsibilities of a State and its Subgrantees?

770.50 Under what circumstances must a State provide an applicant with an opportunity for a hearing?

Authority: 20 U.S.C. 351 *et seq.*, unless otherwise noted.

Subpart A—General

§ 770.1 The Library Services and Construction Act State-Administered Program.

Under the Library Services and Construction Act State-Administered Program—referred to in this part as the State-Administered Program—the Secretary provides Federal funds to assist States to—

(a) Extend and improve public library services;

(b) Construct, renovate and enhance the technology of public libraries; and

(c) Develop and strengthen interlibrary cooperation, resource sharing, and the preservation of library resources.

(Authority: 20 U.S.C. 351, 353, 355b, 355e)

§ 770.2 Who is eligible to apply for a grant under the State-Administered Program?

Under the State-Administered Program the following parties are eligible to apply:

(a) States are eligible to apply to the Secretary for—

(1) Public Library Services grants under Title I of the Act;

(2) Public Library Construction and Technology Enhancement grants under Title II of the Act; and

(3) Interlibrary Cooperation and Resource Sharing grants under Title III of the Act.

(b)(1) Public libraries are eligible to apply to their respective States for subgrants under each type of grant specified in paragraph (a) of this section.

(2) Library systems or networks that include libraries other than public libraries are eligible to apply for a subgrant under Title I of the Act if the purpose of the subgrant is to improve services for public library patrons.

(3) In the case of Interlibrary Cooperation and Resource Sharing grants, a State may also permit other types of libraries to apply for subgrants.

(Authority: 20 U.S.C. 351d, 352, 355a, 355e)

§ 770.3 What regulations apply to the State-Administered Program?

The following regulations apply to the State-Administered Program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), Part 76 (State-Administered Programs), Part 77 (Definitions that Apply to Department Regulations), Part 79 (Intergovernmental Review of Department of Education Programs and Activities), Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments), Part 81 (General Education Provisions Act—Enforcement), Part 82 (New Restrictions on Lobbying), Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)), and Part 86 (Drug-Free Schools and Campuses).

(b) The regulations in this part 770.

(Authority: 20 U.S.C. 351 *et seq.*)

§ 770.4 What definitions apply to the State-Administered Program?

(a) *Definitions in the Act.* The following terms used in this part are defined in section 3 of the Act:

Adult with limited literacy skills
Annual program
Basic State plan
Construction
Educationally disadvantaged adult
Handicapped individual
Hawaiian native
Indian tribe
Library service
Library services for the physically handicapped
Long-range program
Major urban resource library
Network
Public library
Public library services
State
State Advisory Council on Libraries
State institutional library services
State library administrative agency
Technology enhancement

(b) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Acquisition
Applicant
Application
Department
EDGAR
Facilities
Fiscal year
Grant
Grantee
Nonprofit
Private
Project
Secretary
Subgrant
Subgrantee

(c) *Other definitions that apply to this part.* The following definitions apply to this part:

Act means the Library Services and Construction Act, as amended.

Community information referral center means a center that provides information and makes referrals to link people in need of services to appropriate resources.

Disadvantaged means persons whose socio-economic or educational deprivation or whose cultural isolation from the general community may preclude them from benefiting from public library services to the same extent as the general community benefits from these services.

Illiteracy means the inability of an individual to read, write, or comprehend or to perform basic arithmetical computations.

Information and building technologies means those technologies that have been developed or will be developed for the storage, retrieval and processing of information and for the efficient operation and maintenance of buildings and other structures that are authorized to be constructed with Title II funds awarded under the Act.

Interlibrary cooperation means the systematic and effective coordination of the resources of school, public, academic, and special libraries and information centers.

Interlibrary Cooperation and Resource Sharing grants means Federal financial assistance provided by the Secretary under Title III of the Act.

Library materials means books, periodicals, newspapers, documents, pamphlets, photographs, reproductions, microforms, pictorial works, graphic works, musical scores, maps, charts, globes, sound recordings, slides, films, filmstrips, processed video and magnetic tapes, computer software, and materials designed specifically for the handicapped.

Limited English-speaking proficiency, when used with reference to individuals, means individuals who—

(1)(i) Were not born in the United States or whose native tongue is a language other than English;

(ii) Come from environments where a language other than English is dominant; or

(iii) Are American Indian and Alaskan Natives and who come from environments where a language other than English has had a significant impact on their level of English language proficiency; and

(2) Because of one of the reasons listed in paragraph (1) of this definition, have sufficient difficulty speaking, reading, writing, or understanding the English language to be denied the opportunity to learn successfully in classrooms where the language of instruction is English or to participate fully in society.

Literacy means the ability of an individual to read, write, and comprehend and to perform basic arithmetical computations.

Literacy program means a project or activity designed to help individuals improve their ability to read, write, or comprehend or to perform basic arithmetical computations.

Public Library Construction and Technology Enhancement grants means Federal financial assistance provided by the Secretary under Title II of the Act.

Public Library Services grants means Federal financial assistance provided by the Secretary under Title I of the Act.

(Authority: 20 U.S.C. 351 *et seq.*)

Subpart B—What Kinds of Activities Does the Secretary Assist Under This Program?

§ 770.10 What types of projects may be funded under Public Library Services grants?

(a) The Secretary awards Public Library Services grants to assist projects designed to plan for, establish, extend, or improve public library services.

(b) The types of projects referred to in paragraph (a) of this section may include, but are not restricted to, the following:

(1) Extending public library services to areas and populations that lack these services.

(2) Improving public library services to ensure that these services are adequate to meet the needs of specific areas and populations.

(3)(i) Making public library services accessible to individuals who, because of a disadvantage, are unable to benefit from public library services regularly made available to the general public.

(ii) These disadvantages include, but are not restricted to, distance, residence, handicap, age, literacy level, and limited English-speaking proficiency.

(4) Establishing, expanding, and operating programs to improve State and local public library services for—

(i) The elderly;

(ii) The institutionalized;

(iii) The physically handicapped; and

(iv) The disadvantaged in urban and rural areas.

(5) Adapting public library services to meet particular needs of individuals.

(6) Assisting libraries to serve as community information referral centers.

(7) Assisting libraries in providing literacy programs for adults and school dropouts and in carrying out these literacy programs in cooperation with other agencies and organizations in a community.

(8) Establishing and supporting model library literacy centers, coordinated by the State library administrative agency with other interested State agencies and nonprofit organizations to reduce the number of functionally illiterate individuals and to help them reach full employment.

(9) Assisting libraries in developing intergenerational library programs that will match older adult volunteers with libraries interested in developing after school literacy and reading skills programs for unsupervised children during afterschool hours.

(10) Assisting libraries in providing mobile library services and programs to licensed or certified child-care providers or child-care centers.

(11) Assisting libraries in providing and displaying educational materials, and conducting community programs aimed at preventing and eliminating drug abuse, in cooperation with local education agencies, or other agencies or organizations.

(12) Strengthening the capacity of the State library administrative agency to meet the needs of the people of the State with regard to library services, facilities, and resources.

(13) Supporting and expanding the services of major urban resource libraries that meet the demands of individual users and other libraries.

(14) Assisting public libraries in making effective use of technology to improve library and information services.

(15) Strengthening metropolitan libraries that serve as national or regional resource centers.

(Authority: 20 U.S.C. 351(a), 351a, 352, 353)

§ 770.11 What types of projects may be funded under Public Library Construction and Technology Enhancement grants?

(a) The Secretary awards Public Library Construction and Technology Enhancement grants to assist projects designed to carry out the following activities:

(1) Construction of new buildings.

(2) Acquisition, expansion, remodeling, and alteration of existing buildings, including the purchase of existing historic buildings.

(3) Purchase, lease, and installation of equipment for any building referred to in paragraphs (a) (1) and (2) of this section.

(4) Technology enhancement, as defined in section 3(19) of the Act.

(5) Any combination of activities referred to in paragraphs (a) (1) through (4) of this section (including architect's fees and the cost of acquisition of land).

(b) As used in paragraph (a)(3) of this section, "equipment" includes the following:

(1) Information and building technologies.

(2) Video and telecommunications equipment.

(3) Machinery.

(4) Utilities.

(5) Built-in equipment.

(6) Any enclosures or structures necessary to house the items referred to in paragraphs (b) (1) through (5) of this section.

(7) All other items necessary for the functioning of a particular facility as a provider of public library services.

(c) As used in paragraph (a)(2) of this section, "remodeling" includes the following:

(1) Remodeling to meet the standards of the Architectural Barriers Act of 1968.

(2) Remodeling designed to ensure safe working environments and to conserve energy.

(3) Remodeling or renovation to accommodate new technologies.

(Authority: 20 U.S.C. 351a(2), 355a, 355c)

§ 770.12 What types of projects may be funded under Interlibrary Cooperation and Resource Sharing grants?

The Secretary awards Interlibrary Cooperation and Resource Sharing grants to assist projects designed to enable various types of libraries to share resources and materials. The types of projects that may be supported under an Interlibrary Cooperation and Resource Sharing Grant include the following mandated and allowable activities:

(a) Mandated activities include:

(1) Planning for, and taking other steps leading to the development of, cooperative library networks.

(2) Establishing, expanding, or operating local, regional, or interstate cooperative library networks.

(3) Developing the technological capacity of libraries for interlibrary cooperation and resource sharing.

(4) Developing a Statewide resource sharing plan directed toward attaining compliance with section 304 of the Act.

(b) Allowable activities include one or more of the items listed in section 304(c) of the Act.

(c) Activities for which a plan must be approved for the use of LSCA funds include developing and implementing a Statewide preservation cooperation plan for systematically preserving endangered library and information resources. Such a plan must be developed in consultation with such parties and agencies as—

(1) The State archives;

(2) Historical societies;

(3) Libraries;

(4) Scholarly organizations; and

(5) Other interested parties.

(d) State library administrative agencies may contract with other agencies or institutions for part or all of the preservation activities in the Statewide preservation cooperation plan described in paragraph (c) of this section.

(Authority: 20 U.S.C. 351(a), 355e–1(a), 355e–2, 355e–3, 355e–4)

Subpart C—How Does a State Apply for a Grant?

§ 770.20 What must a State do to receive a grant under the State-Administered Program?

(a) In order to receive a grant under the State-Administered Program, a State must—

(1) Establish a State Advisory Council on Libraries; and

(2) After consulting with the council, submit to the Secretary by the various dates established by the Secretary the three parts of a State plan, as described in § 770.21.

(b) The Secretary does not consider the other parts of the plan until the Secretary has approved the basic State plan.

(Authority: 20 U.S.C. 351d(a))

(Approved by the Office of Management and Budget under control number 1850–0528)

§ 770.21 What must a State plan include?

A State plan must consist of the following three parts:

(a)(1) A basic State plan, as described in § 770.22, covering a five-year period.

(2) One basic plan to cover all types of grants provided under this program:

(i) Public Library Services grants.

(ii) Public Library Construction and Technology Enhancement grants.

(iii) Interlibrary Cooperation and Resource Sharing grants.

(b)(1) A long-range program, as described in § 770.23, covering a period of not fewer than three years and not more than five years.

(2) The State library administrative agency shall develop the long-range program—

(i) With the advice and assistance of the State Advisory Council on Libraries; and

(ii) In consultation with the Secretary.

(3) The State shall—

(i) Submit a long-range program that provides a comprehensive description of the State's identified library needs and a description of the activities to be undertaken toward meeting those needs supported with the assistance of the LSCA State-Administered Program;

(ii) Review the program each year;

(iii) Revise the program each year according to changing needs and the results of evaluations and surveys; and

(iv) Submit the revised program to the Secretary.

(c) An annual program, as described in § 770.24, for each type of grant for which the State is applying.

(Authority: 20 U.S.C. 351d(a))

(Approved by the Office of Management and Budget under control number 1850–0528)

§ 770.22 What must a State include in a basic State plan?

A State shall include the following in its basic State plan:

(a) Assurance that the State library administrative agency—

(1) Will administer or supervise the administration of all programs and projects in the State assisted under the State-Administered Program;

(2) Has the fiscal and legal authority and capability to administer or supervise the administration of programs and projects assisted under the State-Administered Program;

(3) Has established or will establish policies, priorities, criteria, and procedures necessary to implement the program in the State;

(4)(i) Will make the reports the Secretary reasonably requires to—

(A) Carry out the Secretary's functions under the program; and

(B) Determine the extent to which funds provided under the program have been effective in carrying out the purposes of the program;

(ii) Will include in these reports, if requested by the Secretary, reports of evaluations made under the State plan; and

(iii) Will make the reports in the form and containing the information reasonably required by the Secretary; and

(5)(i) Will keep the records the Secretary finds necessary to assure the correctness and verification of the reports referred to in paragraph (a)(4) of this section; and

(ii) Will give the Secretary access to the records as the Secretary finds necessary.

(b) Assurances that—

(1) Any funds paid to the State under a long-range program and an annual program will be expended only for the purposes for which the funds have been authorized and appropriated;

(2) The State has adopted the necessary fiscal control and fund accounting procedures to assure proper disbursement of, and accountability for, Federal funds paid—

(i) To the State under the State-Administered Program; and

(ii) By the State to any other agency under the program;

(3) The State will give priority to programs and projects designed to carry out the following objectives:

(i) To improve access to public library resources and services for the least served populations in the State, including—

(A) Projects for individuals with limited English-speaking proficiency;

(B) Projects for individuals with disabilities; and

(C) Projects in urban and rural areas.

(ii) To serve the elderly.

(iii) To combat illiteracy.

(iv) To increase library services and access to services through effective use of technology; and

(4) Libraries within the State that receive funds under this Act will not discriminate on the basis of race, religion, age, gender, national origin, or handicapping condition in providing space for public meetings.

(Authority: 20 U.S.C. 351a(11), 351d(b))

(Approved by the Office of Management and Budget under control number 1850–0528)

§ 770.23 What must a State include in a long-range program?

(a) A State shall include the following in a long-range program covering all activities under the State-Administered Program:

(1) A comprehensive description of the State's identified present and projected library needs.

(2) A plan for meeting those identified needs with Federal funds made available through the appropriate type of grant under the State-Administered Program.

(3)(i) The State's policies, priorities, criteria, and procedures for administering this type of grant and appropriate subgrants under the State-Administered Program.

(ii) A description of how the State plans to implement the priorities in § 770.22(b)(3).

(4) A description of the State's policies and procedures regarding each of the following:

(i) The periodic evaluation of the effectiveness of projects supported under this type of grant in measurable terms and with generally accepted evaluation methods appropriate to the purpose of the program and the project.

(ii) The appropriate dissemination of project evaluations and other information pertaining to these projects.

(iii) The coordination of projects assisted under this type of grant with similar library programs and projects operated by other libraries, institutions, and agencies in the State.

(b) In the case of an application for a Public Library Construction and Technology Enhancement grant, the State shall also include in its long-range program the policies and procedures to be followed by the State library administrative agency in providing an opportunity for a hearing to a local or other public agency whose application for a subgrant is denied.

(c) In the case of an application for an Interlibrary Cooperation and Resource Sharing grant, the State shall also include the following in its long-range program:

(1) A Statewide resource sharing plan directed toward attaining compliance with the provisions of section 304 of the Act. In developing the plan, the State library administrative agency, with the assistance of the State Advisory Council on Libraries, shall consider recommendations from current and potential participating institutions in interlibrary cooperation and resource sharing projects authorized under the Act.

(2) An identification of interlibrary cooperation and resource sharing objectives to be achieved during the period covered by the basic State plan and the long-range program. These objectives may include, but are not restricted to, one or more of the items listed in section 304(c) of the Act.

(3)(i) A State that intends to use LSCA funds for the preservation of library materials shall also include in its long-range program a Statewide preservation cooperation plan (preservation plan) that—

(A) Identifies the preservation objectives to be achieved during the period covered by the long-range program; and

(B) Specifies the methods by which endangered library and information resources are to be preserved systematically.

(ii) In developing the preservation plan, a State shall consult with parties and agencies such as the State archives, historical societies, libraries, scholarly organizations, and other interested parties.

(iii) In carrying out the preservation plan, a State shall work with libraries, archives, historical societies, scholarly organizations and other agencies, within or outside the State, in planning, education and training, coordinating, outreach and public information, and service programs.

(Authority: 20 U.S.C. 351(a), 351a(12), 351d(d), 355c, 355e, 355e–2, 355e–3)

(Approved by the Office of Management and Budget under control number 1850–0528)

§ 770.24 What must a State include in an annual program?

(a) A State shall include the following in an annual program:

(1) A description of the projects and activities the State plans to carry out—and the basis upon which the State plans to award subgrants—during the specified year with regard to public library services, public library construction and technology enhancement, or interlibrary cooperation and resource sharing, as appropriate.

(2) A description of how these projects and activities would—

(i) Be consistent with purposes specified in the Act and in §§ 770.10, 770.11, or 770.12;

(ii) Fulfill the objectives of the State's long-range program or the update of the long-range program; and

(iii) Meet the needs identified by the State in the long-range program.

(3) A description of the criteria the State plans to use in allocating funds.

(4)(i) A demonstration that the manner in which the State proposes to carry out the annual program is consistent with the policies, criteria, priorities, and procedures specified in the long-range program or update of the long-range program.

(ii) In meeting this requirement, the State shall address, among other items, policies and procedures regarding evaluations, dissemination, and coordination, as described in § 770.23(a)(4).

(5) A description of how proposed projects and activities are to be based on the results of evaluations described in § 770.23(a)(4)(i) undertaken according to the long-range program.

(6) A demonstration that proposed projects and activities would meet the assurance given by the State in its basic State plan to implement the priorities specified in § 770.22(b)(3), if appropriate.

(7) The amount of Federal funds the State plans to spend to carry out its administrative functions under the grant, as specified in § 770.46.

(b) In the case of an application for a Public Library Services grant, the State shall also include the following in its annual program:

(1) The criteria the State plans to use to ensure that the State meets the financial obligations specified in §§ 770.40, 770.41, 770.42, and 770.43.

(2) A description of how the State plans to allocate funds to support and expand library services of major urban resource libraries if—

(i) The sum appropriated for the year exceeds the amount specified in section 102(c)(1) of the Act; and

(ii) The State has one or more cities with populations of at least 100,000 individuals.

(3) A description of how the State plans to use funds for projects and activities for the elderly.

(4) A description of how the State plans to use funds to make public library services and programs more accessible to handicapped individuals.

(5)(i) To enable the Secretary to make a determination of payment under section 7(a) of the Act, a statement of the amounts the State will have available for expenditure for the proposed projects and activities during the period covered by the annual program from—

(A) State sources; and

(B) Local sources.

(ii) The State may not include in-kind contributions among the amounts the State declares it will have available for expenditure under paragraph (b)(5)(i) of this section.

(c) In the case of an application for a Public Library Construction and Technology enhancement grant, the State shall also include in its annual program a description of how the State plans to—

(1) Use funds that year, consistent with the long-range program, for approved construction projects in areas of the State lacking the library facilities necessary to provide adequate public library services; and

(2) Follow policies and procedures in the construction of the public libraries that will promote the preservation of library and information resources to be used in the facilities.

(d) In the case of an application for an Interlibrary Cooperation and Resource Sharing grant, the State shall also include in its annual program a description of how the proposed projects and activities would meet the

requirements of the Act with respect to—

(1) The Statewide resource sharing plan;

(2) The interlibrary cooperation and resource sharing objectives identified in the long-range program; and

(3) If applicable, the Statewide preservation cooperation plan described in § 770.23(c)(3).

(Authority: 20 U.S.C. 351, 351a(13), 351d(a), 351d(b)(4); 351e(a)(1), 354, 355c, 355e–2, 355e–3)

(Approved by the Office of Management and Budget under control number 1850–0526)

Subpart D [Reserved]

Subpart E—What Conditions Must Be Met by a State and Its Subgrantees?

§ 770.40 What matching requirements apply to a Public Library Services grant?

In order to receive a Public Library Services grant, a State shall have available, from State and local sources, for expenditure for the projects and activities proposed in its annual program an amount that equals or exceeds the difference between—

(a) The cost of carrying out the State's annual program; and

(b) The Federal share of these costs, as specified in section 7(b) of the Act.

(Authority: 20 U.S.C. 351e(b), 354)

§ 770.41 What are the basic maintenance-of-effort requirements for a Public Library Services grant?

(a) *Basic maintenance-of-effort.* In order to receive a Public Library Services grant, a State shall have available for expenditure—

(1) For State aid to public libraries and library systems, an aggregate amount equal to 90 percent of the amount actually expended by the State for those purposes in the second preceding fiscal year; and

(2) For the State library administrative agency, or the part of the State library administrative agency charged by State law with extending and developing public library services throughout the State, an aggregate amount equal to 90 percent of the amount actually expended for those purposes in the second preceding fiscal year.

(b) *Waiver.* (1) The Secretary may waive the basic maintenance-of-effort requirements contained in paragraph (a) of this section, if the Secretary determines that application of paragraph (a) would be unjust or unreasonable in light of exceptional extenuating circumstances.

(2) The circumstances under which the Secretary may waive the basic maintenance-of-effort requirements include, but are not limited to, the following:

(i) A natural disaster affecting the State.

(ii) A precipitous decline in the financial resources of the State resulting in general reductions in the State's expenditures, except that the effect of State legislative action or referenda reducing revenue or rejecting revenue initiatives does not in and of itself justify a waiver.

(3) A State shall support a waiver request with appropriate documentation.

(4)(i) If the Secretary grants a waiver under this section, the amount of funds that the State library administrative agency is otherwise entitled to receive under this part is not reduced.

(ii) The basic maintenance-of-effort level in the second fiscal year following the fiscal year for which a waiver is granted is at least 90 percent of the amount that the State library administrative agency would have been required to expend in the waiver year had the waiver not been granted.

Example: In fiscal year 1991 a State library administrative agency obtains a waiver under this section because it will have available for expenditure for FY 1991 less than 90 percent of its actual expenditures in the second preceding year (1989) due to exceptional extenuating circumstances. In determining whether the agency meets the basic maintenance-of-effort requirements for fiscal year 1993, the State agency must have available for expenditure at least 90 percent of its actual expenditures for 1989, the second fiscal year preceding the year for which the waiver was granted, and not 90 percent of its actual expenditures in FY 1991 (the waiver year). Thus, if the State agency expended $3,000,000 in FY 1989, $2,800,000 in FY 1990, and only $2,500,000 in FY 1991, when it should have expended $2,700,000 (90 percent of $3,000,000) but obtained a waiver instead, then in FY 1993 it must expend 90 percent of $2,700,000, for a total of $2,430,000, rather than 90 percent of $2,500,000 (the amount it actually expended in FY 1991), or $2,250,000.

(Authority: 20 U.S.C 351e(a))

§ 770.42 What other maintenance-of-effort requirements apply to a Public Library Services grant?

(a) In addition to the requirements in § 770.41, in order to receive a Public Library Services grant a State shall spend for State institutional library services and library services to the physically handicapped, from Federal, State, and local sources, an amount not less than the amount that the State spent from those sources for those services during the second preceding fiscal year.

(b) The Secretary ratably reduces the amount that a State is required to spend for institutional library services and library services to the physically handicapped to the extent that—

(1) The Federal allocation for the State's Public Library Services grant is reduced; and

(2) The Secretary determines that the populations served by those expenditures have declined.

(Authority: 20 U.S.C. 354)

§ 770.43 What maintenance of Federal support is required for major urban resource libraries (MURLs)?

(a) Except as provided in paragraph (b) of this section, if the amount of a Public Library Services grant requires a State library administrative agency to allocate funds to support and expand library services of the State's MURLs, under sections 102(a)(3) and (c) of the Act and in § 770.24(b)(2), the State library administrative agency may not reduce the amount it pays to a MURL below the amount that it paid to that MURL in the preceding fiscal year.

(b) A State library administrative agency may ratably reduce the amount that a State library administrative agency must pay to a MURL under paragraph (a) of this section to the extent that—

(1) The Federal allocation to the State library administrative agency for its Public Library Services grant is reduced for the applicable fiscal year; or

(2) The 1990 Census shows that the population of the city served under paragraph (a) of this section has decreased.

(c) In any fiscal year in which both circumstances described in paragraph (b) of this section occur, the State library administrative agency shall determine whether to apply one or the other, or both, of the reduction rates, or to not reduce payments to its State's MURLs at all. The following example illustrates how the calculation of the reduction can be made if a State library administrative agency chooses to apply both rates in a fiscal year when both circumstances occur.

Example: In a State with 4 MURLs, where the minimum amount required to be set aside for MURLs is $100,000, the allocation reduction rate is 10 percent, and one of the MURLs has a 5 percent decrease in its population. The ratable reduction may be calculated as follows:

$100,000 × 10% = $10,000
$100,000 × 10,000 = $90,000
$90,000 ÷ 4 = $22,500 (assuming equal distribution among these 4 MURLs)
$22,500 × 5% = $1,125
$22,500 − 1,125 = $21,375 to be paid to the MURL with a 5 percent population decrease.

(Authority: 20 U.S.C. 353(c))

§ 770.44 What are a State's financial obligations under a Public Library Construction and Technology Enhancement grant?

(a) A State that receives a Public Library Construction and Technology Enhancement grant shall provide, from State or local sources or both, in the fiscal year for which the grant is made, the difference between—

(1) The costs of projects financed under the grant; and

(2) The Federal share of these costs, as specified in section 7(b) of the Act.

(b) In the case of any individual project awarded under a Public Library Construction and Technology Enhancement grant, at least one half of the total cost must be supplied by State or local sources or both.

(Authority: 20 U.S.C. 351e(b), 355b(b))

§ 770.45 What other financial obligation does a recipient have under a Public Library Construction and Technology Enhancement grant?

(a) Unless released from the obligation under paragraph (c) of this section, a recipient of Federal financial assistance under a Public Library Construction and Technology Enhancement grant—or the recipient's successor in title or possession—shall repay to the United States on request an amount as specified in paragraph (b) of this section if, within 20 years of the completion of construction of the library facility—or part of the facility—for which the assistance was received—

(1) The recipient or its successor ceases or fails to be a public or nonprofit institution; or

(2) The facility ceases to be used as a library facility.

(b) The amount the recipient or its successor is obligated to repay is an amount that equals—

(1) The value of the facility or part of the facility at the time of the occurrence specified in paragraph (a)(1) or (a)(2) of this section, multiplied by—

(2) The ratio of—

(i) The amount of Federal assistance under the grant or subgrant; to

(ii) The cost of the facility or part of the facility for which the assistance was received.

Example: In 1977 a local public library completed a project to enlarge its reading room. The project had been assisted by a subgrant from the State under a Public Library Construction grant. The total cost of the project was $300,000; the subgrant had amounted to $120,000 a ratio of 2 to 5 or 40 percent of the cost.

In 1989 the local library moves to another district, and the facility for which it received assistance in 1977 ceases to be used as a library facility. It is determined that the part of the facility for which assistance was received has a current market value of $400,000.

The United States is entitled to recover from the local public library an amount equal to 40 percent of the current market value of the facility or portion of the facility assisted with Federal funds; that is, 40 percent of $400,000 or $160,000.

(c) The Secretary may decide, for good cause, to release the recipient from its obligation under paragraph (a) of this section.

(d) The provisions of this section apply to any facility constructed at any time with assistance under Title II of the Act.

(Authority: 20 U.S.C. 355b)

§ 770.46 What administrative costs are allowable under the State-Administered Program?

(a) A State library administrative agency may spend funds received under a Public Library Services grant and funds received under a Public Library Construction and Technology Enhancement grant to carry out its administrative functions under a Public Library Services grant, a Public Library Construction and Technology Enhancement grant, and an Interlibrary Cooperation and Resource Sharing grant.

(b) The total amount the agency may spend to carry out its administrative functions under all of these grants during any year may not exceed the amount specified in section 8 of the Act.

(c) The agency may spend the funds for administrative costs in connection with the following activities:

(1) Administration of the State plan, including obtaining the services of consultants.

(2) Statewide planning for and evaluation of library services.

(3) Dissemination of information concerning library services.

(4) Activities of the State Advisory Council on Libraries and of any other advisory groups and panels necessary to assist the State library administrative agency in carrying out its functions.

(Authority: 20 U.S.C. 351f, 353(b))

Subpart F—What Are the Administrative Responsibilities of a State and Its Subgrantees?

§ 770.50 Under what circumstance must a State provide an applicant with an opportunity for a hearing?

(a)(1) In the case of a Public Library Construction and Technology Enhancement grant, if a State denies funds to a local or other public agency that applies for a subgrant for construction of public library facilities, the State library administrative agency shall give the local or other public agency an opportunity for a hearing.

(2) The provision in 34 CFR 76.401(b) (which exempts State agencies from having to offer an opportunity for a hearing under certain State-administered programs) does not apply to Public Library Construction and Technology Enhancement grants.

(b) In providing opportunity for a hearing, the State library administrative agency shall follow the appropriate policies and procedures included in the State's long-range program for the Public Library Construction and Technology Enhancement grant.

(Authority: 20 U.S.C. 355c)

Appendix—Analysis of Comments and Changes

Note: This appendix will not be codified in the Code of Federal Regulations.

In response to the Secretary's invitation in the NPRM, 25 parties submitted 154 comments on the proposed regulations. Four comments did not pertain to the NPRM, and are not addressed in this appendix. An analysis of the comments and of the changes in the regulations since publication of the NPRM follows. Major issues are grouped according to subject, with appropriate sections of the regulations referenced in parentheses. Other substantive issues are discussed under the section of the regulations to which they pertain.

Title I. Defining State Aid and Development of Public Library Services (770.41)

Comments: The Secretary received a number of comments concerning whether or not he should define the terms "State aid" and "Development of public library services," neither of which was defined in the NPRM and for which no definition is provided in the statute. Some commenters favored definitions, others were opposed. It was clear from all of the comments on this issue that a difference of opinion exists among the commenters about which State funds must be reported under either of these two categories.

Discussion: The Secretary recognizes that there is confusion among the States regarding which State funds must be reported under these new maintenance-of-effort provisions mandated by Pub. L. 101–254 because, heretofore, State funds were reported as a single category that encompassed both State aid and funds provided directly by State library administrative agencies for the development of public library services, without identifying the sums for either of the two purposes. In order for States to

comply with the new requirements, the Secretary has concluded that guidance is needed to assist State library administrative agencies to identify the manner in which State library funds are used and the amounts used for each purpose. Detailed discussion of each of these requirements is provided later in this document, following the comments under the pertinent section of the regulation, along with an explanation of why the Secretary has determined that there is a need for a definition of the term "State aid," but not for development of public library services. A proposed definition of State aid is published elsewhere in this issue of the Federal Register, and public comment is invited.

Title I. Use of Technology To Improve Library Services (770.10(b)(14))

Comment: One commenter recommended that a technology category be added to the Title I annual program and annual report forms. The commenter stated that this would allow for more specific accounting for the use of funds for technology.

Discussion: Under the LSCA as amended by Public Law 101–254, "technology" is but one means of achieving LSCA goals. There is no statutory requirement to track a State's use of this means over another. However, the Secretary encourages reporting on States' uses of technology, the kinds of technology used, and the effects of technology on library services, in order that the information may be used to assist other States to develop successful applications of technology.

Changes: None.

Comment: One commenter raised a question in reference to the section of the preamble in which the 1990 Amendments to Title I of the Act are discussed. The commenter asked whether, under the 1990 Amendments, Title I funds may be utilized to assist libraries other than public libraries in making effective use of technology to improve library services.

Response: Under the 1990 Amendments to Title I of the Act, library systems or networks that include libraries other than public libraries are eligible to apply for and receive a subgrant of Title I funds. However, those library systems and networks are eligible for Title I funds only if the purpose of the subgrant for which a system or network has applied is to provide services to public library patrons. A network or system receiving a Title I subgrant for the purpose of assisting libraries to make effective use of technology would be authorized to use those funds only to assist its member libraries in making effective use of technology to improve services to public library patrons.

Changes: None.

Acquisition of Foreign Language Materials (770.10(b)(3))

Comment: Citing the Joint Explanatory Statement of the Committee of Conference (Congressional Record—House, H447, February 27, 1990), one commenter noted that the preamble to the NPRM did not address what the commenter perceived as the congressional intent that a Major Urban Resource Library (MURL) receiving a subgrant award for the acquisition of foreign language materials under Title I may not receive an award under Title V of the LSCA— Foreign Language Materials Acquisition.

Discussion: Contrary to the commenter's impression, under Pub. L. 101–254 a MURL may receive a subgrant from the State under the Title I priority for services to individuals with limited English-speaking proficiency and still be eligible to apply for a Title V discretionary award for the acquisition of foreign language materials. The Committee of Conference statement on foreign language materials acquisition refers to Title V only, which prohibits a single MURL from receiving more than one discretionary award under Title V in any fiscal year.

Changes: None.

Paperwork Reduction Act of 1980 (770.24)

Comment: One commenter felt that the estimate of 31 hours to develop the annual program does not represent the average time of 100 hours needed in the commenter's State for this task.

Discussion: The Secretary recognizes that the paperwork requirements of this program may impose a greater paperwork burden on larger States. However, in the Secretary's view, 31 hours for completing the required forms is a reasonable average for all States.

Changes: None.

Title II Funds (770.11)

Comment: One commenter asked whether a State may use Title II funds appropriated prior to fiscal year 1990 for the technology enhancement allowed under the Act, as amended.

Discussion: The Secretary considers that Title II funds awarded in FY 1991, whether from the current or prior allotments, may be used for a technology enhancement grant, if the purpose of that project is to meet a current library construction or technology enhancement need. LSCA Title II funds that were not obligated at the Federal level to State grantees in prior years are carried forward and for Federal accounting purposes are considered part of the State's current year allotment designated with the same Common Accounting Number as funds allotted for the current year. Those funds remain available until expended.

Changes: None.

Section 770.1 The Library Services and Construction Act State-Administered Program

Comment: One commenter asked whether the statement at § 770.1(b) regarding the use of funds to "construct, renovate and enhance" the technology of public libraries was intended to apply to buildings, services, or both.

Discussion: Section 770.1(b) refers to Title II of the LSCA, as amended by Pub. L. 101–254, under which funds are awarded to States for the construction of public libraries and for the purchase of technological equipment necessary to provide electronic access to information.

Changes: None.

Section 770.2 Who is Eligible To Apply for a Grant Under the State-Administered Program?

Comment: One commenter asked whether Title I funds granted to multi-type library systems under § 770.2(b)(2) must be used for programs that benefit primarily public library members or whether Title I funds may be used to cover basic system administrative costs.

Discussion: Section 102(a) of the Act states that grants to States under Title I (Public Library Services) may be used solely for programs to improve public library services to the public, and that, in carrying out its program to accomplish the purposes of Title I, a State may make subgrants to library systems or networks that include libraries other than public libraries, if the purpose of the subgrant is to improve services for public library patrons. Under Title I, funds are not to be used for general operations, but rather they are to be used to expand or improve services provided to the public. There is no specific authority in Title I for the use of Title I funds awarded to multi-type library systems to compensate the systems for administrative costs. However, under section 8 of the Act a State may expend funds received under Titles I and II for administrative costs in connection with programs and activities carried out under Titles I, II, and III. Additionally, under section 102(b)(1), State library administrative agencies may use Title I funds to pay the cost of administering the State plans submitted and approved under the Act (including obtaining the services of consultants), Statewide planning for and evaluation of library services, dissemination of information concerning library services, and the activities of those advisory groups and panels that may be necessary to assist the State library administrative agency in carrying out its functions under Title I of the Act.

Changes: None.

Comment: One commenter asked whether direct services such as bookmobiles, "facilitating services," or improvements to a central site computer, may be funded under Title I.

Discussion: Under section 101 of the Act, a variety of services may be offered. Bookmobiles may be purchased with Title I funds to be used for the extension of public library services to areas and populations without those services. Adapting public library services to meet particular needs of individuals within the State may result in a service, such as providing large print books, to facilitate the reading of printed matter for persons with visual impairments. Title I monies may be used also to fund technological improvements to a central site computer, as part of the effort to assist public libraries in making effective use of technology to improve library and information services.

Changes: None.

Comment: One commenter noted that libraries other than public libraries may apply for a subgrant under Title I of the Act if the purpose of the subgrant is to improve services for public library patrons. The commenter asked whether the rule applies when a non-public library is a participant in a subgrant project, or only when the non-public library is the applicant for a subgrant.

Discussion: Under § 770.2(b)(2), library systems or networks that include libraries other than public libraries are eligible to apply for Title I funds if the purpose of the subgrant for which they are applying is to improve public library services. Thus, the applicant would be the network or system. Although State library administrative agencies may award subgrants to non-public libraries under Title III of the statute, non-public libraries are not eligible to apply for or receive Title I funds, except as a component of a network or system.

Changes: None.

Section 770.3 What Regulations Apply to the State-Administered Program?

Comment: One commenter asked why 34 CFR Part 74 is included among the regulations applicable to the LSCA.

Discussion: Part 74—Administration of Grants to Institutions of Higher Education, Hospitals and Nonprofit Organizations—is among the regulations that apply to the State-Administered Program because, under section 305 of the LSCA (Preservation Programs), non-profit libraries and other nonprofit organizations such as historical societies and scholarly organizations are eligible to apply for and receive subgrants and enter into contracts with State agencies for the use of Title III funds. The regulations at part 74 apply to those organizations only, not to either State library administrative agencies or to local public libraries.

Changes: None.

Comment: One commenter asked why 34 CFR part 86 is included among applicable regulations.

Discussion: Part 86—Drug-Free Schools and Campuses—applies to all programs administered by the Department under which an institution of higher education, a State educational agency, or a local educational agency (in this case a school library or media center) may receive funds or any other form of Federal assistance. Each of these recipients must certify that it has adopted and implemented a drug prevention program as described in part 86. (Final regulations for Drug-Free Schools and Campuses were published in the Federal Register (55 FR 33580, August 16, 1990). Part 86 applies only to those institutions, not to either State library administrative agencies or to local libraries.

Changes: None.

Comment: One commenter asked why the provisions in 34 CFR 75.600–75.615 are not included, since these regulations are applicable to construction.

Discussion: Sections 75.600–75.615 are not included specifically in the list of regulations applicable to the LSCA because they are included by cross-reference in part 76 (76.600—Where to find construction regulations.)

Changes: None.

Section 770.4 What definitions apply to the State-Administered Program?

Comments: Several commenters were concerned with the lack of definitions for such common words as "displaying" and "elderly."

Discussion: Both the terms "displaying," used at section 101(6) of the Act, and the term "elderly", used at section 6(b)(5)(B) of the Act, are terms whose definitions can be found in any standard dictionary. The Secretary does not intend that these terms convey any special meaning in these regulations beyond the meaning conveyed in their dictionary definitions. Therefore, definitions of these terms in these regulations are not necessary.

Changes: None.

Comments: Several commenters asked for definitions of the terms "administrative functions of a State library administrative agency," "institutionalized," "library system or network," and "older adult."

Discussion: The "administrative functions of a State library administrative agency" are identified in section 102(b)(1) of the Act. The term "institutionalized" is defined within the definition of "State institutional library services" in section 3(9) of the Act. The term "library system" is defined in section 102(a) of the Act and the term "network" is defined in section 3(18) of the Act. The term "older adult," found in section 101(5) of the Act and § 770.10(b)(9) of these regulations, is related to the development of intergenerational programs to help children develop literacy and reading skills during after school hours. The Secretary does not define the term "older adult" because he sees no reason why the determination of the age range of older adults who contribute to this program cannot be left to the State and local libraries, as long as the projects to which older adult volunteers contribute their time result in the intended benefit to the children served by the projects.

Changes: None.

Comment: One commenter stated that the definition of the term "Library materials," which includes computer software, applies only for the use of Title I funds, and asked whether software may be purchased with Title III funds.

Discussion: Computer software may be purchased with Title III funds. Section 302 of the Act provides that grants under Title III shall be used for, among other activities, operating networks and developing the technological capacity of libraries for interlibrary cooperation and resource sharing. In many instances, computer software may be a necessary component of those projects and it is included in the definition of "Library materials" in § 770.4 of these regulations.

Changes: None.

Comment: One commenter suggested clarifying the definition of the term "community information referral center" by indicating that it provides information about a community to appropriate resources within the community.

Discussion: The Secretary does not agree that the definition of "community information referral center" would be improved by the addition of the language suggested by the commenter. The purpose of a community information referral center is to provide information

needed by an individual, not merely to refer that individual to appropriate resources within a particular community. By limiting the referrals to resources within the community, a referral service would not be utilizing available Statewide, regional, national or international networks of information sources to serve the needs of the individual. The Secretary does not intend community information referral centers to be limited in the scope of the information they provide or the other resources to which they can refer a particular individual.

Changes: None.

Comments: Eight commenters, representing eligible State grantees of the LSCA State-Administered program, expressed a variety of concerns about the term "State aid" that was introduced into the maintenance-of-effort provision in section 7(a)(2)(A) of the Act, as amended by Pub. L. 101–254. A number of these commenters expressed the view that this term should be defined by the Secretary. Others felt that no definition was needed at all and that any definition would prove to be problematic. Most were not clear on the meaning of the term or how to report "State aid" expenditures for purposes of maintenance-of-effort, particularly in view of its relationship to the companion maintenance-of-effort requirement that States report on funds expended directly by the State library administrative agency for the development of public library services. Some commenters said that they have no State aid component in their LSCA programs. Most commenters stressed the need for flexibility in any definition that the Secretary might adopt.

Discussion: The Secretary has determined that a definition of the term "State aid" is necessary to the proper administration of the Act and, more specifically, to the administration of the maintenance-of-effort provision in section 7(a)(2)(A). Due to the diversity of State funding patterns (some States do not have a State aid program) as well as to the Act's accountability requirements, a definition is needed to foster consistent administration of the LSCA program among the States. Being able to identify a State library administrative agency's use of its own funds in its State Library program, the manner in which State funds are used, and the amount of State library funds used to carry out a State's library program are critical to the State's ability to demonstrate its compliance with maintenance-of-effort under Title I of the LSCA. Section 7(a)(2)(A) of the Act requires States to maintain effort at 90 percent of the second preceding fiscal year levels of expenditure from State funds for State aid to public libraries and library systems. Because there is confusion among the State library administrative agency representatives who submitted comments on this issue about what constitutes "State aid," the Secretary has determined that a uniform definition is needed in order to enable both the Department and the States participating in the Title I program to identify which State library funds are included within the term "State aid" and thus assist States to comply with section 7(a)(2)(A) of the Act.

Change: Since a definition of "State aid" did not appear in the NPRM, the Secretary is seeking public comments on this added definition through an NPRM containing a proposed definition of "State aid" that solicits comments only on the proposed definition. This additional NPRM is being published elsewhere in this issue of the **Federal Register**. In the NPRM the Secretary proposes to define the term "State aid" to include only funds appropriated by a State legislature for aid to State and local public libraries and library systems. The Secretary further proposes that "State aid" not include State funds used for administering the LSCA program, direct expenditures by the State library administrative agency for statewide programs, or Federal funds received under a categorical assistance program.

Comments: Seven commenters expressed concern about the meaning of "development of public library services" as used in sections 3(10) and 7(a)(2)(B) of the Act, and in § 770.41(a)(2) of the NPRM. Most commenters were not certain as to which activities to include within this funding category. Several commenters requested that a definition be added to the regulations. One commenter did not want a definition, asking that each State be permitted to adopt its own definition of the term.

Discussion: Under section 7(a)(2)(B) of the statute, as amended by the 1990 amendments, the State library administrative agency is required to demonstrate that it will have available for expenditure "*for the State library administrative agency* or for the part thereof charged by State law with the extension and development of public library services throughout the State" an aggregate amount equal to 90 percent of the amount actually expended for such purpose in the second preceding year. (Emphasis added.) The Secretary does not consider it necessary to include in these regulations a definition of the term "extension and development of public library services" since the Secretary does not view the extension and development of public library services as being an expenditure category that differs from the "extension and improvement of public library services" as referred to throughout the LSCA. However, in response to the commenters, the Secretary does wish to make clear that the newly enacted section 7(a)(2)(B) is considered to include expenditures for the extension and development of public library services that are incurred *directly* by the State library administrative agency. These expenditures must be reported separately from section 7(a)(2)(A) "State aid" expenditures. The proposed definition of the statutory term "State aid," contained in a separate NPRM, provides guidance to State library administrative agencies on what expenditures are included within the scope of the term "State aid" as the term is used in section 7(a)(2)(A), as well as providing guidance on what is not included within the term "State aid." The amounts that State library administrative agencies will be required to report as expended under section 7(a)(2)(B) are those amounts of State funds that they have spent for public library development purposes, not by awarding these funds to State or local libraries or library systems, but by direct expenditure. In sum, for purposes of LSCA Title I maintenance-of-effort, the amount of State funds expended directly by the State library administrative agency (or by one of its subdivisions) for the development of public library services or for allowable administrative expenses must be reported separately under section 7(a)(2)(B) as State library administrative agency expenditures.

Changes: None.

Section 770.10 What Types of Projects May Be Funded Under Public Library Services Grants?

Comment: One commenter stated incorrectly that the word "public" had not been used in the regulations currently in effect in § 770.10(b)(4) in reference to library services for the institutionalized and the physically handicapped. The commenter asked for a definition of the term "public" and asked whether services to, and library materials for, handicapped school children are excluded from funding under Title I of the LSCA.

Discussion: The term "Public library" is currently defined at section 3(5) of the Act. Further, under section 101 of the Act grants are made to States to make library services accessible to individuals who, by reason of handicap or residence, among other reasons, are unable to receive the benefits of public library services made available to the public. Additionally, the term "Library services for the physically handicapped" is defined at section 3(4) of the Act, and the term "State institutional library services" is defined at section 3(9) of the Act. Under section 102(a)(2) of the Act, library services to the institutionalized and the handicapped, whether they are adults or children, are allowable expenditures.

Changes: None.

Comment: One commenter suggested adding to § 770.10(b)(7) language specifically authorizing programs whereby libraries could establish or participate in coalitions of community organizations providing literacy programs.

Discussion: The commenter's suggestion for expansion of literacy programs for adults and school dropouts is based on section 101(4) of the Act which allows public libraries to carry out programs in cooperation with other agencies and organizations in a community. The Secretary agrees that this language should be included in § 770.10 of these regulations.

Changes: The Secretary amends § 770.10(b)(7) by adding a reference to programs that are carried out in cooperation with other agencies and organizations in a community. These programs are eligible activities that may be funded with public library services grants.

Comment: One commenter noted that § 770.10(b)(8) repeats the language from section 101(7) of the Act concerning "functionally illiterate individuals" to be served by model library literacy centers. The commenter noted also that "adult with limited literacy skills" is defined at section 3(21) of the Act and asked whether these terms have the same meaning.

Discussion: The Secretary intends that both terms have the same meaning. The definition of an "adult with limited literacy skills," as contained in section 3(21) of the Act, describes the characteristics of a functionally illiterate individual.

Changes: None.

Comments: Several commenters asked for a definition of "a model library literacy center" as referenced in § 770.10(b)(8), and, specifically, asked how it differs from a "literacy program for adults and school dropouts" as referenced in § 770.10(b)(7) of these regulations.

Discussion: The Secretary relies on the Act in interpreting the meaning of the term "model library literacy centers." A model library literacy center, as referenced in section 101(7) of the Act and § 770.10(b)(8) of these regulations, is a center where literacy training is provided to members of the public who are in need of that training through the cooperative efforts of public libraries, State agencies, and nonprofit organizations other than public libraries. The training provided at a model library literacy center is coordinated by the State library administrative agency. A model library literacy center is one that makes available programs that are broader in geographic and programmatic scope and offer more options than a project whose goals are limited to meeting the literacy training needs of a single community. The more limited type of project is described in § 770.10(b)(7) of these regulations.

Changes: None.

Comment: One commenter asked whether the intent of § 770.10(b)(8) is that a State library administrative agency or a local public library establish a model library literacy center, or both.

Discussion: Section 101(7) of the Act and § 770.10(b)(8) of these regulations authorize a State library administrative agency to include in its annual program projects to establish and support model library literacy centers, coordinated by the State library administrative agency and providing literacy training through the cooperative efforts of other agencies and nonprofit organizations. The intent of this section is to authorize both State and local public libraries to utilize Title I funds for establishing and supporting model library literacy centers, as well as to authorize the State library administrative agency to coordinate these literacy training efforts.

Changes: None.

Comment: One commenter inquired whether Title I model library literacy center programs would have to be as extensive as those defined in Title VIII, Part B, of the LSCA, whose purpose is also to establish model library literacy centers.

Discussion: Section 101(7) of the Act authorizes the use of Title I funds to establish and support model library literacy centers, coordinated by the State library administrative agency with other interested State agencies and nonprofit organizations.

The purpose of Title VIII, Part B, of the Act is to establish model library literacy centers throughout the country to serve as resource centers for the dissemination of literacy materials and equipment to local public libraries in order to help overcome the high incidence of adults with limited literacy skills in the United States as a whole. Both State and local libraries are eligible to apply under both Titles. Under Title VIII, local libraries compete at the State level for designation as a literacy center, while States compete at the Federal level. Each provision stands alone; the provisions in Title I do not apply to Title VIII, nor those of Title VIII to Title I.

Changes: None.

Comments: One commenter wished to know whether locations other than public libraries could be used for afterschool intergenerational literacy and reading skills programs, and whether intergenerational library subgrants could be awarded to a subgrantee other than a public library. Another commenter sought a definition of "after school literacy and reading skills programs."

Discussion: There is no prohibition against using a location other than a public library for an intergenerational program. However, only public libraries may be awarded grants to support those programs. The legislative history of the new section 101(5) of the Act demonstrates the congressional intent that Title I funds used by States under authority of section 101(5) be used to provide public libraries with the financial assistance that will enable them to develop intergenerational programs in which older adult volunteers participate in school literacy and reading skills programs for unsupervised school children during afterschool hours.

The Secretary does not see the need for a further definition of "after school literacy and reading skills programs" beyond what is already provided in the Act and in these final regulations. State library administrative agencies and local public libraries should have the flexibility to develop and operate appropriate projects under section 101(5) of the Act to meet the needs of their communities.

Changes: None.

Comments: One commenter noted that the preamble to the NPRM contained the term "latchkey children" used in reference to the intergenerational library programs authorized under § 770.10(b)(9) of the NPRM, and asked whether only latchkey children may be served under a § 770.10(b)(9) project.

Discussion: Based on the legislative history of the Act, the Secretary cannot conclude that only latchkey children may be served under a § 770.10(b)(9) project. However, the Secretary believes that Congress intended that States identify and give priority to serving unsupervised children after school hours. The Secretary bases his conclusion on the legislative history of

Public Law 101–254 that includes a Public Library Association Service to Children Committee report to Congress that stressed the rapid increase in problems libraries were having in dealing with latchkey children, to the detriment of services to other library patrons. The Committee's finding was that one of the most rapidly developing public issues is how to deal with "latchkey children." Congress determined that providing literacy and reading skills programs for children who are unsupervised during afterschool hours through intergenerational programs utilizing older persons as volunteers is one way to address this problem. Congress has also determined that the use of older persons as volunteers helps the staffs of public libraries who are taking time from their other duties to supervise "latchkey children."

Changes: None.

Comment: One commenter inquired whether the term "mobile," as used in § 770.10(b)(10) of the NPRM, was meant to limit funding under the activity to projects carried out at child-care facilities, and to exclude programming at the public library.

Discussion: Under section 101(6) of the Act, the term "mobile" limits the funding of projects under this category to those projects that serve to extend public library services to childcare facilities. The legislative history of Public Law 101–254 demonstrates congressional awareness that not all individuals are able to visit local libraries, and that child-care providers do not have the time to either go to the library to check out appropriate reading materials or to take the children in their care to the local library. Section 101(6), as implemented by § 770.10(b)(10), specifically authorizes State library administrative agencies and local libraries to use Title I funds to bring library materials and programs to licensed or certified child-care providers or child-care centers.

Changes: None.

Comment: One commenter asked whether the purchase of a bookmobile or other motor vehicle would be authorized under § 770.10(b)(10), since such a purchase could be considered part of "assisting libraries in providing mobile library services" to child-care facilities.

Discussion: Under § 770.10(b)(10), bookmobiles and other motor vehicles may be purchased to provide library services to childcare providers or centers.

Changes: None.

Comments: One commenter noted that under the terms of § 770.10(b)(10) of the NPRM, the child-care facility to which mobile library services may be provided with LSCA Title I funds must be licensed or certified, but noted that the NPRM goes no farther in addressing this issue. The commenter inquired whether unlicensed facilities would be eligible for mobile services. Another commenter noted that her State provides an "exemption" status for a clearly defined group of child-care centers. The State agency that licenses child-care centers deems this exemption to be a "certification." The commenter asked whether, under the NPRM, these exempt centers would be eligible to receive services funded with LSCA Title I funds.

Discussion: Under section 101(6) of the LSCA and § 770.10(b)(10) of these final regulations, unlicensed facilities are not eligible for mobile library services. Only child-care centers that meet either State licensing or certification requirements are eligible to either apply for a grant or to receive direct mobile library services under authority of these provisions. Under section 101(6) of the Act, child-care providers or child-care centers must be licensed or certified by the State, or must otherwise meet the requirements of State law. Thus, in a State where certain child-care providers are certified or deemed to be certified by the appropriate State agency, the Secretary would consider these centers and providers to be eligible for services under section 101(6) of the Act and § 770.10(b)(10) of these regulations.

Changes: None.

Comment: One commenter asked for a definition of "community programs" as the term is used in § 770.10(b)(11) of the NPRM.

Discussion: Community programs may involve more than one agency, be carried out in more than one location within a community, and serve a variety of eligible groups or persons. The Secretary does not see the need for a regulatory definition, however, and considers the States and their local libraries to be fully capable of delineating and defining the parameters of their own community programs.

Changes: None.

Section 770.11 What Types of Projects May Be Funded under Public Library Construction and Technology Enhancement Grants?

Comment: One commenter found the entire section confusing and provided a suggested revision of it.

Discussion: In these final regulations, the Secretary has adopted the language proposed by the commenter with minor revisions. The language proposed by the commenter organizes the elements of § 770.11 so that the provision is now more readily understood and should be easier for States to apply to construction program operations.

Changes: The revision of § 770.11 of the NPRM is incorporated at § 770.11 of these final regulations.

Comments: One commenter requested definitions of the terms "Information and building technologies," "Video and telecommunications equipment," "Enclosures or structure necessary to house," and "Safe working environments" as used in § 770.11(c) of the NPRM. Another commenter asked that the definition of the term "Technology enhancement" be included in § 770.11.

Discussion: The term "Information and building technologies," as used in section 3(2) of the Act and in § 770.11(b)(1) of these final regulations, means those technologies that have been developed or will be developed for the storage, retrieval, and processing of information and for the efficient operation and maintenance of buildings and other structures that are authorized to be constructed with Title II funds awarded under the Act. Unlike the other terms referenced in the comment, this term as used in the Act and regulations could have several different meanings, especially as concerns building technologies. Accordingly, the Secretary adds the definition outlined here to the definitions in § 770.4, in order to provide clear and meaningful guidance to grantees. The term "Video and telecommunications equipment," as used in § 770.11(b)(2) of these final regulations, refers to all forms of equipment utilized for visual and audio communications. The term "Enclosures or structures necessary" to house equipment in public library buildings, as used in § 770.11(b)(6) of these final regulations, includes teleconferencing facilities, installations or towers for satellite antennas, and environmentally controlled facilities required for computers and other types of sensitive communications equipment. "Safe working environments" are determined on a case-by-case basis, using appropriate architectural plans, engineering standards, and building codes. Because these terms are generally understood, the Secretary does not consider that definitions for them are necessary in these final regulations. The term "Technology enhancement" is defined at section 3(19) of the Act.

Changes: The definition of "Information and building technologies," as outlined in the discussion above, is added to the definitions in § 770.4. No other changes have been made.

Comment: One commenter asked under what circumstances the leasing of equipment would be an appropriate alternative to the purchasing of equipment.

Discussion: Section 3(2) of the Act authorizes a recipient to both purchase and lease equipment. Under § 770.11(a)(3) of these final regulations, both the purchase and lease of equipment are authorized. The State or subgrantee must decide whether to lease or purchase equipment in particular circumstances based on equipment needs, the purposes of the project, and whether purchase or lease would be necessary, cost-effective, and reasonable under the circumstances.

Changes: None.

Comment: One commenter asked whether "Building technologies" includes heating, ventilation and air conditioning systems, whether the cost of installing a security system could be paid for with Title II funds under authority of § 770.11(c)(4) of the NPRM, and whether repair of facilities and equipment is still an ineligible cost.

Discussion: The term "Building technologies" is included in the definition of "Construction" in section 3(2) of the Act. The Secretary considers reasonable and necessary costs associated with the installation of heating, ventilation, air conditioning and security systems as being necessary for the proper functioning of a facility that provides public library services. Those costs, therefore, would be authorized under § 770.11(b)(1) as well as § 770.11(b)(7) of these final regulations. However, since the Act still contains no provision for repair costs, the cost of repair of equipment and facilities is not allowable.

Changes: None.

Comment: One commenter asked if a Title II project designed to ensure "Safe working environments" could be funded if the project does not involve construction, but involves activities such as standard maintenance or security lighting.

Discussion: Section 3(2) of the Act defines the term "Construction" and authorizes the use of Title II funds for remodeling designed to ensure safe working environments. The same is provided for at § 770.11(c)(2) of these final regulations. Therefore, by statutory definition, any remodeling designed to ensure safe working environments must involve construction and must meet all applicable construction requirements. Standard maintenance or repair is not authorized under § 770.11 but the installation of security indoor or outdoor lighting is an allowable Title II expenditure under either § 770.11(b)(7) or § 770.11(c)(2) of these final regulations. The determination of the best way to achieve a safe working environment must be made on a case-by-case basis, using appropriate architectural plans, engineering standards, and building codes.

Changes: None.

Comment: One commenter asked if Title II funds may be used to remove asbestos, storage tanks leaking fuel, or contaminated soils, to replace a leaking roof, or to install smoke abatement equipment in staff lounge areas of libraries.

Discussion: The Secretary considers that LSCA Title II funds may be used to remove asbestos and other environmentally hazardous materials, and to install smoke abatement equipment, as part or all of a remodeling project to ensure a safe working environment, as authorized in § 770.11(c)(2) of these final regulations. The Secretary does not consider the replacement of a leaky roof to be allowable because this would constitute a repair, for which neither the Act nor these final regulations authorizes the expenditure of Title II funds.

Changes: None.

Comments: Several commenters asked whether technology enhancement projects may be funded even if no construction will be involved.

Discussion: "Technology enhancement" is referred to throughout the amended LSCA as being distinct from "Construction." "Construction" and "Technology enhancement" are defined separately in the Act, in sections 3(2) and 3(19) respectively. The legislative history of Pub. L. 101–254 indicates that in Title II of the Act Congress intended to authorize the use of funds for the purchase of technology necessary to provide the public with access to information and that a library's purchase of that technology need not be a part of a construction or renovation project in order to be allowable under Title II.

Changes: None.

Comment: One commenter asked whether there were any limitations to technology enhancement grants if technology enhancement projects are not undertaken in combination with construction.

Discussion: The limitations that apply to the use of technology enhancement grants for the purchase of technological equipment apart from any construction are those found in the definition of the term in section 3(19) of the Act. Under the definition in section 3(19), technology enhancement grants may be used for the acquisition, installation, maintenance, or replacement of substantial technological equipment necessary to provide access to information in electronic and other formats. Department regulations in 34 CFR 80.32 would also apply to the purchase of equipment with LSCA funds.

Changes: None.

Comment: One commenter wished to know whether a technology enhancement project, which can be independent from a construction project, needs to adhere to Federal regulations on wage rates, environmental impact, relocation assistance, and the other construction assurances.

Discussion: Applicable Federal construction regulations requiring State and subgrantee compliance in areas such as wage rates, environmental impact and relocation assistance, do not apply to a State's or subgrantee's purchase of technological equipment with funds awarded under a technology enhancement grant, whether or not the proposal is part of a construction project. However, the construction regulations would, of course, apply to the construction component of the project.

Changes: None.

Comment: One commenter asked whether the use of Title II funds is limited to equipment that is housed in a public library facility.

Discussion: Title II funds may be utilized only to purchase equipment that is to be housed in, or adjacent to, a public library facility. Section 202 of the Act limits the use of Title II funds to the construction and technology enhancement of public libraries.

Changes: None.

Comment: One commenter asked whether Title II funds may be used to connect electronically a local public library to a regional library's automated database, and whether Title II funds may be used to pay for the public library portion of a multi-type regional library data base upgrade.

Discussion: Title II funds may be used to pay the costs of connecting electronically a public library to a regional library's database, and Title II funds may be used to fund the public library portion of a multi-type regional library database upgrade. The Secretary considers those costs to be allowable under the definition of technology enhancement if a multi-type regional library system provides support services to public libraries and if the purpose of the grant used to effectuate the electronic connection is to enhance the

public libraries' ability to provide services to their patrons.

Changes: None.

Comment: One commenter asked whether demolition of an existing structure, site preparation, landscaping, legal fees, and interior design services are allowable construction costs.

Discussion: The Secretary considers that demolition of an existing structure, site preparation, landscaping, legal fees, and interior design services are allowable only if they are undertaken in conjunction with "Construction" as defined at section 3(2) of the Act. These costs are allowable if they are necessary and reasonable and are incurred in the course of the purchase or construction of a facility.

Changes: None.

Section 770.12 What Types of Projects May Be Funded Under Interlibrary Cooperation and Resource Sharing Grants?

Comments: One commenter noted that, in describing the types of projects that may be funded under Interlibrary Cooperation and Resource Sharing grants, the phrase "include the following" is vague, being neither permissive (may) nor mandatory (shall). The commenter noted also that section 304 of the Act requires that the long-range program and annual program of each State *shall* include a Statewide resource sharing plan. The commenter recommended that the phrase "include the following" be revised to read "planning shall include—."

Discussion: The commenter appears to be concerned about what the statute mandates as opposed to what the statute authorizes under Title III, Interlibrary Cooperation and Resource Sharing. Under section 6(d) of the Act, in order to receive funds under Title III, a State must submit a long-range program for library development that includes a program for interlibrary cooperation and resource sharing activities and an annual program describing the activities to be undertaken using the Title III funds available for that fiscal year. The types of projects that may be funded under Title III of the Act are described in several sections of the Act. Section 302 provides that grants must be used for the development of cooperative library networks; for establishing, expanding, and operating cooperative networks of libraries that provide for the coordination of the resources of school, public, academic and special libraries and information centers; and for developing the technological capacity of libraries for interlibrary cooperation and resource sharing. Section 304(a) requires that the long-range and annual programs of each State must include a Statewide resource sharing plan, and section 305(a) states that the long-range program and annual program of each State may include Statewide preservation objectives.

Changes: In these final regulations the Secretary clarifies § 770.12 by deleting the words "Planning may include" and organizing the projects into a single list which differentiates between activities that are mandated from those that are allowable. The effect of this revision is that the types of projects that may be funded under Title III are now listed as follows: mandated activities are under §§ 770.12(a) (1) through (4), allowable activities are under § 770.12(b), and activities for which a plan must be approved for the use of LSCA funds are under § 770.12(c) of these final regulations.

Comment: One commenter asked for a definition of "Technological capacity." The commenter was referring to section 302(a) of the Act, which provides that funds appropriated under Title III be used for developing the technological capacity of libraries for interlibrary cooperation and resource sharing.

Discussion: The Secretary intends that the dictionary definition of the term "technological" be utilized in administering the program and sees no need to introduce a definition into these final regulations.

Changes: None.

Comment: One commenter requested a statutory citation for "implementing" a statewide preservation cooperation plan.

Discussion: The word "implementing" does not appear in the Act. Section 305(c) of the LSCA allows a State that has a Statewide preservation cooperation plan to use funds under Title III to carry out such a plan. The word "implement" appears in these regulations at §§ 770.22(a)(3) and 770.23(a)(3)(ii), regarding the basic State plan and the long-range plan, respectively, and applies to policies and procedures for carrying out the State plan. The Secretary does not intend that the term "implement" convey any unusual meaning, but instead intends that the dictionary definition of the term be used in the administration of the program and sees no need for introducing a definition of this term into these regulations.

Changes: None.

Comment: One commenter asked what costs are reimbursable under Title III for those schools that make their school library resources available to the public during periods when school is not in session, whether those costs include the costs of acquisition of library materials not currently authorized under Title III, and when a school is considered not to be in session.

Discussion: The State educational agency in each State must determine for purposes of the Act when a school facility is not in session. Under section 304(e) of the Act, States are encouraged to increase public access to school library holdings during periods when schools are not in session, especially in areas with limited library resources. Reimbursable costs are those necessary to provide the intended public access to school library resources. The purchase of library materials is allowable under section 304(c)(6) of the Act, which authorizes the use of Title III funds for collection development in school libraries, among others, if the quality and quantity of library materials housed in school libraries serving as resource centers need to be improved. However, with the exception of materials purchased by a school library that qualifies under section 304(c)(6), the costs that are reimbursable under section 304(e) are those incurred by school libraries that make their existing collections available to public library patrons, not costs incurred by school libraries in the course of the libraries' expansion of their collections.

Changes: None.

Comment: One commenter asked whether State planning for development or update may be funded under Title III.

Discussion: State planning for development may be funded under Title III. Section 302 of the Act and § 770.12 of these final regulations provide for grants for planning for, and taking other steps leading to the development of cooperative library networks. Section 303 of the Act also requires that a State's annual program include an extension of the long-range program, taking into consideration the results of evaluations.

Changes: None.

Comment: One commenter asked whether a State library administrative agency may contract with the State archives to develop a coordinated Statewide preservation plan if the archives is a unit of the State library administrative agency.

Discussion: Under section 305(d) of the Act, a State library administrative agency is authorized to contract with the State archives among other agencies and institutions to develop and implement a Statewide preservation cooperation plan. Section 305 of the Act requires that a Statewide preservation cooperation plan specify the methods by which the State library administrative agency will work, consult, and contract with those agencies to carry out the plan. However, to the extent that in a particular State the State archives is a unit of the State library administrative agency, presumably a contract would not be necessary.

Changes: None.

Section 770.20 What Must a State Do To Receive a Grant under the State-Administered Program?

Comment: One commenter asked what is considered a timely submission of the basic State plan.

Discussion: Under section 6(a)(1) of the Act, any State desiring to receive its allotment for any fiscal year must have in effect a basic State plan for that fiscal year. The Federal fiscal year commences on October 1 and ends on September 30 of the following calendar year. Therefore, a State's basic State plan submission is timely if it has been received by the Department early enough to allow time for the Secretary to have reviewed and approved the plan prior to October 1 of the Federal fiscal year or years to which it applies. Basic State plans are generally effective for several years. Thus, the requirement that a State library administrative agency file a plan does not usually require that the agency apply every fiscal year.

Changes: None.

Section 770.21 What Must a State Plan Include?

Comment: A commenter asked what is meant by "consultation with the Secretary" under § 770.21(b)(2)(ii), what the legal basis for this requirement is, and who represents the Secretary in such a consultation.

Discussion: Consultation with the Secretary is required under section 6(d) of the Act, which governs the development of a State's long-range program for the use of LSCA funds received by a State. The LSCA Program Officer assigned to each State library administrative agency represents the Secretary in that consultation and assists the State library administrative agency in developing a long-range program.

Changes: None.

Section 770.22 What Must a State Include in a Basic State Plan?

Comment: One commenter asked whether the assurance on nondiscrimination in the provision of space for public meetings requires a library to provide access to meeting room space during hours when the library is not open.

Discussion: Section 6(b)(4) of the Act does not require that a library provide space for public meetings after its normal hours of operation. Section 6(b)(4) is silent as to whether the public meetings access referred to is during or after normal operating hours. The Secretary views this provision as prohibiting the discrimination referred to any time that access is provided to outside groups for public meetings.

Changes: None.

Section 770.23 What Must a State Include in a Long-Range Program?

Comments: The Chief Officers of State Library Agencies and other commenters questioned the requirement contained in § 770.23(a)(4)(i) which states that a long-range program must provide for the periodic evaluation of the effectiveness of projects in measurable terms. The commenters cited section 6(b)(3) of the Act which requires States to make reports of evaluations made under their State plans, and pointed out that there is no mention of "measurable terms" anywhere in the Act.

One commenter asked that the term be deleted. The commenters felt that this requirement may place undue emphasis on statistical evaluation in relation to other methodologies, and proposed substitute language such as "with generally accepted evaluation principles."

Discussion: While there is no Federal definition of "measurable terms," the importance of evaluation is emphasized in both the Act and the applicable regulations. These requirements are consonant with the Department's policy to support the strongest possible means of evaluating the benefits of Federal programs. The Secretary views evaluation of the effectiveness of Federally supported programs as a fundamental requirement for good program management. However, the Secretary is sympathetic to the concerns of the commenters that evaluations based solely on statistical measures by themselves may be too limiting, and therefore permits the inclusion of other information based on other generally accepted methods of evaluation. Furthermore, the Secretary would welcome analysis of the information, as well as the judgement of the State library administrative agency concerning the significance, value, or quality of the projects being evaluated.

Changes: The Secretary modifies the regulation to require that projects be evaluated in measurable terms and with generally accepted evaluation methods.

Comment: One commenter asked whether a plan and program for preservation under Title III were one and the same, and whether Title III funds could be used for the preservation of materials.

Discussion: The terms "plan" and "program" occur in several places in the Act. Under the provisions authorizing preservation programs under Title III, States wishing to undertake preservation programs under Title III must include in both their long-range program and annual program (defined respectively in sections 3(12) and 3(13) of the Act) a Statewide preservation cooperation plan. In addition, the long-range and annual programs must identify the preservation objectives to be achieved during the period covered by the long-range program required by section 6 of the Act. In this particular instance, section 305(a)(2) of the Act uses the term "long-range plans" to refer to the "long-range programs" required by Section 6 of the Act.

Changes: None.

Comments: The Chief Officers of State Library Agencies and other commenters questioned the long-range program requirement in § 770.23(c)(3)(i)(B) that States include reference to the "methods" by which endangered library and information resources are to be preserved. The commenters said that this term does not allow enough flexibility to consider the many preservation options that may become available through new technologies. They supported more general language such as requiring States to describe the "strategies" by which resources are to be preserved.

Discussion: The term "methods" is the term used in section 305(b)(1) of the Act. Although the Secretary utilizes this statutory term in these final regulations, the Secretary does not consider it to be inflexible nor does he view the term proposed by the commenters as providing any greater flexibility. Under § 770.23(c)(3)(i)(B), the Secretary fully expects States to apply all appropriate and reasonable preservation methods or technologies that are currently available or become available in the future.

Changes: None.

Section 770.24 What Must a State Include in an Annual Program?

Comment: One commenter asked for clarification of what is meant by the requirement in § 770.24(c)(2) of the NPRM that a State include in its annual program a description of how the State plans to follow policies and procedures in the construction of public libraries that will promote the preservation of library and information resources to be used in the facilities. The commenter also requested a definition of the term "Resources" and inquired whether there

were national policies and procedures that promote the preservation of resources.

Discussion: Library and information resources that require the application of preservation techniques are library materials that have been and are deteriorating physically and have historical or other intrinsic values that justify taking steps to restore or maintain their readability. The most common construction technique that promotes preservation is one that provides library facilities with temperature and humidity controls. There are national preservation organizations that have developed conservation definitions, policies, and procedures that can be adapted by libraries and other organizations concerned with the preservation of rare resources.

Changes: None.

Section 770.40 What Matching Requirements Apply to a Public Library Services Grant?

Comments: Several commenters sought clarification of the Title I matching requirement. They asked whether a State would be ineligible for participation in the Title I program if it were not able to meet the Title I matching requirement. A commenter asked if State aid is to be counted as part of the State source of funds.

Discussion: Under section 7(a)(1) of the Act, any State wishing to participate in the Title I program must have available funds sufficient to meet the matching requirement based upon the State share as promulgated by the Secretary. The ability to match its Title I allotment is a prerequisite to a State receiving its Title I grant award. A State whose State expenditures level has fallen below its mandated share under Title I, as provided in the Secretary's promulgation of the Federal share for each State (section 7(b)(2)) of the Act), would not be eligible to receive Title I funds for the fiscal year when such a condition occurred, regardless of the reason for the reduction. State aid may be counted as State matching funds under this requirement. (Note, however, that if a State fails to qualify for its Title I allotment, it may still qualify for its Title II allotment by meeting the required match for those funds, and for its Title III allotment, which has no matching requirement.)

Changes: None.

Section 770.41(a) What Are the Basic Maintenance-of-Effort Requirements for a Public Library Services Grant?

Comments: General comments on maintenance-of-effort. One commenter asked that the new maintenance-of-effort requirements (introduced in the 1990 Amendments to the LSCA) be dropped because the requirements restrict the ability of the States to make changes in their programs. Another commenter considered these provisions to be the most confusing part of the proposed regulations and recommended that the section be rewritten to clarify what the maintenance-of-effort requirements are and to ensure uniform interpretation. The same commenter suggested that §§ 770.41 and 770.42 be combined and entitled "Maintenance-of-effort requirements for a Public Library Services grant." Yet another commenter was disappointed to find the maintenance-of-effort percentage reduced to 90 percent and expressed the hope that waivers would not be granted.

Discussion: The LSCA Title I maintenance-of-effort requirements, as amended by Public Law 101–254, are found at section 7(a) of the Act. Since the maintenance-of-effort requirements referred to by the commenter are statutory, they must be implemented by the Secretary and are, therefore, included in these final regulations. Since the commenter did not raise specific questions regarding specific aspects of these requirements, there is no basis upon which the Secretary might attempt any further clarification of a provision that he considers to be clear. Finally, the Secretary considers the separation between §§ 770.41 and 770.42 to be a logical one since these two sections contain distinct requirements

Changes: None.

Section 770.41 What Are the Basic Maintenance-of-Effort Requirements for a Public Library Services Grant?

Comments: Eight commenters representing various State library administrative agencies inquired about the meaning of the term "State aid." Several of the commenters asked for a definition of the term. On the other hand, one of the commenters stated that any attempt to define "State aid" for the States collectively might result in unnecessarily restrictive standards, and argued against defining this term in the regulations.

Discussion: "State aid" to public libraries and library systems is referenced in section 7(a)(2)(A) of the Act, as amended by Public Law 101–254. The apparent confusion among commenters on what constitutes "State aid" may result from the diversity in State patterns of funding for public library services. The Secretary recognizes that the diversity in State aid funding patterns could lead to inconsistent reporting of expenditures without clear guidance to the States on what constitutes "State aid". Accordingly, in an NPRM published elsewhere in this issue of the **Federal Register**, the Secretary proposes a definition of the term "State aid". In the definition, the Secretary proposes to establish what is meant by "State aid" under section 7(a)(2)(A) of the Act, in a manner that preserves some flexibility for the States as they account for their expenditure of State funds.

Changes: None.

Comments: Several commenters asked whether under these regulations a State reports only State aid that is used for public library purposes under Title I.

Discussion: State aid is referenced in section 7(a)(2)(A) of the LSCA, as amended by Public Law 101–254. (The term "State aid" is defined in an NPRM elsewhere in this issue of the **Federal Register**.) Under section 7(a)(2)(A), a State library administrative agency is required to report State aid that is expended by public libraries and library systems for public library services. These expenditures are not limited to the purposes of Title I of the LSCA.

Changes: None.

Comment: One commenter asked whether the amount of State aid funds reserved under a State's law to assist with services to populations without public library services must be included in the calculation of maintenance-of-effort, or whether only the amount granted to public libraries and library systems is to be included.

Discussion: Section 101(1) of the Act provides for the extension of public library services to areas and populations without those services. Since one of the purposes of Title I is to extend public library services to areas and populations without those services, all State funds expended for that purpose must be included in the maintenance-of-effort calculation. If a State has a plan for the provision of public library services to populations without those services, the State may award State aid to an existing public library or library system to provide those services (section 7(a)(2)(A) of the Act), or the State could use State funds under its Statewide library development program to provide those services (section 7(a)(2)(B)), or a combination of both. The Secretary wishes to emphasize that, in calculating maintenance-of-effort under the newly enacted section 7(a)(2), expenditures for public library services (section 7(a)(2)(B)) that are incurred *directly* by the State library administrative agency must be reported separately from expenditures for State aid (section 7(a)(2)(A)). Thus, State funds used for services to populations without public library services, whether treated as State aid or made available directly by the State library administrative agency, must be included in the calculation of maintenance-of-effort, and must be reported under the appropriate expenditure category.

Changes: None.

Comment: One commenter from a State that has no State aid program now, but is contemplating one that is based on one-time awards from State surplus funds if they are available, asked whether the State would lose its LSCA funding if this plan were implemented.

Discussion: Under section 7(a)(2)(A) of the Act, as amended by Public Law 101–254, if a State establishes an intermittent State aid program, the State would not qualify for its Title I allotment in subsequent fiscal years beginning the second year after the State aid expenditures when there was no State aid. To qualify for its Title I allotment, a State that has a State aid program must have available for expenditure as State aid in the year of allotment an aggregate amount equal to 90 percent of the amount actually expended for State aid in the second preceding fiscal year.

Changes: None.

Section 770.41 What are the Basic Maintenance-of-Effort Requirements for a Public Library Services Grant?

Comments: Seven commenters asked, in effect, for a definition of the term "Development of public library services" that appears in section 7(a)(2)(B) of the Act. They asked what a State library administrative agency is required to include as part of its charges for extending and developing public library services, and whether it would be permissible for a State library administrative agency to count only the amount that is expended by the Public Library Development Division responsible by State law for developing public library services. Some commenters suggested that reporting expenditures of the Library Development Division would be more appropriate than tracking an aggregate of State library administrative agency expenditures that in some cases includes State aid grants.

Discussion: Under section 7(a)(2)(B) of the statute, as amended by the 1990 amendments, the State library administrative agency is required to demonstrate that it will have available for expenditure "*for the State library administrative agency* or for the part thereof charged by State law with the extension and development of public library services throughout the State" an aggregate amount equal to 90 percent of the amount actually expended for such purposes in the second preceding year. (Emphasis added.) The Secretary does not consider it necessary to include in these regulations a definition of the extension and development of public library services because the Secretary does not view the extension and development of public library services to be an expenditure category that differs from the "extension and improvement of public library services" referred to throughout the LSCA. However, in response to the commenters, the Secretary does wish to clarify that, under the newly enacted section 7(a)(2)(B), expenditures for the extension and development of public library services that are incurred *directly* by the State library administrative agency must be reported separately from section 7(a)(2)(A) "State aid" expenditures, as defined in an NPRM that appears elsewhere in this issue of the **Federal Register**. The proposed definition of "State aid" provides guidance to State library administrative agencies on what expenditures are included within the scope of the term "State aid" as the term is used in section 7(a)(2)(A), as well as providing guidance on what is excluded from the definition of "State aid." The amounts that State library administrative agencies will be required to report as expenditures under section 7(a)(2)(B) (and that are excluded from the definition of "State aid") are those amounts of State funds spent for public library development purposes, not by awarding the funds to State or local libraries or library systems, but by utilizing them directly. In sum, for purposes of LSCA Title I maintenance-of-effort, the amount of State funds expended directly by the State library administrative agency (or by one of its subdivisions) for the development of public library services or for allowable administrative expenses must be reported separately under section 7(a)(2)(B) as State library administrative agency expenditures.

Changes: None.

Comment: One commenter asked which Public Library Development parameters will be used to determine levels of second preceding year library development funding during the first two years of the implementation of the reauthorized Act.

Discussion: The Secretary has not established any parameters for determining levels of second preceding year expenditures for development of public library services during the first two years of the implementation of Public Law 101–254. The Secretary recognizes the possibility that some States may have difficulty providing comparable figures from their FY 1989 and 1990 second preceding year expenditure reports for their FY 1991 and 1992 annual program submissions to comply with section 7 of the Act, as amended by Public Law 101–254. However, since the amended section 7(a)(2) is currently in effect, the Secretary requires that, for FYs 1989 and 1990, the States list second preceding year expenditures under section 7(a)(2)(B) that most nearly reflect those expenditures incurred directly by the State library administrative agency in the extension and development of public library services for the year in question. (See the previous comment for discussion of extension and development of public library services.)

Changes: None.

Comment: One commenter asked whether a State library administrative agency has an option in any given year of maintaining effort on either the entire agency budget, or only on that part charged with extending and developing public library services.

Discussion: In section 7(a)(2)(B), Congress intended that States continue to give fiscal support to State library administrative agencies so that those agencies could either directly provide public library services, or administer the distribution of State aid for public library services, or conduct both these functions. Section 7(a)(2)(B) is not concerned with functions of State library administrative agencies which are unrelated to public library services. It follows that if the entire agency is legally responsible for public library services, the entire agency's budget must be counted. If by State law, only a portion of the agency is responsible for public library services, only the budget for that portion of the agency must be counted. Therefore there is no option.

Note that State aid itself is counted under section 7(a)(2)(A), not 7(a)(2)(B).

Changes: None.

Comment: The same commenter as above asked also whether services to the blind and physically handicapped are considered to be within the part of the State library administrative agency charged by State law with extending and developing public library services throughout the State.

Discussion: If the State library administrative agency is the agency charged by State law with the extension and development of public library services throughout the State (section 7(a)(2)(B) of the Act), and the agency

contains a unit that provides services to the blind and physically handicapped, then the Secretary considers expenditures for library services for the blind and physically handicapped to be expenditures of that agency, to be reported under either section 7(a)(2)(A) or 7(a)(2)(B), depending on how the services are made available. (The expenditures are also reported under section 103 of the Act, regardless of how they are provided.)

Changes: None.

Section 770.41 What Are the Basic Maintenance-of-Effort Requirements for a Public Library Services Grant?

Comments: One commenter endorsed the most rigid waiver stipulations possible, as a means of preventing the State legislature from reducing the State's library budget below the level of the State's eligibility for its LSCA allotment. Another commenter wanted to know whether situations such as hiring freezes, across-the-board State budget cuts, emergency closure of the State library administrative agency, sequester of funds, and extensive position vacancies, qualified as exceptional extenuating circumstances.

Discussion: Hiring freezes, across-the-board State budget cuts, emergency closure of the State library administrative agency, sequester of funds, and extensive position vacancies, may constitute exceptional extenuating circumstances. None of these circumstances, however, is, in and of itself, an automatic ground for waiver. Waiver is to be determined by the Secretary on a case-by-case basis depending on the totality of the circumstances giving rise to the request for waiver.

Changes: None.

Comments: Numerous commenters sought clarification of what is meant in this section of the regulations by State tax initiatives and referenda. Some commenters viewed this requirement as restricting the authority of the Secretary and introducing an element beyond control of the States. They added that the complexity of tax initiatives and referenda within the various States argues for providing more discretion to the Secretary in examining the "exceptional extenuating circumstances". The commenters felt that initiatives and referenda are beyond the capabilities of any governor, legislature, or State librarian to affect, either in the amount of State funds reaching libraries or in the amount of State revenues. The commenters requested that the language "except that the Secretary does not consider the effect of State tax initiatives or referenda in determining whether to grant a waiver" be deleted, as did another commenter who found no basis in Public Law 101–254 for the inclusion of language referring to State tax initiatives or referenda, and did not view that language as consistent with section 7(a) of the Act, as amended by the 1990 amendments. One commenter urged that the natural disaster feature be deleted.

Discussion: Under the 1990 amendments to the LSCA, the Secretary may, for the first time, and in accordance with regulations, waive the maintenance-of-effort requirements under section 7(a)(2) of the Act, if the Secretary determines that the application of section 7(a)(2) would be unjust or unreasonable in the light of exceptional extenuating circumstances. Thus, Public Law 101–254 vests broad authority in the Secretary to define exceptional circumstances in the regulations. The Secretary has retained the language in the proposed regulations that excludes circumstances that arise as the result of State tax initiatives or referenda from consideration in determining whether or not to grant a waiver of maintenance-of-effort requirements. Deletion of the exclusions would subvert the purpose of the maintenance-of-effort requirement. A reduction in library spending that results from a State legislative act or a referendum is a reflection of the State's choice to reduce library spending. Congress enacted the maintenance-of-effort requirement as an incentive to States not to shift their responsibilities for library support to the Federal government. The legislative history of Public Law 101–254 recognizes that the maintenance-of-effort requirement has proven to be effective in leveraging State support for public libraries. In § 770.41(b)(2)(i) the exceptional extenuating circumstances under which the Secretary may waive the basic maintenance-of-effort requirements include, but are not limited to, a natural disaster affecting the State. Under the authority of Public Law 101–254, the Secretary has determined that natural disasters are among the circumstances under which the Secretary may waive basic maintenance-of-effort requirements. A natural disaster is a basis for waiver of maintenance-of-effort requirements in several other programs administered by the Education Department.

Changes: The Secretary retains the language in those regulations dealing with State tax initiatives and referenda that indicates that the effect of State legislative action or referenda reducing revenue or rejecting revenue initiatives does not in and of itself justify a waiver. The Secretary adds to the regulations a requirement that a State support a waiver request with appropriate documentation.

Comment: One commenter stated that it is not clear whether a waiver may be granted two or more years in succession, nor whether there is a time limit on the effect of State tax initiatives or referenda that are not to be considered.

Discussion: Sections 7(a), 7(a)(1), and 7(a)(2) are all clearly intended to apply to a single fiscal year ("any fiscal year," "the fiscal year"). Consequently, any waiver of the requirements of section 7(a)(2) would be effective only for a single fiscal year. Nothing, however, would prevent a State from applying for a separate waiver in a succeeding year. The effect of State tax initiatives or referenda would continue to be excluded from consideration, however, because they occur by deliberate choice and do not constitute exceptional extenuating circumstances.

Changes: None.

Comment: One commenter asked what documentation is required to substantiate a precipitous decline in the financial resources of the State.

Discussion: The documentation required to substantiate a precipitous decline in the financial resources of the State should be sufficient to authenticate the situation being alleged. This may differ from State to State, depending on the nature of the State's resources and the causes for the decline. The Department will, on request, advise State staff on a case by case basis.

Changes: None.

Section 770.42 What Other Maintenance-of-Effort Requirements Apply to a Public Library Services Grant?

Comment: One commenter felt that maintenance-of-effort does not allow a State library administrative agency to take into account cost-effective measures in administering its programs. Nor does it allow for a decrease in demand or need for additional services. The commenter understood that maintenance-of-effort reductions are allowed only for a decrease in populations served.

Discussion: Nothing in the LSCA or applicable regulations prohibits a grantee from applying cost-effective measures in administering its programs. On the contrary, under OMB Circular A–87, basic guidelines for costs require that costs under a grant program be necessary and reasonable for proper and efficient administration of the grant programs. Decreases in demand or need for additional services are determined by a State annually at the time that the long-range program is reviewed and revised according to changing needs and the results of evaluations and surveys (§ 770.21(b)(3) (ii) and (iii) of these final regulations).

Changes: None.

Comment: One commenter asked how public library services were to be differentiated from school library services. The commenter asked how maintenance-of-effort would be affected if they are considered to be separate.

Discussion: Title I of the LSCA relates to public library services only. There is no provision in LSCA Title I relative to school library services. School library services are the responsibility of the school systems and State educational agencies (SEAs) not the State library administrative agencies. School libraries may not be funded directly under the LSCA. For purposes of LSCA Title I maintenance-of-effort, a State library administrative agency reports separately its expenditures for State aid to public libraries and library systems and its direct expenditures for the development of public library services (section 7(a)(2) of the Act). A State's expenditures for public school libraries are separate from either of these, are not reported, and do not affect LSCA Title I maintenance-of-effort.

Changes: None.

Comment: One commenter asked (1) how the Secretary will determine whether populations of the institutionalized and the physically handicapped have declined, (2) whether State or Federal statistics will be used, (3) whether long-term decreases or short-term declines will be relevant, (4) whether a base year will be established, and (5) what formula will be used to determine applicable reductions.

Discussion: Under the paragraph immediately following section 103(7) of the LSCA, as amended by Public Law 101–254, the amount required to be expended for maintenance-of-effort for State institutional library services and library services to the blind and physically handicapped will be ratably reduced if both the Federal allocations to the State are reduced and the populations served by those expenditures have declined. Under the paragraph immediately following section 103(7) of the statute, both conditions must exist for ratable reduction to apply to the amount which a State must expend from Federal, State, and local sources under section 103(3). The Secretary will rely on relevant statistics supplied by the State to determine if populations of the institutionalized or the physically handicapped have declined. Based on State data, subject to verification and for which the Secretary may at any time require additional substantiation under section 6(b)(3) of the Act, the Secretary will make a determination of the reduction rate. The base for maintenance-of-effort for institutionalized and physically handicapped populations is the second preceding year.

Changes: None.

Section 770.43 What Maintenance of Federal Support is Required for Major Urban Resource Libraries (MURLs)?

Comments: One commenter noted that under the LSCA, as amended by Public Law 101–254, States may ratably reduce grants to MURLs if the total Federal allocations to the State under section 5 of the Act for Title I purposes are reduced for the fiscal year in question, or if the 1990 Census shows that the population in the city served by the MURL in question has decreased (LSCA, section 102(3)). The commenter noted also that the NPRM provided no instructions as to how this can be accomplished in a manner that would enable a State to continue to meet MURL maintenance-of-support requirements. Another commenter asked whether the ratable reduction would decrease by the same percentage as the population decrease.

Discussion: Under section 102(c)(3)(A) and (B) of the Act, a State may ratably reduce the amount paid to any of its MURLs to the extent that the total Federal allocation for that State under Title I is reduced *or* to the extent that the 1990 Census shows that the population of the city served by the MURL in question has decreased. A State library administrative agency meets the MURL maintenance-of-support requirement by applying the reductions determined by the Secretary, as appropriate in each case. Reduced payments by States to MURLs under this section of the Act may be proportionate to the decrease in either the Federal allocation *or* the population of the MURL city, or both. A reduction in the Federal allocation affects the minimum required to be reserved by the State library administrative agency for payment to all MURLs, whereas a reduction in the population of a MURL city affects the amount to be paid by the State library administrative agency to the MURL in that city. In the event that both of these circumstances occur in the same fiscal year, with different rates of reduction, a State may apply one or the other of the rates, or both rates. A State need not reduce payments at all, under section 102(c)(1) of the statute, but rather is authorized to do so under section 102(c)(3) of the statute. In any fiscal year when the Title I Federal allocation exceeds $80,000,000, States are still required to set aside certain minimum amounts for payment to their MURLs. The regulations in § 770.43(c) provide an example illustrating how a calculation might be made in a fiscal year when both a reduction in the Federal allocation occurs and a MURL city's population is reduced, and a State chooses to apply both rates.

Changes: The Secretary revises § 770.43 to indicate that the State library administrative agency may ratably reduce the amount that it pays to a MURL, rather than that the Secretary does so, as stated in the NPRM. As revised, § 770.43 also provides that, in any fiscal year when both reduction rates apply, the State library administrative agency determines whether to apply one or the other of the reduction rates, or both, or not to reduce payments to MURLs at all. In response to the commenters' requests for guidance in determining how a State meets the MURL maintenance-of-support requirement under these circumstances, the revised regulation includes an example of how a reduction may be calculated.

Comments: Several commenters asked whether the 1990 Census becomes the basis for determining the population of a city served by a MURL, and whether official Census estimates will no longer be used by the Secretary for that purpose.

Discussion: Under section 102(c)(3)(B) of the Act, the 1990 Census is the basis that a State library administrative agency must use for determining whether a MURL city's population has decreased. In the light of this provision, in making a determination under section 102(c)(3)(B), a State library administrative agency is required to utilize 1990 Census figures and is not authorized to rely upon Census estimates. Section 102(c)(2)(A) authorizes the Secretary to make the determination of whether any city has a population of 100,000 or more for purposes of designating it a MURL city. For this purpose, the Secretary will continue to utilize the best available population data provided by the Census Bureau.

Changes: None.

Comment: One commenter asked whether a MURL whose city population falls below 100,000 is eligible for an interim metropolitan library subgrant. He asked also for an explanation of the distinction between eligible and

ineligible expenditures as a subrecipient of a metropolitan subgrant.

Discussion: Under section 102(c)(2) of the Act, a city whose population falls below 100,000 is no longer eligible for a MURL grant. However, the library in that city is eligible to apply for grants under section 102(a)(2)(C) of the Act for strengthening metropolitan public libraries that serve as national or regional resource centers, provided that the State's long-range program includes a plan for services needed by the users of those libraries. Eligible expenditures under this provision must be for the purposes authorized under Title I of the Act, and they must meet all other applicable statutory and regulatory requirements.

Changes: None.

Section 770.44 What are a State's Financial Obligations under a Public Library Construction and Technology Enhancement Grant?

Comments: Several commenters asked whether there is a matching requirement for Title II funds that will be used for technological enhancement, and whether the match is determined by the Federal share or the 50/50 match required for construction.

Discussion: Section 202 of the Act states that funds must be available for the purpose of paying the Federal share of the cost of construction and technology enhancement projects, and that the Federal share of the cost of construction and technology enhancement of any project assisted under Title II of the LSCA may not exceed one-half of the total cost of the project. In order to qualify for LSCA Title II funds in any fiscal year, a State must meet its overall share of State and local funds for that fiscal year. In a fiscal year in which a State's share is less than 50 percent, each construction and technology enhancement project approved in that fiscal year in that State must still meet the 50 percent project matching requirement.

Changes: None.

Comment: One commenter asked whether a local library construction project with no Federal funds involved may use that project's local funds as a match for a Title II technological enhancement grant.

Discussion: State and local funds from a local library project that has no Federal funds involved may not be used as a match for a Title II technology enhancement grant. Since section 202(b) of the Act prohibits the Federal share of any project assisted under Title II from exceeding one-half of the total cost of that same project, an unrelated project funded with State and local funds could not be applied toward satisfying the Title II project-by-project matching requirement.

Changes: None.

Comment: In referencing § 770.44(a)(1), one commenter considered the phrase "for that year" to be ambiguous. He asked whether what is meant is the amount of a project grant awarded in a particular year, or whether the costs for that year are to be compared with the Federal share for that year. The commenter suggested a revision of the paragraph.

Discussion: Under section 202 of the LSCA, there is a matching requirement for Federal funds that may be used for construction and technology enhancement, whether or not these Federal funds are from the current fiscal year's Title II allotment, or from a previous year's or years' Title II allotments. The minimum amount that must be provided as the non-Federal match for a single construction and technology enhancement project under Title II of the LSCA is 50 percent of the total cost of that project (section 202(b) of the Act). If the State's non-Federal share as promulgated by the Secretary is greater than 50 percent, then the share or shares of one or more projects may have to be increased to enable the State to meet the State matching requirement under section 202(a). The Secretary agrees that the language in § 770.44(a)(1) of the NPRM may be confusing and that this regulation needs to be clarified.

Changes: The Secretary clarifies the regulations at § 770.44(a) by indicating that in the year that a Title II Public Library Construction and Technology Enhancement grant is made for, a State must provide, from non-Federal sources, the difference between the total costs of the projects financed under that grant and the Federal share of those costs as determined under section 7(b) of the Act.

Section 770.45 What Other Financial Obligation Does a Recipient Have Under a Public Library Construction and Technology Enhancement Grant?

Comments: Several commenters inquired as to whether section 202(c) of the Act applies to technology enhancement, and specifically whether or not technologies such as computer hardware purchased under the technology enhancement amendment would be held to the 20-year requirement.

Discussion: The 20-year requirement applies to a building constructed with Title II funds that ceases to be used as a library facility. Under section 202(c) of the Act, if, within 20 years of its construction, a facility constructed with Title II funds ceases or fails to be a public or nonprofit institution or ceases to be used as a library facility, the recipient of the Title II funds must repay a prorated amount of the value of the facility constructed with those funds, based on the amount of the Federal interest remaining in the project. The 20-year requirement does not apply to equipment installed under a "technology enhancement" proposal, whether or not the proposal is part of a construction project, because technology enhancement results in the purchase and installation of equipment, not the construction of facilities. The term "technology enhancement" is defined separately in the Act, contains no restriction to "any such building" as found in Section 3(2) of the Act, and is referred to throughout the amended LSCA in a manner that distinguishes it from "construction." In addition, the Secretary has concluded, from the legislative history of Pub. L. 101–254, that Congress did not intend to require each technology enhancement project to be a part of a construction or renovation project in each instance in order for the technology enhancement project to be funded under Title II.

Changes: None.

Comment: One commenter noted that the term "good cause" is not defined at section 202(c) of the Act or in these regulations.

Discussion: The Secretary determines "good cause" on a case-by-case basis. The good cause clause is not contained in the 1990 amendments to the LSCA; it was introduced in the 1984 amendments to the LSCA, Pub. L. 98–480. Comments on Pub. L. 98–480 included a request for a definition of "good cause." The Secretary's response to this request is contained in the **Federal Register** at 50 FR 33196, August 16, 1985. As was stated in that response, section 202(c) of the LSCA provides the Secretary with broad discretion to determine whether or not there is "good cause" for releasing the institution from its obligation to repay the amount of the Federal interest to the Department. He does so based on relevant information provided to the Department by each library requesting a "good cause" waiver under section 202(c).

Changes: None.

Section 770.46 What Administrative Costs Are Allowable Under the State-Administered Program?

Comment: One commenter asked whether expenses are allowable for the work of the LSCA advisory committee to the State library administrative agency, and, if so, under which title those expenses should be paid.

Discussion: Section 8 of the Act allows a State to expend funds received under Titles I and II for administrative costs in connection with programs and activities carried out under Titles I, II, and III of the Act. Subject to the provisions of section 8, section 102(b)(1) of the Act provides that grants to States may be used to pay the cost of the activities of those advisory groups and panels as may be necessary to assist the State library administrative agency in carrying out its functions under Title I.

Changes: None.

Comments: One commenter asked for the meaning of "administrative functions." The commenter asked whether these are restricted to the activities identified in § 770.46(c) (1) through (4). The same commenter asked also whether indirect costs, as approved by Federal cognizant agencies for cost allocation plans, are included in this definition of "administration."

Discussion: Administrative functions are identified at section 102(b)(1) of the Act and they are restricted to the activities enumerated in § 770.46(c) (1) through (4). Section 8 of the Act allows a State to expend funds received under Titles I and II for administrative costs in connection with programs and activities carried out under Titles I, II, and III. Conversely, indirect costs and cost allocation plans are not included in the Act or these regulations because they are not program activities. Rather, they are allowable cost items for accomplishing the activities. Indirect costs are governed by 34 CFR 76.560 and 76.561. In addition, as a result of the comments on the NPRM under the 1984 reauthorization of the LSCA (Pub. L. 98–480), a discussion of the relationship of indirect costs to administering the LSCA program and to the six percent cap on allowable costs for administration at section 8 of the Act was published in the **Federal Register** at 50 FR 33198, August 16, 1985.

Changes: None.

Department of Education

34 CFR Part 770

Library Services and Construction Act State-Administered Program; Proposed Rule

DEPARTMENT OF EDUCATION

34 CFR Part 770

RIN: 1850-AA39

Library Services and Construction Act State-Administered Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to add a definition of the term "State aid" to the regulations governing the Library Services and Construction Act (LSCA). Comments received following publication of the notice of proposed rulemaking (NPRM) implementing the 1990 amendments to the LSCA (55 FR 42152) indicated uncertainty among commenters over what is meant by the term "State aid" and the new maintenance-of-effort requirement in section 7 of the LSCA, as amended by the 1990 amendments to the LSCA (Pub. L. 101-254). The commenters asked for an explanation of the meaning of "State aid." Some of the commenters favored a definition of the term, while others argued against a definition in the regulations. It was clear from all of the comments on this issue that a difference of opinion exists among the commenters about which State funds must be reported under the "State aid" category. The Secretary has concluded that a definition is needed in order to clarify the meaning of the term "State aid" and of the new maintenance-of-effort requirement in section 7 of the LSCA. The proposed definition would promote uniform administration of the Act consistent with congressional intent.

DATES: Comments must be received on or before May 1, 1992.

ADDRESSES: All comments concerning this proposed definition should be addressed to Mr. Robert Klassen, U.S. Department of Education, 555 New Jersey Avenue NW., room 402L, Washington, DC 20202-5571.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Klassen. Telephone: (202) 219-1303. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: On October 17, 1990, the Secretary published in the Federal Register (55 FR 42152) an NPRM to implement the Library Services and Construction Act Amendments of 1990 (Pub. L. 101-254). In particular, the amendments of 1990 modified substantially the maintenance-of-effort requirement under title I of the LSCA by identifying two discrete expenditure categories: State aid to public libraries and library systems under section 7(a)(2)(A) of the LSCA and State funds expended directly by State library administrative agencies for Statewide development of public library services under section 7(a)(2)(B) of the LSCA. The NPRM listed these two new categories separately, consistent with the sections of the Act that identify each. Formerly, State funds expended for the purposes of the LSCA were reported under the general category of State funds, without differentiation among categories of those funds. Moreover, the new term "State aid," introduced into section 7 of the LSCA by the 1990 amendments, is not defined in the statute.

Comments received following publication of the NPRM made it evident that the commenters did not have a clear understanding of how to report State expenditures under the two new categories. Of particular concern to the commenters was the meaning of the term "State aid." The apparent confusion among commenters on what constitutes "State aid" may result from the diversity in State patterns of funding for public library services. The Secretary recognizes that the diversity in State aid funding patterns could lead to inconsistent reporting of expenditures without clear guidance to the States on what constitutes "State aid."

Accordingly, as a result of the conflicting comments received concerning the term "State aid," the Secretary proposes a definition of the term in this NPRM and is soliciting public comment on the proposed definition. The definition identifies funds that would be included and those that would not be included in the category of "State aid." By this definition, the Secretary proposes to establish what is meant by "State aid," under section 7(a)(2)(A) of the LSCA, in a manner that preserves some flexibility for the States as they account for their expenditure of State funds while continuing to comply with section 7 maintenance-of-effort. The definition also would help the States to differentiate between funds used for "State aid" and those used directly by State library administrative agencies for the development of public library services.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. Under the State-administered program, grants for public library services, for public library construction and technology enhancement, and for interlibrary cooperation and resource sharing are available only to States and State library administrative agencies. States and State agencies are not considered to be small entities under the Regulatory Flexibility Act. The regulations concerning this program do not impose any non-statutory requirements that will have a significant economic impact on the small entities affected.

Paperwork Reduction Act of 1980

This proposed definition has been examined under the Paperwork Reduction Act of 1980 and has been found to contain no information collection requirements.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program. (Please note that Federally recognized Indian tribal governments are not subject to Executive Order 12372.)

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding the proposed definition of the term "State aid."

All comments submitted in response to this NPRM will be available for public inspection, during and after the comment period, in room 402L, Capitol Building, 555 New Jersey Avenue NW., Washington, DC, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites

comment on whether there may be further opportunities to reduce any regulatory burdens found in this NPRM.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed definition would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Lamar Alexander,

Secretary of Education.

(Catalog of Federal Domestic Assistance Numbers: 84.034 Public Library Services; 84.154 Public Library Construction; 84.035 Interlibrary Cooperation and Resource Sharing)

The Secretary proposes to amend part 770 of title 34 of the Code of Federal Regulations as follows:

PART 770—LIBRARY SERVICES AND CONSTRUCTION ACT STATE-ADMINISTERED PROGRAM

1. The authority citation for part 770 continues to read as follows:

Authority: 20 U.S.C. 351 *et seq.*, unless otherwise noted.

2. Section 770.4 is amended by adding to paragraph (c), in alphabetical order, a definition of the term "State aid" to read as follows:

§ 770.4 What definitions apply to the State-Administered Program?

* * * * *

(c) * * *

State aid means funds that are appropriated by a State legislature for aid to State and local public libraries and to library systems for library services, including funds appropriated to a State library administrative agency for payment to State and local public libraries and to library systems. The term does not include—

(1) State funds appropriated for the purpose of defraying the administrative expenses of the State library administrative agency;

(2) State funds utilized directly by the State library administrative agency for the extension and development of public library services; or

(3) Federal funds received by the State under a categorical assistance program.

* * * * *

Department of Education

Fund for Innovation in Education: Innovation in Education Program—Restructuring Competition; Applications for New Awards for Fiscal Year 1992; Notice

DEPARTMENT OF EDUCATION

[CFDA No. 84.215A]

Fund for Innovation in Education: Innovation in Education Program—Restructuring Competition; Notice Inviting Applications for New Awards for Fiscal Year 1992

Purpose of Program: To provide grants for projects that show promise of identifying and disseminating innovative educational approaches at the preschool, elementary, and secondary levels.

Eligible Applicants: State educational agencies, local educational agencies, institutions of higher education, private schools, and other public and private agencies, organizations and institutions or consortia of those agencies.

Deadline for Transmittal of Applications: May 22, 1992.

Deadline for Intergovernmental Review: July 22, 1992.

Applications Available: March 30, 1992.

Estimated Available Funds: $1,000,000.

Estimated Range of Awards: $100,000–$300,000.

Estimated Average Size of Awards: $200,000.

Estimated Number of Awards: 3–5.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Budget Period: 12 months.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86.

SUPPLEMENTARY INFORMATION: This program and priority support AMERICA 2000, the President's strategy for moving the Nation toward achievement of the National Education Goals. The strategy calls for world-class standards for students in the core subjects of mathematics, science, English, history, and geography and high quality assessments that can measure students' achievement of these standards. The National Council on Education Standards and Testing (NCEST) was a congressionally-chartered group charged with investigating the desirability and feasibility of national standards and improved assessment in elementary and secondary schools. NCEST issued its report in January, 1992, calling for the development of national standards in the core subjects as an urgently needed first step in reforming American education.

The feasibility of setting national standards and their effectiveness in encouraging State and local reform have been demonstrated by a number of national professional organizations. Recently, the National Council of Teachers of Mathematics developed national standards for what students should know and be able to do in mathematics. While national standards do not currently exist for grades K–12 in history, geography, science, and English, considerable work has been done by a variety of organizations toward the development of such national standards. Also, certain States and local school districts have already developed curriculum frameworks that reflect high standards and provide guidelines for the content that should be taught in the core subjects. To ensure that all students have the opportunity to reach high standards, schools and school systems will often need to be restructured.

Priority: Under 34 CFR 75.105(c)(1) the Secretary is particularly interested in applications that meet the following invitational priority. However, an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

Projects that design, develop, and implement innovative approaches for restructuring elementary and secondary schools or school systems in order to ensure that all students can meet high standards of academic achievement in English, history, geography, mathematics, and science. The Secretary is particularly interested in comprehensive restructuring projects that create powerful incentives for performance and improvement, and real consequences for persistent failure. Applicants are invited to address the following four areas of schooling and the anticipated impact proposed changes will have on student achievement:

(a) *New curriculum and instructional strategies to help all students achieve high standards.* Projects that develop and implement curricula that identify what all students in each grade, K–12, need to know in the core subjects. The curricula should incorporate diverse instructional materials and instructional strategies. It is particularly important that the projects include classroom teachers in the process of determining what should be taught and in developing appropriate strategies likely to help all students attain national standards of achievement.

(b) *New approaches to improve the quality of teachers and teaching.* Projects that develop and implement new approaches to professional development of teachers in core subjects to ensure that the teachers master the subjects that they teach. Projects would incorporate new instructional strategies, including the use of advanced technologies, to the end of helping all students meet high standards. These projects would also include new strategies for recruiting, educating, and rewarding good teachers and providing a way for gifted professionals who want to teach to do so through alternative certification routes.

(c) *New school organizational patterns and management strategies to improve learning outcomes.* Projects that develop and implement strategies that give administrators and teachers more discretion to make decisions regarding curriculum, schedules, and staffing, and the flexibility to use resources in more productive, innovative ways that improve student learning.

(d) *New partnerships between schools, or other institutions, and community groups to enhance student success.* Projects that develop and implement activities that include: (1) Collaboration between elementary and secondary school teachers and scholars in institutions of higher education for curriculum design and professional development of teachers; (2) special programs for parent involvement in the school academic program; (3) mechanisms for working with human service agencies supportive of students and their families; and (4) linkages with business and labor organizations to help students prepare for productive careers.

Applicants are encouraged to provide for rigorous documentation of proposed activities, with emphasis on the documentation of changes in student and school performance, and for the outside evaluation and dissemination of program outcomes.

Selection Criteria: Under 34 CFR 75.210(c), the Secretary is authorized to distribute an additional 15 points among the criteria to bring the total to a maximum of 100 points. For the purpose of this competition, the Secretary will distribute the additional points as follows:

Plan of operation. (34 CFR 75.210(b)(3)). Ten (10) additional points will be added for a possible total of 25 points for this criterion.

Evaluation plan. (34 CFR 75.210(b)(6)). Five (5) additional points will be added for a possible total of 10 points for this criterion.

FOR APPLICATION OR INFORMATION CONTACT: Seresa Simpson, U.S. Department of Education, Fund for the Improvement and Reform of Schools and Teaching (FIRST) Office, 555 New Jersey Avenue, NW., room 522, Washington, DC 20208–5524. Telephone (202) 219–1496. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in Washington, DC, 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 3151.

Dated: March 12, 1992.

Diane Ravitch,

Assistant Secretary for Educational Research and Improvement.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions ar : also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound; or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.

Rules and Regulations

Federal Register
Vol. 57, No. 53
Wednesday, March 18, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-NM-21-AD; Amendment 39-8193; AD 92-06-13]

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to Boeing Model 767 series airplanes equipped with General Electric CF6-80C2 engines. This action requires revising the wiring in certain panels, the wing-body disconnects, and the wing-strut disconnects. This amendment is prompted by an on-going design review, resulting from an accident investigation from which it has been determined that, prior to the accident, the airplane apparently experienced an uncommanded in-flight deployment of a thrust reverser. Deployment of a thrust reverser during flight could result in reduced controllability of the airplane. The actions specified in this AD are intended to ensure the integrity of the fail safe features of the thrust reverser system by preventing the possible discrepancies in the thrust reverser control system that can result in the inadvertent deployment of a thrust reverser during flight.

DATES: Effective March 18, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of March 18, 1992.

Comments for inclusion in the Rules Docket must be received on or before May 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-21-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Lanny Pinkstaff, Aerospace Engineer, Propulsion Branch, ANM-140S, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2684; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: The wiring configuration of the CF6-80C2 engine thrust reverser, as installed on Boeing Model 767 series airplanes, has the Pressure Regulating Shutoff Valve (PRSOV) and the Directional Pilot Valve (DPV) control wires in adjacent pins of several wire bundle disconnects. These wires should have pin separation so that the DPV will not have power on adjacent pins. A bent pin in a wire bundle disconnect could contribute to an inadvertent in-flight deployment of the thrust reverser during an "auto-restow" event. Deployment of a thrust reverser during flight could result in reduced controllability of the airplane.

The FAA has reviewed and approved Boeing Alert Service Bulletin 767-78A0052, Revision 1, dated February 14, 1992, which describes procedures for revising the wiring in certain panels, the wing-body disconnects, and the wing-strut disconnects. This modification will improve wiring pin separation between the thrust reverser PRSOV and the DPV circuits.

Since an unsafe condition has been identified that is likely to exist on other Boeing Model 767 series airplanes of the same type design, this AD is being issued to prevent deployment of a thrust reverser during flight, which could result in reduced controllability of the airplane. This AD requires revising the wiring in certain panels, the wing-body disconnects, and the wing-strut disconnects. The actions are required to be accomplished in accordance with the service bulletin described previously.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "**ADDRESSES.**" All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-21-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or

on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-06-13. **Boeing:** Amendment 39-8193. Docket 92-NM-21-AD.

Applicability: Model 767 series airplanes equipped with General Electric CF6-80C2 engines, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent inadvertent deployment of a thrust reverser during flight, accomplish the following:

(a) Within 60 days after the effective date of this AD, revise the wiring in certain panels, the wing-body disconnects, and the wing-strut disconnects, in accordance with Boeing Alert Service Bulletin 767-78A0052, Revision 1, dated February 14, 1992.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with Boeing Alert Service Bulletin 767-78A0052, Revision 1, dated February 14, 1992.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC.

(e) This amendment becomes effective on March 18, 1992.

Issued in Renton, Washington, on February 27, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-6291 Filed 3-17-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 91-NM-181-AD; Amendment 39-8186; AD 92-06-06]

Airworthiness Directives; General Dynamics Convair Model 340, 440, and C-131 (Military) Series Airplanes, Including Those Modified for Turbopropeller Power

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final Rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to all General Dynamics Model 340, 440 and C-131 (Military) series airplanes, which currently requires structural inspections, and repair or replacement, as necessary to ensure continued airworthiness. This amendment requires more detailed inspections, adds areas to be inspected, requires the use of improved inspection methods, and revises certain compliance times. This amendment is prompted by the analysis of new data submitted in accordance with the existing AD. The actions specified by this AD are intended to prevent the compromise of the structural integrity of these airplanes.

DATES: Effective April 22, 1992.

The incorporation by reference of General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, dated November 14, 1986, including Addendum I dated April 14, 1987; Addendum II dated May 4, 1987, and Addendum III, dated August 4, 1987; was previously approved by the Director of the Federal Register as of November 21, 1988 (53 FR 41157, October 20, 1988).

The incorporation by reference of General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, Revision 1, dated April 15, 1991, including Addenda I, II, and III, all dated April 15, 1991, is aproved by the Director of the Federal Register as of April 22, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from General Dynamics/Convair Division, Lindberg Field Plant, P.O. Box 85377, San Diego, California 92138, Attention: Derek Trusk. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Los Angeles Aircraft Certification Office 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Brent Bandley, Aerospace Engineer, Airframe Branch, ANM-123L, FAA, Northwest Mountain Region, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5237.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 88-22-06, Amendment 39-6006 (53 FR 41157, October 20, 1988), which is applicable to all General Dynamics Model 340, 440 and C-131 (Military) series airplanes, was published in the **Federal Register** on October 4, 1991 (56 FR 50299). The action proposed to require more detailed inspections of various structural components of these airplanes, more areas to be inspected, the use of improved inspection methods, and the revision of certain compliance times.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule.

One commenter asks for clarification as to whether the proposed rule applies to the Model C-131A, the military version of the Model 240. The FAA notes that this AD action is applicable to the C-131B through C-131H models, but not the C-131A; the applicability statement of the final rule has been revised to indicate this. (This is also indicated in the effectivity section of the applicable Structural Inspection Document (SID), page 2-1.)

This same commenter also suggests that the proposed rule contain a statement, such as the one in the beginning of the revised SID and each addendum, that in addition to the inspection intervals described for each principal structural element (PSE), there is a specified calendar time limit for each inspection item. The FAA concurs that the rule would be clearer if such information were included. The final rule has been revised to add new paragraph (c) which specifies that inspections of the principal structural elements (PSE) are to begin within 6 months after the incorporation of the revised SID into the FAA-approved maintenance inspection program.

One commenter asks for clarification as to how paragraphs (a) and (b) of the proposal relate to each other. This commenter states that it appears that an affected operator would have to comply with both paragraphs at the same time. The FAA concurs that some clarification is necessary. Paragraph (a), which is currently in effect (originally required by AD 88-22-06), requires operators to revise their maintenance inspection program within one year after November 21, 1988, to include the items specified in the original issue of the Convair SID, dated November 14, 1986 (and various addenda). The FAA's intent is that the requirements of that paragraph remain in effect until operators incorporate Revision 1 of the SID (dated April 15, 1991) into their maintenance inspection program, as required by paragraph (b). Within six months after such incorporation, operators must then commence inspections of the PSE's specified in Revision 1 of the SID, as required by new paragraph (c) of the final rule.

Several commenters oppose the six-month compliance time (from the date that the revised AD becomes effective) to do all the inspections in accordance with the calendar times indicated in the revised SID. They noted that the compliance time was too short and, therefore, would have negative impact on flight schedules, aircraft availability, and available manpower. These commenters request that the compliance time be extended to two or four years. The FAA concurs in part. As discussed above, the final rule as been revised to indicate that the inspections in accordance with the revised SID are required within six months after the incorporation of the revised SID into the maintenance inspection program. The operators, in effect, have one year from the date that this final rule becomes effective to do the inspections required by the calendar time requirement. The FAA considers one year to be sufficient time in which operators can accomplish these inspections. Further, the inspections specifically required within the calendar time schedules will have limited impact on the entire fleet. The inspection required with respect to calendar time schedules will affect mainly low-time airplanes, namely, those airplanes that have not exceeded a certain threshold specified in number flight hours; eighty percent of the fleet already has exceeded that threshold.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 320 General Dynamics Model 340, 440, and C-131 (Military) series airplanes of the affected design in the worldwide fleet. The FAA estimates that 240 airplanes of U.S. registry and 25 U.S. operators will be affected by this AD.

To initially incorporate the Supplemental Inspection Document (SID) program into an operator's maintenance program, as required by AD 88-22-06, necessitated 1,000 work hours per operator to accomplish. To incorporate the additional procedures into the SID program as required by this AD action will necessitate an additional 20 work hours per operator. At an average labor cost of $55 per work hour, the additional administrative cost to U.S. operators incurred as a result of this AD is $27,500, or $1,100 per operator.

The new requirements of this AD will also necessitate approximately 50 additional work hours per airplane to accomplish initially the inspection procedures. At an average labor cost of $55 per work hour, the additional cost to U.S. operators incurred as a result of this AD is $660,000 for the fleet, or $2,750 per airplane.

Based on these figures, the total additional cost impact of the new requirements of this AD on U.S. operators is $687,500.

The recurring inspection cost to the affected operators is estimated to be 500 work hours per airplane per year, at an average cost of $55 per work hour. This figure entails no additional work hours as a result of this new AD action. Therefore, the total cost of recurring inspections to U.S. operators is estimated to be $8,600,000 annually for the fleet, or $27,500 per airplane.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by

removing amendment 39-6006 (53 FR 41157, October 20, 1988), and by adding a new airworthiness directive (AD), amendment 39-8186, to read as follows:

92-06-06. General Dynamics: Amendment 39-8186. Docket No. 91-NM-181-AD. Supersedes AD 88-22-06, Amendment 39-6006.

Applicability: Applies to Model 340, 440, and C-131 (Military) series airplanes, all serial numbers, certificated in any category, including those modified for turbo-propeller power.

Compliance: Required as indicated, unless previously accomplished.

To ensure the continuing structural integrity of these airplanes, accomplish the following:

(a) Within one year after November 21, 1988 (the effective date of Amendment 39-6006, AD 88-22-06), incorporate a revision into the FAA-approved maintenance inspection program which provides for inspection of the Principal Structural Elements (PSE) defined in section 3 of General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, dated November 14, 1986; Addendum I, dated April 14, 1987; Addendum II, dated May 4, 1987; and Addendum III dated August 4, 1987. The non-destructive inspection techniques set forth in the SID provide acceptable methods for accomplishing the inspections required by this AD. All inspection results (negative or positive) must be reported to General Dynamics, in accordance with the instructions in the SID.

(b) Within six months after the effective date of this AD, incorporate a revision into the FAA-approved maintenance inspection program which provides for inspection of the Principal Structural Elements (PSE) defined in section 3 of General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, Revision 1, dated April 15, 1991; including Addenda I, II, and III, all dated April 15, 1991.

(c) Within six months after incorporation of General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, Revision 1, dated April 15, 1991; including Addenda I, II, and III, dated April 15, 1991; into the FAA-approved maintenance inspection program, as required by paragraph (b) of this AD, inspect all PSE's specified in that SID that have not been inspected within the 12 calendar years. The non-destructive inspection techniques set forth in that SID provide acceptable methods for accomplishing the inspections required by this AD. All inspection results (negative or positive) must be reported to General Dynamics, in accordance with the instructions in the SID.

(d) Cracked structure detected during the inspections required by paragraph (a) or (c) of this AD must be repaired or replaced, prior to further flight, in accordance with General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, dated November 14, 1986; or Revision 1, dated April 15, 1991.

(e) All of the information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120-0056.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(g) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may concur or comment and then send it to the Manager, Los Angeles ACO.

(h) The program revision required by paragraph (a) of this AD shall be done in accordance with General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, dated November 14, 1986, including Addendum I dated April 14, 1987; Addendum II dated May 4, 1987, and Addendum III, dated August 4, 1987. The incorporation by reference of that document was approved previously by the Director of the Federal Register as of November 21, 1988 (53 FR 41157, October 20, 1988), in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The program revision required by paragraph (b) of this AD shall be done in accordance with General Dynamics, Convair Division, "Supplemental Inspection Document (SID), Model 340/440," Report No. ZS-340-1000, Revision 1, dated April 15, 1991; including Addenda I, II, and III, all dated April 15, 1991. The incorporation by reference of that document was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from General Dynamics/Convair Division, Lindberg Field Plant, P.O. Box 85377, San Diego, California 92138, Attention: Derek Trusk. These documents may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(i) This amendment becomes effective April 22, 1992.

Issued in Renton, Washington, on February 24, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8402]

RIN 1545-AL41

Consolidated Return Regulations; Modification of Rules Relating to the Applicability of Other Provisions of Law in the Context of the Consolidated Return Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary and final regulations.

SUMMARY: This document contains temporary and final regulations under section 1502 of the Internal Revenue Code of 1986, as amended, providing that section 304 does not apply to acquisitions of the stock of a corporation by one member of a consolidated group from another member and providing special restoration rules for deferred gain that results on an acquisition of the stock of a subsidiary member of a consolidated group by one member from another member.

DATES: The regulations are effective on July 24, 1991 and apply to an acquisition of stock of a corporation in an intercompany transaction occurring on or after July 24, 1991.

FOR FURTHER INFORMATION CONTACT: Brendan P. O'Hara at telephone (202) 566-2455 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains revisions to § 1.1502-80 of Income Tax Regulations (26 CFR part 1) under section 1502 of the Internal Revenue Code of 1986, as amended. Proposed regulations were filed on July 24, 1991 and published on July 25, 1991 (56 FR 34044).

Section 1.1502-80 currently provides that section 304 applies for any consolidated return year. Section 304 treats a sale of stock by a shareholder to a person related to the shareholder as a distribution with respect to stock, which may be taxed as a dividend. Under the consolidated return regulations, a dividend, including one arising under section 304, is eliminated from income. Section 1.1502-14(a). Absent section 304(b)(4), a dividend arising under section 304 may result in inappropriate adjustments to basis in the stock of the transferor and other corporations in a consolidated group. Section 304(b)(4) prevents that result.

The Internal Revenue Service has concluded that the simplest way to implement the purposes of section 304(b)(4) for a consolidated group is for section 304 not to apply to an acquisition of stock by one member from another member. Alternatives to implementing the purposes of section 304(b)(4), which would have required complex basis and earnings and profits adjustments, were rejected. Section 304 continues to apply, in appropriate cases, to an acquisition of stock by a member from non-member.

This document also contains revisions to § 1.1502-13T to provide a rule parallel to that contained in § 1.1502-14T(c), relating to the restoration of deferred gain resulting from the distribution of stock of a subsidiary by one member of a consolidated group to another member.

Comments

A hearing on the proposed regulations was held on December 10, 1991. Several speakers noted that, under the approach of the proposed regulations, a consolidated group may recognize gain associated with assets twice, when the assets are sold and, through restoration of deferred gain, when the stock in the corporation that held the assets is disposed of. This issue arises also when appreciated stock of a member is distributed from one member to another. The Internal Revenue Service is studying the issue as part of a regulations project under §§ 1.1502-13 and 1.1502-14.

Explanation of Provisions

The final regulations amend § 1.1502-80 to provide that an acquisition of stock of a corporation by one member of a consolidated group from another member occurring on or after July 24, 1991 is not subject to section 304. These transfers of stock between members are treated, to the extent provided in § 1.1502-13, as deferred intercompany transactions.

The final regulations do not affect the application of section 304(b)(4) to section 304 transfers not addressed by the final regulations. Section 304(b)(4) continues to require appropriate adjustments to basis and earnings and profits in such cases.

The temporary regulations amend § 1.1502-13T to add rules similar to those provided in § 1.1502-14T(c) (which restores deferred gain on distributed stock) that apply to deferred gain arising in an intercompany transaction that is a sale or exchange of stock of a subsidiary.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(d) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on the impact of the rules on small business.

List of Subjects in 26 CFR Parts 1.1502-12 through 1.1502-100

Income taxes, Controlled group of corporations, Consolidated returns.

Amendments to the Regulations

Accordingly, the amendments to 26 CFR chapter I, subchapter A, part 1 are as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following citation:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805, 26 U.S.C. 6038, and 26 U.S.C. 6038A * * * Section 1.1502-80 also issued under 26 U.S.C. 304(b)(4) and 1502 * * *

Par. 2. Section 1.1502-13T is amended by designating paragraph (o) as paragraph (p) and adding paragraph (o) to read as follows:

§ 1.1501-13T Temporary regulations for certain intercompany transactions.

* * * * * * *

(o) *Restoration of deferred gain on stock of a member*—(1) *Restoration rule.* For purposes of this section and § 1.1502-13, gain deferred with respect to an acquisition of stock of a subsidiary in an intercompany transaction shall be taken into account—

(i) Upon a disposition (as defined in § 1.1502-19(b)(2)) of the stock of the subsidiary in an amount equal to the amount that would have created or increased the excess loss account if the adjustment to basis (or excess loss account) of the stock of the subsidiary resulting from the acquisition has not occurred, or

(ii) Following a disposition (as defined in § 1.1502-19(b)(2)), to the extent distributions with respect to any stock owned by a member would exceed the basis of such stock if the adjustment to the basis of the stock resulting from the acquisition had not occurred.

(2) *Example.* This paragraph (o) may be illustrated by the following example:

Example. (a) Corporations P, S1, S2, and S3 file consolidated returns on a calendar year basis. P owns all of the outstanding stock of S1 and S2. S1 owns all 100 shares of the outstanding stock of S3. The S3 shares have an adjusted basis of $1,000 and value of $10,000. S1 sells all 100 shares of the S3 stock to S2 for $10,000 and recognizes $9,000 of gain. The gain is deferred under § 1.1502-13(c). S2 takes a $10,000 basis in the S3 stock under § 1.1502-31(a).

(b) S3 borrows $5,000 in 1992 and distributes the $5,000 to S2 in the same year. S3 has no current earnings and profits, and the distribution reduces S2's basis in the S3 stock from $10,000 to $5,000.

(c) In 1993, S3 has no current earnings and profits. At the end of 1993, S3 issues 100 shares of stock to X, an unrelated third party. As a result, S2 no longer owns 80 percent or more of the S3 stock and S3 ceases to be a member of the group. S3's ceasing to be a member of the group is a disposition of the S3 stock under § 1.1502-19(b)(2)(i). If the basis of the S3 stock had not been adjusted as a result of the sale of the S3 stock by S1 to S2, the $5,000 distribution would have resulted in a $4,000 excess loss account with respect to the S3 stock. Accordingly, S1 is required to take into account $4,000 of the deferred gain (the amount that would have been in the excess loss account but for the adjustment to the basis of the S3 stock resulting from its sale).

(d) In 1994, S2 sells its 100 shares of S3 stock to X for $6,000. S2 recognizes gain of $1,000 on the sale. Further, under § 1.1502-13(f)(1)(i), because the S3 stock is disposed of outside the group, S1 must take into account the remaining $5,000 of deferred gain on the S3 stock.

(3) *Effective date.* This paragraph (o) applies to acquisitions of stock of a subsidiary in an intercompany transaction occurring on or after July 24, 1991.

* * * * * * *

Par. 3. Section 1.1502-80 is revised to read as follows:

§ 1.1502-80 Applicability of Other Provisions of Law.

(a) *In general.* The Internal Revenue Code, or other law, shall be applicable to the group to the extent the regulations do not exclude its application. Thus, for example, in a transaction to which section 381(a) applies, the acquiring corporation will succeed to the tax attributes described in section 381(c). Furthermore, sections 269 and 482 apply for any consolidated year. Section 304 applies except as provided in paragraph (b) of this section.

(b) *Non-applicability of section 304.* Section 304 does not apply to any acquisition of stock of a corporation in

an intercompany transaction occurring on or after July 24, 1991.

Dated: March 4, 1992.

David G. Blattner,

Acting Commissioner of Internal Revenue.

Fred T. Goldberg, Jr.,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5-90-064e]

Drawbridge Operation Regulations; Potomac River, District of Columbia

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule with request for comments.

SUMMARY: The Coast Guard has been petitioned by the Federal Highway Administration, the Maryland and Virginia Departments of Transportation, and the District of Columbia Department of Public Works to permanently amend the regulations governing operation of the Woodrow Wilson Memorial Bridge across the Potomac River, mile 103.8, at Alexandria, Virginia. As part of the rulemaking process, the Coast Guard is considering several alternative opening schedules as well as the schedule proposed by the petitioners. This temporary rule is being issued to evaluate a variation of the schedule that was published as a notice of proposed rulemaking in the December 20, 1991, **Federal Register**. This variation is being tested in response to some of the comments the Coast Guard has received concerning the hours of heaviest morning vehicular traffic and the effect of midday drawbridge openings for recreational vessels on highway traffic.

DATES: This temporary rule is effective from March 28, 1992, through May 26, 1992, unless sooner terminated. Comments must be received on or before April 27, 1992.

ADDRESSES: Comments should be mailed to Commander (ob), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704-5004. The comments received will be available for inspection and copying at room 507 at the above address between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, Fifth Coast Guard District, at 804-398-6222.

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this notice are Ann B. Deaton, Project Officer, and Capt. M.K. Cain, Project Attorney.

Discussion of Temporary Rule

This temporary rule is being issued to evaluate a variation of the opening schedule that was published as a notice of proposed rulemaking in the December 20, 1991, **Federal Register** by the Coast Guard in response to a request from the Federal Highway Administration, the Virginia and Maryland Departments of Transportation, and the District of Columbia Department of Public Works, to permanently change the regulations for the Woodrow Wilson Memorial Bridge by further restricting the hours during which the bridge may open for vessel traffic. This variation moves the noon opening for recreational vessels to 10 a.m., and moves the morning bridge closure period for commercial vessels forward one hour; i.e., instead of the closure period occurring from 4 a.m. to 9 a.m., it will occur from 5 a.m. to 10 a.m.

This variation also will require 4 hours (as opposed to 2 hours) advance notice from commercial vessels in order to have the bridge open from 10 a.m. to 2 p.m., and will require the bridge tender to delay the 10 a.m. openings for recreational vessels up to 4 hours to coincide with a later scheduled opening if a commercial vessel is scheduled to open the bridge during these hours. By linking recreational vessel openings with commercial vessel openings, the chance for multiple openings (i.e., one at 10 a.m. for recreational vessels then another for a commercial vessel 1, 2, or 3 hours later) during this high volume midday traffic period will be eliminated. Since the number of times this scenario is likely to occur is relatively low, recreational vessels should not be unduly inconvenienced, and they will be assured of reasonable midday access through the bridge each day of the year. Also, on those occasions when there are no scheduled midday openings for commercial vessels, and the bridge does open for recreational vessels at 10 a.m. as allowed under this variation, the opening will occur at a less disruptive time to vehicular traffic than 12 noon as shown by the traffic counts provided by state transportation officials. Advancing the morning bridge closure period forward by one hour for commercial vessels should result in the closure period coinciding more closely with the actual morning rush hour period according to the state highway officials and many comments we received. In all other respects, this rule is identical to the proposed rule that was published in the **Federal Register** on December 20, 1991.

This temporary rule is for evaluation purposes only and will be effective for a 60-day period beginning on March 28, 1992. The impact of this proposal on highway and marine traffic during this period will be evaluated to determine if it will result in substantial improvements in vehicular traffic flow without unreasonably restricting marine traffic. Data will be collected during the period to document the time and duration of draw openings and length of any resulting vehicle backups. If this rule results in an unforeseen disruption of traffic, it may be withdrawn sooner than 60 days. Unless particular problems with this temporary schedule are identified during this test period, the Coast Guard intends to reissue it as an Interim Final Rule to be effective from 27 May until a permanent rule is published.

The Woodrow Wilson Bridge operated under temporary rules from August 2, 1990, through May 31, 1991, to facilitate repairs to the bridge. Repairs were completed by May 31, 1991. Normally, operation of the bridge would revert to the permanent rule in 33 CFR 117.255. However, it is apparent that this will not provide a satisfactory balance between the needs of today's vehicular traffic and the needs of vessels. Therefore, the Coast Guard issued a temporary deviation from the permanent rules under the provisions of 33 CFR 117.43. That temporary rule with request for comments was issued to evaluate one of the alternative opening schedules being considered for a permanent change in the regulations. The rule was published in the **Federal Register** (56 FR 25369) on June 4, 1991. It was effective from June 1, 1991, through July 30, 1991. Comments were accepted through July 15, 1991. On July 9, 1991, the Coast Guard issued a second temporary rule with request for comments under the provisions of 33 CFR 117.43 to evaluate another of the alternative opening schedules being considered for a permanent change in regulations. That rule was published in the **Federal Register** (56 FR 35816) on July 29, 1991. It was effective from July 31, 1991, through September 28, 1991. Comments were accepted through September 13, 1991. On September 23, 1991, the Coast Guard issued a third temporary rule with request for comments under the provisions of 33 CFR 117.43 to evaluate another alternative opening schedule being considered. That rule was published in the **Federal Register** (56 FR 49145) on September 27, 1991. It was effective from September 29, 1991, through November 27, 1991. Comments were accepted through November 12, 1991. On November 20, 1991, the Coast Guard issued a fourth temporary rule with request for comments under the provisions of 33 CFR 117.43 to evaluate a variation of one of the alternative opening schedules being considered. That rule was published in the **Federal Register** (56 FR 59880) on November 26, 1991. It was effective from November 28, 1991, through January 27, 1992. Comments were accepted through January 13, 1992. On January 16, 1992, the Coast Guard issued a fifth temporary rule with request for comments under the provisions of 33 CFR 117.43 to evaluate another variation of one of the alternative opening schedules being considered. That rule was published in the **Federal Register** (57 FR 3008) on January 27, 1992. It was effective from January 28, 1992, through March 27, 1992. Comments were accepted through March 12, 1992.

In order to propose a permanent change in the operating rule for the Woodrow Wilson Bridge, a notice of proposed rulemaking was published on December 20, 1991 (56 FR 66326), and comments on all alternatives under consideration were solicited. The comment period for that proposal expired on February 3, 1992.

Comments are specifically invited concerning any particular problems experienced with this temporary schedule, or concerns with the proposal to issue this same rule as an interim final rule. These comments will be evaluated and modifications may be made or an alternate temporary schedule of openings may be established for the purpose of further evaluation. All comments received will also be considered along with those received in connection with the permanent operating schedule rule change being considered. Persons submitting comments should include their name and address, identify the bridge, and give reasons for any recommended changes to the temporary rule. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

This temporary rule serves the immediate interests of highway traffic with no expected significant adverse impacts on marine traffic. It is a variation of one of the alternative opening schedules previously evaluated and is the sixth in a series of temporary rules being evaluated to gather information for drafting a new permanent rule. For these reasons, pursuant to 5 U.S.C. 553(b), the Coast Guard finds that good cause exists for publishing this temporary rule without publication of a notice of proposed rulemaking. Further, because the Coast Guard agrees that it is not acceptable to revert to the existing permanent rule on the expiration of the current temporary deviation on March 27, 1992, it finds pursuant to 5 U.S.C. 553(b), that good cause exists for making this rule effective in less than 30 days after the date of publication in the **Federal Register**.

Regulatory Evaluation

This temporary rule is considered to be non-major under Executive Order 12291 and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034, February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. This conclusion is based on the fact that these regulations are temporary and may be withdrawn earlier than scheduled. They are not expected to have any substantial effect on commercial navigation or on any businesses that depend on waterborne transportation for successful operations.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the U.S. Coast Guard must consider whether proposed rules will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C 632). The Coast Guard will accept comments on the economic impact on small entities, in connection with the proposal for permanent regulations, and consider them at that time.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the temporary rule does not raise sufficient federalism implications to warrant preparation of a Federalism Assessment.

Environment

This rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2.g.(5) of Commandant Instruction M16475.1B. A Categorical Exclusion Determination statement has been prepared and placed in the rulemaking docket.

List of Subjects in 33 CFR Part 117

Bridges.

In consideration of the foregoing, part 117 of title 33, Code of Federal Regulations, is temporarily amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g); 33 CFR 117.43.

2. Section 117.255 is temporarily amended by revising paragraph (a)(2) and adding paragraphs (a)(3) and (a)(4) to read as follows: (This is a temporary rule and will not appear in the Code of Federal Regulations.)

§ 117.255 Potomac River.

(a) * * *

(2) Need not open:

(i) Except as provided in paragraphs (a)(1) and (2)(vi) of this section, for the passage of any vessel unless at least 2 hours advance notice is given to the bridge tender at (202) 727-5522.

(ii) For the passage of any vessel from 5 a.m. to 10 a.m. and from 2 p.m. to 7 p.m., on Mondays through Fridays other than Federal holidays.

(iii) For the passage of any vessel from 2 p.m. to 7 p.m. on Saturdays, Sundays, and Federal holidays.

(iv) For the passage of recreational vessels from 4 a.m. to 12 midnight with the exception of one opening at 10 a.m., if requested, on Mondays through Fridays other than Federal holidays.

(v) For the passage of recreational vessels from 6 a.m. to 12 midnight with the exception of one opening at 10 a.m., if requested, and one opening at 9 p.m., if requested, on Saturdays, Sundays, and Federal holidays.

(vi) For the passage of commercial vessels from 10 a.m. to 2 p.m., seven days a week, unless at least 4 hours advance notice is given to the bridge tender at (202) 727-5522.

(3) The bridge tender shall delay the 10 a.m. opening for recreational vessels up to 4 hours, seven days a week, if he receives a request (with proper advance notice) from a commercial vessel to open the bridge between 10 a.m. and 2 p.m.

(4) This temporary rule is effective from March 28, 1992, through May 26, 1992.

* * * * *

Dated: March 11, 1992.

W.T. Leland,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[VA8-1-5429; A-1-FRL-4114-9]

Approval and Promulgation of Air Quality Implementation Plans; Virginia; Burlington Industries Consent Agreement

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Commonwealth of Virginia. This revision consists of a Consent Agreement between the State Air Pollution Control Board of the Commonwealth of Virginia and Burlington Industries. The Consent Agreement limits the operation and reduces the allowable sulfur dioxide (SO_2) emissions at Burlington Industries' facility in Clarksville, Mecklenburg County, Virginia. The intended effect of this action is to approve a Consent Agreement submitted by the Commonwealth of Virginia Department of Air Pollution Control as a SIP revision rendering its conditions limiting Burlington Industries' operation and reducing its allowable SO_2 emissions federally enforceable. This action is being taken in accordance with section 110 of the Clean Air Act.

EFFECTIVE DATE: This action will become effective May 18, 1992 unless notice is received within April 17, 1992 that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Thomas J. Maslany, Director, Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107; Public Information Reference Unit, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and Commonwealth of Virginia Department of Air Pollution Control, room 801, Ninth Street Office Building, P.O. Box 10089, Richmond, Virginia, 23240.

FOR FURTHER INFORMATION CONTACT: David J. Campbell, (215) 597-9781; FTS 597-9781.

SUPPLEMENTARY INFORMATION: On December 16, 1991, the Commonwealth of Virginia submitted a formal revision to its State Implementation Plan (SIP). The SIP revision consists of a Consent Agreement, dated November 19, 1991, entered into by the State Air Pollution Control Board and Burlington Industries. This Consent Agreement limits the operation and reduces the allowable SO_2 emissions of Burlington Industries' facility in Clarksville, Virginia.

Summary of SIP Revision

The State Air Pollution Control Board and Burlington Industries entered into a Consent Agreement on November 19, 1991 to commit to a plan and schedule for the completion of actions to restrict operation and to reduce allowable SO_2 emissions at the company's facility in Clarksville, Virginia.

The purpose of this Agreement is to restrict the operation and reduce allowable emissions, as authorized under the Commonwealth of Virginia Regulations for Control and Abatement of Air Pollution Rule 4-8—"Emission Standards for Fuel Burning Equipment," of the Clarksville facility to ensure the protection of the National Ambient Air Quality Standards (NAAQS) for SO_2.

The need to restrict the operation and reduce the allowable SO_2 emissions of the Clarksville facility was discovered through the March 9, 1990 Air Quality Impact Analysis supporting the Prevention of Significant Deterioration (PSD) air permit application for the Mecklenburg Cogeneration Limited Partnership (MCLP) facility in Mecklenburg County, Virginia. This computer modeling analysis indicated that Burlington Industries has the potential to exceed the primary and secondary NAAQS for SO_2 when operating at its maximum allowable levels according to the Virginia Regulations and current SIP. As a result, Burlington Industries voluntarily agreed to a control program with the State Air Pollution Control Board.

The Burlington Industries' control program is the basis of the Consent Agreement. The control program states that the five (5) steam-generating boilers of the seven (7) operating boilers at the Clarksville facility will be vented into an existing 235-foot stack creating a single, merged gas stream. In order to demonstrate compliance with the State Air Pollution Control Board Regulations and SIP, which prohibit the merging of gas streams unless the resultant plant-wide SO_2 emissions are less than or equal to 5,000 tons per year, Burlington Industries must limit the sulfur content of the coal burned and can not operate the two (2) non-merged boilers simultaneously. The resultant plant-wide allowable emissions under this control program are 4,849 tons per year of SO_2, thus satisfying the Board's Regulations and the SIP.

The November 19, 1991 Consent Agreement details the above operating conditions for the Clarksville facility, which will result in the reduction of allowable SO_2 emissions. A plant-wide SO_2 emission limit of 4,849 tons per year is imposed. Compliance with this annual limit shall be met over every consecutive twelve-month period on a continuous, rolling basis. Compliance shall be determined through the use of a sulfur-in-fuel content limit and an annual cap on the quantity of fuel consumed. Specific emission factors are listed to be used to determine conformance with the annual SO_2 emission limit. The Consent Agreement also stipulates that two (2) specific boilers may not be operated simultaneously.

The Agreement defines the maximum sulfur content of coal burned (1.2 percent by weight on an annual basis) and the minimum heat content (12,500 Btu/lb). Burlington Industries shall maintain and report records of the quantity and sulfur content of each fuel shipment received. The records shall be maintained for a period of no less than two (2) years.

Furthermore, the Consent Agreement outlines a specific schedule for the award of a contract by Burlington Industries for the construction of the ductwork required by the control program. Burlington Industries is required to complete all necessary modifications within a specified time period.

EPA Evaluation

EPA has evaluated Virginia's SIP revision request and concluded the following: (1) The operational and emission limitations imposed on the Burlington Industries Clarksville facility are shown by computer modeling to adequately protect the NAAQS for SO_2; (2) the operational and emission limitations are clearly enforceable; and (3) the applicable requirements of 40 CFR part 51 have been met. A more detailed evaluation is provided in a Technical Support Document available upon request from the Regional EPA office listed in the **ADDRESSES** section of this notice.

EPA is approving this SIP revision without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by simultaneously publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective on May 18, 1992.

Final Action

EPA is approving the Consent Agreement dated November 19, 1991 submitted by the Commonwealth of Virginia Department of Air Pollution Control as a revision to the Virginia SIP. The Consent Agreement restricts the operation and allowable SO_2 emissions of the Burlington Industries Clarksville facility, thereby ensuring the protection of the National Ambient Air Quality Standards for SO_2.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under 5 U.S.C. section 605(b), I certify that this SIP revision imposing restrictions on the operation and reducing the allowable SO_2 emissions at Burlington Industries' facility in Clarksville, Virginia will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214-2225). EPA has submitted a request for a permanent waiver for Table 2 and 3 SIP revisions. OMB has agreed to continue that temporary waiver until such time as it rules on EPA's request.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 18, 1992. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: March 4, 1992.

Edwin B. Erickson,

Regional Administrator, Region III.

Subpart VV, part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401-7642.

Subpart VV—Virginia

2. Section 52.2420 is amended by adding paragraph (c)(96) to read as follows:

§ 52.2420 Identification of plan.

* * * * *

(c) * * *

(96) Revisions to the State Implementation Plan submitted by the Virginia Department of Air Pollution Control on December 16, 1991.

(i) *Incorporation by reference.* (A) Letter from the Virginia Department of Air Pollution Control dated December 6, 1991 submitting a revision to the Virginia State Implementation Plan.

(B) Agreement between the State Air Pollution Control Board of the Commonwealth of Virginia and Burlington Industries (Source Registration No. 30401) reducing allowable emissions of sulfur dioxide, dated November 19, 1991.

(ii) *Additional materials.* (A) Remainder of the State Implementation Plan revision request submitted by the Virginia Department of Air Pollution Control on December 16, 1991.

BILLING CODE 6560-50-M

40 CFR Part 271

[FRL-4115-5]

Guam; Final Authorization of Territorial Hazardous Waste Management Program

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: The Territory of Guam has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA), as amended. EPA has reviewed Guam's application and has made a decision, subject to public review and comment, that Guam's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Thus, EPA intends to approve Guam's hazardous waste program revisions. Guam's application for program revision is available for public review and comment.

DATES: Final authorization for Guam shall be effective May 18, 1992 unless EPA publishes a prior **Federal Register** action withdrawing this immediate final rule. All comments on Guam's program revision application must be received by the close of business April 17, 1992.

ADDRESSES: Copies of Guam's program revision application are available during the business hours of 9 a.m. to 5 p.m. at the following addresses for inspection and copying:

Guam Environmental Protection Agency, Solid and Hazardous Waste Management, Harmon Plaza, Complex Unit D-107, 103 Rojas Street, Harmon, Guam 96911, Phone: (671) 646-8863/4/5.

U.S. EPA Region IX Library-Information Center, 75 Hawthorne Street, San Francisco, California 94105, Phone: (415) 744-1510.

Written comments should be sent to April Katsura, U.S. EPA Region IX (H-2-2), 75 Hawthorne Street, San Francisco, California 94105, Phone: 415/744-2026.

FOR FURTHER INFORMATION CONTACT: April Katsura at the above address and phone number.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of the Resource Conservation and Recovery Act ("RCRA" or "the Act"), 42 U.S.C. 6929(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with,

and no less stringent than the Federal hazardous waste program. Revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 260–266, 268, 124 and 270.

B. Guam

Guam initially received final authorization on January 27, 1986. Guam received authorizations for revisions to its program on May 22, 1989, August 11, 1989 and March 3, 1992. On January 28, 1992, Guam submitted a program revision application for additional program approvals. Today, Guam is seeking approval of its program revisions in accordance with 40 CFR 271.21(b)(3).

EPA has reviewed Guam's application, and has made an immediate final decision that Guam's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant final authorization for the additional program modifications to Guam. The public may submit written comments on EPA's immediate final decision up until April 17, 1992. Copies of Guam's application for program revision are available for inspection and copying at the locations indicated in the "ADDRESSES" section of this notice.

Approval of Guam's program revision shall become effective in 60 days unless an adverse comment pertaining to the Territory's revision discussed in this notice is received by the end of the comment period. If an adverse comment is received EPA will publish either (1) a withdrawal of the immediate final decision or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision.

Guam is applying for authorization for the following Federal hazardous waste regulations:

Federal requirements	Territory authority
List (Phase I) of Hazardous Constituents for Ground Water Monitoring (52 FR 25942, July 9, 1987).	10 Guam Code Annotated (GCA) § 51103(a) (6) & (11); Hazardous Waste Management Regulations (HWMR) Part VI.A & B.
Identification and Listing of Hazardous Waste (52 FR 26012, July 10, 1987)	10 GCA § 51103(a) (6) & (11); HWMR Part III.A & B.
Liability Requirements for Hazardous Waste Facilities; Corporate Guarantee (52 FR 44314, November 18, 1987).	10 GCA § 51103(a) (6) & (11); HWMR Parts VI.A & B and VII.A & B.
Hazardous Waste Miscellaneous Units (52 FR 46946, December 10, 1987)	10 GCA § 51103(a) (6) & (11); HWMR Parts II.B, VI.A & B and X.A & B.
Identification and Listing of Hazardous Waste; Technical Correction (53 FR 13382, April 22, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Part III.A & B.
Identification and Listing of Hazardous Waste; Treatability Studies Sample Exemption (53 FR 27290, July 19, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Parts II.A & B and III.A, B, C & D.
Standards Applicable to Owners and Operators of Hazardous Waste Storage and Treatment Tank Systems (53 FR 34079, September 2, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Parts II.A & B, VI A & B, and VII.A, B & J.
Identification and Listing of Hazardous Waste; and Designation, Reportable Quantities, and Notification (53 FR 35412, September 13, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Part III.A & B.
Permit Modifications for Hazardous Waste Management Facilities (53 FR 37912, September 28, 1988, as amended on October 24, 1988 at 53 FR 41649).	10 GCA § 51103(a) (6) & (11); HWMR Parts II.D, VI.A & B, X.A & L-R and XI.A & D.
Statistical Methods for Evaluating Ground Water Monitoring Data from Hazardous Waste Facilities (53 FR 39720, October 11, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Part VI.A & B.
Identification and Listing of Hazardous Waste; Removal of Iron Dextran from the List of Hazardous Wastes (53 FR 43878, October 31, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Part III.A & B.
Identification and Listing of Hazardous Waste; Removal of Strontium Sulfide from the List of Hazardous Wastes (53 FR 43881, October 31, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Part III.A & B.
Standards for Generators of Hazardous Waste; Manifest Renewal (53 FR 45089, November 8, 1988).	10 GCA § 51103(a) (6) & (11); HWMR Part IV.A & B.
Hazardous Waste Miscellaneous Units; Standards Applicable to Owners and Operators (54 FR 615, January 9, 1989).	10 GCA § 51103(a) (6) & (11); HWMR Parts III.A & B, VI.A & B, and X.A & B.
Hazardous Waste Incinerator Permits, Amendment Requirements (54 FR 4286, January 30, 1989).	10 GCA § 51103(a) (6) & (11); HWMR Part X.A & B.
Changes to Interim Status Facilities for Hazardous Waste Management Permits; Modifications of Hazardous Waste Management Permits; Procedures for Post-Closure Permitting (54 FR 9596, March 7, 1989).	10 GCA § 51103(a) (6) & (11); HWMR Parts X.A, B & C and XI.A & N.

Guam will not have issued any Territorial hazardous waste permits prior to being authorized for the above program revisions. The Territorial program does not include jurisdiction over Indian Lands; there are no Indian Lands in Guam.

C. Decision

I conclude that Guam's application for program revision meets RCRA. Accordingly, Guam is granted final authorization to operate its hazardous waste program as revised. Guam has responsibility for permitting treatment, storage, and disposal facilities within its borders and carrying out other aspects of the RCRA program described in its revised program application, subject to the limitations of the Hazardous and Solid Waste Amendments of 1984. Guam also has primary enforcement responsibilities, although EPA retains the right to conduct inspections under section 3007 of RCRA and to take enforcement actions under section 3008, 3013 and 7003 of RCRA.

Compliance with Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 4 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of Guam's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the Territory. It does not impose any new burdens on small entities. This rule, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 271

Proposed Rules

Federal Register
Vol. 57, No. 53
Wednesday, March 18, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-NM-274-AD]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to supersede an existing airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, which currently requires external inspections of the circumferential fuselage splices and internal inspections of certain bonded doublers for delamination, cracking, corrosion, and repair, if necessary. This action would clarify the terminating action expand the area of inspection, and update the inspection procedures. This proposal is prompted by reports from operators of additional skin cracks, corrosion, and delamination between the skin and doubler. This condition, if not corrected, could result in rapid decompression of the airplane.

DATES: Comments must be received no later than May 11, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 91-NM-274-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Dan R. Bui, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2775; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 91-NM-274-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 91-NM-274-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion:

On April 8, 1991, the FAA issued AD 91-09-10, Amendment 39-6978 (56 FR 18669, April 24, 1991), to require external inspections of circumferential fuselage splices and internal inspections of certain bonded doublers on Model 737 series airplanes for delamination, cracking, and corrosion. That action was prompted by reports of cracking of the circumferential fuselage skin splices and several reports of delamination of the bonded doubler. The requirements of that AD are intended to prevent rapid decompression of the airplane.

Since the issuance of that AD, operators have reported additional skin cracks, corrosion, and delamination between the skin and doubler. The FAA has determined that galley door, electrical/electronic door, and airstair cutouts also need to be inspected because of reports of delamination and corrosion of the bonded doubler that have been found recently in these areas. Such delamination and corrosion presents the same unsafe condition addressed by the existing AD.

The FAA has reviewed and approved Boeing Service Bulletin 737-53-1076, Revision 4, dated September 26, 1991, that describes procedures for visual, ultrasonic, high frequency eddy current, and low frequency eddy current inspections; repair; and a terminating modification consisting of replacement of fasteners with protruding head fasteners.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would supersede AD 91-09-10 with a new airworthiness directive that would expand the area requiring inspections to detect disbonding to include all non-riveted areas of bonded doublers around each major skin cut-out and bonded doublers in the area of galley door, electrical/electronic door, and airstair cutouts. The terminating action has been clarified to specify that all fasteners in the forward-most and aft-most row of fasteners must be replace with standard oversize protruding head solid fasteners at all circumferential fuselage splices; this terminating action is for the modified areas only. The actions would be required to be accomplished in accordance with the procedures specified in the service bulletin described previously.

There are approximately 519 Model 737 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 213 airplanes of U.S. registry would be affected by this AD.

To accomplish the procedures currently required by AD 91-09-10 requires approximately 262 work hours per airplane; to accomplish the new procedures that would be required by this AD action would require 2 additional work hours per airplane. The average labor cost would be $55 per work hour. Based on these figures, the additional costs incurred by U.S. operators as a result of the new requirements proposed in this AD action would be $23,430; the total cost impact of this AD (including the actions previously required by AD 91-09-10) on U.S. operators would be $3,092,760.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6978 (56 FR 18669, April 24, 1991), and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket No. 91-NM-274-AD. Supersedes AD 91-09-10, amendment 39-6978.

Applicability: Model 737 series airplanes, listed in Boeing Service Bulletin 737-53-1076, Revision 4, dated September 26, 1991, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent decompression of the airplane, accomplish the following:

(a) Within 1,000 flight cycles or 3 months after May 28, 1991 (the effective date of AD 91-09-10, amendment 39-6978), whichever occurs first, unless accomplished within the last 12 months, perform an external close visual inspection for corrosion or evidence of delamination in all circumferential skin butt splices from body station (BS) 259.5 to BS 1016, and in the areas of the bonded internal doublers around the major skin cutouts for entry, cargo, nose landing gear, overwing exit doors, and in the area from BS 360 to BS 420 between stringer (S)-15L and S-25L, in accordance with Boeing Service Bulletin 737-53-1076, Revision 2, dated February 8, 1990.

(b) Within 1,000 flight cycles or 3 months after the effective date of this AD, whichever occurs first, unless accomplished within the last 12 months, perform an external close visual inspection for corrosion or evidence of delamination, in the areas of bonded internal doublers around the skin cutouts for the galley door, electrical/electronic door, and airstair in accordance with Boeing Service Bulletin 737-53-1076, Revision 4, dated September 26, 1991 (hereinafter referred to as "the Service Bulletin").

(c) As a result of the inspections required by paragraph (a) and (b) of this AD, accomplish one of the following:

(1) If no corrosion or evidence of delamination is found, repeat the external close visual inspection at intervals not to exceed 4,500 flight cycles or 15 months, whichever occurs first.

(2) If corrosion is found, prior to further flight, repair in accordance with paragraph (f) of this AD. Following repair, continue to repeat the external close visual inspection at intervals not to exceed 4,500 flight cycles or 15 months, whichever occurs first.

(3) If delamination is found, prior to further flight, repair in accordance with paragraph (g) of this AD. Following repair, continue to repeat the external close visual inspection at intervals not to exceed 4,500 flight cycles or 15 months, whichever occurs first.

(d) Within 500 flight cycles after the effect date of this AD; or prior to the accumulation of 40,000 flight cycles for Group 1 airplanes and 60,000 flight cycles for Group 2 airplanes; whichever occurs later, unless accomplished within the last 4,000 flight cycles; accomplish the following:

(1) Perform the following external inspections:

(i) High frequency eddy current (HFEC) inspection for cracks in the skin common to the forward-most and aft-most row of fasteners in the circumferential skin splice over the crown from S-10L to S-10R, in accordance with the Service Bulletin.

(ii) Close visual inspection for skin cracks, and loose or missing fasteners in all circumferential skin butt splices from BS 259.9 to BS 1016, in accordance with the Service Bulletin.

(iii) Close visual inspection for skin cracks in the area of the bonded internal doublers around the skin cutouts for entry, galley, cargo, nose landing gear, airstairs, electrical/electronic door, overwing exit doors, and in the area from BS 360 to BS 420 between S-15L and S-25L, in accordance with the Service Bulletin.

(2) As a result of the inspections required by paragraph (d)(1) of this AD, accomplish either subparagraph (d)(2)(i) or (d)(2)(ii) of this AD, as applicable:

(i) If no cracks are found, repeat the inspections required by paragraph (d)(1) of this AD at intervals not to exceed 4,500 flight cycles or 15 months, whichever occurs first; or accomplish the terminating action in accordance with the Service Bulletin.

(ii) If cracks are found, prior to further flight, repair in accordance with paragraph (g) of this AD. Following repair, continue to inspect in accordance with paragraph (d)(1) of this AD at intervals not to exceed 4,500 flight cycles or 15 months, whichever occurs first.

(3) Replacement of all fasteners in the forward-most and aft-most row of fasteners with standard oversize protruding head solid fasteners at all circumferential fuselage splices, in accordance with the Service Bulletin, constitutes terminating action for the circumferential skin butt splice crack inspections required by this AD for the modified areas only.

(e) For Group 1 airplanes, within the next 4,500 flight cycles or 15 months after the effective date of this AD, whichever occurs first; or prior to the accumulation of 40,000 flight cycles, whichever occurs later; unless previously accomplished within the last 7,500 flight cycles; accomplish the following:

(1) Perform the following internal inspections:

(i) Close visual inspection for cracks, corrosion, and delamination, of the bonded doublers around all major skin cutouts for entry, galley, cargo, nose landing gear, airstairs, electrical/electronic door, overwing exit doors, and in the area from BS 360 to BS 420 between S-15L and S-25L, and at each circumferential but splice from BS 277 through BS 1016, in accordance with the Service Bulletin.

(ii) Ultrasonic inspection for corrosion and delamination of all non-mechanically fastened areas of the bonded doublers around all major skin cutouts for entry, galley, cargo, nose landing gear, airstairs, electrical/electronic door, and overwing exit doors, in accordance with the Service Bulletin.

(2) As a result of the inspections required by paragraph (e)(1) of this AD, accomplish either subparagraph (e)(2)(i) or (e)(2)(ii) of this AD, as applicable:

(i) If no cracks, corrosion, or delamination is found, repeat the inspections required by paragraph (e)(1) of this AD at intervals not to exceed 12,000 flight cycles or 4 years, whichever occurs first.

(ii) If corrosion is found, prior to further flight, repair in accordance with paragraph (f) of this AD. Following repair, continue to inspect in accordance with paragraph (e)(1) of this AD at intervals not to exceed 12,000 flight cycles or 4 years, whichever occurs first.

(f) In areas where corrosion is found, but evidence of cracking is NOT found, as a result of the inspections required by paragraphs (a), (b), (d), and (e) of this AD, prior to further flight, perform a low frequency eddy current (LFEC) inspection to determine the amount of material loss.

(1) If material loss is less than 10% of the skin or doubler thickness, prior to further flight, accomplish either subparagraph (f)(1)(i) or (f)(1)(ii) of this AD:

(i) Accomplish the repair in accordance with the Service Bulletin; or

(ii) Conduct repetitive LFEC inspections thereafter at intervals not to exceed 2,250 flight cycles or 6 months, whichever occurs first, until the repair is accomplished.

(2) If material loss is equal to or greater than 10% of the skin or doubler thickness, prior to further flight, repair in accordance with the Service Bulletin.

(g) In areas where cracks or delamination are found as a result of the inspections required by paragraphs (a), (b), (d), and (e) of this AD, prior to further flight, repair in accordance with the Service Bulletin.

(1) Blind fasteners may be used as temporary repair only. Repairs using blind fasteners must repetitively inspect for loose or missing fasteners at intervals not to exceed 3,000 flight cycles following installation, and replaced until 10,000 flight cycles following installation.

(2) Repairs previously installed with blind fasteners prior to May 28, 1991, but be inspected for loose or missing fastnerships within 1,000 flight cycles after May 28, 1991, and thereafter at intervals not to exceed 3,000 flight cycles. Blind fasteners must be replaced with protruding head solid fasteners within 10,000 flight cycles following installation.

(3) If any loose or missing blind fasteners are found, prior to further flight, replace with solid type fasteners in accordance with the Service Bulletin.

(h) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(i) Special flight permits may be issued in accordance with FAR 21.197 and 21.197 to operate airplanes to a base in order to comply with the requirements of this AD.

Issued in Renton, Washington, on March 10, 1992.

James V. DeVany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 92-NM-26-AD]

Airworthiness Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the adoption of a new airworthiness directive (AD) that is applicable to Boeing Model 757 series airplanes. This proposal would require repetitive checks of the passenger door emergency power assist assembly, and correction of any discrepancies found. This proposal is prompted by reports of corroded or seized bearings found in the emergency power assist assembly of the passenger doors. The actions specified by the proposed AD are intended to prevent seizure of the passenger door emergency power assist support bearings, which could impede the opening of an exit door during an emergency evacuation.

DATES: Comments must be received by May 4, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Airplane Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-26-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Monica L. Nemecek, Aerospace Engineer, Crashworthiness and Interiors Section, ANM-120S, Seattle Aircraft Certification Office; telephone (206) 227-2773; fax (206) 227-1181. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the subatance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-26-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Northwest Mountain Region, Transport Airplance Directorate, ANM-103, Attention: Rules Docket No. 92-NM-26-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

The manufacturer has reported that several operators of Boeing Model 757 series airplanes have discovered corroded bearings in the emergency power assist assembly of the passenger doors. One operator reported that bearings in the passenger door emergency power assist assembly were damaged or seized. Subsequently, another operator reported a similar occurrence of a seized bearing that had affected the emergency power cable travel. The manufacturer has reported that bearing seizure can be attributed to the lack of anti-corrosive lubrication. Although these bearings are initially packed with grease when installed on an airplane, reapplication of grease is necessary to ensure their successful opeation in the assembly.

When the bearing is completely seized, it will not allow the mechanism to rotate and pull the cable sufficiently to activate the power reservoir. The reservoir releases pressurized gas to the actuator, which operates the door during an emergency. This condition, if not corected, could result in seizure of the passenger door emergency power assist support bearings, which could impede the opening of an exit door during an emergency evacuation.

The FAA has reviewed and approved Boeing Service Letter 757-SL-52-6, dated September 17, 1991, that describes procedures for performing a check of the passenger door emergency power assist cable travel and correction of discrepancies identified.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require repetitive checks of the passenger door emergency power assist cable travel, and correction of any discrepancies ientified. The actions are required to be accomplished in accordance with the service letter described previously.

The proposed AD would also provide for an optional terminating action for the repetitive checks, consisting of replacement of the existing bearing with a stainless steel bearing, bearing seal, and back-up ring. The terminating action would be required to be accomplished in accordance with a method approved by the FAA. (Boeing has advised the FAA that it is currently developing a service bulletin that will contain procedures for accomplishing the optional terminating action specified in this proposed AD.)

There are approximately 428 Boeing Model 757 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 264 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 21 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $304,920, or $1,155 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessmesnt.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Fedeal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 92-NM-26-AD.

Applicability: All Boeing Model 757 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent seizure of the passenger door emergency power assist support bearings, which could impede the opening of an exit door during an emergency evacuation, accomplish the following:

(a) Prior to or upon the accumulation of 8,000 flight hours or within 1,500 flight hours after the effective date of this AD, whichever occurs later; and thereafter at intervals not to exceed 4,000 flight hours; perform a check of the ermgency power assist cable travel to detect corroded or seized bearings, in accordance with Boeing Service Letter 757-SL-52-6, dated September 17, 1991. If discrepancies are detected, prior to further flight, correct them in accordance with the service letter.

(b) Replacement of the existing bearing with a stainless steel bearing, bearing seal, and back-up ring, in accordance with a manner approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate, constitutes terminating action for the requirements of this AD.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle ACO, FAA, Transport Airplance Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 4, 1992.

Darrell M. Pederson,

Acting Manager, Trasnsport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1211

Certification and Recordkeeping for Automatic Residential Garage Door Operators: Proposed Rules

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The Consumer Product Safety Act ("CPSA") requires that manufacturers and private labelers of a product subject to a consumer product safety rule certify that the product conforms to all applicable safety standards. As part of the Consumer Product Safety Improvement Act of 1990, Congress mandated that certain entrapment protection requirements for automatic residential garage door operators would become a consumer product safety rule. The Commission codified these requirements on June 19, 1991. Thus, all manufacturers of automatic residential garage door operators are currently required to certify that their garage door operators manufactured on or after January 1, 1991 comply with the requirements of the consumer product safety rule.

The Commission is proposing a certification rule requiring specific certification labeling for non-UL listed automatic residential garage door operators that comply with additional entrapment protections mandated for 1993. The Commission is also proposing a recordkeeping rule that will establish recordkeeping requirements for all automatic residential garage door operators subject to the safety standard. Both the proposed recordkeeping and certification rules, if issued in final form, would become effective on January 1, 1993.

DATES: Written comments in response to this notice must be received by the Commission no later than June 1, 1992.

ADDRESSES: Comments should be mailed, preferably in five (5) copies, to

the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207, or delivered to the Office of the Secretary, Consumer Product Safety Commission, room 420, 5401 Westbard Avenue, Bethesda, Maryland; telephone (301) 504–0800.

FOR FURTHER INFORMATION CONTACT: George Sushinsky (301) 443–1155.

SUPPLEMENTARY INFORMATION:

A. Background

1. Section 203 of the CPSIA

Section 203 of the Consumer Product Safety Improvement Act of 1990 ("CPSIA") requires all automatic residential garage door operators manufactured on or after January 1, 1991 to conform to entrapment protection provisions of the Underwriters Laboratories, Inc. ("UL") Standard for Safety, UL 325, in effect at that time and as revised in the future. On June 19, 1991, the Commission published in the **Federal Register** a codification of the requirements established by Congress as a safety standard. 56 FR 28050.

The CPSIA also mandates that on January 1, 1993 the additional entrapment protections of a revised UL standard will become effective as a mandatory Commission standard. Thus, on January 1, 1993, all automatic residential garage door operators manufactured on or after that date will have to comply with the entrapment protection provisions of the revised UL standard.

Section 203(d) of the CPSIA requires manufacturers to identify clearly on the garage door operator and its container the month or week and year the operator system was made and its conformance with the entrapment protection provisions of UL 325. This section also states that the display of the UL logo or listing mark, and compliance with the date marking requirements of UL 325, on both the operator system and its container, shall satisfy the labeling requirements of section 203(d). The Commission interprets this to mean that compliance with section 203(d) also satisfies certification labeling requirements that CPSC may implement the proposed certification rule will specify certification labeling required for those automatic garage door operators that are not UL certified. The proposed recordkeeping requirements, however, will apply to all automatic residential garage door operators.

2. Certification Under the CPSA

Section 14(a)(1) of the Consumer Product Safety Act ("CPSA"), 15 U.S.C. 2063(a)(1), requires manufacturers (including importers) and private labelers of a product subject to a consumer product safety standard to issue a certificate which states that the product conforms to all applicable consumer product safety standards, specifies the applicable standard, states the name of the manufacturer or private labeler issuing the certificate, and includes the date and place of manufacture. The certificate must accompany the product or be furnished to any distributor or retailer to whom the product is delivered. Section 14(a) also requires that the certificate be based on a test of each product or upon a reasonable testing program. 15 U.S.C. 2063(a). Section 14(c) of the CPSA authorizes the Commission to issue rules requiring a product to bear a label containing information similar to that required by section 14(a) for certificates.

The failure to issue a certificate of compliance or the issuance of a certificate which is false or misleading in any material respect violates section 19(a)(6) of the CPSA, *id.* sec. 2068(a)(6), and may subject the firm to civil and criminal penalties as provided in sections 20 and 21 of the CPSA. *Id.* secs. 2069 and 2070.

Thus, the CPSA and CPSIA currently require that garage door operators manufactured on or after January 1, 1991 certify that they comply with the entrapment protection provisions of UL 325, now codified as a Commission rule, 56 FR 28050. While certification is currently required by section 14(a) of the CPSA, presently, the specific wording and form of the certification may be determined by the manufacturer. Congress stated, however, that the UL logo or listing mark will satisfy the labeling requirement.

3. The Proposed Certification Rule

The Commission is issuing this proposed certification regulation to specify the certification label that manufacturers, importers, and private labelers will use in the future in certifying that their products comply with the applicable safety standard. The certification rule will apply to automatic residential garage door operators, except that use of the UL label will fulfill the certification labeling requirement.

As stated above, section 203(d) of the CPSIA requires certain labeling on the operator system and its container. (Unlike section 14 of the CPSA, section 203(d) does not specifically discuss the responsibility of private labelers to label operators or containers.) Section 203(d) also states that display of the UL logo or listing mark and compliance with the date marking requirements of UL 325 satisfies the labeling requirements of section 203(d). Accordingly, those manufacturers that have obtained UL certification of their operators may allow the UL logo or listing mark to serve as the "certificate of compliance required by this certification rule. Those manufacturers that have not obtained UL certification for their operators will be required to issue satisfactory certificates of compliance in the form of permanent labels attached to each operator and its container. The proposed rule provides guidance to manufacturers concerning the certification required by section 14 of the CPSA, and it describes the certification label that would be required of non-UL listed automatic residential garage door operators after December 31, 1992.

As discussed above, Congress provided that revised UL entrapment protections will go into effect as a Commission rule on January 1, 1993. A certification labeling rule proposed now for the 1991 standard would be in effect for only a few months before firms would have to start certifying compliance with the 1993 standard. Thus, firms that are not UL listed would be required to use a CPSC certification label certifying to the 1991 standard for only a few months before needing to certify to the 1993 standard. This would result in garage door operators that comply with all 1991 safety requirements and are labeled for the 1991 standard competing in the marketplace with other garage door operators that also comply with all 1991 safety requirements but are not so labeled. To avoid this confusion, the Commission decided to propose that the rule specifying the certification label would go into effect in 1993.

4. The Proposed Recordkeeping Rule

The recordkeeping requirements of the proposed rule apply to all manufacturers regardless of whether their operators obtained UL certification. The proposed recordkeeping rule will also become effective on January 1, 1993. The proposed recordkeeping rule will aid the Commission in enforcing the safety standard.

B. Summary of the Proposed Certification and Recordkeeping Rules

1. Certification Testing

The proposed certification rule restates the requirement of 14(a) of the CPSA that manufacturers (defined to include importers and, for purposes of testing only, assemblers) and/or private labelers must either test each individual

operator or devise "reasonable testing programs." A "reasonable testing program" is defined in the proposed rule as one which provides reasonable assurance that the certified operators comply with the standard. The proposed rule allows manufacturers and importers to develop their own reasonable testing programs.

The Commission believes that it is unnecessary to specify the testing program for the manufacturers. An operator's ability to meet the performance requirements is controlled by the operator's design, materials, and method of production. The Commission will test for compliance with the standard by using procedures based on the requirements contained in 16 CFR part 1211 and based on the requirements as revised in 1993. A manufacturer's tests may include tests prescribed in 16 CFR part 1211 or other reasonable test procedures that can be demonstrated to provide an equivalent measure of entrapment protection.

Although no particular testing program is specified, the proposed rule describes general principles that should be followed in a "reasonable testing program." For certification testing, the operators should be grouped into "production lots." Production lots are defined as a quantity of operators from which certain operators are selected for testing prior to certifying the lot. All operators in a production lot should be essentially identical in those design, construction, and material features which relate to the ability of an operator to comply with the standard. Sample operators are then selected from the production lot for testing in accordance with the reasonable testing program.

If the production lot has been properly limited as to number and design of operators, it should be possible for a manufacturer to test samples from the lot for certification and not to test again as long as the operators in the production lot are essentially identical to the operators tested for certification in all respects relating to the ability of the operator to meet the requirements of the standard. After a lot has been established, if there are any changes in the specifications for the operator which could affect the operator's performance in relation to the requirements of the standard, the manufacturer should establish a new production lot for testing. Similarly, if there are changes in parts, suppliers of parts, or production methods which could affect the ability of the operator to comply with the standard, the manufacturer should establish a new production lot for testing. Furthermore, if the testing program shows that an operator does not comply with a requirement of the standard, no operator in the production lot should be certified as complying until all non-complying operators in the lot have been identified and destroyed or altered by repair, redesign, or use of different materials or components to the extent necessary to make the operators conform to the standard.

It should be noted that the obligation to issue a certificate of compliance based on a reasonable testing program is in addition to, and not in place of, the obligation to manufacture, import, distribute, or private label only operators which meet the requirements of the standard.

Consequently, if the Commission tests operators in accordance with the standard and obtains failing results, the Commission may begin enforcement action for violation of section 19(a)(1) of the CPSA, even though the manufacturer or importer of the operator may have issued a certificate of compliance and may have based that certificate on a reasonable testing program which meets the requirements of the proposed regulation below.

Section 22 of the CPSA authorizes the Commission to enjoin any person from violating section 19, and to seize any product which does not comply with an applicable standard. 15 U.S.C. 2071(a)(1). In addition, sections 20 and 21 of the CPSA authorize the Commission to seek civil or criminal penalties for violation of the CPSA in appropriate cases. *Id.* secs. 2069 and 2070.

2. Product Certification and Labeling

The proposed certification rule requires manufacturers (including importers) and/or private labelers of non-UL listed automatic residential garage door operators manufactured after December 31, 1992, to affix to the operators permanent labels which shall be considered a "certificate" of compliance, as that term is used in section 14(a) of the CPSA. Section 14(a) directs manufacturers and private labelers—if the product bears a private label—to certify that a product conforms to the garage door operator safety rule. *Id.* sec. 2063(a)(1). Even though section 203(d) of the CPSIA requires only manufacturers to label operator systems and containers in a certain way, the Commission believes that, since the authority for the proposed certification rule rests in section 14 of the CPSA, the proposed rule should apply to private labelers in a manner consistent with the terms of section 14 of the CPSA.

As mentioned above, section 203(d) of the CPSIA states that display of the UL logo or listing mark, and compliance with the date marking requirements of UL 325, on the operator and its container satisfies the labeling requirements of the garage door safety rule. In view of that provision, the Commission believes that the UL logo or listing mark on the operator and compliance with the date marking requirements of UL 325 (as codified at 16 CFR 1211.6), should also satisfy the certificate of compliance/permanent label aspect of the proposed certification rule. Any operator that is UL listed and bears the UL logo or listing mark will not be required to display the separate certification label described below. However, manufacturers and private labelers of UL listed operators may choose to use the certification label on the operator and its container if they wish.

The certification label required on non-UL listed operators (and their containers) must include the following information: (1) The statement: "Meets CPSC _____ [insert 1993 or later year of applicable standard] garage door operator entrapment protection requirements," and (2) identification of the production lot. The standard, at 16 CFR 1211.6, already requires the manufacturer's name, the system date code, and the factory location (where more than one factory is used to produce the operator). All of this information may be placed on the same label.

The certification label should be visible and legible to the ultimate consumer. It should be a permanent part of the operator and should remain affixed for the life of the operator. It is expected, however, that the permanent label on the operator will not be immediately visible to the consumer at the time of sale because of packaging or other marketing practices. In that event, a second label stating "Meets CPSC _____ [Insert 1993 or later year of applicable standard] garage door operator entrapment protection requirements," along with the month or week and year of manufacture as required by § 1211.7, is required on the container, or if the container is not visible, on the promotional material used with the sale of the operators.

In deciding that certification for garage door operators be in the form of a permanent label rather than a separate certificate supplied to persons in the distribution chain, the Commission points out that the label will be visible to all in the distribution chain, and the certification will be immediately available if any questions concerning a particular operator's compliance with the standard arise. The

Commission believes that a permanent label will benefit consumers and industry, as well as the Commission, in the following ways:

1. A permanent label will make it easier to determine whether a particular operator was certified to comply with the standard. In the event an operator is involved in an injury or death, for example, any investigating party can tell immediately if the operator was certified.

2. A permanent label will enable CPSC investigators who are screening operators for compliance to distinguish between operators manufactured before and those manufactured after the standard without examining retailers' or distributors' shipping records. An examination of shipping records can be time-consuming and difficult.

3. Permanent labels with an identification of the manufacturing dates will be advantageous to manufacturers, distributors, retailers, private labelers, and consumers in the event of a recall under section 15 of the CPSA. If the recall is limited to a certain production period, the label will help in identifying and limiting those operators which are subject to the recall.

The proposed rule provides that importers of operators should issue certification labels, but may rely on the foreign manufacturers' tests to support the certification if the records of the tests are maintained in the United States and the importer is a resident of the U.S. or has a resident agent in the U.S. Requirements that manufacturer's records of the type described above must be maintained in the U.S. and the importer must reside, or maintain a resident agent, in this country are necessary to enable the Commission investigators to inspect the records and monitor compliance with the standard. Importers who certify are responsible for inspecting the test records to determine that all testing has been performed properly, that the records of the tests are accurate and complete, and that the tests provide reliable assurance that all operators imported comply with the standard.

3. Recordkeeping

The proposed recordkeeping rule requires that manufacturers (including importers) of automatic residential garage door operators subject to the standard maintain written records demonstrating that compliance certificates are based on tests of each operator or a reasonable testing program.

Private labelers of the operators should maintain records which allow them to identify the manufacturer of each operator and relate each operator to a particular manufacturing date code and production lot.

No specific format is prescribed for the records, but the records should contain sufficient information to show the nature of a firm's testing procedures, including the basis for, and identity of, the production lot. The records should also show whether the operators (which are being marketed and certified to comply with the standard) are essentially identical, in every respect that relates to compliance with the standard, to the operators that were tested for conformance with the standard. The records should also indicate exactly which operators or production lots of operators are being certified as a result of a specified test or series of tests. Records should describe the type of tests conducted (in sufficient detail that they may be replicated), the production interval selected, the sampling scheme and the pass/reject criteria. Records of testing results should include the date and location of testing, the identity of passing and failing units, the nature of failure(s) and specific reasons for failure. The records should state the specific actions taken to address any failure and the additional actions taken to assure that corrective actions had the intended effect.

The records must be maintained a minimum of three years from the date of certification of each operator or the last operator in each production lot. This is because the Commission staff estimates that some operators can reasonably be expected to remain in inventory and not reach consumers for a period of three years, and the staff is particularly interested in being able to check the records concerning any operators held in inventory.

In addition to aiding the Commission's enforcement of the standard and the certificaion rule, these records could be helpful to a manufacturer in limiting the scope of a possible recall order under section 15 of the CPSA. See 15 U.S.C. 2064. (The Commission is authorized under section 15 to order a manufacturer of a product which is found, after opportunity for a hearing, to present a "substantial product hazard" to elect on of the following remedies: repair the defective product, replace the product with a non-defective product or refund the purchase price of the product. "Substantial product hazard" is defined in section 15 to mean a failure to comply with an applicable consumer product safety rule, or a product defect, if either creates a substantial risk of injury to the public.) Records of the date and location of manufacture, dates of changes in specifications, parts, suppliers, or manufacturing procedures, and the dates and results of quality control or recertification testing are examples of the types of information which could serve to identify the period of time during which non-complying or defective operators were manufactured. In the absence of such information, the entire production of a particular type of operator could be subject to a recall order.

The recordkeeping requirements of the proposed rule are issued under the authority of section 16(b) of the CPSA, which authorizes requirments for the establishment and maintenance of records that are necessary to implement the act or to determine compliance with regulations issued under the act. 15 U.S.C. 2065(b). The Commission believes the records required by the proposed rule are necessary to monitor compliance with the garage door operator standard.

Section 16(b) further provides that these records must be made available for inspection by duly designated agents of the Commission upon request. *Id.*

C. Anticipated Impact of the Proposed Rules

1. The Proposed Certification Rule

The stock of garage door operators in use is estimated to be at least 27 million units (with an average life expectancy of 15 years), of which 19 million were manufactured since 1982; the year the UL voluntary standard was revised to include entrapment protection provisions. In a 1991 industry survey, the Commission staff found that 14 firms manufactured or imported garage door operators, of which 12 are listed as complying with UL 325. Four of these 12 firms account for over 70 percent of the garage door operator market. In 1990, shipments were estimated at up to 2.5 million units with retail revenues of $552 million.

Industry representatives estimated that increases in per unit labeling costs for firms maketing non-UL operators will range from as low as $.10–.25 (when labeling is phased into the production process), to as high as $1.10 (when labeling requires the over-striking of inventory). Thus, the annual cost for non-UL listed firms will be at least $2,500. These costs are based on an estimate that 99% of all operators are UL-listed and on 1990 levels of production (about 2.48 million UL-listed and 25,000 non UL-listed operators).

It is anticipated that manufacturers of garage door operators will pass any increases in costs resulting from the proposed certification rule directly to the consumer. An estimate of the per unit retail price impact of certification labeling on non-UL listed residential garage door operators would range from $.22 to as high as $2.42. This represents a total annual cost of $5,500 based on recent annual sales.

2. The Proposed Recordkeeping Rule

The majority of firms manufacturing garage door operators are listed as complying with the UL 325 standard, and these firms have recordkeeping activities related to the UL requirments. The proposed recordkeeping rule will have minimal additional impact on variable costs for these firms. There are no data on the per unit recordkeeping costs for non-UL listed operators. However, since the certification and recordkeeping rule for walk-behind mowers issued in 1979 closely parallels the proposed rules for garage door operators, a rough approximation can be derived by using the per unit retail price impact of the recordkeeping rule estimated for walk-behine mowers. In May 1977, Stanford Research Institute predicted the per unit retail price impact of that recordkeeping to be $.50 ($1.08 in 1990 dollars). Based on 1990 unit sales of about 25,000 non UL-listed operators, this represents a total annual cost to consumers of about $27,000 for the non-UL listed operators.

D. Regulatory Flexibility Certification

Under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, agencies are generally required to prepare proposed and final regulatory flexibility analyses describing the impact of the rule on small businesses and other small entities, unless the head of the agency certifies that the rule will not, if promulgated, have a significant effect on a substantial number of small entities.

The Commission staff analyzed the potential effect the proposed certification and recordkeeping rules could have on industry. The cost to industry is not anticipated to be large. Potential effects on small firms would not be disproportionate to the effects on larger firms. Thus, the Commission certifies that no significant adverse impact on a substantial number or entities would result from the proposed rules.

E. Environmental Considerations

The Commission's rules at 16 CFR part 1021 provide that product certification or labeling rules normally have no potential for affecting the environment. 16 CFR 1021.5(b)(2). The Commission finds that the proposed certification and recordkeeping rules would have no significant effect on the human environment and that no environmental review is necessary.

F. Proposed Effective Date

The Commission proposes that the labeling certification and recordkeeping rules will become effective on January 1, 1993.

List of Subjects in 16 CFR Part 1211

Consumer protection, Labeling, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Consumer Product Safety Commission proposes to amend 16 CFR part 1211 as set forth below.

PART 1211—SAFETY STANDARD FOR AUTOMATIC RESIDENTIAL GARAGE DOOR OPERATORS

1. The authority citation for part 1211 is revised to read as follows:

Authority: Secs. 14 and 16, 15 U.S.C. 2063 and 2065.

2. The existing text of part 1211 is designated as

Subpart A—The Standard

3. Part 1211 is amended by adding new subpart B, consisting of §§ 1211.10 through 1211.15, and new subpart C, consisting of §§ 1211.20 and 1211.21 to read as follows:

Subpart B—Certification

Sec.
1211.10 Purpose, scope, and application.
1211.11 Effective date.
1211.12 Definitions.
1211.13 Certification testing.
1211.14 Product certification and labeling by manufacturers.
1211.15 Product certification and labeling by importers.

Subpart C—Recordkeeping

Sec.
1211.20 Effective date.
1211.21 Recordkeeping requirements.

Subpart B—Certification

§ 1211.10 Purpose, scope, and application.

(a) *Purpose.* Section 14(a) of the Consumer Product Safety Act, 15 U.S.C. 2063(a), requires every manufacturer (including importers) and private labeler of a product which is subject to a consumer product safety standard to issue a certificate that the product conforms to the applicable standard, and to base that certificate either on a test of each product or on a "reasonable testing program." The purpose of this subpart is to establish requirements that manufacturers and importers of automatic residential garage door operators subject to the Safety Standard for Automatic Residential Garage Door Operators (16 CFR part 1211, subpart A), shall issue certificates of compliance in the form specified.

(b) *Scope and application.* The provisions of this subpart apply to all residential garage door operators which are subject to the requirements of the Safety Standard for Automatic Residential Garage Door Operators that take effect on January 1, 1993 or later.

§ 1211.11 Effective date.

Under the Consumer Product Safety Act, automatic residential garage door operators must certify that they comply with requirements of subpart A of this part. This certification requirement is currently in effect. The specific labeling requirement of the certification rule in this subpart will become effective for any automatic residential garage door operator manufactured on or after January 1, 1993.

§ 1211.12 Definitions.

The following definitions shall apply to this subpart:

(a) *Private labeler* means an owner of a brand or trademark which is used on an operator subject to the standard and which is not the brand or trademark of the manufacturer of the operator, provided the owner of the brand or trademark caused or authorized the operator to be so labeled and the brand or trademark of the manufacturer of such operator does not appear on the label.

(b) *Production lot* means a quantity of garage door operators from which certain operators are selected for testing prior to certifying the lot. All garage door operators in a lot must be essentially identical in those design, construction, and material features which relate to the ability of an operator to comply with the standard.

(c) *Reasonable testing program* means any test or series of tests which are identical or equivalent to, or more stringent than, the tests defined in the standard and which are performed on one or more garage door operators of the production lot for the purpose of determining whether there is reasonable assurance that the operators in that lot comply with the requirements of the standard.

§ 1211.13 Certification testing.

(a) *General.* Manufacturers and importers shall either test each individual garage door operator (or have it tested) or shall rely upon a reasonable testing program to demonstrate compliance with the requirements of the standard.

(b) *Reasonable testing program.* This paragraph provides guidance for establishing a reasonable testing program.

(1) A reasonable testing program for automatic residential garage door operators is one that provides reasonable assurance that the operators comply with the standard. Manufacturers and importers may define their own testing programs. Such reasonable testing programs may, at the option of manufacturers and importers, be conducted by an independent third party qualified to perform such testing programs.

(2) To conduct a reasonable testing program, the garage door operators should be divided into production lots. Sample operators from each production lot should be tested in accordance with the reasonable testing program so that there is a reasonable assurance that if the operators selected for testing meet the standard, all operators in the lot will meet the standard. Where there is a change in parts, suppliers of parts, or production methods that could affect the ability of the operator to comply with the requirements of the standard, the manufacturer should establish a new production lot for testing.

(3) The Commission will test for compliance with the standard by using the test procedures contained in the standard. However, a manufacturer's reasonable testing program may include either tests prescribed in the standard or any other reasonable test procedures.

(4) If the reasonable testing program shows that an operator does not comply with one or more requirements of the standard, no operator in the production lot can be certified as complying until all non-complying operators in the lot have been identified and destroyed or altered by repair, redesign, or use of a different material or components to the extent necessary to make them conform to the standard. The sale or offering for sale of garage door operators that do not comply with the standard is a prohibited act and a violation of section 19(a) of the CPSA (15 U.S.C. 2068(a)), regardless of whether the operator has been validly certified.

§ 1211.14 Product certification and labeling by manufacturers.

(a) *Form of permanent label of certification.* Manufacturers (including importers) shall issue certificates of compliance for automatic residential garage door operators manufactured after the effective date of the standard in the form of a permanent label which can reasonably be expected to remain on the operator during the entire period the operator is capable of being used. Such labeling shall be deemed to be a "certificate" of compliance as that term is used in section 14 of the CPSA, 15 U.S.C. 2063.

(b) *Exception for UL listed operators.* The certification labeling requirement of paragraph (a) of this section shall be satisfied by display of the Underwriters Laboratories, Inc. (UL) logo or listing mark, and compliance with the date marking requirements of UL Standard for Safety 325, on both the operator system and its container. Operators displaying the UL logo or listing mark and complying with the UL standard are exempt from the requirements of paragraphs (c) and (d) of this section.

(c) *Contents of certification label.* The certification labels required by this section shall clearly and legibly contain the following information:

(1) The statement "Meets CPSC _____ [insert 1993 or later date of applicable standard] garage door operator entrapment protection requirements."

(2) An identification of the production lot.

(d) *Placement of the label.* The label required by this section must be affixed to the operator. If the label is not immediately visible to the ultimate purchaser of the garage door operator prior to purchase because of packaging or other marketing practices, a second label that states: "Meets CPSC _____ [insert 1993 or later date of applicable standard] garage door operator entrapment protection requirements," along with the month or week and year of manufacture must appear on the container or, if the container is not visible, on the promotional material used with the sale of the operator.

§ 1211.15 Product certification and labeling by importers.

(a) *General.* The importer of any automatic residential garage door operator subject to the standard in subpart A of this part must issue the certificate of compliance required by section 14(a) of the CPSA and § 1211.14 of this subpart. If testing of each operator, or a reasonable testing program, meeting the requirements of this subpart has been performed by or for the foreign manufacturer of the product, the importer may rely in good faith on such tests to support the certificate of compliance provided the importer is a resident of the United States or has a resident agent in the United States and the records of such tests required by § 1211.21 of subpart C of this part are maintained in the United States.

(b) *Responsibility of importer.* If the importer relies on tests by the foreign manufacturer to support the certificate of compliance, the importer bears the responsibility for examining the records supplied by the manufacturer to determine that the records of such tests appears to comply with § 1211.21 of subpart C of this part.

Subpart C—Recordkeeping

§ 1211.20 Effective date

The recordkeeping requirements in this subpart shall become effective on January 1, 1993 and shall apply to automatic residential garage door operators manufactured on or after that date.

§ 1211.21 Recordkeeping requirements.

(a) *General.* Every person issuing certificates of compliances for automatic residential garage door operators subject to the standard set forth in subpart A of this part shall maintain written records which show that the certificates are based on a test of each operator or on a reasonable testing program. The records shall be maintained for a period of at least three years from the date of certification of each operator or the last operator in each production lot. These records shall be available to any designated officer or employee of the Commission upon request in accordance with section 16(b) of the CPSA, 15 U.S.C. 2065(b).

(b) *Content of records.* Records shall identify the operators tested and the production lot and describe the tests the operators were subjected to in sufficient detail so the tests may be replicated. Records shall also provide the results of the tests including the precise nature of any failures, and specific actions taken to address any failures.

(c) *Format for records.* The records require to be maintained by this section may be in any appropriate form or format that clearly provides the required information.

Dated: March 11, 1992

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 92-6186 Filed 3-17-92; 8:45 am]

BILLING CODE 6355-01-M

DEPARTMENT OF THE TREASURY

Office of the Assistant Secretary (Domestic Finance)

17 CFR Chapter IV

Federal Regulatory Review

AGENCY: Office of the Assistant Secretary (Domestic Finance), Department of the Treasury.

ACTION: Federal regulation review, request for comments.

SUMMARY: This notice is being published in response to the President's announcement of a Federal regulatory review. To assist in the review, the Department of the Treasury (Department) requests the public to provide comments on whether the regulations promulgated pursuant to the Government Securities Act of 1986 (GSA Regulations) substantially impede economic growth or impose unnecessary costs or burdens.

DATES: Earlier comments are invited, but all comments must be received no later than close of business Friday, April 3, 1992.

ADDRESSES: Comments should be sent to Government Securities Regulations Staff, Bureau of the Public Debt, room 515, 999 E Street NW., Washington, D.C. 20239-0001.

FOR FURTHER INFORMATION CONTACT: Don Hammond, Acting Director, Government Securities Regulations Staff, Bureau of the Public Debt, (202) 219-3632.

SUPPLEMENTARY INFORMATION: On January 28, 1992, as part of his State of the Union Address, President Bush announced a 90-day moratorium and review of regulations. As part of the review process, the President asked agencies to work with the public, other interested agencies, the Office of Information and Regulatory Affairs in the Office of Management and Budget, and the Council on Competitiveness, to identify regulations and programs that impose a substantial cost on the economy and to determine whether regulations and programs adhere to the following standards:

(1) The expected benefits to society of any regulation should clearly outweigh the expected costs it imposes on society.

(2) Regulations should be fashioned to maximize net benefits to society.

(3) To the maximum extent possible, regulatory agencies should set performance standards instead of prescriptive command and control requirements, thereby allowing the regulated community to achieve regulatory goals at the lowest possible cost.

(4) Regulations should incorporate market mechanisms to the maximum extent possible.

(5) Regulations should provide clarity and certainty to the regulated community and should be designed to avoid needless litigation.

As part of its regulatory review, the Department is requesting public comment as to whether the GSA Regulations (17 CFR chapter IV) impose substantial burdens on the economy. The Department requests that commenters consider the standards listed above and identify, by citation to specific provisions of the Code of Federal Regulations, 17 CFR parts 400 through 450, items that might be improved in light of the standards listed above. Such comments should include not only existing regulatory provisions that are considered burdensome, but also specific provisions that could be added to improve regulation.

Dated: March 13, 1992.

Jerome H. Powell,

Assistant Secretary (Domestic Finance).

[FR Doc. 92-6365 Filed 3-16-92; 12:22 pm]

BILLING CODE 4810-40-M

DELAWARE RIVER BASIN COMMISSION

18 CFR Part 401

Proposed Amendments to Administrative Manual, Rules of Practice and Procedure; Public Hearings

AGENCY: Delaware River Basin Commission.

ACTION: Proposed rules and public hearings.

SUMMARY: Notice is hereby given that the Delaware River Basin Commission will hold public hearings to receive comments on proposed amendments to its Rules of Practice and Procedure relating to water quality standards and policies to protect existing water quality in certain waters of the Basin.

In addition, the Commission is proposing related revisions to its Comprehensive Plan, Water Code of the Delaware River Basin and Administrative Manual—Part III Water Quality Regulations. Supplementary background information and a summary of the proposed amendments to the Comprehensive Plan, Water Code and Water Quality Regulations are published elsewhere in the Notices section of this issue of the Federal Register. These proposed revisions set forth an overall framework for providing special water quality protection measures for interstate and contiguous waters deemed by the Commission to have exceptionally high scenic, recreational, ecological or water supply values. The proposal then classifies certain stream reaches as Special Protection Waters.

The proposed amendments to the Rules of Practice and Procedure revise certain point source pollution control policies and requirements. They would reduce the threshold for point source discharges deemed not to have a substantial effect on the water resources of the Basin and not required to be submitted to the Commission under Section 3.8 of the Compact from a daily average rate of 50,000 gallons to 10,000 gallons in the drainage area to Outstanding Basin Waters and Significant Resources Waters.

DATES: The public hearings are scheduled as follows: May 5, 1992, and May 6, 1992 from 2 p.m. to 5 p.m., resuming at 7 p.m.

The deadline for inclusion of written comments in the hearing record will be announced at the hearings.

ADDRESSES: The May 5, 1992 hearing will be held in the Ballroom of the Inn at Hunt's Landing, 900 Routes 6 & 209, Matamoras, Pennsylvania.

The May 6, 1992 hearing will be held in the Tusten Theater on Bridge Street (Route 52) in Narrowsburg, New York.

Written comments should be submitted to Susan M. Weisman, Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628.

FOR FURTHER INFORMATION CONTACT: Susan M. Weisman, Commission Secretary, Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628, Telephone (609) 883-9500.

SUPPLEMENTARY INFORMATION: Copies of the full text of the proposed amendments and the Administrative Manual—Rules of Practice and Procedure may be obtained by contacting Susan M. Weisman, at the address provided in **FOR FURTHER INFORMATION CONTACT.** Persons wishing to testify are requested to notify the Secretary in advance. Written comments on the proposed amendments should also be submitted to the Secretary.

Delaware River Basin Compact, 75 Stat. 688.

Dated: March 11, 1992.

Susan M. Weisman,

Secretary.

BILLING CODE 6360-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 155

[CGD 91-034/90-068]

RIN 2115-AE61 and 66

Vessel Response Plans and Carriage and Inspection of Discharge-Removal Equipment

AGENCY: Coast Guard, DOT.

ACTION: Notice of additional meetings of the Oil Spill Response Plan Negotiated Rulemaking Committee.

SUMMARY: The Coast Guard is announcing additional meetings of the Oil Spill Response Plan Negotiated Rulemaking Committee. The committee has decided to meet again on March 26, 1992 and, if necessary, continue on March 27th.

DATES: The meetings will take place on March 26, 1992, from 8:30 a.m. to 5 p.m., and continue on March 27, 1992, if necessary.

ADDRESS: The meetings will be held in room 4200 at DOT Headquarters, 400 Seventh Street SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Glen Wiltshire, OPA 90 Staff (G-MS-1), at (202) 267-6739 between 7 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: As required by section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. APP. 2), the Coast Guard is announcing that the Oil Spill Response Plan Negotiating Committee will meet on March 26, 1992 and, if necessary, continue on March 27th. The meetings are an addition to the schedule of meetings previously published in the **Federal Register** (57 FR 1890, 57 FR 6792). At their meeting on March 12, the committee decided on the additional meeting(s) in order to complete its report and transmit it to the Coast Guard. The meeting(s) will be open to the public, subject to space availability. Additional information on the purpose and information of the Oil Spill Response Plan Negotiating Committee was published in the **Federal Register** on January 10, 1992 (57 FR 1139).

Dated: March 13, 1992.

A.E. Henn,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 111

Mailability of Sharps and Other Medical Devices

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: Even though the risk appears low, the potentially serious consequences of infection acquired from mailed medical sharps and other devices requires that the Postal Service take every reasonable precaution to prevent customer and employee exposure to the hazard. It is expected that requiring sharps to be sent as First-Class or Priority Mail in containers that must be able to pass the tests in 49 CFR 178.604, 178.608, and 178.609 will reduce or eliminate potential employee exposure to leaking or broken medical sharps containers. By requiring these parcels to be mailed at the First-Class or Priority Mail rates, there will be a reduction in mechanized handling, which will limit the likelihood of breakage or leakage.

DATES: Comments must be received on or before May 4, 1992.

ADDRESSES: Written comments should be mailed or delivered to the Director, Office of Classification and Rates Administration, Marketing and Customer Service Group, room 8430, 475 L'Enfant Plaza West SW., Washington DC 20260-5903. Copies of all written comments will be available for inspection and photo copying between 9 a.m. and 4 p.m., Monday through Friday, at the above address.

FOR FURTHER INFORMATION CONTACT: Earl B. Hohbein, (202) 268-5309.

SUPPLEMENTARY INFORMATION: After a review of the comments received regarding its notice titled "Mailability of Sharps and Unsterilized Containers and Devices, dated August 1, 1991 (56 FR 36750), further investigation of packaging methods, and consultation with government agencies and other organizations, the Postal Service has decided to publish a revision of its proposed rule on this topic. Consequently, the Postal Service is proposing to amend its regulations to require that used sharps and other medical devices be sent as First-Class or Priority Mail. The Postal Service is also proposing that, effective 90 days after publication of a final rule, used sharps must be packaged in a primary container that is securely sealed, leak resistant, and puncture resistant. The primary container must be packaged in a watertight secondary containment system. The secondary containment system may consist of more than one component. If, however, one of those components is a plastic bag, it must be, at a minimum, 3.0 mils in thickness. Each primary container and secondary containment system (or sets of primary containers in a secondary containment system) must be enclosed in a shipping container constructed of 275-pound grade corrugated fiberboard or material of equivalent strength. Enough absorbent material must be enclosed within a watertight barrier to absorb three times the total liquid allowed in the package. The total volume of liquid in the primary container and secondary containment system (or set of primary containers in a secondary containment system) may not exceed 50 ml., and there will be a 35-pound weight limit for each mailed parcel. To ensure compliance with these standards, all distributors and manufacturers of sharps containers will be required to obtain an authorization from the U.S. Postal Service for their products to be transported in the mails. All packaging must by "type-tested" and certified by an independent company or organization before application is made for a U.S. Postal Service mailing authorization. Packaging will be required to pass the vibration standard in 49 CFR 178.608, the leakproof test in 49 CFR 178.604, as well as the tests for packages containing infectious substances in 49 CFR 178.609.

Other used medical devices which do not have or contain a projecting sharp must be packaged in a securely sealed, leak resistant primary container. The primary container must be enclosed in a shipping container that is constructed of 275-pound grade corrugated fiberboard or similar material of equivalent strength. The total volume of liquid in the primary and shipping container must not exceed 50 ml., unless the devices are mailed in a formalin solution or its equivalent. There must be sufficient absorbent material between the primary and shipping container to absorb three times the total liquid allowed within the primary container, except when the device is being shipped in a formalin solution.

Although exempt from the notice and comment requirements of the Administrative Procedures Act (5 U.S.C. 553(b) and (c)) regarding proposed rule making by 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed amendments of part 124 of the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001-3011, 3201-3219, 3403-3406, 3621, 5001.

2. Section 124.382 is amended by adding sections 124.382e and 124.382f. Section 124.384 is revised by replacing old subsections 124.384a and b with new subsections 124.384a and b and adding new subsections 124.384c through j. Section 124.385 is replaced with new section 124.385a through e. Old section 124.385 is renumbered to 124.386 and section 124.386 is renumbered to section 124.387. The proposed text is as follows:

124 NONMAILABLE MATTER—ARTICLES AND SUBSTANCES; SPECIAL MAILING RULES

* * * * *

.38 Etiologic Agent Preparation, Clinical Specimens, Sharps, Medical Devices and Biological Products

* * * * *

.382

* * * * *

e. *Sharps* means items having a projecting cutting edge or fine point that have been used in animal or human patient care or treatment or in medical research, or industrial laboratories, including hypodermic needles, syringes (with or without the attached needles), pasteur pipettes, scalpel blades, blood vials, needles with attached tubing, and culture dishes (regardless of the presence of infectious agents). Also included are other types of broken or unbroken glassware that were in contact with infectious agents, such as used slides or cover slips.

f. *Other medical devices* mean any devices used in animal or human patient care or treatment or in medical research which are not, or do not contain, a projecting sharp.

* * * * *

.384 Sharps

a. A mailed parcel containing the types of used materials defined in section 124.382e is nonmailable unless it bears the "Infectious Substance" label required by 49 CFR 172.432, and is sent by First-Class Mail or Priority Mail.

b. Used sharps must be packaged in a securely sealed, leak resistant, and puncture resistant primary container, the total liquid volume of which can not exceed 50 ml. The primary container must maintain its integrity when exposed to temperatures between 0 degrees and 120 degrees Fahrenheit.

c. The primary container must be packaged within a water-tight secondary containment system. The secondary containment system may consist of more than one component; however, if one of the components is a plastic bag, it must be, at a minimum, 3.0 mils in thickness, and must be reinforced with a fiberboard sleeve. A plastic bag will not by itself satisfy the requirement for a secondary containment system. Several primary containers may be enclosed within a secondary containment system to prevent breakage during ordinary processing.

d. The secondary containment system must be enclosed within an outer shipping container constructed of 275-pound grade corrugated fiberboard or similar material of equivalent strength. The secondary containment system must fit securely within the shipping container to prevent breakage during ordinary processing.

e. There must be sufficient absorbent material within a watertight barrier to absorb and retain three times the total liquid allowed within the primary container (150 ml per primary container) in case of leakage.

f. Each parcel must not weigh more than thirty-five pounds.

g. Each package prepared for mailing must be designed and constructed so that, if subjected to the environmental and test conditions prescribed in 49 CFR 178.604, (Leadproof test), 178.606 (Stacking test), 178.608 (Vibration standard), 178.609 (Test requirements for packaging for infectious substances (etiologic agents)) in addition to a bursting test for the shipping container and an absorbency test for the absorbent material commensurate with the requirements in subsection e, there will be no release of the contents to the environment, and no significant reduction to the effectiveness of the packaging.

h. All mailed packages containing used sharps must be accompanied by a four-part manifest or mail disposal service shipping record. The manifest must be placed in an envelope which is affixed to the outside of the shipping container, and must comply with any any applicable requirements imposed by the laws of the State from which the package is mailed.

At a minimum, the following information must appear on the manifest:

1. GENERATOR (MAILER)
   a. Name.
   b. Complete address (NOT A P.O. BOX)
   c. Telephone number.
   d. Description of contents of shipping container.
   e. Date the shipping container was mailed, and
   f. State permit number of the approved facility in which the contents will be disposed.
2. DESTINATION FACILITY (DISPOSAL SITE)
   Complete Address (NOT A P.O. Box)
3. GENERATOR'S (MAILER'S) CERTIFICATION
   "I certify that this carton has been approved for the mailing of used medical sharps, has been prepared for mailing in accordance with the directions for that purpose, and does not contain excess liquid or nonmailable material in violation of the applicable postal regulations. I am aware that FULL RESPONSIBILITY RESTS WITH THE GENERATOR (MAILER) FOR ANY VIOLATION OF 18 U.S.C. 1716 WHICH MAY RESULT FROM PLACING IMPROPERLY PACKAGED ITEMS IN THE MAIL.
   This printed statement is to be followed by the printed name of the generator (mailer), the signature of the generator, and the date the manifest was signed.
4. DESTINATION FACILITY (STORAGE OR DISPOSAL SITE)
   a. Printed Certification of receipt, treatment, and disposal—"I certify that the contents of this package have been received, treated, and disposed of in accordance with all local, state, and Federal regulations."
   b. Printed or typed name of an authorized recipient at the destination facility.
   c. Signature of the authorized recipient at the destination facility.
   d. Date destination facility's representative signed manifest.
5. TRANSPORTER OR INTERMEDIATE HANDLER OTHER THAN THE U.S. POSTAL SERVICE (IF DIFFERENT FROM THE DESTINATION FACILITY).
   a. Name.
   b. Complete address (NOT A P.O. BOX)
   c. Printed name of transporter or intermediate handler.
   d. Signature of transporter or intermediate handler.
6. The manifest or mail disposal service shipping forms must be serialized.
7. The form must contain an area reserved specifically for discrepancies and comments, especially if an alternate destination facility is used.
8. Instructions for completing form and distribution of copies.
   a. One copy must be retained by the generator (mailer).
   b. One copy must be retained by the transporter or intermediate handler.
   c. One copy must be retained by the destination facility.
   d. One copy must be mailed to the generator by the destination facility.
9. The form must bear the following statement with appropriate information:

"IN CASE OF EMERGENCY, OR THE DISCOVERY OF DAMAGE OR LEAKAGE, CALL 1–800–XXX–XXXX"

i. U.S. Postal Service Authorization to Mail Sharps. Each distributor or manufacturer of mailing kits or packaging assemblies, including containers, cartons, and any other related material to be used to mail sharps to a storage or disposal facility, must obtain an authorization from the United States Postal Service. Before applying for this authorization, each such type of the mailing kit must be tested and certified against the standards in section 125.364g by an independent company or organization. This authorization may be obtained by applying in writing to the Office of Classification and Rates Administration, Business Requirements Division, U.S. Postal Service, 475 L'Enfant Plaza SW., Washington, DC 20260–5906. The letter of application must contain the following information: The address of the headquarters or general business office of the distributor or manufacturer; the addresses of all disposal and storage sites; a list of all types of mailing kits to be covered with proof of package testing certifications by the independent testing facility that subjected the materials to the testing requirements prescribed above; a copy of the proposed manifest to be used with all mailings; 24-hour telephone numbers for emergencies; and a list of the types of sharps that will be mailed for disposal.

j. Each package must be mailed using merchandise return service (section 919) and each authorized manufacturer (or distributor) must provide to the Office of Classification and Rates Administration a surety bond of $50,000 or a letter of credit as proof of sufficient financial responsibility to cover disposal costs if the manufacturer (or distributor) ceases doing business before all its shipping containers are disposed of, or to cover clean-up costs if spills occur while the containers are in the possession of the Postal Service. Each primary and shipping container must bear a label, which cannot be detached intact, bearing (1) the company name of the manufacturer or the distributor, (2) the USPS authorization number, (3) the container ID number (or unique model number) signifying that the packaging material has been certified and the manufacturer or distributor has obtained an authorization required by subsection i.

.385 Other Medical Devices

a. Other medical devices, as defined in section 124.382f, must be mailed as First-Class or Priority Mail.

b. Other medical devices must be packaged in a securely sealed, leak resistant primary container, the total liquid volume of which must not exceed 50 ml., unless the devices are being shipped in formalin or its equivalent. The primary container must maintain its integrity when exposed to temperatures between 0 degrees and 120 degrees Fahrenheit.

c. The primary container must be enclosed in an outer shipping container constructed of 275-pound grade corrugated fiberboard or similar material of equivalent strength. The primary container must fit securely within the shipping container to prevent breakage during ordinary processing.

d. There must be sufficient absorbent material between the shipping container and the primary container to absorb three times the total liquid allowed within the package unless the device is mailed in a formalin solution or its equivalent.

e. Each parcel containing other medical devices must bear a complete return address (not a post office box).

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published if the proposal is adopted.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

Notices

Federal Register
Vol. 57, No. 53
Wednesday, March 18, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Information Collection Request Under Review

AGENCY: Action

SUMMARY: Under the Paperwork Reduction Act (44 U.S.C., chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted three copies of the attached information collection proposal to OMB. OMB and ACTION will consider comments on the proposed collection of information and recordkeeping requirements. ACTION is requesting an expedited review by OMB with final action by April 1, 1992, so that the approved forms may be issued in early April.

DATES: OMB and ACTION will consider comments received by two weeks from the date of publication. Comments are to be directed to both of the following addresses:

Janet Smith, ACTION Clearance Officer, ACTION, 1100 Vermont Avenue, NW., Washington, DC 20525, Tel. (202) 634–9245.

Daniel Chenok, Desk Officer for Action, Office of Management and Budget, 3200 New Executive Office Bldg., Washington, DC 20503, Tel. (202) 395–7316.

SUPPLEMENTARY INFORMATION:

Office of ACTION Issuing Proposal: Equal Opportunity Staff.

Title of Form: Handicap Accessibility Self-Evaluation Certification.

Need and Use: Section 504 of the Rehabilitation Act of 1973, as amended, prohibits discrimination on the basis of disability by recipients of Federal financial assistance. Section 417 of the Domestic Volunteer Service Act, Public Law 93–113, defines recipient of Federal financial assistance as any place a volunteer is assigned under one of ACTION'S programs. Regulations implementing section 504 (45 CFR 123.7 (c)) require that recipients of Federal financial assistance determine if physical barriers in facilities or programmatic barriers cause discrimination against individuals with disabilities by preventing or interfering with their participation in programs conducted by the particular recipient. The certification form is designed to ensure that ACTION only provides Federal financial assistance to recipients who have conducted the required self-evaluation.

Type of Request: Existing collection in use without an OMB control number.

Frequency of Collection: Non-recurring.

General Description of Respondents: ACTION sponsors and stations.

Estimated Number of Responses: 54,000.

Estimated Annual Reporting or Disclosure Burden: 108,000 hours.

Dated: March 12, 1992.

Jane A. Kenny,

Director, ACTION.

HANDICAP ACCESSIBILITY SELF-EVALUATION CERTIFICATION

Organization Name: _____
Address: _____
Telephone Number (with area code): _____

I certify that a handicap accessibility self-evaluation has been:_____ completed on (date)_____ _____partially completed and will be done on (date)_____.

The result of the self-evaluation(s) is as follows:

_____ The recipient's program, when viewed in its entirety, is accessible and no corrective actions are required.

_____ The recipient's program, when viewed in its entirety, is accessible, but some corrective actions will be made.

_____ The recipient's program, when viewed in its entirety, is not accessible. FOR SPONSOR ONLY: Corrective actions will be made by (date)_____.

I understand that, if the organization has 15 or more employees, information on how the self-evaluation was conducted is to be made available for public inspection for 3 years after its completion. I also understand that this information will be available to ACTION officials upon request.

Date

Signature _____

Name/Title of Responsible Official

Each OAVP station and VISTA site must submit this certification form to its OAVP sponsor or VISTA project. Each OAVP sponsor and VISTA project must submit this one form to its ACTION State Office.

BILLING CODE 6050–28–M

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

March 13, 1992.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, room 404–W Admin. Bldg., Washington, DC 20250, (202) 690–2118.

Revision

- *Forest Service*

Sale and Disposal of National Forest System Timber: Log Export and Substitution Exemption Restrictions.

One time submission.

State or local governments; Businesses or other for-profit; Federal

agencies or employees; Small businesses or organizations; 35 responses; 98 hours.
Fred Walk (202) 475–3758.

Extension

- *Federal Crop Insurance Corporation*
High-Risk Land Exclusion Option.
FCI–19–C.
On occasion.
Individuals or households; Farms; 58,480 responses; 58,480 hours.
Bonnie L. Hart (202) 254–8393.
- *Federal Crop Insurance Corporation*
Application for Assignment of Indemnity—Transfer of Right to An Indemnity—Claim for Cotton Indemnity.
FCI–20, FCI–21, and FCI–74–B.
On occasion.
Individuals or households; Farms; 60,000 responses; 30,000 hours.
Bonnie L. Hart (202) 254–8393.

New Collection

- *Food and Nutrition Service*
WIC Program Annual Closeout Report.
FNS–1174.
Annually.
State or local Governments; 86 responses; 447 hours.

Office of the Secretary

[Docket No. 92–020]

Declaration of Emergency Because of Asian Gypsy Moth

A new exotic pest, the Asian gypsy moth, has been introduced into the Northwestern United States. Infestations have been found in Oregon and Washington, as well as in the neighboring Canadian province of British Columbia.

The Asian gypsy moth infestations in Oregon and Washington represent the first U.S. introductions of this exotic pest capable of devastating forests, woodlands, and residential landscapes. This Asian strain has different behavioral characteristics than the European gypsy moth which has been devastating northeastern forests in the United States. Females can fly long distances, and larvae feed on certain conifers as well as hardwoods. The ability of the female to fly complicates management strategies. It is necessary to detect and eradicate new infestations at the earliest possible stage, before they begin to spread widely.

The economic impact of Asian gypsy moth establishment in the United States would be devastating, severely disrupting the multibillion dollar timber and forest products industry. Parks, woodlands, and residential landscapes would be threatened. Pesticide usage and annual control costs would increase.

Foreign countries would embargo products from infested areas. U.S. exporters of agricultural commodities would lose markets worth millions of dollars, diminishing the international competitiveness of the United States.

State departments of agriculture in Washington, Oregon, Idaho, and California, in cooperation with the Animal and Plant Health Inspection Service (APHIS) and the Forest Service (FS), have established a Northwestern Asian Gypsy Moth Project Team. This team has developed a coordinated, cooperative survey and eradication plan. Implementation of this plan will cost approximately $20 million during Fiscal Year 1992.

For this Asian gypsy moth survey and eradication project to succeed, State cooperators need an immediate pledge of financial support. APHIS will share the costs of survey and eradication activities on State and private lands on a fifty-fifty basis with the States of Oregon and Washington and the FS.

Identification of suspect specimens has been completed. Ten trapped adult specimens in Washington and Oregon were confirmed as Asian gypsy moths.

APHIS, the lead Federal agency in the Asian gypsy moth project, has insufficient funds to meet the needs of the proposed program. Once funded, however, APHIS can proceed with the detection and eradication program that will eliminate the Asian gypsy moth infestations now in the United States. The cooperative Asian gypsy moth program will detect and identify Asian gypsy moth-infested areas, control and prevent the spread of Asian gypsy moths to noninfested areas of the United States, and eradicate Asian gypsy moths in the infested areas.

Therefore, in accordance with the provisions of the Act of September 25, 1981, 95 Stat. 953 (7 U.S.C. 147b), I declare that there is an emergency which threatens the timber, forest products, and nursery industries of this country, and I authorize the transfer and use of such sums as I may deem necessary from appropriations or other funds available to the agencies or corporations of the Department of Agriculture for the conduct of a program to detect and identify Asian gypsy moth-infested areas, to control and prevent the spread of Asian gypsy moths to noninfested areas in the United States, and to eradicate Asian gypsy moths wherever they may be found in the continental United States.

All necessary Congressional notification will occur immediately.

Effective Date: This declaration of emergency shall become effective March 12, 1992.

Ann W. Veneman,
Acting Secretary of Agriculture.

BILLING CODE 3410–34–M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of Export Administration.
Title: Gears and Gearing Products Industry.
Form Number(s): Ref.#77.
Agency Approval Number: None.
Type of Request: New collection.
Burden: 2,440 hours.
Number of Respondents: 301.
Avg Hours Per Response: 4-10 hours.
Needs and Uses: Information will be collected from 206 producers and 95 importers as part of Commerce's Section 232 gear industry investigation. This investigation includes examination of the effect of imports on all phases of U.S. production capacity necessary to meet national security requirements.
Affected Public: Businesses or other for–profit institutions; and small businesses or organizations.
Frequency: One time.
Respondent's Obligation: Mandatory.
OMB Desk Officer: Gary Waxman, (202) 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Gary Waxman, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: March 12, 1991.

Edward Michals,
Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–07–M

Bureau of Export Administration

Action Affecting Export Privileges; Richard Clark Johnson; Order Denying Permission To Apply for or Use Export Licenses

In the matter of: Richard Clark Johnson, 1073 Oak Street, Harwich, Massachusetts 02646 and FCI Raybrook, Post Office Box 903, Raybrook, New York 12977.

On August 20, 1990, Richard Clark Johnson was convicted in the United States District Court for the District of Massachusetts of violating section 38 of the Arms Export Control Act (currently codified at 22 U.S.C.A 2778 (1991)) (AECA).

Section 11(h) of the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. 2401–2420 (1991)) (EAA),[1] provides that, at the discretion of the Secretary of Commerce,[2] no person convicted of a violation of section 38 of the AECA, or certain other provisions of the United States Code, shall be eligible to apply for or use any export license issued pursuant to, or provided by, the EAA or the Export Administration Regulations (currently codified at 15 CFR parts 768–799 (1991)) (the Regulations), for a period of up to 10 years from the date of the conviction. In addition, any export license issued pursuant to the EAA in which such a person had any interest at the time of his conviction may be revoked.

Pursuant to §§ 770.15 and 772.1(g) of the Regulations, upon notification that a person has been convicted of violating Section 38 of the AECA, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, shall determine whether to deny that person permission to apply for or use any export license issued pursuant to, or provided by, the EAA and the Regulations and shall also determine whether to revoke any export license previously issued to such a person. Having received notice of Johnson's conviction for violating Section 38 of the AECA, and following consultations with the Director, Office of Export Enforcement, I have decided to deny Johnson permission to apply for or use any export license, including any general license, issued pursuant to, or provided by, the EAA and the Regulations, for a period of 10 years from the date of his conviction. The 10-year period ends on August 20, 2000. I have also decided to revoke all export licenses issued pursuant to the EAA in which Johnson had an interest at the time of his conviction.

Accordingly, it is hereby Ordered.

I. All outstanding individual validated licenses in which Johnson appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Johnson's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

II. Until August 20, 2000, Richard Clark Johnson, 1073 Oak Street, Harwich, Massachusetts 02646, now incarcerated at FCI Raybrook, Post Office Box 903, Raybrook, New York 12977, hereby is denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, in whole or in part, and subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization, or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. After notice and opportunity for comment as provided in § 770.15(h) of the Regulations, any person, firm, corporation, or business organization related to Johnson by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

IV. As provided in § 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Export Licensing, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export provileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or

[1] The EAA expired on September 30, 1990. Executive Order 12730 (55 FR 40373, October 2, 1990) continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C.A. 1701–1706 (1991)).

[2] Pursuant to appropriate delegations of authority that are reflected in the Regulations, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, exercises the authority granted to the Secretary by section 11(h) of the EAA.

participate: (a) in any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

V. This Order is effective immediately and shall remain in effect until August 20, 2000.

VI. A copy of this Order shall be delivered to Johnson. This Order shall be published in the **Federal Register**.

Dated: March 10, 1992.

Iain S. Baird,

Director, Office of Export Licensing.

BILLING CODE 3510-DT-M

Telecommunications Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Telecommunications Equipment Technical Advisory Committee will be held April 8, 1992, 9:30 a.m., in the Herbert C. Hoover Building, room 1617M, 14th and Pennsylvania Avenue NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions that affect the level of export controls applicable to telecommunications and related equipment and technology.

Agenda

General Session

1. Opening remarks by the Chairman.
2. Approval of minutes.
3. Presentation of papers or comments by the public.
4. Report on status of U.S. implementation of Core List.
5. Discussion and recommendations for changes to Category 5 (Telecommunications & Information Security) for submission to COCOM in fall of 1992.

Executive Session

6. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent that time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. However, to facilitate distribution of public presentation materials to the Committee members, the Committee suggests that presenters forward the public presentation materials two weeks prior to the meeting date to the following address: Lee Ann Carpenter, Technical Support Staff, OTPA/BXA, room 1621, U.S. Department of Commerce, 14th & Pennsylvania Avenue NW., Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on February 5, 1992, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C., 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, room 6628, U.S. Department of Commerce, Washington, DC 20230. For further information or copies of the minutes, contact Lee Ann Carpenter on (202) 377-2583.

Dated: March 13, 1992.

Betty Anne Ferrell,

Director, Technical Advisory Committee Unit.

BILLING CODE 3510-DT-M

Foreign-Trade Zones Board

[Docket 8-90]

Order No. 565; Approval for Certain Processing Activity (Reprocessing Rubber) Foreign-Trade Zone 122, Corpus Christi, TX

Pursuant to its authority under the Foreign-Trade Zones (FTZ) Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following order:

After consideration of the request submitted by the Port of Corpus Christi Authority, Grantee of FTZ #122 (filed 02/14/90), on behalf of Housmex, Inc., for authority to use zone procedures to reprocess rubber within FTZ 122, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations would be satisfied, and that the proposal would be in the public interest if approval were given subject to a restriction requiring that privileged-foreign status (19 CFR 146.65) be elected on all foreign merchandise that is subject to Column 2 duty rates (non-MFN merchandise) at the time of admission to the zone, approves the request subject to the foregoing restriction.

The Secretary of Commerce, as Chairman and Executive Officers of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

This authority is granted subject to the FTZ Act and the Board's regulations (as revised, 56 FR 50790-50808, 10/8/91), including § 400.28, and to all other conditions contained in Board Order 310 (50 FR 38020, 9/19/85), which authorized establishment of Foreign-Trade Zone 122, and in subsequent Board Orders issued in regard to the general-purpose zone.

Signed at Washington, DC, this 11th day of March, 1992.

Alan M. Dunn,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Du Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[A-428-037]

Drycleaning Machinery From Germany; Termination of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On December 23, 1991, the Department of Commerce initiated an administrative review of the antidumping finding on drycleaning machinery from Germany. The Department is now terminating this review.

BACKGROUND: On December 23, 1991 (56 FR 66429) the Department of Commerce published a notice of initiation of administrative review of the antidumping finding on drycleaning machinery from Germany. This notice stated that we would conduct a review of Böwe-Passat Reinigungs-und Wäschereitechnik GmbH and its affiliated companies ("BPRW") for the period November 1, 1990 through October 31, 1991. BPRW withdrew its request for review on February 26, 1991. Since the withdrawal request was filed within 90 days of the date of publication of the notice of initation (*see* 19 CFR 353.22(a)(5)), and no other interested party has requested an administrative review for this period, the Department is now terminating this review.

EFFECTIVE DATE: March 18, 1992.

FOR FURTHER INFORMATION CONTACT: Alan Letort or Richard Weible, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, telephone (202) 377-3793 or telefax (202) 377-1388.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(a)(1)), and section 353.22(a)(5) of Commerce regulations (19 CFR 353.22(a)(5)).

Dated: March 10, 1992.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

[FR Doc. 92-6299 Filed 3-17-92; 8:45 am]

BILLING CODE 3510-DS-M

[A-570-815]

Preliminary Determination of Sales at Less Than Fair Value: Sulfanilic Acid From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: March 18, 1992

FOR FURTHER INFORMATION CONTACT: Mary Jenkins or Brian Smith, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC, 20230; telephone: (202) 377-1756 and 377-1766, respectively.

Preliminary Determination

The Department of Commerce ("the Department") preliminarily determines that sulfanilic acid from the People's Republic of China ("PRC") is being, or is likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended ("the Act") (19 U.S.C. 1673b). The estimated margin is shown in the "Suspension of Liquidation" section of this notice. Also, the Department preliminarily makes a negative finding of critical circumstances (see, the "Critical Circumstances" section of this notice).

Case History

On October 23, 1991, we initiated this investigation. On October 28, 1991, we sent a letter to the PRC embassy requesting a list of all known exporters of the subject merchandise. On October 28, 1991, we sent a letter to the PRC embassy and petitioner requesting that they address the issues of: (1) Whether we should continue to treat the PRC as a nonmarket economy country, or (2) whether available information would permit the Department to determine foreign market under section 773(a) of the Act. Since publication of the notice of initiation on October 29, 1991 (56 FR 55659), the following events have occurred. On October 29, 1991, counsel filed a letter of appearance for respondent, China National Chemicals Import & Export Corporation, Hebei Branch ("Sinochem Hebei"), and its related U.S. branches. On November 12, 1991, counsel for respondent claimed that the prices of material inputs used in producing sulfanilic acid in the PRC are market-driven and that for purposes of this investigation, the PRC should be treated as a market economy country for valuing those inputs.

On November 18, 1991, the International Trade Commission (ITC) made a preliminary determination that there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury by reason of imports of such merchandise that are allegedly sold at less than fair value in the United States. On November 18, 1991, the PRC embassy informed us that it would not be providing us with information we requested for conducting our investigation.

On November 27, 1991, we sent questionnaires to counsel for respondent and to the Chinese Chamber of Commerce for serving on all other known exporters of the subject merchandise during the POI.

On December 9, 1991, counsel for respondent requested a 30 day extension for responding to the questionnaire. On December 10, 1991, we granted Sinochem Hebei a partial extension.

On December 17, 1991, another counsel for respondent filed a letter of appearance with the Department and on January 24, 1992, original counsel withdrew from representation of Sinochem Hebei.

On December 23, 1991, counsel for respondent submitted its response to section A.

On December 26, 1991, counsel for respondent requested that Sinochem Hebei, be exempted from submitting factors of production for one of the four factories that provide them with sulfanilic acid for exports. On December 30, 1991, we denied respondent's request.

On January 3, 1992, counsel for Sinochem Hebei requested a one-day extension for submitting section C and part of section D and a two-day extension for submitting the rest of Section D and the remaining attachments to the questionnaire. On January 3, 1992, we granted respondent's request.

On January 6, 1992, respondent submitted its response to Section C and part of Section D. On January 7, 1992, respondent informed the Department that another entity, Sinochem Shandong, exported the subject merchandise to the United States and requested that it be exempt from reporting sales information of Sinochem Shandong to the Department.

On January 8, 1992, respondent submitted its response to the rest of Section D and the attachments.

On January 14, 1992, the Department sent a deficiency letter to respondent. On January 14, 1992, respondent submitted, on behalf of its four factory suppliers, costs for the raw material factor inputs.

On January 17, 1992, we sent a letter to respondent stating that we were requiring responses inclusive of Sinochem Shandong and if they did not report Sinochem Shandong's sales information and the Department determined that all branches of Sinochem should be treated as one entity, the Department would base its determination for all of Sinochem's sales on the best information available.

On January 29, 1992, respondent submitted its response to our deficiency letter.

On February 14, 1992, the Department sent a supplemental deficiency letter to respondent. On February 24, 1992, respondent submitted import statistics and requested a two day extension for responding to the remaining sections of the deficiency letter. On February 25, 1992, we granted respondent's request. On February 27, 1992, respondent submitted the remainder of its response to our supplemental deficiency letter.

In letters to the Department, petitioner has argued that (1) there are additional manufacturers in the PRC of sulfanilic acid which is exported to the United States; (2) the Department should issue questionnaires to these additional manufacturers, and to the exporters of those products; (3) the Department must consider whether the exporter (respondent) identified in this investigation accounts for 60 percent of U.S. sales, pursuant to 19 CFR 353.42(b); (4) the Department should issue respondent a country-wide rate, and (5) the Department should use surrogate

values for determining foreign market value and naot the PRC input prices submitted by respondent. (See *Foreign Market Value* Section).

Period of Investigation

The period of investigation ("POI") is May 1, 1991, through October 31, 1991.

PRC Exporters

In its December 30, 1991, submission, petitioner has argued that other PRC trading companies such as Quandong Chemicals and Shanghai Chemical exported the subject merchandise to the United States during the POI. Petitioner also maintains that respondent (Sinochem Hebei) does not account for over 60 percent of U.S. sales during the POI and that the Department should examine all exporters of the subject merchandise during the POI.

We issued a questionnaire to the Chinese Chamber of Commerce for Exporters & Importers of Metal & Mineral Products and Chemical Products to be transmitted to all branches of Sinochem except the Hebei Branch and to all other exporters of the subject merchandise.

We received a response from only Sinochem Hebei, which reported all its sales and shipments during the POI. Based on this and other information, the Department has determined that the total volume of Sinochem Hebei's sales and shipments during the POI accounted for more than 60 percent of the subject merchandise sold and shipped to the United States during the POI.

Separate Rates

In its November 12, 1991, submission, section C response, and in subsequent filings with the Department, respondent has argued that a separate, company-specific rate should be calculated in this investigation. Respondent states that the only relationship between it and the other trading companies of Sinochem China is in the production of oil, a category one product which is under state control but not subject to this investigation. Therefore, respondent maintains that it is an independent entity regarding the production and sale of sulfanilic acid, a category three product which is not under government control.

In order to determine whether a company-specific dumping margin should be calculated in this investigation, we asked respondent to provide information on company ownership and relationships, sources of inputs, manufacturing processes, distribution channels, involvement of trading companies, controls on external trade, profit retention, and other facets of their production and sale of sulfanilic acid. As stated in the Final Determination of Sales at Less than Fair Value: Sparklers from the People's Republic of China, 56 FR 20588 (May 6, 1991) ("Sparklers"), we will issue separate rates if a respondent can demonstrate both a *de jure* and *de facto* absence of central control. Evidence supporting, though not requiring, a finding of *de jure* absence of central control would include: (1) An absence of restrictive stipulations associated with an individual exporter's business and export licenses; and (2) any legislative enactments devolving central control of export trading companies. Evidence supporting a finding of *de facto* absence of central control with respect to exports would include: (1) Whether each exporter sets its own export prices independently of the government and other exporters; and (2) whether each exporter can keep the proceeds from its sales.

When we apply these four criteria, the evidence in the record submitted by respondent supports a finding that Sinochem Hebei is entitled to its own rate. Furthermore, we have no information that establishes that floor prices are being set by either the Ministry of Foreign Relations and Trade ("MOFERT") or any other governmental entity. Therefore, for purposes of the preliminary determination, we have calculated a company-specific margin for Sinochem Hebei. However, our final decision on the separate rate issue will depend upon successful verification of the factual assertions made by respondent and relied upon here. (For our analysis of the information in the record, see Concurrence Memorandum dated February 25, 1992.)

Since Sinochem Hebei was the only part to respond to our questionnaire we have no evidence that any of the other known exporters are independent from each other, or the government. Unless a respondent demonstrates entitlement to a separate, company-specific rate pursuant to the test enunciated in Sparklers, we presume that that they are related and subject to a single rate. See, *e.g.*, Preliminary Determination of Sales at Less Than Fair Value; Certain Carbon Steel Butt-Weld Pipe Fittings From the People's Republic of China, 56 FR 66831 (December 26, 1991). In determining what rate to use as BIA, the department follows a two-tiered methodology, whereby the Department may assign lower rates for those respondents who cooperated in an investigation and rates based on more adverse assumptions for those respondents who did not cooperate in an investigation (See, *e.g.*, Final Determination of Sales at Less Than Fair Value; Apheric Ophthalmoscopy Lenses from Japan, 57 FR 6703, 6704 (February 27, 1992).

According to the Department's two-tiered BIA methodology outlined in the Final Determination of Sales at Less Than Fair Value: Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof form the Federal Republic of Germany, Italy, Japan, Romania, Sweden, Thailand, and the United Kingdom, 54 FR 18992, 19033 (May 3, 1989), when a company refuses to provide the information requested in the form required, or otherwise significantly impedes the Department's investigation, it is appropriate for the Department to assign to that company the higher of (1) the margin alleged in the petition, or (2) the highest calculated rate of any respondent in the investigation. Therefore, as best information available, the dumping margin assigned to all other exporters who did not cooperate in this investigation is the highest calculated rate of the respondent in this investigation.

Scope of the Investigation

The products covered by this investigation are all grades of sulfanilic acid, which include technical (or crude) sulfanilic acid, refined (or purified) sulfanilic acid and sodium salt of sulfanilic acid (sodium sulfanilate).

Sulfanilic acid is a synthetic organic chemical produced from the direct sulfonation of aniline with sulfuric acid. Sulfanilic acid is used as a raw material in the production of optical brighteners, food colors, specialty dyes, and concrete additives. The principal differences between the grades are the undesirable quantities of residual aniline and alkali insoluble material present in the sulfanilic acid. All grades are available as dry, free flowing powders.

Technical sulfanilic acid, classified under the subheading 2921.42.24 of the Harmonized Tariff Schedule (HTS), contains 96 percent minimum sulfanilic acid, 1.0 percent maximum aniline and 1.0 percent maximum alkali insoluble materials. Refined sulfanilic acid, classified under the HTS subheading 2921.42.20.0, contains 98 percent minimum sulfanilic acid, 0.5 percent maximum aniline and 0.25 percent maximum alkali insoluble materials. Sodium salt of sulfanilic acid, classified under the HTS subheading 2921.42.70, is a granular or crystalline material containing 75 percent minimum equivalent sulfanilic acid, 0.5 percent maximum aniline, and 0.25 percent maximum alkali insoluble materials based on the equivalent sulfanilic acid content.

Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Fair Value Comparisons

To determine whether sales of sulfanilic acid from the PRC to the United States were made at less than fair value, we compared the United States price ("USP") to the foreign market value ("FMV"), as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

United States Price

We based United States price on purchase price where sales were made directly and indirectly to unrelated parties prior to the date of importation into the United States, in accordance with section 772(b) of the Act. We used purchase price as defined in section 772 of the Act, both because sulfanilic acid was sold to unrelated purchasers in the United States prior to importation into the United States, and because exporter's sales price ("ESP") methodology was not indicated by other circumstances.

We calculated purchase price based on packed, CIF port or delivered prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, U.S. duty, U.S. inland freight, U.S. brokerage, U.S. port charges, and U.S. containerization fees.

Foreign Market Value

Section 773 (c)(1) of the Act provides that the Department shall determine FMV using a factors of production methodology if (1) the merchandise is exported from a nonmarket economy country (NME), and (2) the information does not permit the calculation of FMV using home market prices, third country prices, or constructed value under section 773(a) of the Act.

In past cases *(e.g., Final Determination of Sales at Less than Fair Value: Chrome-Plated Lug Nuts from the People's Republic of China,* 56 FR 46153 (September 10, 1991) (*"Lug Nuts"*) and *Sparklers,* and indeed in every case conducted by the Department involving the PRC, the PRC has been treated as an NME. In this case, neither party has suggested that the PRC is no longer an NME. However, the respondent claims that certain inputs in the production of sulfanilic acid are market-driven.

The Department has previously interpreted 773(c)(1)(B) of the Act to mean that foreign market value can be based on the NME exporter's prices or costs, despite the fact that the country may otherwise be considered an NME, if sufficient market forces are at work (see, Lug Nuts and Final Determination of Sales at Less Than Fair Value; Oscillating Fans and Ceiling Fans from the People's Republic of China, 56 FR 55271 (October 25, 1991).

However, as stated in our recent notices of initiation for two countervailing duty investigations (see, Initiation of Countervailing Duty Investigation: Oscillating Fans and Ceiling Fans from the People's Republic of China, 56 FR 57616 (November 13, 1991) and Initiation of Countervailing Duty Investigation: Chrome-Plated Lug Nuts and Wheel Locks from the People's Republic of China, 57 FR 877 (January 9, 1992)), the Department determined that it must reconsider the appropriateness of the specific approach established in Lug Nuts and Fans.

As a result of this reconsideration, we have now developed the following criteria for determing whether a market-oriented industry exists in an economy which will otherwise be considered nonmarket:

- For merchandise under investigation, there must be virtually no government involvement in setting prices or amounts to be produced. For example, state-required production or allocation of production of the merchandise, whether for export or domestic consumption in the nonmarket economy country would be an almost insuperable barrier to finding a market-oriented industry.
- The industry producing the merchandise under investigation should be characterized by private or collective ownership. There may be state-owned enterprises in the industry but substantial state ownership would weigh heavily against finding a market-oriented industry.

Market-determined prices must be paid for all significant inputs, whether material or non-material, and for an all but insignificant proportion of all the inputs accounting for the total value of the merchandise under investigation. For example, an input price will not be considered market-determined if the producers of the merchandise under investigation pay a state-set price for the input or if the input is supplied to the producers at government direction. Moreover, if there is any state-required production in the industry producing the input, the share of state-required production must be insignificant.

If these conditions are not met, the producers of the merchandise under investigation will be treated as nonmarket economy producers, and the foreign market value will be calculated by using prices and costs from a surrogate country, in accordance with section 773(c) (3) & (4) of the Act.

Respondent maintains that the prices at which the factories purchase some of their inputs for sulfanilic acid are not subject to state-control and are market-driven. Therefore, respondent argues the Department should use these PRC input prices for valuing the factors of production. Respondent submitted costs for aniline, sulfuric acid, activated carbon, coal, and plastic bags, but not for electricity and labor.

Petitioner maintains that the sulfanilic acid industry is state-controlled and is not market-oriented. Petitioner argues that market forces are not at play in establishing any input prices for producing sulfanilic acid in the PRC.

As noted above, we continue to find that the PRC is an NME. Therefore, the presumption remains that the inputs used by the sulfanilic acid producers which are sourced in the PRC are not purchased at market prices. A respondent asserting that it purchases inputs at market-oriented prices must provide significant documentary evidence and also show that market prices are at work to overcome this presumption. An absence of government control alone is not sufficient to warrant a conclusion that prices for inputs are market-driven. We must also conclude by application of the criteria outlined above that market forces are at work in determining the prices in general within the PRC. Therefore, respondent's assertion, without sufficient documentary support, is not enough to establish market behavior with respect to input prices.

We have determined that for purposes of this preliminary determination, we do not have any information from the PRC government which could assist us in determining whether or not there is a lack of state-control or a presence of market forces with respect to the four factories' input costs and their respective supplier prices. We have requested information from the PRC government to determine whether there is any government control in the chemical sector, sulfanilic acid industry, or in inputs used to produce sulfanilic acid. The information submitted by the PRC government and respondent will be subject to verification, and will be taken into account in making our final decision on the PRC input prices issues.

Therefore, in accordance with section 773(c) of the Act, the Department is required to determine FMV on the basis of factors of production utilized in producing the subject merchandise, as valued in a surrogate country.

Surrogate Country

Section 773(c)(4) of the Act requires the Department to value the factors of production, to the extent possible, in one or more market economy countries that are at a level of economic development comparable to that of the nonmarket economy country, and that are significant producers of comparable merchandise. The Department has determined that India and Pakistan are the most comparable to the PRC in terms of overall economic development, based on per capita gross national product (GNP), the national distribution of labor, and growth rate in per capita GNP. Because India fulfills both requirements outlined in the statute, India is the preferred surrogate country for purposes of calculating the factors of production used in producing the subject merchandise. Further, because Pakistan is not a producer of sulfanilic acid, we have only resorted to Pakistan for surrogate values if Indian values were not obtainable. We have used the values for the factors of production, as appropriate, from both countries. Date for valuing the factors of production was obtained from the U.S. Embassy in India and the U.S. consulate in Pakistan.

We calculated FMV based on factors of production reported by the factories which produced the subject merchandise for the respondent Sinochem Hebei. The factors used to produce sulfanilic acid include materials, labor, and energy. According to respondent, water usage cannot be valued as a factor of production because there is no cost for water incurred by the factories. Subject to verification, we have accepted respondent's argument.

To value aniline, one of six main inputs for producing sulfanilic acid, we used an imported price quote provided by the U.S. Embassy in India. We used the imported price rather than the domestic price of aniline because imported aniline is used by Indian producers in manufacturing sulfanilic acid for exportation. For sulfuric acid and activated carbon, we have used POI price quotes provided by the U.S. consulate in Pakistan because the U.S. Embassy in India could not obtain values for these inputs. We used unskilled and skilled labor rates, including benefits, obtained from the U.S. embassy in India. For coal, we used a POI price quote provided by the U.S. consulate in Pakistan because the U.S. embassy in India could not obtain surrogate values. For electricity, we used an electricity rate provided by the U.S. embassy in India. For purposes of the preliminary determination, we have considered the prices supplied by the U.S. Embassy in India and U.S. consulate in Pakistan as prices during the POI. However, since the Indian prices were obtained in January 1992, and the Pakistani prices were obtained in December 1991, we will confirm the effective dates of these prices prior to our final determination.

To calculate FMV, the reported factors of production were multiplied by the appropriate Indian and Pakistani values for the various components. We added an amount for the delivery of inputs to the factory to arrive at a delivered cost of materials. We used freight rates obtained from the U.S. Embassy in India. We have also used a percentage for factory overhead, based on Indian producers' experience, obtained from the U.S. Embassy in India. We then added an amount higher than the statutory ten percent minimum for selling, general and administrative expenses, and an amount higher than the statutory eight percent minimum for profit, based on Indian producers'experience, obtained from the U.S. embassy in India. We also added an amount for packing labor based on Indian wage rates, and an amount for packing materials based on Indian prices to arrive at a constructed FMV for one metric ton of sulfanilic acid.

Critical Circumstances

Petitioner alleges that "critical circumstances" exist with respect to imports of sulfanilic acid from the PRC. Section 733(e)(1) of the Act provides that critical circumstances exist when we determine that there is a reasonable basis to believe or suspect that:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or (ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of investigation at less than its fair value, and (B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 733(e)(1)(b) of the Act, we generally consider the following factors in determining whether imports have been massive over a short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports. See, *e.g.*, Final Determination of Sales at Less Than Fair Value: Certain Internal-Combustion, Industrial Forklift Trucks from Japan, 53 FR 12552 (April 15, 1988). To determine whether imports have been massive, we normally compare the export volume for the base period, which is a period of not less than three months beginning with the month the petition was filed, with a previous period of the same length. Since the petition was filed on October 3, 1991, we compared shipments, for Sinochem Hebei, during the three-month period from the filing of the petition, October through December 1991, to shipments during the three month period prior to the month in which the petition was filed, July through September 1991.

Under 19 CFR 353.16(f)(2), unless the imports in the comparison period have increased by at least 15 percent over the imports during the base period, we will not consider the imports "massive." Based on this analysis, we find that imports of the subject merchandise from the PRC during the period subsequent to receipt of the petition have not been massive.

Since we do not find that there have been massive imports, pursuant to section 733(e)(1) of the Act, we do not need to consider whether there is a history of dumping or whether there is a reason to believe or suspect that importers of this product knew or should have known that it was being sold at less than fair value.

Therefore, we preliminarily determine that critical circumstances do not exist with respect to imports of sulfanilic acid from the PRC.

Currency Conversion

When calculating foreign market value, we made currency conversions in accordance with 19 CFR 353.60(a).

Verification

As provided in section 776(b) of the Act, we will verify all information used in reaching our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of sulfanilic acid from the PRC, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated margin amount by which the foreign market value of the subject merchandise exceeds the United States price as shown below. The suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Margin percent
China National Chemicals Import & Export Corporation, Hebei Branch ("Sinochem Hebei")	85.29
All others	85.29

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments, must be submitted, in at least ten copies, to the Assistant Secretary for Import Administration no later than May 6, 1992, and rebuttal briefs no later than May 11, 1992. In addition, a public version and five copies should be submitted by the appropriate date if the submission contains business proprietary information. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. The hearing will be held, if requested, at 10 a.m. on May 12, 1992, at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue NW., Washington DC, 20230. Interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B-099 within ten days of the date of publication of this notice. Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentation will be limited to arguments raised in the briefs.

This determination is published pursuant to section 773(f) of the Act (19 U.S.C. 1673b(f)) and 19 CFR 353.15.

Dated: March 11, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Ball Bearings and Parts Thereof From Thailand; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on ball bearings and parts thereof from Thailand. We preliminarily determine the total bounty or grant to be 20.41 percent *ad valorem* for all companies for the period January 1, 1990 through December 31, 1990. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: March 18, 1992.

FOR FURTHER INFORMATION CONTACT: Beth Chalecki, Sylvia Chadwick, or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5260.

SUPPLEMENTARY INFORMATION:

Background

On May 21, 1991, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (56 FR 23271) of the countervailing duty order on ball bearings and parts thereof from Thailand (54 FR 19130; May 3, 1989). On May 31, 1991, Torrington Company, the petitioner, and Pelmec Thai and NMB Thai, the respondents, requested an administrative review of the order. We initiated the review, covering the period January 1, 1990 through December 31, 1990, on June 18, 1991 (56 FR 27944). The Department has now conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act). This is the first administrative review since the publication of the order.

Scope of Review

Imports covered by this review are shipments of ball bearings and parts thereof. Such merchandise is described in detail in Appendix A to this notice. The Tariff Schedules of the United States Annotated (TSUSA) and the Harmonized Tariff Schedule (HTS) item numbers listed in appendix A are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1990 through December 31, 1990, two producers/exporters, NMB Thai Ltd. (NMB) and Pelmec Thai Ltd. (Pelmec), and twelve programs.

Calculation Methodology

Respondents claim that the value of the subject merchandise entering the United States is greater than the sales revenue received by the comnpanies in Thailand due to a markup charged by the parent company, located in a third country, through which the merchandise is invoiced. Respondents argue that the calculated *ad valorem* rate should be adjusted by the ratio of the RTG export value over the sales value charged to the US customer by the parent company.

The Department does not consider it appropriate to incorporate markups or markdowns levied in a third country in calculating the net bounty or grant rate, because the bounties or grants were received based on the value of respondents' sales as exported from Thailand (see, Final Affirmative Countervailing Duty Determination and Partial Countervailing Duty Order; Ball Bearings and Parts Thereof from Thailand (54 FR 19130; May 3, 1989)). Therefore, in this review we calculated the rate of bounty or grant using only the FOB export value of the subject merchandise.

Analysis of Programs

1. Electricity Discounts for Exporters

The Electricity Generating Authority of Thailand (EGAT), the Metropolitan Electricity Authority (MEA), and the Provincial Electricity Authority (PEA) provided discounts on electricity rates charged to exporters. This program was discontinued on January 1, 1990, but exporters are still eligible for residual benefits from previously submitted applications. This program provides a 20 percent discount on the cost of the electricity used to produce the exported goods. Because this program provides benefits to exporters only, we determine that it is countervailable.

Both NMB and Pelmec received benefits from this program during the review period. To calculate the benefit, we divided the total amount of electricity credits received by both companies by the total FOB value of export sales of both companies. On this basis, we preliminarily determine the net bounty or grant from this program to be 0.07 percent *ad valorem* during the review period.

2. Investment Promotion Act (IPA)—Sections 31, 28 and 36(1)

The Investment Promotion Act of 1977 is administered by the Board of Investment (BOI) and is designed to provide incentives to invest in Thailand. In order to receive benefits from the IPA, each company must apply to the

BOI for a Certificate of Promotion (license), which specifies goods to be produced, production and export requirements, and benefits allowed. These licenses are granted at the discretion of the BOI and are periodically amended or reissued to upgrade benefits. Each IPA section for which a company is eligible must be specifically stated in the license. Both Pelmec and NMB had export requirements contained in their licenses for the review period, and both licenses specifically allowed them to receive tax and duty exemptions under IPA sections 31, 28, and 36(1).

Under section 31, an exporting company is allowed an exemption from payment of corporate income tax on profits derived from promoted exports. Under section 28, an exporting company is allowed to import machinery and equipment (fixed assets) free of import duties and business and local taxes, and under section 36(1), the company is allowed to import essential materials (non-fixed assets) that are not physically incorporated into the export good free of the same duties and taxes. We verified that NMB and Pelmec claimed exemptions under section 31 on their tax returns filed during the 1990 review period, and they imported both fixed and non-fixed assets duty- and tax-free during the review period. Because the tax and duty exemptions provided in NMB's and Pelmec's BOI licenses are contingent upon export performance, we determine that these exemptions are countervailable.

We calculated the benefit to NMB and Pelmec under Section 31 by obtaining the difference between what each company paid in corporate income tax during the review period, and what it would have paid absent the exemption. We calculated the benefit to NMB and Pelmec under sections 28 and 36(1) by obtaining the amount of duties and taxes that would have been paid on the imports absent the exemption. We added all duty and tax savings under all the IPA programs and divided this aggregate benefit by the total FOB export value. On this basis, we preliminarily determine the net bounty or grant from IPA sections 31, 28 and 36(1) to be 20.19 percent *ad valorem* during the review period.

3. Tax Certificate for Exporters

The Royal Thai Government issues to exporters of record tax certificates which are transferable and which rebate indirect taxes and import duties levied on inputs used to produce exports. This rebate program is provided for in the "Tax and Duty Compensation of Exported Goods Produced in the Kingdom Act" (Tax and Duty Act). The rebate rates under the Tax and Duty Act are computed based on the Basic Input-Output Table of Thailand (I–O table).

Using the I–O table, the Thai Ministry of Finance computes the value of total inputs (both imported and domestic) at ex-factory prices. It also calculates the import duties and indirect taxes on each input, and calculates an "A" rebate rate, which rebates both import duties and indirect domestic taxes, and a "B" rebate rate, which rebates only indirect domestic taxes. Exporters who participate in Thailand's duty drawback or duty exemption programs claim the "B" rate. The relevant rebate rate is then applied to the FOB value of the export to determine the amount of rebate that will be provided.

Under the Tax and Duty Act, rebates are paid to exporters by tax certificates, which can be used to pay the exporter's tax liabilities, or can be sold to another company, usually at less than face value. The rebate rates in effect during the review period were 7.19 percent as the "A" rate, and 0.59 percent as the "B" rate. As determined in Final Affirmative Countervailing Duty Determination and Partial Contervailing Duty Order: Ball Bearings and Parts Thereof from Thailand (54 FR 19130; May 3, 1989), these rebates are countervailable only to the extent that the remissions of duties and taxes exceed those actually levied on physically incorporated inputs. Further, in Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Steel Wire Rope from Thailand (56 FR 46299; September 11, 1991), the Department calculated the sector-wide overrebate rate for Sector 111, which contains steel wire rope. Since Sector 111 also contains ball bearings, we applied the same sector rate in this review. On this basis, we preliminarily determine the net bounty or grant benefit from this program to be 0.15 percent *ad valorem*.

4. Other Programs

We also examined the following programs and preliminarily determine that the exporters of the subject merchandise did not use them during the review period:

- Export Packing Credits.
- Rediscount of Industrial Bills.
- Export Processing Zones.
- IPA Sections 33 and 36(4).
- Reduced Business Taxes for Producers of Intermediate Goods for Export Industries.
- International Trade Promotion Fund.

Preliminary Results of Review

As a result of our review, we preliminarily determine the total bounty or grant to be 20.41 percent *ad valorem* for the period January 1, 1990 through December 31, 1990.

Therefore, the Department will instruct the Customs Service to assess countervailing duties of 20.41 percent of the f.o.b. invoice price on all shipments from Thailand of the subject merchandise exported on or after January 1, 1990 and on or before December 31, 1990.

As provided by section 751(a)(1) of the Act, the Department also intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties of 20.41 percent of the f.o.b. invoice price on shipments of the subject merchandise from Thailand entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review.

Parties to the proceeding may request disclosure of the calculation methodology and interested parties may request a hearing not later than 10 days after the date of publication of this notice.

Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 355.38(e). Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under 19 CFR 355.38(c), are due. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any case or rebuttal brief or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: March 10, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Appendix A

Scope of the Review

The products covered by this review, ball bearings, mounted or unmounted, and parts thereof, constitute the following as outlined below.

Ball Bearings, Mounted or Unmounted; and Parts Thereof

These products include all antifriction bearings which employ balls as the rolling element. During 1988, imports of these products were classifiable under the following categories: Antifriction balls (Tariff Schedules of the United States Annotated (TSUSA) items 680.3025 and 680.3030; ball bearings with integral shafts (TSUSA item 680.3300); ball bearings (including radial ball bearings) and parts thereof (TSUSA items 680.3704, 680.3706, 680.3712, 680.3717, 680.3718, 680.3722, 680.3727, and 680.3728); ball bearing type pillow blocks and parts thereof (TSUSA items 681.0410 and 681.0430); ball bearing type flange, take-up, cartridge, and hanger units, and parts thereof (TSUSA items 681.1010 and 681.1030); and other bearings (except tapered roller bearings) and parts thereof (TSUSA 680.3960). Wheel hub units which employ balls as the rolling element entering under TSUSA item 692.3295 are subject to the review; all other products entering under this TSUSA item are not subject to the review. Finished but unground or semiground balls are not included in the scope of this review.

Imports of these products are currently classifiable under the following Harmonized Tariff Schedule (HTS) item numbers: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

This review covers all of the subject bearings and parts thereof outlined above with certain limitations. With regard to finished parts (inner race, outer race, cage, rollers, balls, seals, shields, etc.), all such parts are included in the scope of this review. For unfinished parts (inner race, outer race, rollers, balls, etc.), such parts are included if (1) they have been heat treated, or (2) heat treatment is not required to be performed on the part. Thus, the only unfinished parts that are not covered by this review are those where the part will be subject to heat treatment after importation.

BILLING CODE 3510–DS–M

National Institute of Standards and Technology

[Docket No. 911186–1286]

RIN 0693–AA48

Selection of a Test Method and Intention To Establish a Validation Service for the Federal Information Processing Standard (FIPS) 160, Programming Language C

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice; request for comments

SUMMARY: NIST has selected the Perennial ANSI C Validation Suite (ACVS™) as the test method to be used by the NIST for testing C compilers for conformance to FIPS PUB 160. The NIST Validation Service will be used to assess the degree to which C implementations conform to FIPS PUB 160. The NIST will use a trial validation service to verify the accuracy and completeness of the C validation procedures. To assess the suitability of the test method and validation procedures for testing conformance to FIPS, NIST solicits the views of industry, the public and local governments

DATES: The trail validation service started in January 1992 and will continue through September 1992. Comments on the test method and validation procedures must be received by September 30, 1992.

ADDRESSES: Written comments should be sent to: National Institute of Standards and Technology, Computer Systems Laboratory, ATTN: C Test Service, Building 225, room A266, Gaithersburg, MD 20899.

FOR FURTHER INFORMATION CONTACT: Kathryn Miles, telephone (301) 975–3156, National Institute of Standards and Technology, Building 225, room A266, Gaithersburg, MD 20899.

SUPPLEMENTARY INFORMATION:

Background

The Federal Information Processing Standard Publication (FIPS PUB 160) for the Programming Language C, which adopts ANSI X3.159–1989 Programming Language—C, was approved as a Federal Standard on February 15, 1991, and became effective on September 30, 1991. In accordance with FIPS PUB 160, the standard applies to C compilers acquired for federal use after its effective date. The purpose of the C standard is to permit portability of C applications across a variety of hardware configurations.

Federal agencies may require conformance to FIPS 160 whether the compilers are developed internally, acquired as part of an ADP system procurement, used under an ADP leasing arrangement, or specified for use in contracts for programming services. Testing may be required in order for agencies to determine if the C implementations conform to FIPS PUB 160. The Perennial ACVS™ Test Suite and the test results provided from the NIST validation service are sources for federal agencies to use in making this determination.

Updates to the Test Method

The Test Suite will be periodically updated and used as the basis for validating FIPS 160 implementations. The update process will be used to correct errors identified in the Perennial ACVS™ Test Suite and to introduce new or modified programs as appropriate. Modification to the Test Suite is also intended to ensure that implementations are being built according to the technical specifications of the standard. Should an interpretation of the FIPS be made that would affect the test suite, these changes would also be reflected during the update process.

Authority: Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100–235.

Dated: March 11, 1992.

BILLING CODE 3510-13-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Sri Lanka

March 11, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: March 18, 1992.

FOR FURTHER INFORMATION CONTACT: Kim-Bang Nguyen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343–6580. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing, special shift and carryover.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991). Also see 56 FR 29232, published on June 28, 1991.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 11, 1992.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on June 21, 1991, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products and silk blend and other vegetable fiber apparel, produced or manufactured in Sri Lanka and exported during the twelve-month period which began on July 1, 1991 and extends through June 30, 1992.

Effective on March 18, 1992, you are directed to amend further the directive dated June 21, 1991 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and Sri Lanka:

Category	Adjusted twelve-month limit [1]
338/339	991,521 dozen of which not more than 784,132 dozen shall be in Categories 338–S/339–S [2].
341	757,849 dozen of which not more than 321,123 dozen shall be in Category 341–Y [3].
359–C/659–C [4]	948,114 kilograms.
369–D [5]	546,324 kilograms.

[1] The limits have not been adjusted to account for any imports exported after June 30, 1991.

[2] Category 338–S: only HTS numbers 6103.22.0050, 6105.10.0010, 6105.10.0030, 6105.90.3010, 6109.10.0027, 6110.20.1025, 6110.20.2040, 6110.20.2065, 6110.90.0068, 6112.11.0030 and 6114.20.0005; Category 339–S: only HTS numbers 6104.22.0060, 6104.29.2049, 6106.10.0010, 6106.10.0030, 6106.90.2010, 6106.90.3010, 6109.10.0070, 6110.20.1030, 6110.20.2045, 6110.20.2075, 6110.90.0070, 6112.11.0040, 6114.20.0010 and 6117.90.0022.

[3] Category 341–Y: only HTS numbers 6204.22.3060, 6206.30.3010 and 6206.30.3030.

[4] Category 359–C: only HTS numbers 6103.42.2025, 6103.49.3034, 6104.62.1020, 6104.69.3010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010; Category 659–C: only HTS numbers 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.3038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.3014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.4015, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[5] Category 369–D: only HTS numbers 6302.60.0010, 6302.91.0005 and 6302.91.0045.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 92–6243 Filed 3–17–92; 8:45 am]

BILLING CODE 3510-DR-F

Denial of Participation in the Special Access and Special Regime Programs

March 11, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs denying the right to participate in the Special Access and Special Regime Programs.

EFFECTIVE DATE: June 1, 1992.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–3400.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Committee for the Implementation of Textile Agreements (CITA) has determined that Lee Thomas, Inc. is in violation of the requirements set forth for participation in the Special Access and Special Regime Programs.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs, effective on June 1, 1992, to deny Lee Thomas, Inc. the right to participate in the Special Access and Special Regime Programs for a period of three months, beginning June 1, 1992 and ending August 31, 1992.

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 54 FR 50425, published on December 6, 1989.

Requirements for participation in the Special Regime Program are available in **Federal Register** notices 53 FR 15724, published on May 3, 1988; 53 FR 32421, published on August 25, 1988; 53 FR 49346, published on December 7, 1988; and 54 FR 50425, published on December 6, 1989.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 11, 1992.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: The purpose of this directive is to notify you that the Committee for the Implementation of Textile Agreements has determined that Lee Thomas, Inc. is in violation of the requirements for participation in the Special Access and Special Regime Programs.

Effective on June 1, 1992, you are directed to prohibit Lee Thomas, Inc. from further participation in the Special Access and Special Regime Programs for a period of three months, beginning June 1, 1992 and ending August 31, 1992. Goods accompanied by Form ITA–370P which are presented to U.S. Customs for entry under the Special Access and Special Regime Programs will no longer be accepted. In addition, for the period June 1, 1992 through August 31, 1992, you are directed not to sign ITA–370P forms for export of U.S.-formed and cut fabric for Lee Thomas, Inc.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

DEPARTMENT OF DEFENSE

Department of the Army

Change in Carrier Approval Qualifications in the International One-Time-Only Program

AGENCY: Military Traffic Management Command, DoD.

ACTION: Notice of change.

SUMMARY: The Military Traffic Management Command (MTMC), Directorate of Personal Property, is effecting changes to carrier approval qualifications to participate in the international one-time-only (OTO) program for the movement of DoD household goods (HHG) and unaccompanied baggage (UB) shipments. The initial proposal regarding these changes was published in the **Federal Register** on 2 July 1991, 56 FR 30380.

EFFECTIVE DATE: March 18, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Gail Collier, (703) 756–2397, Headquarters, Military Traffic Management Command, ATTN: MTPP–CI (Ms. Collier), 5611 Columbia Pike, Falls Church, VA 22041–5050.

SUPPLEMENTARY INFORMATION:

a. the Military Traffic Management Command's procedures for the international OTO household goods and unaccompanied baggage shipment programs are outlined in the International Personal Property Rate Solicitation I–2, effective 1 October 1991, Chapter VII, and Personal Property Traffic Management Regulation (PPTMR), DOD 4500.34–R chapter 2, paragraph 2024.a, page 2–30 and 5003.e2. The OTO program is primarily used for moving household goods and unaccompanied baggage shipments when the origin-to-destination channels are uncontrolled rate areas; when no carrier has Letter of Intent (LOI) on file at the military installation controlling the shipment; when a shipment requires conversion, i.e., from Code 4 to Code 5 service or from Code 7 to Code 6 service due to strike or other conditions which impede timely service and the carrier to which the shipment was tendered does not offer alternative rates in the converted service; when a shipment requires reshipment under conditions specified in chapter V of the rate solicitation; or when a carrier inadvertently accepts shipment on a channel where it has not effective rate on file. Chapter II of the PPTMR and chapter VII of the International Personal Property Rate Solicitation contain a complete listing of OTO procedures. MTMC solicits rates for these types of shipments from approved MTMC international through Government Bill of Lading (ITGBL) carriers that have submitted a written request to participate in the international OTO program. All comments received by MTMC have been considered and as appropriate have been incorporated into the following rule change.

Revised Rule

a. The DOD 4500.34–R PPTMR, chapter 2, paragraph 2004.d., (page 2–5), is changed as follows:

d. Uncontrolled-Rate Areas. Specific country approval is required by HQMTMC for uncontrolled rate areas. Carriers, seeking to participate in the OTO program for movements involving uncontrolled rate areas, must provide the following to HQMTMC with their requests for approval:

(1) A statement, that the carrier has completed 12 months of continuous service as a DOD-approved international through Government Bill of Lading (ITGBL) carrier. Carrier must have had a satisfactory performance during the 12 month period. Satisfactory (ITGBL) performance is defined as a satisfactory performance TQAP score for the most recent 6-month performance cycle (1 Apr to 30 Sep/1 Oct to 31 Mar) at no less than 90 pecent of total installations serviced.

(2) A list of codes of service for which the carrier is requesting approval.

(3) A list of countries in which the carrier would like to participate, enclosing the name(s) and addresses of agent(s) for each country. Agents located outside of the continental United States, Alaska, Hawaii, and controlled rate areas listed in paragraph 2004c, need not be DOD-approved. This does not restrict the carrier to use only the agent(s) listed. Carriers are required to update this list annually from the date of their initial submission.

(4) A copy of the carrier's standard operating procedures (tracing and traffic management procedures) used to process international OTO shipments.

(5) Telephone numbers at which key employees can be reached during nonworking hours in case of an emergency. These numbers will be utilized in case of emergency situations, such as an embassy evacuation. This is a voluntary requirement. Carriers who cannot be contacted on short notice may not be able to submit their bids in a responsive manner.

(6) Carriers approved and presently participating in the OTO program will be required to comply with the above qualification requirements within 12 months of implementation of these requirements. Failure to provide the required information will result in the revocation of the carrier's approval to participate in this program. Carriers submitting initial approval after starting 1 March 1992, must comply with the above requirements.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

[FR Doc. 92–6210 Filed 3–17–92; 8:45 am]

BILLING CODE 3710–08–M

Intent To Grant an Exclusive Patent License to AMVAX, Inc.

AGENCY: Office of the Judge Advocate General, Department of the Army, DOD.

ACTION: Notice of intent.

SUMMARY: The Department of the Army announces its intention to grant AMVAX, Inc., a corporation of the State of Delaware, an exclusive license under U.S. Patent Application SN 07/642,093, filed on 12 January 1991, and Immunogenic Peptide Vaccines and Methods of Preparation.

The proposed limited exclusive license will comply with the terms and conditions of 35 U.S.C. 209 and the Department of Commerce's regulations at 37 CFR part 404. The proposed license may be granted unless, within 60 days from the date of this notice, the Department of the Army receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest. All comments and materials must be submitted to Earl T. Reichert at the address below.

FOR FURTHER INFORMATION CONTACT: Earl T. Reichert, Department of the Army, Office of the Judge Advocate General, Intellectual Property Law Division, 5611 Columbia Pike, Falls Church, VA 22041–51013, (703) 756–2623.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

BILLING CODE 3710–08–M

DELAWARE RIVER BASIN COMMISSION

Proposed Amendments to Comprehensive Plan, Water Code of the Delaware River Basin, Administrative Manual; Part III Water Quality Regulations; Public Hearings

AGENCY: Delaware River Basin Commission.

ACTION: Notice of proposed rulemaking and public hearings.

SUMMARY: Notice is hereby given that the Delaware River Basin Commission will hold public hearings to receive comments on proposed amendments to its Comprehensive Plan, Water Code and Water Quality Regulations relating to water quality standards and policies to protect existing water quality in certain waters of the Basin. The proposal would also classify the Upper Delaware Scenic and Recreational River, the Delaware Water Gap National Recreation Area, and the Delaware River from Millrift, Pennsylvania to the northern boundary of the Delaware Water Gap National Recreation Area as Special Protection Waters.

In addition, the Commission is proposing related revisions to its Administrative Manual—Rules of Practice and Procedure. A summary of the proposed amendments to the Administrative Manual—Rules of Practice and Procedure is published elsewhere in the Proposed Rules section of this issue of the **Federal Register**.

DATES: The public hearings are scheduled as follows: May 5, 1992, and May 6, 1992 from 2 to 5 p.m., resuming at 7 p.m.

The deadline for inclusion of written comments in the hearing record will be announced at the hearings.

ADDRESSES: The May 5, 1992 hearing will be held in the Ballroom of the Inn at Hunts Landing, 900 Routes 6 & 209, Matamoras, Pennsylvania.

The May 6, 1992 hearing will be held in the Tusten Theater on Bridge Street (Route 52) in Narrowsburg, New York.

Written comments should be submitted to Susan M. Weisman, Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628.

FOR FURTHER INFORMATION CONTACT: Susan M. Weisman, Commission Secretary, Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628, Telephone (609) 883–9500.

SUPPLEMENTARY INFORMATION:

Background and Rationale

Water quality standards and policies now in effect for the Delaware River between Hancock, New York and the Delaware Water Gap are based on the protection of designated uses for primary-contact recreation and aquatic life. However, these water quality standards and associated effluent and other policies do not specifically preserve the existing high level of water quality from degradation.

In 1988, the Commission and the National Park Service initiated the development of a water quality protection plan for the Middle Delaware Scenic and Recreational River and tributaries within the boundary of the National Recreation Area. Prompting the need for the plan was the existing and planned rapid growth and development in the drainage area to the National Recreation Area and the potential decline in water quality within the National Recreation Area due to increased point and non-point source pollution in its drainage area.

In 1989, the Watershed Association of the Delaware River petitioned the Commission to classify the Delaware River from Hancock, New York to the Delaware Water Gap as an Outstanding National Resource Water, as described by U.S. Environmental Protection Agency anti-degradation regulations.

In response to the petition and other considerations, the Commission expanded the areal scope of the water quality protection planning effort to include the Upper Delaware Scenic and Recreational River corridor.

Commission reports describing issues and alternatives were disseminated in March 1990, October 1990 and April 1991. In November and December 1990, the Commission held a series of public briefings concerning possible scenic rivers protection alternatives.

The proposed changes to the Commission's regulations were developed with scientific and policy input from the Commission's Water Quality Advisory Committee. Participants in the Committee discussions included representatives from the environmental departments of Delaware, New Jersey, New York, Pennsylvania; U.S. Environmental Protection Agency Regions II and III; public members from the University of Rhode Island and the Academy of Natural Sciences; and the National Park Service. Members of the general public were observers at the various Committee meetings. Comments received on the various reports issued to the public during the planning process, comments received from the public briefings, and the inputs received through the Advisory Committee deliberations have led to the changes now being proposed.

The proposed revisions set forth an overall framework for providing special water quality protection measures for interstate and contiguous waters deemed by the Commission to have exceptionally high scenic, recreational, ecological or water supply values. The proposed changes then go an additional step by classifying certain stream reaches as Special Protection Waters, thus activating the provisions of the Special Protection Water policies in these reaches. The changes have been designed to be implementable, with the dual objective of protecting existing water quality without adversely impacting local growth and development prerogatives.

The proposed amendments define the goals of the water quality protection strategy, set forth point and non-point source pollution control policies and requirements and define the institutional structure within which the Commission, the state environmental agencies and others will share overall water quality management responsibilities. The proposal also classifies certain stream reaches as Special Protection Waters and includes numerical definitions of Existing Water Quality and the locations of monitoring points which will be used to manage water quality.

The Commission has prepared a "Basis and Background Document—Proposed Revisions to Water Quality Standards and Regulations—Hancock, New York to the Delaware Water Gap" describing the proposed amendments and their rationale in considerable depth. This and other relevant reports may be obtained by contacting Christopher M. Roberts at the Commission.

Copies of the full text of the proposed amendments may be obtained by contacting Ms. Weisman at the address provided in **FOR FURTHER INFORMATION CONTACT.** Persons wishing to testify are requested to notify the Secretary in advance. Written comments on the proposed amendments should also be submitted to the Secretary.

Delaware River Basin Compact. 75 Stat. 686.

Dated: March 11, 1992.

Susan M. Weisman,

Secretary

BILLING CODE 6360–01–M

DEPARTMENT OF ENERGY

Availability of Draft "Decontamination and Decommissioning Integrated Demonstration Strategy"

AGENCY: Department of Energy, Office of Environmental Restoration and Waste Management.

ACTION: Notice of Availability.

SUMMARY: This notice announces the availability for public review of the draft document, "DOE Decontamination and Decommissioning Integrated Demonstration Strategy." The document outlines an approach to providing new and improved technology that will allow decontamination and decommissioning of DOE shutdown facilities to be performed faster, safer, better, and cheaper than using currently available technology.

DATES: Written comments on this document will be accepted by mail or by facsimile transmission to the address or telephone numbers given below until May 15, 1992.

ADDRESSES: Copies of this document are available from R. D. Bundy or J. M. Kennerly, Martin Marietta Energy Systems, Inc., P.O. Box 2003, Oak Ridge, Tennessee 37831–7387 (Telephone (615) 576–0192 or (615) 574–9935, Facsimile (615) 576–7702 or (615) 574–9538).

Dated: March 9, 1992.

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

[FR Doc. 92–6294 Filed 3–17–92; 8:45 am]

BILLING CODE 6450–01–M

Floodplain/Wetland Involvement Notification for the Standley Lake Diversion Near the Department of Energy's Rocky Flats Plant at Golden, CO

AGENCY: U.S. Department of Energy (DOE).

ACTION: Notice of floodplain/wetland involvement.

SUMMARY: Regulations at 10 CFR part 1022 require DOE to evaluate actions it may take in a floodplain/wetland, in order to ensure consideration of protection of the floodplain/wetland in decisionmaking. After a determination that a floodplain/wetland may be involved, the regulations require that public notice be published in the **Federal Register**, including a description of the proposed action and its location. DOE, through a grant to the City of Westminster, Colorado, and other nearby municipalities, proposes to construct a water diversion project immediately east of the Rocky Flats Plant (RFP) and approximately 16 miles northwest of Denver. The project could have impacts on 100-year floodplains and/or wetlands.

DATES: Comments on the proposed action must be received by April 2, 1992.

ADDRESSES: All Comments concerning this notice should be addressed to Floodplain/Wetland Comments, Beth Brainard, Public Affairs Office, U.S. Department of Energy, Rocky Flats Office, Post Office Box 928, Golden, Colorado 80402–0928; Telephone: (303) 966–5993.

FOR FURTHER INFORMATION CONTACT: Information on floodplain/wetland environmental review requirements is available from Carol M. Borgstrom, Director, Office of NEPA Oversight, U.S

Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585; Telephone: (202) 586–4600 or (800) 472–2756.

SUPPLEMENTARY INFORMATION: DOE, through a grant to the City of Westminster, Colorado, and other nearby municipalities, proposes to construct a water diversion project immediately east of the Rocky Flats Plant (RFP) and approximately 16 miles northwest of Denver. The project could have impacts on 100-year floodplains and/or wetlands. The project is intended to provide protection for Standley Lake, a drinking water supply reservoir immediately downstream of RFP and serving approximately 180,000 people, from accidental releases of contaminants for RFP. Protection would be provided in the form of a diversion canal that would route flows from Woman Creek (which drains a portion of RFP and flows directly to Standley Lake) around Standley Lake, returning these flows directly to Big Dry Creek downstream of the reservoir. Surface waters downstream of the reservoir are not used for drinking water supplies.

The diversion canal would have a total length of aproximately 15,000 feet, extending in an easterly/southeasterly direction from a point on Woman Creek between Indiana and Alkire Streets (immediately east of RFP), around the north side of Standley Lake near 100th Avenue, and emptying into Big Dry Creek immediately below the dam at Standley Lake. The first 10,500 feet would be an earth-lined channel with a maximum capacity of 1,500 cubic feet per second, conforming to local flood control district limitations. Along this portion of the canal, concrete drop structures would be installed to maintain the overall gentle longitudinal slope and minimize the depth of the required cut. The canal would run underground in box culverts in two locations, one beneath Alkire Street north of the Church Ditch, and one beneath the Church Ditch at a location southwest of 100th Avenue and Simms Street. At a point sourtheast of Simms Street and 100th Avenue, the slope of the last 4,500 feet of the canal would increase to 2.9 percent, and the channel would join the dam spillway. This portion of the channel would be concrete lined.

Also associated with this project are an upstream diversion pond and a downstream energy dissipation pond. The purpose of the upstream diversion pond would be to regulate runoff from Woman Creek into the diversion canal. The pond would be impounded by an earthen embankment less than 10 feet high and would have a surface area of approximately 10 acres. Storage of 20 to 40 acre-feet would be provided.

The downstream energy dissipation pond would provide a controlled hydraulic transition for high-velocity waters transmitted through the concrete-lined spillway. The pond would be constucted immediately off-channel of Big Dry Creek below the Standley Lake Dam. The downstream pond would provide 30 to 60 acre-feet of storage capacity.

The project would be designed to intercept and divert Woman Creek flows on a regular basis upstream of Standley Lake and dewater the reach of Woman Creek between the upstream pond and Standley Lake. There is the potential that the upstream pond would inundate some wetlands and a section of the narrow band of wetlands, extending northwest of the Mandalay Reservoir along the Mandalay-Kettner Ditch also may be affected by the canal.

It is expected that the upstream pond would lie within the 100-year floodplain for Woman Creek. On Big Dry Creek, the downstream energy dissipation pond would be constructed within the 100-year floodplain. An environmental assessment is being prepared for this project and contains detailed project descriptions and further discussions of potential project impacts. The environmental assessment is available from the U.S. Department of Energy, Rocky Flats Office (see **ADDRESSES**, above).

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

BILLING CODE 6450–01–M

Financial Assistance; Surface Combusted, Inc.

AGENCY: U.S. Department of Energy (DOE).

ACTION: Notice of award intent.

SUMMARY: The U.S. Department of Energy's Idaho Field Office announces that pursuant to the DOE Financial Assistance Rules 10 CFR 600.7, it intends to award a Cooperative Agreement Number DE–FC07–92ID13173 to Surface Combustion, Inc. The objective of the work to be performed under this project is to develop an acoustic temperature measurement system of determing temperatures of work pieces as they are heated.

FOR FURTHER INFORMATION CONTACT: Dallas L. Hoffer, U.S. Department of Energy, Idaho Field Office, 785 DOE Place, MS 1221, Idaho Falls, Idaho 83401–1562, 208–526–0014.

SUPPLEMENTARY INFORMATION: The statutory authority for the research is Public Law 92–577, Federal Non-Nuclear Energy Research and Development Act of 1974 and Public Law 93–348, Energy Reorganization Act of 1974. The proposal meets the criteria for "non-competitive financial assistance," as set forth in 10 CFR 600.7(b)(2). The anticipated total project period to be awarded is 3 years. The estimated total award value is $440,000. The estimated Surface Combustion cost share is estimated to be 115,000 or 26%.

Contact: Dallas L. Hoffer, Contract Specialist (208) 526–0014, U.S. Department of Energy, Idaho Field Office, 785 DOE Place, MS 1221, Idaho Falls, Idaho 83401–1562.

Dated: March 5, 1992.

Dolores J. Ferri,

Director, Contracts Management Division.

BILLING CODE 6450–01–M

FEDERAL MARITIME COMMISSION

L.A. Cruise Ship, Terminals, Inc., et al. Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200631.

Title: L.A. Cruise Ship Terminals, Inc./Crystal Cruises, Inc. Terminal Agreement.

Parties:

L.A. Cruise Ship Terminals, Inc.
Crystal Cruises, Inc.

Synopsis: The agreement provides for the use by Crystal Cruises, Inc. of terminal facilities and services provided by L.A. Cruise Ship Terminals, Inc. in the Port of Los Angeles.

Agreement No.: 202–011284–019.

Title: Equipment Interchange Discussion Agreement.

Parties:

American President Lines, Ltd.
A.P. Moller-Maersk Line
Compagnie Generale Maritime
Crowley Maritime Corporation
Hapag-Lloyd Aktien-gesellschaft
Hyundai Merchant Marine Co., Ltd.
Kawasaki Kisen Kaisha, Ltd.
Mitsui O.S.K. Lines Ltd.
Nedlloyd Lijnen B.V.
Neptune Orient Lines, Ltd.
Nippon Yusen Kaisha Line
Orient Overseas Container Line, Inc.
Orient Overseas Container Line, (UK) Ltd.
P & O Containers Limited
Sea-Land Service, Inc.

Synopsis: The proposed amendment would clarify the requirements on votes taken by telex, telephone, and telefax polls conducted under the Agreement.

Agreement No.: 202–011346–002.

Title: Israel Trade Conference Agreement.

Parties:

Farrell Lines, Inc.
Lykes Bros. Steamship Company Company, Inc.
Zim Israel Navigation Co., Ltd.

Synopsis: The proposed amendment would revise Article 5.4 of the Agreement Authority to permit the parties to discuss and agree upon any open tariff rate, rule or regulation. Adherence to any such agreement is voluntary.

Dated: March 12, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Ocean Freight Forwarder License Revocations

Notice is hereby given that the following ocean freight forwarder licenses have been revoked by the Federal Maritime Commission pursuant to section 19 of the Shipping Act of 1984 (46 U.S.C. app. 1718) and the regulations of the Commission pertaining to the licensing of ocean freight forwarders, 46 CFR 510.

License Number: 3274.
Name: Product Transportation Group, Inc.
Address: 370 Adams Street, Newark, N.J. 07114.
Date Revoked: February 7, 1992.
Reason: Failed to furnish a valid surety bond.

License Number: 1062.
Name: Horizon Forwarders, Inc.
Address: 19 Virginia Ave., Long Beach, NY 11561
Date Revoked: February 21, 1992.
Reason: Surrendered license voluntarily.

License Number: 736.
Name: Dunlap, Alpers & Mott, Inc.
Address: 27 Park Place, suite 308, New York, NY 10007.
Date Revoked: March 2, 1992.
Reason: Surrendered license voluntarily.

Bryant L. VanBrakle,

Director, Bureau of Tariffs, Certification and Licensing.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Calvin W. Clark; Change in Bank Control Notice; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notice is available for immediate inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for the notice or to the offices of the Board of Governors. Comments must be received not later than April 13, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Calvin W. Clark, Pine City, Minnesota; to acquire 17.82 percent of the voting shares of Pine City Bancorporation, Inc., Pine City, Minnesota, and thereby indirectly acquire Pine City State Bank, Pine City, Minnesota.

Board of Governors of the Federal Reserve System, March 12, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 92-6237 Filed 3-17-92; 8:45 am]

BILLING CODE 6210-01-F

Community First Bankshares, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 13, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Community First Bankshares, Inc., Fargo, North Dakota; to acquire Community Insurance, Inc., Fargo, North Dakota, and thereby engage in general insurance agency activities in communities with populations of less than 5,000 pursuant to § 225.25(b)(8)(iii)(A) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 12, 1992.

National Cancer Institute; Meeting; Biometry and Epidemiology Contract Review Committee

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Biometry and Epidemiology Contract Review Committee, National Cancer Institute, National Institutes of Health, April 20-21, 1992, Executive Plaza North, Conference Room H, 6130 Executive Boulevard, Rockville, Maryland 20892.

This meeting will be open to the public on April 20 from 9 a.m. to 10 a.m. to discuss administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and sec. 10(d) of Public Law 92-463, the meeting will be closed to the public on April 20 from 10 a.m. to recess and April 21 from 9 a.m. to adjournment for the review, discussion, and evaluation of individual contract proposals. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Committee Management Office, National Cancer Institute, Building 31, room 10A06, National Institutes of Health, Bethesda, Maryland 20892, Tel. 301/496-5708, will provide a summary of the meeting and a roster of committee members upon request. Dr. Harvey P. Stein, Scientific Review Administrator, Biometry and Epidemiology Contract Review Committee, 5333 Westbard Avenue, room 807, Bethesda, Maryland 20892, telephone 301/496-7030, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Numbers: 93.393, Cancer Cause and Prevention Research; 93.394, Cancer Detection and Diagnosis Research; 93.395, Cancer Treatment Research; 93.396, Cancer Biology Research; 93.397, Cancer Centers Support; 93.398, Cancer Research Manpower; 93.399, Cancer Control.)

Dated: March 4, 1992.

Susan K. Feldman,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-92-3361; FR-3193-N-03]

HOPE for Homeownership of Multifamily Units Program; Notice of Set-Asids

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of set-aside for fiscal year 1992 funding.

SUMMARY: This notice announces a set-aside for grants to be awarded to mutual housing associations out of the $95 milion appropriated in fiscal year (FY) 1992 for grants under the HOPE for Homeownership of Multifamily Units (HOPE 2) program. This set-aside will be available to applications submitted by mutual housing associations to HUD by April 17, 1992, the date announced for receipt of applications in the Notice of Fund Availability published in the **Federal Register** on January 14, 1992. This Notice also announces the Department's intent to enter into a contract with the National Center for Tenant Ownership for technical assistance to low-income tenant organizations working toward homeownership.

DATES: Applications continue to be due by close of business in the appropriate HUD Field Office. See the January 14 NOFA for complete details on submission of applications.

FOR FURTHER INFORMATION CONTACT: Margaret Milner, Office of Resident Initiatives, Department of Housing and Urban Development, room 6130, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708-4542. To provide service for persons who are hearing- or speech-impaired, this number may be reached via TDD by dialing the Federal Information Relay Service on 800-877-TDDY, 800-877-8339, or 202-708-9300. (Telephone numbers, other than "800" TDD numbers, are not toll-free.)

SUPPLEMENTARY INFORMATION: The HOPE for Homeownership of Multifamily Units program (HOPE 2) was authorized by title IV of the National Affordable Housing Act (Pub. L. 101-625, approved Nov. 28, 1990) (the Act). (HOPE is an acronym for Homeownership and Opportunity for People Everywhere.) The Act also authorized HOPE for Public and Indian Housing Homeownership (HOPE 1) and HOPE for Homeownership of Single Family Homes (HOPE 3). The purpose of the HOPE grants programs is to provide homeownership opportunities for low-income families and individuals.

On January 14, 1992, the Department published a Notice of Fund Availability for the HOPE 2 program in the **Federal Register** (57 FR 1585) announcing the competition for $95 million appropriated by the Department of Veterans Affairs and Housing and Urban Development and Independent Agencies Appropriations Act for fiscal year 1992 (Pub. L. 102-139, approved October 28, 1991) for grants as follows:

- Up to $15 million for mini planning grants and full planning grants; and
- $80 million for implementation grants.

During the passage of the appropriations act, Congress made two recommendations for set-asides of funds appropriated for HOPE 2. The first recommendation, contained in the Conference report accompanying HR 2519, called for an allocation of $3 million to the National Center for Tenant Ownership in affiliation with the Harrison Institute at the Georgetown University Law Center, to provide technical assistance for low-income tenant organizations working toward homeownership. The second recommendation was in the Senate Committee report, and directed the Department to contract with the Neighborhood Reinvestment Corporation to award $10 million in HOPE 2 funds to grant applications for mutual housing.

After considering the congressional recommendations, the Department has determined to contract with the National Center for Tenant Ownership to provide technical assistance to develop low-income tenant homeownership. The $3 million amount will be provided from the $15 million allocated for mini and full planning grants in the January 14, 1992 NOFA.

Further, the Department has determined that it will award up to $10 million to HOPE 2 applicants that are mutual housing associations. This Notice announces the procedure by which the mutual housing set-aside will be awarded.

All applications for HOPE 2 grants that are received by close of business on April 17, 1992 will be reviewed and, if they meet the requirements of the program guidelines, will be rated and

ranked in a national competition, using procedures outlined in the NOFA and described in detail in the Notice of Amended Program Guidelines that was published simultaneously (57 FR 1558).

The NOFA and Notice announced that the geographic diversity required by the HOPE 2 authorizing statue would be assured by selecting the highest-ranked approvable implementation grant application and the three highest-ranked approvable planning grant applications in each of the ten HUD regions. This procedure will be retained. Following this regional selection process, HUD will review the applications recommended for selection in each of the regions to identify those that were submitted by mutual housing associations. The amount of funding requested by these mutual housing association applications will be counted against the set-aside for the mutual housing associations. HUD will then review the total universe of remaining approvable applications on a national basis and will compare the proportion of approvable mutual housing association applications to the total universe of approvable applications. Based on that analysis, HUD will determine the total amount to be provided under the set-aside and will select additional mutual housing applications to be funded in national rank order until all the set-aside funds have been awarded or all approvable applications for the mutual housing associations have been selected, whichever comes first. The total amount of funds to be used for mutual housing associations will not exceed $10 million. All funds not used for this purpose will be available for funding the remaining approvable HOPE 2 applications.

Dated: March 12, 1992.

Alfred A. DelliBovi,

Deputy Secretary.

[FR Doc. 92-6347 Filed 3-17-92; 8:45 am]

BILLING CODE 4210-32-M

[Docket No. D-92-981; FR-3266]

Review of Determination, Orders and Interlocutory Rulings of Hearing Officers; Designation

AGENCY: Office of the Secretary, Department of Housing and Urban Development.

ACTION: Designation.

SUMMARY: This designation grants Shelley A. Longmuir, Counselor to the Secretary, the power and authority of the Secretary to review determinations, orders and interlocutory rulings of hearing officers in certain proceedings of the Department of Housing and Urban Development.

EFFECTIVE DATE: February 19, 1992.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Markison, Assistant General Counsel of Administrative Law, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410, telephone (202) 708-3137. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Subpart G of 24 CFR part 26 permits parties to request review of determinations, orders and interlocutory rulings by hearing officers concerning administrative sanction hearings for government debarments and suspensions pursuant to 24 CFR part 24, hearings with respect to administrative actions taken by the Mortgagee Review Board pursuant to 24 CFR part 25, hearings with respect to determinations by the Multifamily Participation Review Committee pursuant to 24 CFR part 200, subpart H, as well as to any other case where a hearing is required by statute or regulation, to the extent that rules pertaining to Secretarial review adopted under such statute or regulation are not inconsistent with 24 CFR part 26.

Under subpart G of 24 CFR part 26, the Secretary may name a designee to grant or deny a petition for review of a determination or order, to grant or deny a petition for review of an uncertified interlocutory ruling, to review a certified interlocutory ruling, to require further briefs from opposing parties with respect to a petition for review of a determination or order, to issue a written determination and to serve it upon the parties and the hearing officer, and to interrupt a proceeding pending the determination of an interlocutory appeal.

This designation provides that Shelley A. Longmuir, Counselor to the Secretary, shall be the Secretary's designee with respect to subpart G of 24 CFR part 26 and shall have all the power and authority to the Secretary under this Subpart.

Section A. Designation

Shelley A. Longmuir, Counselor to the Secretary, is hereby designated to exercise all power and authority of the Secretary of Housing and Urban Development under 24 CFR part 26, subpart G.

Section B. No Further Designation

The power and authority granted to Shelley A. Longmuir, Counselor to the Secretary, may not be redelegated or granted to another designee pursuant to this designation.

Authority: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: Februry 19, 1992.

Jack Kemp,

Secretary.

BILLING CODE 4210-32-M

Office of Administration

[Docket No. N-92-3414]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Jennifer Main, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708-0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: March 10, 1882.

John T. Murphy,

Director, Information Resources Management Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Emergency Shelter Grants Program (FR-3005).

Office: Community Planning and Development.

Description of the Need for the Information and Its Proposed Use: This program provides formula grants to cities, counties, States, and territories (and competitive grants to Indian Tribes) for the following eligible activities relating to emergency shelter for the homeless. Eligible activities include rehabilitation, essential social services, operating costs and homeless prevention. The information collected will be used to ensure grantees comply with the program's statutory and regulatory requirements.

Form Number: SF-424, SF-269, HUD-7015.15, and certifications.

Respondents: Individuals or Household, State or Local Governments and Non-Profit Institutions.

Frequency of Submission: Annually and Other (initial and final application).

Reporting Burden:

	No. of respondents	×	Frequency of response	×	Hours per response	=	Burden hours

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NW-050-92-4333-12]

Proposed Camping Restrictions for Certain Public Lands; Las Vegas District, Nevada

SUMMARY: The proposed restriction is necessary for the management of actions, activities, and public use on certain public lands within the Las Vegas District. Within the affected lands, all camping is prohibited except pursuant to the terms and conditions of a permit. Permits are available from the Bureau of Land Management, Las Vegas District Office, 4765 Vegas Drive, Las Vegas, Nevada, 89106.

Camping is defined as: The erecting of a tent or shelter of natural or synthetic material, preparing a sleeping bag or other bedding material for use, or parking of a motor vehicle, motor home, or trailer for the apparent purpose of overnight occupancy.

The affected lands are located in the following areas:

Mount Diablo Meridian, Nevada

T. 16 S., R. 53 E., secs. 1 through 18 inclusive

T. 15 S., R. 53 E.,
Sec. 1, SE¼; sec. 12, E½; sec. 13, E½; sec. 24, E½; sec. 25, E½; sec. 35, S½S½; sec. 36, E½, S½SW¼.

T. 15 S., R. 54 E.,
Sec. 4, SW¼; sec. 5, S½; sec. 6, S½; secs. 7-8 inclusive; sec. 9, W½; sec. 16, W½; secs. 17-20 inclusive; sec. 21, W½; sec. 28, W½; secs. 29-32; sec. 33, W½.

T. 16 S., R. 54 E.,
Secs. 5 through 8 inclusive; secs. 17 and 18.

T. 16 S., R. 55 E.,
Sec. 1, S½; sec. 2, S½; sec. 3, S½; sec. 4, S½; sec. 5, S½; sec. 6, S½; secs. 7 through 18 inclusive; all lands located witin the Las Vegas Valley Subunit whose boundaries are defined in the Clark County Management Framework Plan and all public lands within the following legal descriptions:

T. 20 S., R. 63 E.,
Secs. 13, 24, 25;

T. 21 S., R. 63 E.,
Secs. 25, 36;

T. 22 S., R. 63 E.,
Secs. 1, 12, 13, 24, 25, 36;

T. 22 S., R. 63½ E.,
Secs. 1, 12, 13, 24, 25, 36;

T. 23 S., R. 63½ E.,
Sec. 1.

T. 20 S., R. 64 E.,
Secs. 19, 20, 29, 30.

DATES: Comments must be submitted on or before April 17, 1992.

ADDRESSES: Interested parties may submit comments on this proposed camping restriction to Ben F. Collins, District Manager, Las Vegas District Office, 4765 W. Vegas Drive, P.O. Box 26569, Las Vegas, Nevada, 89126.

FOR FURTHER INFORMATION CONTACT: Runore Wycoff, Bureau of Land Management, Las Vegas District Office, P.O. Box 26569, Las Vegas, Nevada 89126, Telephone: 702-647-5000.

SUPPLEMENTARY INFORMATION: This camping restriction is consistent with BLM policy and is established to assist BLM in reducing the incidence of occupancy trespass under the guise of camping on public lands within the Las Vegas District.

Authority for a camping closure is contained in Title 43 CFR, subpart 8364.1. Violation of this camping closure is punishable by a fine not to exceed $100,000.00 ($200,000.00 if the violator is an organization), imprisonment not to exceed 12 months, or both, as provided for under the Federal Land Policy Management Act (Public Law 94-579) as amended at 18 U.S.C. 3571(b)(5).

Dated: March 9, 1992.

Ben F. Collins,

(District Manager, Las Vegas, NV).

BILLING CODE 4310-HC-M

National Park Service

Civil War Sites Advisory Commission; Meetings

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting of the Civil War Sites Advisory Commission.

Notice is hereby given in accordance with the Federal Advisory Committee Act, 5 U.S.C. Appendix (1988), that a meeting of the Civil War Sites Advisory Commission will be held on March 30, 1992, at the Department of the Interior, 18th & C Streets, NW., Washington, DC; in room 8068.

The meeting will begin at 9 a.m. and conclude not later than 4 p.m.

This meeting constitutes the sixth meeting of the Commission. The meeting will focus primarily on discussion of specialized subjects as they relate to preserving and protecting Civil War sites.

Space and facilities to accommodate members of the public may be limited and persons will be accommodated on a

first-come, first-served basis. Anyone may file with the Commission a written statement concerning matters to be discussed.

Persons wishing further information concerning the meeting, such as the specific location of the meeting, or who wish to submit written statements, may contact Ms. Jan Townsend, Interagency Resources Division, P.O. Box 37127, Washington, DC 20013–7127 (telephone 202–343–9549). Draft summary minutes of the meeting will available for public inspection about 8 weeks after the meeting, in room 6111, 1100 L Street, NW., Washington, DC.

Dated: March 11, 1992.

Janet E. Townsend,

Program Manager, Civil War Sites Advisory Commission.

BILLING CODE 4310–70–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 701–TA–308 (Final)]

Bulk Ibuprofen From India

AGENCY: United States International Trade Commission.

ACTION: Termination of investigation.

SUMMARY: On March 4, 1992, the Commission received a letter from counsel for the petitioner (Ethyl Corporation) withdrawing its petition in the subject investigation, a final investigation instituted by the Commission effective on December 23, 1991, following an affirmative preliminary countervailing duty determination by the Department of Commerce (57 FR 693, January 8, 1992). Pursuant to 19 U.S.C. 1671c(a) and § 207.40(a) of the Commission's Rules of Practice and Procedure (19 CFR 207.40(a)), the countervailing duty investigation concerning Bulk Ibuprofen from India (Investigation No. 701–TA–308 (Final)) is terminated.

EFFECTIVE DATE: March 11, 1992.

FOR FURTHER INFORMATION CONTACT: Diane J. Mazur (202–205–3184), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

Authority: This investigation is being terminated under authority of section 704(a) of the Tariff Act of 1930. This notice is published pursuant to § 207.40 of the Commission's rules (19 CFR 207.40).

Issued: March 12, 1992.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[Investigation No. 332–320]

Macadamia Nuts: Economic and Competitive Factors Affecting the U.S. Industry

AGENCY: United States International Trade Commission.

ACTION: Scheduling of public hearings.

SUMMARY: Notice is hereby given that the Commission has scheduled two public hearings in connection with this investigation: in Kailua-Kona, Hawaii, at King Kamehameha's Kona Beach Hotel, 75–5660 Palani Road, beginning at 8:30 a.m. on Wednesday, April 22, 1992; and in Washington, DC at the International Trade Commission Building, 500 E Street SW., Washington, DC 20436, beginning at 9:30 a.m. on Tuesday, May 12, 1992. Requests to appear at the public hearing in Kona should be filed with the Secretary, United States International Trade Commission, 500 E Street SW., Washington, DC. 20436, no later than 5:15 p.m. (Eastern Daylight Time) April 8, 1992. Persons testifying at the hearing are encouraged to file prehearing briefs or statements; the deadline for filing such briefs or statements (a signed original and 14 copies) is April 10, 1992; the deadline for filing posthearing briefs or statements is May 29, 1992. Requests to appear at the public hearing in Washington, DC should be filed with the Secretary, United States International Trade Commission, 500 E Street SW., Washington, DC 20436, no later than 5:15 p.m. (Eastern Daylight Time) April 28, 1992. The deadline for filing prehearing briefs or statements (a signed original and 14 copies) is May 1, 1992; and the deadline for filing posthearing briefs or statements is May 29, 1992.

Any confidential business information included in such briefs or statements or to be submitted at the hearing must be submitted in accordance with the procedures set forth in § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6).

All persons having an interest in this matter have the right to appear at the hearing either in person or through counsel, to present information and to be heard. Persons testifying at one hearing need not attend or testify at the other hearing.

Notice of the investigation and of the fact that a public hearing would be held in Washington was published in the **Federal Register** of January 8, 1992 (57 FR 694).

EFFECTIVE DATE: March 10, 1992.

FOR FURTHER INFORMATION CONTACT: Edward Carroll (202–205–1819), Office of Public Affairs, or Stephen Burket (202–205–3318) or David Ingersoll (202–205–3309) Agriculture Division, Office of Industries, U.S. International Trade Commission. Hearing-impaired persons may obtain information on this study by contacting the Commission's TDD terminal on 202–205–2648.

Issued: March 11, 1992.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 731–TA–514 (Final)]

Shop Towels From Bangladesh

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act), that an industry in the United States is materially injured by reason of imports from Bangladesh of shop towels,[3] provided for in subheading 6307.10.20 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] Vice Chairman Brunsdale and Commissioner Crawford dissenting. Commissioner Watson not participating.

Background

The Commission instituted this investigation effective September 12, 1991, following a preliminary determination by the Department of Commerce that imports of shop towels from Bangladesh were being sold at LTFV within the meaning of section 733(b) of the act (19 U.S.C. 1673b(b)). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 9, 1991 (56 FR 50926). The hearing was held in Washington, DC, on January 30, 1992, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on March 11, 1992. The views of the Commission are contained in USITC Publication 2487 (March 1992), entitled "Shop Towels from Bangladesh: Determination of the Commission in Investigation No. 731–TA–514 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

Issued: March 12, 1992.

By Order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Docket No. 332–323]

Probable Economic Effect of Certain Modifications to the Interpretation and Rules of Origin Applicable to the United States-Canada Free-Trade Agreement

AGENCY: United States International Trade Commission.

ACTION: Institution of investigation.

[3] Shop towels are absorbent industrial wiping cloths made from a loosely woven fabric. The fabric may be either 100 percent cotton or a blend of materials.

EFFECTIVE DATE: March 9, 1992.

FOR FURTHER INFORMATION CONTACT: Lawrence A. DiRicco (telephone 202–205–2606) or Janis L. Summers (202–205–2605) in the Office of Tariff Affairs and Trade Agreements, U.S. International Trade Commission, Washington, DC 20436.

SUPPLEMENTARY INFORMATION:

Following receipt of a letter from the Office of the United States Trade Representative (USTR) on February 4, 1992, the Commission instituted investigation No. 332–323, Probable Economic Effects of Certain Modifications to the Interpretation and Rules of Origin Applicable to the United States-Canada Free-Trade Agreement, under section 332(g) of the Tariff Act of 1930. USTR has requested that the Commission's report of the results of this investigation be transmitted to it by June 4, 1992.

As requested by USTR, the Commission will provide advice on the probable economic effect of certain modifications to the interpretive guidelines and rules of origin contained in Annex 301.2 to chapter 3 of the United States-Canada Free-Trade Agreement. Under section 202 of the United States-Canada Free-Trade Agreement Implementation Act of 1988 (CFTA Implementation Act), the President is authorized, after compliance with the provisions of section 103 of that Act, to proclaim modifications to the "Rules" provided for in Annex 301.2. Changes to the "Interpretation" section of Annex 301.2 require conforming amendments to section 202 of the CFTA Implementation Act, which cannot be accomplished by Presidential proclamation.

The amendments and modifications, which have been provisionally agreed to by both countries, are set out below.

1. Proposed modifications to the Interpretation section of Annex 301.2:

A. The following text is to be added as paragraph 2.1:

> 2.1 Further, whenever goods are produced or assembled in the territory of either Party or both Parties exclusively from materials that originate in the territory of either Party or both Parties pursuant to this Agreement, such goods shall be treated as originating and shall not be subject to the changes in tariff classification described by the rules set forth in this Annex, provided that such processing or assembly occurs entirely within the territory of either Party or both Parties, and provided further that such goods have not subsequently undergone any processing or assembly outside the territories of the Parties that improves the goods in condition or advances them in value.

It is the Commission's understanding that proposed interpretative guideline 2.1 is intended to address explicitly the circumstance in which finished goods are assembled from originating components, some of which contain third-country materials and, further, to eliminate confusion as to the appropriate basis for claiming originating status on an exporter's certification.

B. The text of the existing paragraphs 3, 4, and 5 is deleted and replaced by the following:

> 3. Whenever the assembly of goods in the territory of a Party fails to result in a change of tariff classification because:
>
> (a) The goods were imported into the territory of the Party in unassembled or disassembled form and were classified as unassembled or disassembled goods pursuant to General Rule of Interpretation 2(a) of the Harmonized System, or
>
> (b) The tariff subheading for the goods provides for both the goods themselves and their parts, or the tariff heading for the goods provides for both the goods themselves and their parts and is not further subdivided into subheadings, the goods shall nevertheless be considered to have been transformed in the territory of a Party and be treated as originating in the territory of that Party, provided that the value of the materials originating in the territory of either Party or both Parties used or consumed in the production of the goods, plus the direct cost of assembling the goods in the territory of either Party or both Parties, constitute not less than 50 per cent of the value of the goods when exported to the territory of the other Party, and further provided that the goods have not, subsequent to assembly, undergone processing or further assembly in a third country and they meet the requirements of Article 302.
>
> 4. Deleted.
>
> 5. The provisions of paragraph 3 shall not apply to goods of Chapters 61–63 of the Harmonized System.

It is the Commission's understanding that the revisions to interpretive guidelines 3 through 5 are twofold. First, the scope of guideline 3(b) would be expanded to include those situations where an assembly operation fails to effect a change in tariff classification because a non-subdivided 4-digit tariff heading provides for both the goods themselves and their parts. Current guideline 3(b) applies only to the 6-digit subheading level and therefore excludes coverage of 4-digit headings that are not subdivided at the 6-digit level. Second, current guidelines 3 through 5 would be reorganized to better clarify their intent and to align them with administrative practices in the United States and Canada. With respect to guideline 5, chapters 61–63 cover wearing apparel, clothing accessories and other made-up textile articles.

C. The following text is to be added as paragraph 8:

8. Packaging materials and containers in which goods are packaged for retail sale and packing materials and containers in which goods are packed for shipment, and that meet the provisions of General Rule of Interpretation 5(b) of the Harmonized System shall be disregarded in determining the origin of the goods they contain, provided that the origin of the packaging materials and containers in which goods are packaged for retail sale shall not be disregarded for the purpose of determining the value of materials originating in the territory of either Party or both Parties.

It is the Commission's understanding that proposed interpretive guideline 8 is intended to provide specifically for the treatment of third-country packing used to ship goods that are wholly obtained or produced in the United States and/or Canada. At present, the agreement is silent on this question.

2. Proposed modifications to the Rules section of Annex 301.2:

A. The following text is to be added as new rule 1.1 after Rule 1 of Section XV (Section XV covers base metals and articles thereof):

1.1 A change from a parts subheading to a subheading other than a parts subheading; provided that the value of the materials originating in the territory of either Party or both Parties plus the direct cost of processing performed in the territory of either Party or both Parties constitute not less than 50 per cent of the value of the goods when exported to the territory of the other Party.

It is the Commission's understanding that the addition of rule 1.1 is being proposed in order to align the rules governing the treatment of goods of Section XV with those of Sections XVI to XX.

B. Delete the current Rule 10 of Section XV and replace with the following:

10. A change to headings of 7309–7311, 7313–7314, 7316, 7319 or 7321–7326 from any heading other than any of those headings.

Note—current Rule 10 reads as follows:

10. A change to headings of 7309–7326 from any heading outside that group.

It is the Commission's understanding that the proposed modification of rule 10 of Section XV is intended to permit the goods of headings 7309–7311, 7313–7314, 7316, 7319, or 7321–7326 to qualify as originating articles even if they contain third-country iron or steel articles of headings 7312 (stranded wire, ropes and cables), 7315 (chain and parts thereof), 7317 (nails, tacks, and similar articles), 7318 (screws, bolts, nuts, washers, and similar articles) or 7320 (springs). In addition, the Commission was specifically requested, with respect to the modifications to Section XV of the Rules, to analyze the effects of the changes affecting heading 7321 if made retroactive to January 1, 1992. Heading 7321 covers stoves, ranges, grates, cookers, barbecues and similar nonelectric domestic appliances and parts thereof, of iron or steel.

C. Delete the current rule 3 of Section XVI and replace with the following:

3. A change to heading 8407 or 8408 from any other heading; provided that the value of materials originating in the territory of either Party or both Parties plus the direct cost of processing performed in either Party or both Parties constitute not less than 50 percent of the value of the goods when exported to the territory of the other Party.

It is the Commission's understanding that the proposed modification of rule 3 to Section XVI is intended to correct an oversight which excluded diesel or semi-diesel engines of heading 8408 from the rule. Current rule 3 applies only to spark-ignition reciprocating or rotary internal combustion engines included under heading 8407.

D. The following text is to be added as new rule 5.1 after rule 5 of Section XVI (Section XVI covers machinery, mechanical appliances, electrical equipment, and parts of all the foregoing; sound recorders and producers, television image and sound recorders and producers, and parts and accessories of such articles):

5.1 A change to subheading 8471.99 from subheading 8471.93.

Subheading 8471.93 covers storage units for automatic data processing equipment and subheading 8471.99 covers control or adapter units, power supplies and miscellaneous units for incorporation into automatic data processing equipment.

It is the Commission's understanding that proposed rule 5.1 to Section XVI is intended to address an anomaly under the current rules, whereby computer control units which contain a third-country disc drive are not eligible for CFTA treatment despite the fact that the disc drive constitutes only a small fraction of the value of the control unit and that the control unit, absent the disc drive, would otherwise be eligible for CFTA treatment.

WRITTEN SUBMISSIONS: Interested parties (including other Federal agencies) are invited to submit written statements concerning this investigation. Such statements must be submitted by no later than April 9, 1992, in order to be considered by the Commission. Commercial or financial information that a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. All submissions should be addressed to the Office of the Secretary, United States International Trade Commission, 500 E Street SW, Washington, DC 20436.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on 202–205–1810.

Issued: March 11, 1992.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 388 (Sub-No. 22)]

Intrastate Rail Rate Authority; New Mexico

AGENCY: Interstate Commerce Commission.

ACTION: Extension of provisional recertification.

SUMMARY: By decision served March 13, 1990, the Commission granted 180-day provisional recertification for New Mexico, through its State Corporation Commission, to regulate intrastate rail rates, practices, and procedures pending filing of its application for recertification pursuant to State Intrastate Rail Rate Authority, 5 I.C.C.2d 680 (1989). On September 13, 1990, March 18, 1991, and again on September 17, 1991, the Commission extended the provisional recertification for another 180 days. Pursuant to a request from the State, the Commission grants another extension so that New Mexico can complete modifications of its procedures and prepare an application for recertification.

DATES: New Mexico's provisional recertification is extended for 180 days from March 18, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660 (TDD for hearing impaired: (202) 927–5721).

Decided: March 11, 1992.

BILLING CODE 7035-01-M

[Finance Docket No. 31972]

Southern Electric Railroad Co.; Construction Exemption—Jefferson County, AL

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts under 49 U.S.C. 10505, from the prior approval requirements of 49 U.S.C. 10901, the construction by the Southern Electric Railroad Company of approximately one and one-half miles of track between Alabama Power Company's Plant Miller in Jefferson County, AL, and a main line of the Burlington Northern Railroad Company.

DATES: The exemption will not be effective until completion of the Commission's environmental review and a further decision. Petitions for reconsideration must be filed by April 7, 1992.

ADDRESSES: Send pleadings referring to Finance Docket No. 31972 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioner's representative: John R. Molm, Esq., Troutman Sanders, Lockerman and Ashmore, 1400 Candler Building, 127 Peachtree Street, NE., Atlanta, GA 30303.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660, (TDD for hearing impaired: (202) 927–5721)).

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 927–5721.)

Decided: March 10, 1999.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips and Emmett.

BILLING CODE 7035-01-M

[Docket No. AB-3 (Sub-no. 101X)]

Missouri Pacific Railroad Co.; Abandonment Exemption in Ellis and Hill Counties, TX

Applicant has filed a notice of exemption under 49 CFR 1152 subpart F—Exempt Abandonments to abandon its 18.23-mile line of railroad between milepost 813.10, near Italy and milepost 831.33, near Hillsboro, in Ellis and Hill Counties, TX.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under Oregon Short Line R. Co.—Abandonment—Goshen, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 17, 1992 (unless stayed). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2)[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by March 30, 1992.[3] Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by April 7, 1992, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Joseph D. Anthofer, Missouri Pacific Railroad Company, 1416 Dodge Street, room 830, Omaha, NE 68179.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

Applicant has filed an environmental report which addresses enviornmental or energy impacts, if any, from this abandonment.

The Section of Energy Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by March 23, 1992. Interested persons may obtain a copy of the EA from SEE by writing to it (room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 927–6248. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: March 10, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92-6279 Filed 3-17-92; 8:45 am]

BILLING CODE 7035-01-M

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines,* 5 I.C.C.2d 377 (1989). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.,* 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use statement as long as it retains jurisdiction to do so.

NATIONAL COMMISSION ON JUDICIAL DISCIPLINE AND REMOVAL

Meeting of Commission on Judicial

AGENCY: National Commission on Judicial Discipline and Removal.

ACTION: Public meeting.

SUMMARY: Notice is hereby given in the public interest and pursuant to the Federal Advisory Committee Act that a public meeting of the National Commission on Judicial Discipline and Removal will be held on March 27, 1992, in Washington, DC. The precise location of the meeting will be the Supreme Court of the United States, East Conference Room, 1 First Street, NE., Washington, DC 20543. The public entrance to the building is the North Entrance off of Maryland Avenue NE. The meeting will convenue at 9:30 a.m.

and will adjourn at approximately 4:30 p.m.

AUTHORITY: The meeting will be the second one for the National Commission, a body composed of thirteen members appointed by the Speaker of the House, the President *pro tem* of the Senate, the President, the Chief Justice of the United States and the Conference of Chief Justices. The National Commission, established by Public Law 101–650 (Title IV), is assigned three statutory duties. The first is to investigate and study the problems and issues involved in the tenure (including discipline and removal) of Article III (appointed to serve for life) Federal judges. The second is to evaluate the advisability of proposing alternatives to current arrangements with respect to such problems and issues, including alternatives for the discipline or removal of Federal judges that would require constitutional amendments. Finally, the Commission is required to prepare and submit a report to the Congress, the Chief Justice and the President setting forth a detailed statement of its findings and conclusions together with any recommendations for legislative and administrative actions as are considered appropriate. The Commission is not authorized to consider the factual underpinings of specific complaints against Federal judges.

Ordinarily the provisions of the Federal Advisory Committee Act are not applicable to legislative or judicial agencies. Nonetheless, since the Commission is composed of representatives of all three branches of the Federal Government, good faith attempts will be made to follow the spirit of the law. This good faith commitment to open meetings is incorporated in the Commission's By-laws.

STATUS: The meeting will be open to the public but will be closed to the public for approximately one hour (from 12:30 p.m. until 1:30 p.m.) for a lunch break. No official business will be conducted during that time-period.

MATTERS TO BE CONSIDERED: The Commission will focus its attention on a work plan to be accomplished during its statutory life. Discussion and debate will revolve around a tentative identification of information needs and research projects. In this regard, the Commission will discuss the holding of two days of public hearings in late April and May 1992.

Furthermore, the Commission will consider the recent grant by the Supreme Court of a petition for certiorari in the case a former Federal judge (Walter F. Nixon, Jr) who was impeached and removed from office in 1989. The Commission will anlyze the potential impact that the case might have on the Commssion's schedule and work plan.

Finally, the Commission will receive information from two national organizations—the Twentieth Century Fund and the American Judicature Society—about recently issued or pending studies and reports related to the subject of judicial discipline and accountability.

CONTACT PERSONS FOR FURTHER INFORMATION: Contact Michael J. Remington or Victoria Y. Smith at the National Commission of Judicial Discipline and Removal, suite 690, 2100 Pennsylvania Ave., NW., Washington, DC 20037–3202; (202) 254–8169.

SUPPLEMENTARY INFORMATION: Minutes of the meeting will be available for public inspection during regular working hours at the Commission offices approximately thirty working days following the meeting.

Michael J. Remington,

Director.

BILLING CODE 6820–DB–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Cooperative Agreement for Administration of an State Arts Agency AIE Coordinator Conference

AGENCY: National Endowment for the Arts.

ACTION: Notification of availability.

SUMMARY: The National Endowment for the Arts is requesting proposals leading to the award of a Cooperative Agreement to administer a conference of State Arts Agency Arts in Education coordinators, at the same time as the National Assembly of State Arts Agencies annual meeting in Chicago, IL in November 1992. The work will entail assisting with preparing the program and agenda, making conference arrangements, and conducting an evaluation of the conference and preparing recommendations for future conferences. Those interested in receiving the Solicitation package should reference Program Solicitation PS 92–04 in their written request and include two (2) self-addressed labels. Verbal requests for the Solicitation will not be honored.

DATES: Program Solicitation PS 92–04 is scheduled for release approximately March 31, 1992 with proposals due April 30, 1992.

ADDRESSES: Requests for the Solicitation should be addressed to the National Endowment for the Arts, Contracts Division, room 217, 1100 Pennsylvania Ave., NW., Washington, DC 20506.

William I. Hummel,

Director, Contracts and Procurement Division.

[FR Doc. 92–6250 Filed 3–17–92; 8:45 am]

BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–302]

Florida Power Corp.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–72 issued to Florida Power Corporation (FPC) for operation, and FPC, et al. for possession, of Crystal River Unit 3 Nuclear Generating Station, located in Crystal River, Florida.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would revise the operating license to delete Sebring Utilities Commission (Sebring) as a participating owner of CR–3 and as a licensee (possession only) under this license, in order to recognize the purchase of Sebring's 0.4473 percent ownership share by FPC. Presently, FPC owns 90% of CR–3, with portions of the remaining 10% owned by 11 municipalities and cooperatives, including Sebring. FPC alone is licensed to operate CR–3. FPC and Sebring have entered into an agreement under which FPC would purchase the 0.4473 percent share owned by Sebring, which would increase FPC's ownership share to 90.4473 percent. Ownership shares of the other 10 participants would not change. The proposed action is in accordance with the licensee's application dated August 16, 1991.

The Need for the Proposed Action

The proposed action is required to reflect the ownership change discussed above. The amendment reflecting the transfer of Sebring's possession-only interest in the license will have minimal impact on the operation of the facility by FPC. The transfer and amendment will not affect the facility's Technical Specifications, license conditions, or the organization and practices of FPC.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed license amendment and concludes that there will be no changes to CR–3 or the environment as a result of this action. The transfer of Sebring's possession-only interest in the license and the associated license amendment will not affect the numbers, qualifications, or organizational affiliation of the personnel who operate the facility, as FPC will remain the holder of the operating license and continue to be responsible for the operation of CR–3. Accordingly, the Commission concludes that this proposed action would result in no radiological or non-radiological environmental impact.

The Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination was published in the **Federal Register** on February 5, 1992 (57 FR 4487). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in no benefits to the public or the parties involved.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Crystal River Unit 3 Nuclear Generating Plant, issued in May, 1973.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons regarding this environmental assessment.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for the license amendment dated August 16, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the Coastal Region Library, 8619 W. Crystal Street, Crystal River, Florida 32029.

Dated at Rockville, Maryland, this 12th day of March 1992.

For the Nuclear Regulatory Commission.

Jan A. Norris,

Acting Director, Project Directorate II–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 92–6280 Filed 3–17–92; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards (ACRS) and Advisory Committee on Nuclear Waste (ACNW); Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittees and meetings of the ACRS full Committee, of the ACNW, and the ACNW Working Groups the following preliminary schedule is published to reflect the current situation, taking into account additional meetings that have been scheduled and meetings that have been postponed or cancelled since the last list of proposed meetings was published February 24, 1992 (57 FR 6337). Those meetings that are firmly scheduled have had, or will have, an individual notice published in the **Federal Register** approximately 15 days (or more) prior to the meeting. It is expected that sessions of ACRS and ACNW full Committee meetings designated by an asterisk (*) will be closed in whole or in part to the public. The ACRS and ACNW full Committee meetings begin at 8:30 a.m. and ACRS Subcommittee and ACNW Working Group meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during ACRS and ACNW full Committee meetings, and when ACRS Subcommittee and ACNW Working Group meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the April 1992 ACRS and ACNW full Committee meetings can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committees (telephone: 301/492–4600 (recording) or 301/492–7288, Attn: Barbara Jo White) between 7:30 a.m. and 4:15 p.m., Eastern Time.

ACRS Subcommittee Meetings

Thermal Hydraulic Phenomena

March 26, 1992, Bethesda, MD. The subcommittee will review the General Electric Company's (GE's) generic program supporting power level increases for operating GE Boiling Water Reactor nuclear power plants.

Planning and Procedures

March 27, 1992, Bethesda, MD. The Subcommittee will discuss proposed reassignment of responsibilities for review of NRC research activities to cognizant topical Subcommittees and preliminary plans to address ACRS assignments made during the meeting with NRC Commissioners on March 5, 1992. Qualifications of candidates nominated for appointment to the ACRS will also be discussed, as appropriate.

Plant Operations

April 1, 1992, Bethesda, MD. The Subcommittee will continue its review of the NRC staff's evaluation of risk from shutdown and low-power operations at U.S. commercial nuclear power plants as well as the associated activities of the nuclear industry.

Planning and Procedures

April 1, 1992, Bethesda, MED, 3 p.m.–5:30 p.m. The Subcommittee will discuss proposed ACRS activities and related matters. Qualifications of candidates nominated for appointment to the ACRS will also be discussed, as appropriate.

Joint Individual Plant Examinations/ Severe Accidents

April 21, 1992, Bethesda, MD. The Subcommittees will discuss the status of the Individual Plant Examination (IPE) program and the development of Severe Accident Management Guidelines.

Joint Computers in Nuclear Power Plant Operations/Instrumentation and Control Systems

May 5, 1992, Bethesda, MD. The Subcommittees will discuss digital instrumentation and control system designs and practices at foreign plants and the international computer activities.

Planning and Procedures

May 6, 1992, Bethesda, MD, 8 a.m.–12:00 Noon. The Subcommittee will discuss proposed ACRS activities and related matters.

Regional Programs

May 20 1992, NRC Region V Office, Walnut Creek, CA. The Subcommittee will discuss the activities of the NRC Region V Office.

Thermal Hydraulic Phenomena

Date to be determined (April/May), Bethesda, MD. The Subcommittee will continue its review of the NRC staff program to address the issue of interfacing systems LOCAs.

Severe Accidents

Date to be determined (April/May), Bethesda, MD. The Subcommittee will review the revision to NUREG–1365, Severe Accident Research Program Plan.

Joint Materials and Metallurgy/ Advanced Reactor Designs

Date to be determined (May), San Jose, CA. The Subcommittees will discuss the application of the high temperature structural materials in the Advanced Liquid-Metal Reactor (ALMR).

Advanced Pressurized Water Reactors

Date to be determined (May/June), Bethesda, MD. The subcommittee will continue its review of the ABB CE System 80+ Design Certification. Topics being proposed for discussion include Engineered Safety Feature Systems and incorporation of the requirements resulting from the resolution of USIs and GSIs into the System 80+ design.

Joint Thermal Hydraulic Phenomena/ Core Performance

Date to be determined (June/July, tentative), Bethesda, MD. The Subcommittees will continue the review of the issues pertaining to BWR core power stability.

Decay Heat Removal Systems

Date to be determined (July, tentative), Bethesda, MD. The Subcommittee will review the proposed final resolution of Generic Safety Issue 23, "Reactor Coolant Pump Seal Failures."

Thermal Hydraulic Phenomena

Date to be determined, Bethesda, MD. The Subcommittee will review the status of the application of the Code Scaling, Applicability, and Uncertainty (CSAU) Evaluation Methodology to a small-break LOCA calculation for a B&W plant.

ACRS Full Committee Meetings

384th ACRS Meeting

April 2–4, 1992, Bethesda, MD. Items are tentatively scheduled.

*A. GE Advanced Boiling Water Reactor

Discuss proposed ACRS report regarding the Draft Safety Evaluation Reports for this reactor plant design.

B. Policy Issues for the Certification of Advanced Nuclear Power Plants

Review and comment on technical policy issues identified by the NRC staff for advanced (LWR) nuclear power plants including evolutionary and passive designs. Representatives of the NRC staff and the nuclear industry will participate in this session, as appropriate.

C. Assessment of Risks from Lower Power and Shutdown Operations of Nuclear Power Plants

Review and comment on NRC evaluation of risks from shutdown/low-power operations of U.S. nuclear power plants (NUREG–1449). Representatives of the NRC staff and the nuclear industry will participate, as appropriate.

*D. Proposed Power Level Increase for Operating GE BWR Plants

Review and report on GE topical reports which justify a proposed power level increase for operating GE boiling water reactor plants. Representatives of the NRC staff and the GE Company will participate, as appropriate.

E. Update and Development of NRC Standard Review Plans

Briefing and discussion regarding the NRC staff's effort to revise and update its Standard Review Plan to accommodate the review of future plants. Representatives of the NRC staff will participate in this session, as appropriate.

F. Meeting with Director, NRC Office of Nuclear Reactor Regulation

Discuss items of mutal interest with the Director of the NRC Office of Nuclear Reactor Regulation. Members of his staff will participate, as appropriate.

G. Proposed Plan for Implementation of the NRC Safety Goal Policy

Discuss proposed ACRS report on an alternative plan to implement the NRC Safety Goal Policy.

H. Use of Probabilistic Risk Assessment in the Regulatory Process

Briefing and disucssion regarding the status of activities of the NRC inter-office working group to develop guidance on consistent and applicable methods to be applied in the use of probabilistic risk assessment. Representatives of the NRC staff will participate, as appropriate.

I. Special Review of NRC Regulations

Briefing and discussion regarding the scope and status of a special review to determine if NRC regulations can be eliminated or revised to reduce the regulatory burden without any reduction of the protection of public health and safety. Representatives of the NRC staff will participate.

J. ACRS Subcommittee Activities

Hear and discuss reports of cognizant Subcommittees regarding the status of assigned duties. This will include consideration of ASME risk-based inspection procedures and plans for ACRS activities to deal with matters requested by the Commission.

*K. Recent Operating Experience and Events

Briefing and discussion regarding recent operating transients and incidents at nuclear power plants and related facilities.

L. ACRS Future Activities

Discuss anticipated subcommittee activities and items proposed for consideration by the full Committee.

*M. Appointment of ACRS Members

Discuss qualifications of candidates nominated for appointment to the Committee.

N. Miscellaneous

Discuss topics related to the conduct of ACRS activities and specific issues that were not completed during previous meeting as time and availability of information permit.

385th ACRS Meeting

May 6 (1 p.m.), 7–9 (8:30 a.m.), 1992, Bethesda, MD—Agenda to be announced.

386th ACRS Meeting

June 4–6, 1992, Bethesda, MD—Agenda to be announted.

ACNW Full Committee and Working Group Meetings

42nd ACNW Meeting

April 23–24, 1992, Bethesda, MD. Items are tentatively scheduled.

A. Periodic meeting with NRC Commissioners to discuss topics of mutual interest.

B. Discussion of the Pathfinder Nuclear Power Plant decommissioning, including lessons learned and residual levels of contamination. Also, briefing and discussion regarding the status of decommissioning plans at Rancho Seco, Ft. St. Vrain, and Shoreham Nuclear Power Stations.

C. Review an Expedited rulemaking effort concerning on-site storage of low-level waste.

D Prepare the next four month plan of ACNW activities for the Commission's information.

E. Continue efforts to investigate the feasibility of a systems analysis approach to reviewing the overall high-level waste program.

F. Briefing on the adoption by EPA of a revised Hazard Ranking system for use in assessing the threat associated with the release or potential release of hazardous chemicals and/or radioactive materials into the environment.

G. Briefing on the NRC staff's review of the DOE reports on the Exploratory Studies Facility Alternatives Study.

H. Hear an update on the status of the low-level radioactive waste state compacts.

I. Briefing by Louisiana Energy Services on their private uranium enrichment facility plans.

J. Review a Technical Position on Alternate Concentration Limits for Uranium Mill Tailings Sites.

K. Discuss anticipated and proposed Committee activities, future meeting agenda, administrative, and organizational matters, as appropriate. Also, discuss matters and specific issues that were not completed during previous meetings as time and availability of information permit.

ACNW Working Group on the Impact of Long-Range Climate change in the Area of the Southern Basin and Range,

May 27, 1992, Bethesda, MD. The Working Group will discuss the historical evidence and the potential for climate changes in the Southern Basin and Range and the impact of climate changes on the performance of the proposed high-level waste repository at Yucca mountain.

43rd ACNW Meeting

May 28–29, 1992, Bethesda, MD—Agenda to be announced.

ACNW Working Group on Inadvertent Human Intrusion Related to the Presence of Natural Resources at a High-Level Site

July 29, 1992, Bethesda, MD. The Working Group will discuss methodologies for the assessment of the potential for natural resources at the proposed high-level waste repository site at Yucca Mountain. The relationship between such resources and the potential for human intrusion will be emphasized.

Dated: March 12, 1992.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 92–6261 Filed 3–17–92; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards; Subcommittee on Planning and Procedures; Meeting

The ACRS Subcommittee on Planning and Procedures will hold a meeting on April 1, 1992, room P–422, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance, with the exception of a portion that may be closed to discuss the qualifications of candidates nominated for appointment to the ACRS. This session will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy per 5 U.S.C. 552b(c)(6).

The agenda for the subject meeting shall be as follows:

Wednesday, April 1, 1992—3 p.m. Until 5:30 p.m.

The Subcommittee will discuss proposed ACRS activities and related matters. Qualifications of candidates nominated for consideration as ACRS members will also be discussed, as appropriate.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Official, Mr. Raymond F. Fraley (telephone 301/492–4516) between 7:30 a.m. and 4:15 p.m., EST. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: March 11, 1992.

Sam Duraiswamy,

Chief, Nuclear Reactors Branch.

[FR Doc. 92–6262 Filed 3–17–92; 8:45 am]

BILLING CODE 7590–01–M

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97–415, the Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. P.L. 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from February 24, 1992 through March 6, 1992. The last biweekly notice was published on March 4, 1992 (57 FR 7806).

Notice of Consideration of Issuance of Amendment To Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity For Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not

normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 17, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714 a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to **(Project Director)**: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room for the particular facility involved.

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529, and STN 50-530, Palo Verde Nuclear Generating Station, Unit Nos. 1, 2, and 3, Maricopa County, Arizona

Date of amendment requests: December 30, 1991

Description of amendment requests: This request changes the containment purge supply and exhaust valve ACTION statements to be consistent with other containment system action requirements. Specifically, the proposed ACTION statements will require PVNGS to be in HOT STANDBY, as the first stage of plant shutdown, in lieu of the existing requirement to be in HOT SHUTDOWN in six hours.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis about the issue of no significant hazards consideration, which is presented below:

Standard 1: Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed amendment does not affect the probability or consequences of an accident previously evaluated because the plant being in either HOT SHUTDOWN or HOT STANDBY, as the first stage of plant shutdown, has no impact on the assumptions made in the limiting accident analyses, Steam Line Break (15.1.5) and Large Break LOCA (15.6.5). The plant being at 0...[percent] power (HOT STANDBY) would result in no increase in the probability of occurrence of the events. *Standard 2:* Create the possibility of a new or different kind of accident from any accident previously evaluated.

The first stage of plant shutdown to comply with a LCO has no effect on the type of accident to which the plant could be exposed. Both HOT SHUTDOWN and HOT STANDBY are plant modes for which the facility has been analyzed; therefore, no new or different kind of accident from any previously evaluated will be created. 1*Standard 3:* Involve a significant reduction in a margin of safety.

The proposed change from HOT SHUTDOWN to HOT STANDBY as the first stage of plant shutdown for the ACTION statements for Specification 3.6.1.7 will increase the margin of safety by reducing the potential for accelerated plant cooldowns to HOT SHUTDOWN, consistent with the other PVNGS Containment System Action statements.

Therefore, the proposed change will not reduce the margin of safety.

The NRC staff has reviewed the licensees' analysis and, based on that review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Local Public Document Room location: Phoenix Public Library, 12 East McDowell Road, Phoenix, Arizona 85004

Attorney for licensees: Nancy C. Loftin, Esq., Corporate Secretary and Counsel, Arizona Public Service Company, P.O. Box 53999, Mail Station 9068, Phoenix, Arizona 85072-3999

NRC Project Director: Theodore R. Quay

Baltimore Gas and Electric Company, Docket No. 50-317, Calvert Cliffs Nuclear Power Plant, Unit No. 1, Calvert County, Maryland

Date of application for amendment: February 6, 1992

Brief description of amendment: The proposed amendment would revise the Technical Specifications (TS) for Unit 1 to provide new heatup and cooldown curves which allow operation beyond 12 effective full power years (EFPY). The Power Operated Relief Valve (PORV) setpoints have also been revised, and the Minimum Pressure and Temperature (MPT) enable temperature has been increased to 355 ° F to provide low temperature overpressure protection (LTOP) for an allowable fluence corresponding to approximately 22 EFPY based on the current core loading pattern. The temperature at which the high pressure safety injection (HPSI) pumps are placed under manual control during a reactor cooldown has been increased to 375 ° F due to the higher MPT temperature. To accommodate the lower 10 CFR Part 50, Appendix G, pressure limits associated with the new curves, the maximum allowed HPSI pump flow rate has been reduced from 210 gpm to 200 gpm when used to add mass to the Reactor Coolant System (RCS). The criterion for the reactor to be shutdown for 8 hours or longer before a reactor coolant pump (RCP) is started has been removed from the bases, since it is no longer required.

The initial indicated RCS pressure for starting an RCP has been increased to 300 psia. The Adjusted Reference Temperature (ART) for the 1/4 T and 3/4 T positions in the bases changed to 253.7 ° F and 193.8 ° F, respectively.

The proposed TS changes would specifically change the following:

1. Heatup and Cooldown Curves and Rates

a. Change TS Limiting Condition for Operation (LCO) 3.4.9.1.a, maximum allowable heatup rates and corresponding RCS temperatures as follows:

Maximum Allowable Heatup Rates	RCS Temperature
30 ° F in any hour period	70 ° F to 164 ° F
40 ° F in any hour period	164 ° F to 328 ° F
10 ° F in any hour period	328 ° F to 355 ° F
60 ° F in any hour period	355 ° F (greater than)

b. Change Technical Specification LCO 3.4.9.1.b, maximum allowable cooldown rates and corresponding RCS temperatures.

Maximum Allowable Cooldown Rates	RCS Temperature
100 ° F in any one hour period.	254 ° F (greater than)
20 ° F in any one hour period.	254 ° F to 184 ° F
10 ° F in any one hour period.	184 ° F (less than)

c. Replace TS Figures 3.4-2a and 3.4-2b, RCS Pressure-Temperature (P-T) Limits with new figures. The revised curves and rates are based on a fluence of 3.25×10^{19} n/cm^2 (E greater than 1mev), which corresponds to approximately 22 EFPY based on the current core loading pattern. The revisions to the curves also made it necessary to revise the ART for 1/4 T position and 3/4 T position in the bases. The ART for 1/4 T position has been changed from 222 ° F to 253.7 ° F and the ART for 3/4 T position has been changed from 162.5 ° F to 193.8 ° F.

2. LTOP Controls

a. Change TS 3.4.9.3a.1 and 2 from "lift setting less than or equal to 430 psia" to "trip setpoint of less than or equal to 429 psia." Bases 3/4.4.9 has been changed to explain the new terminology used to describe the PORV setpoint.

b. The MPT enable temperature has been changed from 327 ° F to 355 ° F. The TS that are affected by this change are 3.1.2.1, 3.1.2.3, Table 3.3.3, 3.4.1.2, 3.4.1.3, 3.4.9.3, 4.5.2, 3.5.3, Bases 3/4.4.1, Bases 3/4.4.9, and Bases 3/4.5.2.

c. Due to higher MPT enable temperature, the transition region at which the HPSI pumps are placed under manual control on cooldown and

restored to automatic status on heatup has been changed from 327 ° F - 350 ° F to 355 ° F - 375 ° F. This affects Technical Specification 3.5.3 and Table 3.3-3.

d. The allowable HPSI pump flow rate has been changed from "less than or equal to 210 gpm" to "less than or equal to 200 gpm" when used to add mass to the RCS. This affects TS 3.4.9.3, B3/4.4.9 and B3/4.5.2.

3. RCP Start Criteria

a. Change the RCP start controls for pressurizer pressure in footnote (***) to the applicability section of TS 3.4.1.3 and in footnote (**) to the applicability section of TS 3.4.1.2 from less than or equal to 290 psia to less than or equal to 300 psia.

b. Remove the criteria for reactor shutdown of 8 hours or longer prior to RCP start from the Bases.

4. Technical Specification Bases

Revise TS Bases 3/4.4.1, Coolant Loops and Coolant Circulation, and Bases 3/4.4.9, Pressure/Temperature Limits, and Bases 3/4.5.2, ECCS Subsystem, to be consistent with the above changes.

5. Clarification

Add TS LCO 3.4.9.3.e to say, "When not in use, the above operable high pressure safety injection pump shall have its handswitch in pull-to- lock." at least once per 12 hours."

Change TS Bases B3/4.9 to remove the discussion of temperature instrument uncertainty for the minimum boltup temperature. The margin between the calculated minimum boltup temperature of -10 ° F and the conservative administrative limit of 70 ° F ensures that plant operation is consistent with the safety analysis for minimum boltup temperature. It has also been clarified that the administrative limit of 70 ° F for minimum boltup temperature is the minimum allowable reactor vessel temperature at which the reactor vessel head can be attached in order to comply with the 10 CFR Part 50, Appendix G, limits.

Changes TS Bases B3/4.4.9 to replace the discussion of a figure that was developed to show the calculated RCS pressure versus time with a more descriptive discussion. That discussion addresses the mass addition transient, which is the basis for the PORV setpoint.

Basis for proposed no significant hazards consideration determination. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

1. Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The existing Unit 1 12 Effective Full Power Years (EFPY) Pressure Temperature (P-T) limits were conservatively developed in accordance with the fracture toughness requirements of 10 CFR Part 50, Appendix G, as supplemented by the American Society of Mechanical Engineers (ASME) Boiler and Presser Vessel Code Section III, Appendix G. The reactor vessel material Adjusted RT_{NDT} values are based on the conservative methodology provided in Regulatory Guide 1.99, Revision 2. Because of increased fluence from 12 EFPY to approximately 22 EFPY based on the current core loading pattern, this amendment changes the P-T limit calculations that are the basis for the existing heatup and cooldown curves. The proposed heatup and cooldown curves and associated limits continue to provide conservative administrative restrictions on reactor coolant system pressure to minimize material stresses in the Reactor Coolant System (RCS) due to normal operating transients, thus minimizing the likelihood of a rapidly propagating fracture due to pressure transients at low temperature. Because these proposed heatup and cooldown curves and rates are based on new P-T limits that were conservatively developed using the same methods as the existing curves, this proposed amendment does not involve an increase in the probability or consequences of accidents previously evaluated.

Consistent with the selection of proposed heatup and cooldown curves and rates, the low temperature overpressure protection (LTOP) controls are being changed by decreasing the Power Operated Relief Valve (PORV) trip setpoint. The increase in vessel fluence require that the Minimum Pressure and Temperature (MPT) enable temperature be increased. The new PORV trip setpoint is based on protecting against exceeding the most restrictive pressure of both the heatup and cooldown curves; i.e., a 10° F per hour cooldown at 70° F RCS temperature. Since the basis for the selection of the PORV setpoint has not changed, the PORV will provide the same degree of protection in mitigating postulated LTOP transients with the new setting as that provided by the present LTOP system. Therefore, this change does not increase the probability or consequences of accidents previously evaluated.

As a result of the higher MPT enable temperature, the transition region at which the high pressure safety injection (HPSI) pumps are placed under manual control on cobldown and restored to automatic status on heatup has been changed to 355° F - 375° F. Analysis performed indicates that adequate Loss of Coolant Accident (LOCA) protection below 375° F is provided by the Safety Injection Tanks to allow operator action to manually start a HPSI pump, if required. Therefore, this change does not increase the probability or consequences of accidents previously evaluated.

The proposed heatup and cooldown rates, the decreased PORV trip setpoint, and increased MPT enable temperature continue to provide margin to accommodate postulated pressurization from mass and energy addition transients. Calculations have been performed that predict the response to such transients. From these calculations, the Reactor Coolant Pump (RCP) start criteria has been revised. The revised criteria will permit a slightly higher initial pressure for RCP starts (two RCPs starting simultaneously) and will remove the eight-hour reactor shutdown criteria for RCP restart. Also, a lower HPSI pump throttle flow limit has been selected that will continue to protect the Appendix G pressure limit during a mass addition transient. Adding the requirement to ensure the operable HPSI pump s handswitch will be placed in pull-to-lock when not in use is only a clarification and does not change the intent of the specification. Because of the results of the analyses remain well within the conservative acceptance limits of 10 CFR [Part] 50 Appendix G, these changes do not increase the probability or consequences of accidents previously evaluated.

2. Would not create the possibility of a new or different type of accident from any accident previously evaluated.

The proposed changes to LTOP controls do not represent a significant change in the configuration or operation of the plant. Specifically, no new hardware is being added to the plant as part of the proposed change, no existing equipment is being modified, nor are any significantly different types of operations being introduced. Therefore, the proposed amendment would not create the possibility of a new or different kind of accident from those previously evaluated.

3. Would not involve a significant reduction in a margin of safety.

This change will ensure that the margin of safety is maintained with respect to energy addition or mass addition events in that there are no postulated events that could challenge the Appendix G limit. Utilizing the analytical margins for a planned RCP start does not significantly reduce the margin of safety. The proposed increase in the allowable fluence at the reactor vessel wall necessitated the changes to the heatup and cooldown curves and rates, the PORV trip setpoint, MPT enable temperature, HPSI pump flow limit, and HPSI pump manual control temperature. These changes ensure that the margin of safety is maintained by protecting the Appendix G limits for all postulated transients. Therefore, the proposed changes would not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room Location: Calvert County Library, Prince Frederick, Maryland 20678.

Attorney for Licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Robert A. Capra

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: February 13, 1992

Description of amendments request: The proposed amendments would revise the Calvert Cliffs Nuclear Power Plant, Units 1 and 2, Technical Specifications (TS) and associated TS Bases. The specific TS changes are to TS 3/4.1.1.1, 3/4.1.1.2, 3/4.1.3.1, 3/4.1.3.5, and TS Bases 3/4.1.3. These TS govern reactivity control systems and the proposed changes provide clarification and simplification for the above TS relating to the control element assemblies (CEAs). The changes would: (1) provide a clarification of the terminology for a CEA which is not available for reactivity insertion during a reactor trip in TS 4.1.1.1.1.a, 4.1.1.2.a, 3.1.3.1 and TS Bases 3/4 1.3; (2) clarify the applicability of TS 3/4.1.1.2 specification; (3) provide clarification of the appropriate actions to be applied for inoperable and misaligned (CEAs) in TS 3.1.3.1 and 3.1.3.5; (4) remove an unnecessary portion of an action statement that implies that an unavailable, automatic mode of CEA operation is acceptable in TS 3.1.3.1.b.2; and (5) provide other minor administrative corrections and clarifications.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) would not involve a significant increase in the probability or consequences of an accident previously evaluated.

This change involves only clarification of the current requirements for control element assemblies (CEAs) which are inoperable or misaligned within the constraints of current safety analyses. A stuck or misaligned CEA is not assumed as the initiator of any accidents previously evaluated. However, a stuck CEA is considered in the mitigation assumptions of previously evaluated accidents. The clarifications would not allow more than previously accepted misalignment or inoperability of the CEAs and, therefore, do not involve a significant increase in the consequences of any previously evaluated accident.

(2) would not create the possibility of a new or different type of accident from any accident previously evaluated.

The safety analyses consider rod ejection, loss of coolant, loss of flow, and other sudden loss of negative reactivity events. However, there are no changes in design or operation of the plant as a result of this change, and the changes would provide no opportunity for creating new or different initiators of the previously analyzed accidents. This change provides only a clarification to prevent misinterpretation of the requirements for inoperable or misaligned CEAs. Therefore, there is no possibility of a new or different type of accident.

(3) would not involve a significant reduction in a margin of safety.

The margin of safety of these Specifications is assured by maintaining the availability of negative reactivity for insertion to provide the shutdown margin assumed in the safety analyses. These clarifications would continue to assure that the necessary negative reactivity is available in the form of trippable CEAs.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Attorney for licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Robert A. Capra

Commonwealth Edison Company, Docket Nos. STN 50-454 and STN 50-455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois; Docket Nos. STN 50-456 and STN 50-457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of application for amendments: November 6, 1987, as supplemented on February 8, 1991, January 13 and February 6, 1992.

Description of amendments request: The proposed change will revise Technical Specification Tables 3.3-6 and 4.3-3 to designate the radiation monitors assigned to each train of control room ventilation (VC). Also, action statement 27 on page 3/4 3-41 will be revised to allow the option of running an operational VC train when less than the minimum number of monitors in the opposite VC train are inoperable. Additionally, Cycle 1 specific reliefs that are no longer applicable will be removed from pages 3/4 3-41 and -42 for Byron and pages 3/4 3-39, -41 and -42 for Braidwood. The January 13 and February 6, 1992, submittals partially supersede the previous submittals published on March 20, 1991 (56 FR 11775).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change does not result in a significant increase in the probability or consequence of accidents previously evaluated. The radiation monitors are designed to provide a response to a radiological incident. The operability of these monitors does not factor into the sequence of events required for a radiological release to the atmosphere to occur. They serve to initiate action to prevent a release from unacceptably impacting the Control Room; they do not prevent a release from occurring.

The subject radiation monitors function to isolate the Control Room Ventilation System (VC) outside air intakes in the event of a high radiation condition. Each train of the VC system is provided with redundant radiation monitors. Only one train of VC is operated at a time. The proposed change would allow the operation of a train of VC with a full complement of radiation monitors in the normal configuration. Assuming a limiting scenario of the plant operating with degraded monitoring on the idle VC train with the occurrence of radioactive release and subsequent failure of the running train, the idle train could be started. The train would still have a single radiation monitor available or already be aligned in the emergency mode per system design. If the initiating event resulted in a Safety Injection signal, the ventilation system would automatically align to the post-accident mode. This provides a diverse means of providing radiological protection for the Control Room. The proposed change does not alter the manner in which the actuation signal is provided, nor does it have an impact on the response of the VC system to a valid actuation signal.

The proposed change does not create the possibility for a new or different kind of accident from any accident previously evaluated. The proposed change does not introduce any new or different equipment, and it will not result in installed equipment being operated in a new or different manner. The change will allow the operation of a fully operable train of VC, rather than require that a train with degraded monitoring be operated in its post-accident configuration. The monitors are designed to fail in a safe condition, so required system configuration or operation are not precluded.

The proposed change does not involve a significant reduction in a margin of safety. The proposed change allow[s] the operation of a VC train with full radiation monitoring capability. In the event there is one monitor per train inoperable, the change does not render the plant vulnerable to a single failure which would result in the overexposure of control room personnel. Additionally, the Control Room is equipped with Area Radiation Monitors which provide an alarm upon detection of a high radiation condition. As such, sufficient means will remain available to ensure that the VC system is capable of being both automatically and manually aligned to provide for the mitigation of radiological events.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three

standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: Richard J. Barrett

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, LaSalle County Station, Units 1 and 2, LaSalle County, Illinois

Date of application for amendments: January 21, 1992

Description of amendments request: This amendment request proposes to add additional setpoint requirements to the Technical Specification (TS) for the refueling mast loaded interlock and overload interlock setpoints. This addition is due to the station's plans to install a new refueling mast. The original refueling mast setpoints will remain in the TS because the original refueling mast for Unit 2 will be maintained as a backup.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1) Involve a significant increase in the probability or consequences of an accident previously evaluated because:

As discussed in [the Updated Final Safety Analysis Report] UFSAR Section 15.7.4, a fuel handling accident (FHA) is postulated to occur as a consequence of a failure of the fuel assembly lifting mechanism resulting in the dropping of a raised fuel assembly onto other fuel bundles in the core. The accident which produces the largest number of failed spent fuel rods (including consideration of the drop of a fuel bundle onto the Unit 2 consolidated fuel storage pool) is the drop of a spent fuel bundle onto the reactor core when the vessel head is off. This accident is expected to occur with the frequency of a limiting fault.

This proposed change does not result in a change to any of the assumptions of the postulated FHA. The added weight of the NF500 mast is the only design change of safety significance. The refueling platform fuel hoist incorporates redundant lifting features (dual cables) so that no single component failure will result in a fuel bundle drop. The design of the grapple is not being changed as a result of this proposed change. The NF500 mast is similar in design and function to the presently installed triangular mast and meets or exceeds the design in all other aspects. There are no changes being made to interlocks on the platform which prevent unsafe operation over the reactor vessel during control rod movements, limit travel of the fuel grapple, and interlock grapple hook engagement with hoist power.

NUREG-0612, "Control of Heavy Loads of Nuclear Power Plants," was reviewed and is not applicable to the installation of the NF500 mast because the NUREG defines a Heavy Load as: 'Any load, carried in a given area after a plant becomes operational, that weighs more than the combined weight of a single spent fuel assembly and its associated handling tool for the specific plant in question." Therefore, the NF500 mast is bounded by the FHA analysis.

The proposed fuel hoist overload cutoff setpoint ensures that excessive lifting forces are not applied to the top guide or fuel assemblies. The proposed fuel hoist loaded setpoint ensures that the associated fuel hoist loaded interlocks are initiated when the weight of a channeled fuel bundle is applied to the grapple.

Further, the maximum height from which a fuel bundle could be dropped remains unchanged as does the minimum required water level above stored irradiated fuel. The postulated number of fuel rod failures due to a bundle drop with the increased weight of a NF500 mast analyzed by General Electric is 116 rods. This is bounded by the postulated failure of 125 rods in the current UFSAR analysis. The radiological release for the FHA with the NF500 mast as calculated by current approved methods is less than the release documented in the UFSAR. Therefore, this proposed change will not increase the probability or consequences of any accident previously evaluated.

2) Create the possibility of a new or different kind of accident from any accident previously evaluated because:

No new failure modes will be introduced as a result of this proposed change. The NF500 mast is similar in design and function to the currently installed mast and meets or exceeds all of the other design aspects so as not to introduce a new failure mode. The proposed fuel hoist overload cutoff setpoint ensures that excessive lifting force is not applied to the top guide or fuel assemblies. The proposed fuel hoist loaded setpoint ensures that the associated fuel hoist loaded interlocks are initiated when the weight of a channeled fuel assembly is applied to the grapple. Therefore, this proposed change does not create a new or different kind of accident from any accident previously evaluated.

3) Involve a significant reduction in the margin of safety because:

The fuel hoist setpoints serve no safety function. These setpoints serve to prevent damage to reactor internals such as caused by a stuck fuel bundle. The setpoints are also designed to prevent the loading of fuel assemblies during core alterations when all control rods are not fully inserted. The proposed change in the fuel hoist overload cutoff and fuel hoist loaded interlock setpoints solely account for the increased weight of the NF500 mast. These setpoints provide approximately the same margin as the setpoints for the current triangular fuel mast (762E974). The proposed fuel hoist overload cutoff setpoint for the NF500 mast of 1600 +100/-0 pounds ensures that excessive lifting force is not applied to the top guide or fuel assemblies. The proposed fuel hoist loaded interlock setpoint of 700 +50/-0 pounds for the NF500 mast ensures that the associated hoist loaded interlocks are initiated when the weight of a channeled fuel assembly is applied to the grapple. The refueling platform mast design is not discussed in the bases of the Technical Specifications 3/4.9.6.

As a result, there is no significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Ogelsby, Illinois 61348.

Attorney to licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60690.

NRC Project Director: Richard J. Barrett

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: January 30, 1992

Description of amendment request: The licensee has proposed to amend the Technical Specifications to clarify the limiting conditions for operation and monitoring frequency for a severe hurricane condition in the vicinity of Indian Point Unit No. 2.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

In accordance with the requirements of 10 CFR 50.92, the proposed technical specification changes are deemed to involve no significant hazards consideration because operation of Indian Point Unit No. 2 (IP-2) in accordance with these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated, since the unit is required to be in the same shutdown status prior to arrival of winds on-site with sufficient intensity to threaten plant structures. The original IP-2 Hurricane Technical Specification requirement was requested by NRC as a result of its review of the IPSSS [IPPSS, Indian Point Probabilistic Safety Study] and was issued as *Amendment No.* 83 to the IP-2 Operating License on December 23, 1982. The original basis and intent of the issued Safety Evaluation with *Amendment No.* 83 are not degraded by the changes proposed in the enclosed application, since under both *Amendment No.* 83 and the proposed specification, plant shutdown is required prior to arrival of sustained surface winds exceeding 87 knots on site. Furthermore, the proposed specification would avoid possible unnecessary cycling of the plant which might occur under the present specification in instances where there is essentially no probability that hurricane sustained surface winds exceeding 87 knots will impact the site. The proposed technical specification change would continue to require a prompt report in the event of a hurricane and action to ensure that the plant is in a cold shutdown condition prior to arrival on site of hurricane sustained surface winds in excess of 87 knots. Therefore, these changes cannot increase the probability or consequences of an accident previously evaluated.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated for the same reasons described in Item (1), although safety may be enhanced to some extent by the avoidance of unnecessary cycling of the unit, and

(3) Involve a significant reduction in a margin of safety. The safety-related aspects of the existing Technical Specification text and that (the) proposed one remain the same, inasmuch as the plant must be in a cold shutdown condition prior to arrival of sustained surface winds exceeding 87 knots on site. The margin of safety is actually increased somewhat since unnecessary cycling of the plant will likely be precluded. Adherence to the existing technical specification resulted in such cycling on Sept. 27, 1985 and Aug. 19, 1991 for Hurricanes Gloria and Bob, respectively, when sustained surface winds at the site were no stronger than 15 MPH.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003.

NRC Project Director: Robert A Capra

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: February 6, 1992

Description of amendment request: The licensee has requested an amendment to the Technical Specifications that would increase the maximum fuel enrichment limit to 5.0 w/o U-235. This change will provide the capability for extended fuel cycles.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

In applying the standards of 10 CFR 50.92, we have concluded that the proposed Technical Specification change would not involve a significant hazards consideration based on the answers to the following questions:

1. Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response:

Neither the probability nor the consequences of an accident previously analyzed is increased due to the proposed change.

The proposed change is based on conservative analyses which show that, taking credit for the use of IFBAs [Integral Fuel Burnable Absorbers] for fuel with enrichments above 4.5 w/o and up to 5.0 w/o will enable this type of fuel to be stored in the new fuel racks while meeting the design criteria of K_{eff} less than 0.95 for fully loaded racks flooded with nonborated water at a density of 1 gm/cc (68° F) and K_{eff} [less than or equal to] 0.98 assuming low density optimum moderation. The spent fuel racks have already been approved to accept a 5.0 w/o fuel.

The enrichment of the reload fuel is used in the Reload Safety Evaluation which is performed for each fuel cycle to evaluate the use of new fuel in the reactor. The maximum fuel enrichment used in the reload would be limited to 5.0 w/o when this amendment is approved.

2. Does the proposed license amendment create the possibility of a new or different kind of accident from any previously evaluated?

Responses:

The higher fuel enrichment limit for the new fuel rack will not create the possibility of a new or different kind of accident. The new fuel storage rake [rack] will meet the required criticality design criteria of K_{eff} [less than] 0.95 for fully loaded racks flooded with nonborated water at a density of 1 gm/cc (68° F) and K_{eff} [less than or equal to] 0.98 assuming low density optimum moderation. The spent fuel racks are already approved for 5.0 w/o. The reload Safety Evaluation will use a maximum of 5.0 w/o.

3. Does the proposed license amendment involve a significant reduction in the margin of safety?

Response:

The proposed amendment does not involve a significant reduction in the margin of safety. The new fuel racks will meet the required subcriticality of K_{eff} [less than] 0.95 for fully loaded racks flooded with nonborated water at a density of 1/gm/cc (68° F) and K_{eff} [less than or equal to] 0.98 assuming low density optimum moderation. For fuel above 4.5 w/o and up to 5.0 w/o IFBAs will be used to ensure this subcriticality.

The Spent Fuel Storage racks have already been approved for 5.0 w/o. The Reload Safety Evaluation will use a maximum of 5.0 w/o.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003.

NRC Project Director: Robert A. Capra

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: February 3, 1992

Description of amendment request: The proposed amendment to the Technical Specifications (TS) would delete a surveillance requirement in Table 4.1.1, Footnote (4). Footnote (4) which verifies the low flow trip set point for non-operating pump combinations will no longer be appropriate due to modifications being made to the Reactor Protection System (RPS) during the upcoming refueling outage. Additionally, Section 2.0 of the TS, "Safety Limits and Limiting Safety Limits Settings", would be administratively revised to enhance clarity and consistency with other sections of the TS.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The deleted surveillance requirement serves only to verify the proper adjustment of

an alternate set of Low Flow setpoint potentiometers which could currently be selected by repositioning the Flow Setpoint Selector Switch. These alternate setpoint potentiometers are no longer used. Prior to implementation of the requested Technical Specifications change, modifications to the Reactor Protective System will have removed both the switch and the alternate setpoint potentiometers. Therefore, the subject surveillance will no longer be useful.

Verification testing of the Low Flow Trip setpoint for the operating pump combination will continue to be accomplished on a monthly interval, as is done with current practice. If the setpoint must be adjusted due to changing the number of operating Primary Coolant Pumps, the setpoint would be verified as part of the adjustment process, as it would be with current practice. Deletion of the subject surveillance requirement will have no effect on the frequency of, or procedure for, verifying the Low Flow Trip setpoints. The subject surveillance requirement affects no other parameters.

The administrative changes do not affect plant operation in any way.

Therefore, the proposed changes do not involve a significant increase [in] the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The first proposed change deletes a surveillance requirement which verifies the correct setting of equipment which, since it is no longer used, will be removed from the plant. This change would not alter the operating conditions of the plant systems, and would not reduce the reliability of any plant equipment.

The second proposed change, administrative changes to the Safety Limits and Limiting Safety System Settings section, does not affect plant operation in any way.

Therefore, these changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Involve a significant reduction in a margin of safety.

The first proposed change deletes a surveillance requirement which verifies the correct setting of equipment which, since it is no longer used, will be removed from the plant. This change would not affect the setpoints, capacities, or operating limits for any required equipment.

The second proposed change, administrative changes to the Safety Limits and Limiting Safety System Settings section, does not affect plant operation in any way.

Therefore, the proposed changes do not involve a significant reduction [in] a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: L. B. Marsh.

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of amendment request: September 24, 1991 and as supplemented January 31, 1992

Description of amendment request: Detroit Edison Company (DECo or the liscensee) is requesting an amendment to the Fermi-2 Technical Specifications (TS) to increase the licensed power level approximately 4.2% from 3293 MWt to 3430 MWt. This will result in an increase of steam flow to approximately 105% of the current operating limit, but will require no changes to the basic fuel design and fuel operating limits such as maximum average planar linear heat generation rate (MAPLHGR) or minimum critical power ratio (MCPR) will still be met at the uprated power level. The means for achieving higher power is to expand the power/flow map by increasing core flow along existing flow control lines and thereby increasing slightly reactor vessel dome pressure. However, there will not be an increase in the maximum recirculation flow limit over the pre-uprate value.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Will the change involve a significant increase in the probability or consequences of an accident previously evaluated?

Uprated power operation is achieved primarily by increasing core flow slightly along existing flow control lines to achieve a five percent increase in the steamflow to the turbine/generator. The maximum allowable reactor recirculation flowrate remains unchanged. The increased flowrate is well within the capabilities of the feedwater system which supplies the additional feedwater needed due to the increased steamflow. A slight increase in reactor pressure maintains turbine control valve controllability at the increased steamflows. Safety relief valve and power, pressure, and flow related instrumentation trip setpoints are increased slightly to accommodate uprated power operation and to maintain approximately the same level of trip avoidance and safety system challenges as before uprated power operation.

The plant is operated in the same manner at uprated power as it is at the currently licensed power level. That is the methods and sequences of operation are unchanged. Emergency operating procedure steps remain the same with only minor changes to timing required. Since the level of trip avoidance and safety system challenges remains approximately the same, the frequency of operational responses to those events is not increased. Reactor fuel operating limits designed to protect the fuel cladding are maintained and provide the same level of protection as before uprated power operation. Fuel reload analyses performed subsequent to power uprate will continue to meet current acceptance criteria. Operation at 3430 MWt is consistent with the original plant design capability and thus will not significantly increase any failure probabilities. All of the original equipment design or regulatory criteria established for plant equipment (ASME code, IEEE standards, NEMA standards, etc.) are still imposed and met for operation at the uprated power level. Furthermore, a review of the plant's individual plant examination (IPE) which uses probabilistic risk analysis (PRA) methods determined that the IPE would be minimally affected. A comprehensive review was performed on the effects of increased power and pressure conditions on the reactor vessel and internals, reactor connected piping, balance of plant piping, primary containment, and related systems and components. These reviews and associated analyses show continued compliance with the original design and licensing criteria.

The consequences of the spectrum of hypothetical accidents and transients have also been investigated and meet the same regulatory criteria after uprate as before uprate. Selected original plant transients that were run at rated power plus 2% were rerun at uprated power plus 2% with no change in consequence (i.e., no fuel failure). Sufficient operating limit minimum critical power ratio will be maintained to ensure that the safety limit minimum critical power ratio is not exceeded during uprated power operation thus providing the same level of protection as previously provided. All of the analyses with postulated radiological consequences and the overpressurization analysis were originally performed using 3430 MWt and were reviewed by the NRC. The overpressurization analysis was reperformed at uprated power plus 2% uncertainty using the increased operating dome pressure and safety relief valve setpoints. At uprated conditions a slightly higher peak reactor vessel pressure results, but remains well below the 1375 psig ASME code limit.

The radiological consequences of several design basis accidents including the DBA/LOCA and main steam line break (MSLB) accidents were recalculated at 3430 MWt plus 2% uncertainty or 3499 MWt. When compared on a consistent basis, calculated offsite doses increase proportionately to reactor power since the radiological source term is directly proportional to reactor power and since the meteorology factors remain the same. Because the original analyses were performed at 3430 MWt, power uprate analyses would show an increased dose rate of 2% due to the additional 2% uncertainty factor, when compared on a consistent basis. The recalculated doses for Fermi 2 are not comparable to previous calculations since the NRC approved methodology and assumptions used have undergone revision. The new radiological calculations, however, remain well within the [10 CFR Part 100] limitations. These calculations would be 2% higher than the original calculations due to the addition of the 2% uncertainty factor if the original calculations had been performed on the same basis as the new (improved) calculations. The 2% increase in dose associated with the uncertainty factor does not constitute a significant increase in the consequences of an accident.

Thus, the increase in power level discussed herein and associated Technical Specification changes do not significantly increase the probability (frequency of occurrence) or consequences of an accident previously evaluated.

(2) Will the change create the possibility of a new or different kind of accident from any accident previously evaluated?

The full spectrum of accident considerations defined in Regulatory Guide 1.70 has been reviewed and no new or different kind of accident has been identified. Power uprate uses already developed technology and applies it within the capabilities of existing plant equipment in accordance with presently existing regulatory criteria including NRC-approved codes, standards, and methods. GE has designed BWRs of higher power levels than the uprated power of any of the currently operating BWRs, and no new power dependent accidents have been identified. In addition, Fermi 2 was originally designed to the proposed uprated steam flow (105%) and all of the accident analyses with postulated radiological consequences were performed at that condition. The plant systems have been assessed and have been verified to be adequately designed and capable of performing their design intent at uprated operating conditions. Only minor changes to plant systems are required to effect uprated power operation. Also, as discussed in the response to question 1 above, methods of plant operation at uprated power are virtually the same as before power uprate. Since there are no significant changes to the plant equipment or methods and sequences of operation, no new accident scenarios are created. Therefore, this change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) Will the change involve a significant reduction in a margin of safety?

The plant was originally designed for operation at 3430 MWt. As previously discussed, no change is required in fuel design or safety limits. The MAPLHGR limit remains the same. The operating limit MCPR is increased appropriately to ensure that the same safety margin is maintained. Only minor changes to plant equipment are required to accommodate power uprate and the methods and sequences of operation are essentially unchanged. The entire plant design has been reviewed to ensure that plant equipment will perform properly and will still meet original design and licensing criteria. Although, as discussed herein, some analyses produce results somewhat closer to the related acceptance criteria, results remain within those criteria. The safety margins prescribed by the Code of Federal Regulations have been maintained by meeting the appropriate regulatory criteria. Similarly, the margins provided by the application of the ASME design acceptance criteria have been maintained where applicable, as well as other margin-assuring acceptance criteria used to judge the acceptability of the plant. Several accident and transient analyses have been reperformed at uprated plant operating conditions consistent with the requested Technical Specification changes with the most significant ones discussed below.

All of the accidents with postulated radiological consequences and the overpressurization analysis were originally performed at 3430 MWt. The overpressurization analysis was reperformed at uprated power plus 2% uncertainty using the increased operating dome pressure and safety relief valve setpoints. At uprated conditions a slightly higher peak reactor vessel pressure results, but remains well below the 1375 psig ASME code limit. The radiological doses of several design basis accidents including the DBA/LOCA and MSLB accidents were recalculated at 3430 MWt plus 2% uncertainty factor added for conservatism. When compared on a consistent basis, calculated offsite doses increase proportionately to reactor power since the radiological source term is directly proportional to reactor power and since the meteorology factors remain the same. Because the original analyses were performed at 3430 MWt, power uprate analyses would show an increased dose rate of 2% due to the additional 2% uncertainty factor when compared on a consistent basis. The recalculated doses are not comparable on a consistent basis to previous calculations since the NRC-approved methodology and assumptions used have undergone revision. However, it has been demonstrated that the recalculated doses remain well within the acceptance criteria of [10 CFR Part 100]. Dose calculations would be 2% higher than the original calculations due to the addition of the 2% uncertainty factor if the original calculations had been performed on the same basis as the new (improved) calculations. The 2% increase in dose associated with the uncertainty factor does not constitute a significant reduction in the margin of safety.

As previously discussed, in each case the relevant acceptance criteria is met which preserves the margin of safety provided by these criteria. It is therefore concluded that the requested changes do not involve a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Duke Power Company, Docket Nos. 50-269, 50-270, and 50-287, Oconee Nuclear Station, Units 1, 2, and 3, Oconee County, South Carolina

Date of amendment request: January 2, 1992, as revised February 14, 1992

Description of amendment request: This amendment reflects a reorganization of the Duke Power Company (DPC). The reorganization essentially decentralizes the corporate management of nuclear activities to each of DPC's three nuclear site facilities, including the Oconee Site. The revisions to the Technical Specifications (TS) also reflect and are complementary to revisions to the DPC Quality Assurance Topical Report. The review of this report, based upon the guidance of Standard Review Plan 17.3 as issued in August 1990, is being addressed as a separate action from the revision of the TS.

The proposed changes throughout TS Section 6.0, "Administrative Controls," reflect the creation of several new positions and the retitling of other positions. Previously, the Vice President of Nuclear Production oversaw activities at all three DPC nuclear facilities (Catawba 1 and 2, McGuire 1 and 2, and Oconee 1, 2, and 3). The reorganization now places a Vice President at each site, including the Vice President of the Oconee Nuclear Site. The Senior Corporate Nuclear Executive will be the Senior Vice President-Nuclear Generation Department for all three nuclear sites.

The Vice President of Nuclear Production is now titled Vice President Oconee Nuclear Site. Other position title changes include: health physics to radiation protection; station to site; facility to plant; auxiliary operators to non-licensed operators; Superintendent of Operations to Operations Superintendent; operating engineer to shift operations manager; shift technical advisor to shift manager; Oconee Safety Review Group (OSRG) to Safety Review Group (SRG); Manager, Station Training Services to Training Manager; and changes to TS 6.1.1.4, 6.1.2.1.a and c to reflect the revised position titles for the Operations Superintendent, the Mechanical Superintendent, the I and E Superintendent and the Work Control Superintendent; etc.

Certain functions, for example, in TS 6.1.2.1.d, .f, .g, .j, and .k; 6.2.1; and 6.2.2, have been reassigned to the newly created positions of Vice President-Oconee Site or Manager, Safety Assurance.

Certain functions, for example, in TS 6.1.3.2, 6.1.3.4.g, and 6.1.3.5, have been

reassigned from the former position of Vice President-Nuclear Production to the Executive Vice President-Power Generation or to the Senior Vice President-Nuclear Generation Department.

Other changes, for example, in TS 6.1.2.1.h and .i, and 6.1.3.4 are made to reflect the DPC's revisions of its Quality Assurance (QA) Topical Report in accordance with the guidance in Standard Review Plan (SRP) Section 17.3, "Quality Assurance Program Description," that was issued in August 1990. SRP 17.3 provides guidance for the licensee to put a performance-oriented quality assurance program into place. The NRC staff's review of the DPC QA Topical Report is being addressed as a separate review activity from the specific amendments to the Administrative Controls section of the TS.

Other revisions have been made to TS 6.1.3.2 for the Nuclear Safety Review Board regarding the composition and member qualifications required for these groups.

Other miscellaneous changes in titles, terms, and footnotes are made throughout TS 6.0 to reflect the major changes discussed above.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed amendments would not involve a significant increase in the probability or consequences of a previously evaluated accident. Nor would they create the possibility of a new or different kind of accident from any accident previously evaluated. The changes do not have any impact upon the design or operation of plant equipment; therefore, they cannot serve to initiate a new type of accident.

The proposed amendments would not involve a reduction in a margin of safety. The changes would not impact the design or operation of any plant systems or components.

Based upon the preceding analysis, Duke Power Company concludes that the proposed amendments do not involve a Significant Hazards Consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691

NRC Project Director: David B. Matthews

Florida Power and Light Company, et al., Docket Nos. 50-335 and 50-389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of amendment request: February 25, 1992

Description of amendment request: By letter L-91-275, dated November 22, 1991, Florida Power and Light Company informed the NRC of its reactor trip and transient reduction efforts through specific Technical Specification changes. As part of that effort, the proposed license amendments would increase the safety of St. Lucie, Units 1 and 2 by reducing the probability of unnecessary automatic reactor trips caused by turbine trips. These turbine trips occur during the transfer from 15% feedwater bypass valves to main feedwater regulating valves near 15% power. By increasing the trip enable setpoint to 25%, a turbine trip may occur, but a reactor trip is spared.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

It has been determined that the operation of St. Lucie Units 1 and 2 with the proposed change does not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The accidents in the [Final Safety Analysis Report (FSAR)] have been reviewed in terms of a possible increase in their probability of occurrence due to the proposed change. The event of relevance here is a small break [loss-of-coolant accident (LOCA)] resulting from a stuck-open [power operated relief valve (PORV)]. A turbine trip without reactor trip at 25% power, which could lead to PORV opening, has been analyzed with the most limiting single failure criterion applicable to ... St. Lucie Units 1 and 2: failure of pressurizer spray. The results of the analysis demonstrate that PORV opening does not occur if the Steam Bypass Control System (SBCS) is available. Therefore, the probability of occurrence of a [s]mall [b]reak LOCA (SBLOCA) is not affected by the proposed change. The scenario in which the SBCS is not available has also been analyzed, with the conclusion that the probability of occurrence of a SBLOCA is not increased by the proposed setpoint change.

The proposed change will not increase the consequences of an accident previously evaluated, since this change only impacts the power range between 15% and 25% where no previously evaluated transient is determined to be limiting.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change only affects plant operation in the range of [power] between 15% and 25%. Outside this range, the plant will continue to operate as before and its safe operation is demonstrated by the analyses included in the FSAR. Within the affected power range, that is between 15% to 25%, no new accident will occur simply due to the proposed setpoint change.

3. Involve a significant reduction in the margin of safety.

The results of the analyses show that implementation of the proposed change does not involve a significant reduction in the margin of safety. The plant continues to operate as before for all power ranges except in the range between 15% and 25% where the reactor trip on turbine trip inhibit feature is extended. Within this range, the effects of the proposed change on the existent safety margins are well within the acceptance criteria for safe operation of the plant.

Based on its compliance with 10 CFR 50.92 criteria, it is concluded that the proposed change meets the requirements for a no significant hazard consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003

NRC Project Director: Herbert N. Berkow

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: February 5, 1992

Description of amendment request: Gulf States Utilities is requesting a change to River Bend Station (RBS) Technical Specification 4.5.1 to clarify the Automatic Depressurization System (ADS) operability by the addition of the minimum ADS accumulator air supply header pressure during normal plant operations. An explanation of the basis for this minimum pressure will also be added to the associated Bases section.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change would not create the probability or the consequences of an accident previously evaluated because:

An additional surveillance requirement is proposed for Technical Specification 3/4.5.1, "ECCS-Operating," and addition of the required minimum ADS accumulator supply header pressure is proposed. This change will have no effect upon the probability of accidents assumed in the safety analysis report because no plant structures, systems, or components which could affect failure assumptions are to be added or deleted. Thus, no additional single failures which could significantly increase the probability of an accident previously analyzed in the RBS safety analysis report will result from this change. Consequences of any accidents previously analyzed will not be affected because this change will not affect the severity or release paths of any accident described in the safety analysis report. Therefore, no significant increase in the probability or the consequences of an accident previously evaluated results from these proposed Technical Specification changes.

2. The proposed change would not create the possibility of a new or different kind of accident from any previously evaluated because:

As stated above, no structures, systems, or components are to be added or deleted by this change. Thus, the possibility of additional single failures resulting in a new or different kind of accident is not introduced [as] a result of this change. This change provides an additional surveillance requirement to confirm ADS operability with respect to the ADS accumulator air supply pressure during normal plant operations. Therefore, this change is administrative change only and will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change would not involve a significant reduction in the margin of safety because:

As stated in the RBS [Updated Safety Analysis Report] USAR Section 5.2.2.4.1, one ADS actuation at 70 percent of drywell design pressure is sufficient to depressurize the reactor and allow inventory makeup by the low pressure emergency core cooling systems. But for conservatism, the accumulators are sized to provide 2 actuations at 70 percent of drywell design pressure or 4 to 5 actuations at atmospheric pressure. No changes are made to these bases by the proposed amendment, but this change further defines the minimum ADS accumulator pressure at which these criteria are satisfied. Therefore, these proposed changes will not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: August 23, 1991

Description of amendment request: The proposed amendment would make changes to the Technical Specifications in accordance with the guidance provided in Generic Letter 91-01. The change consists of removing TS Table 4.4-5 providing the schedule for reactor vessel material specimen withdrawal.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below.

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated because:

The removal of the specimen withdrawal schedule from the Technical Specifications is administrative in nature since changes to this schedule are controlled by the requirements of 10 CFR 50, Appendix H and the specimen withdrawal schedule table in the Technical Specifications is a duplicate of the Appendix H requirements.

2. The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated because:

The removal of the specimen withdrawal schedule from the Technical Specifications is administrative in nature since changes to this schedule are controlled by the requirements of 10 CFR 50, Appendix H and the specimen withdrawal schedule table in the Technical Specifications is a duplicate of the Appendix H requirements.

3. The proposed change does not involve a significant reduction in the margin of safety because:

The removal of the specimen withdrawal schedule from the Technical Specifications is administrative in nature since changes to this schedule are controlled by the requirements of 10 CFR 50, Appendix H and the specimen withdrawal schedule table in the Technical Specifications is a duplicate of the Appendix H requirements.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

NRC Project Director: Suzanne C. Black

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: December 23, 1991

Description of amendment request: The proposed amendment would modify the Clinton Power Station license and Technical Specification 3.6.1.2, "Primary Containment Leakage." If approved the amendment would reflect an exemption to 10 CFR Part 50, Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors," for the Reactor Core Isolation Cooling vacuum breaks line.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

1. This request does not involve a change in the plant design. Failure of or leakage through a containment barrier cannot create an accident and therefore this request does note increase the probability of any accident previously evaluated. Failure of or leakage through containment barrier can, however, increase the consequences of those accidents previously evaluated. This request involves a reduction in the local leak rate testing requirements for one containment penetration. The line associated with this penetration is nominally three inches in diameter. In addition, this line normally only contains air at approximately containment pressure and temperature, and thus is not subjected to degradation due to severe thermal or hydraulic transients. As a result, IP has concluded that the noted potential leakage pathways would not degrade significantly between the performance of ILRTs. Therefore, the potential leakage associated with these pathways would not significantly contribute to exceeding the leakage limit or significantly impact system

operation. The performance of local leak testing with a soap solution during each ILRT will provide added assurance that these potential leakage pathways do not contribute significantly to the leakage measured during the ILRT and provide additional indication of the need for repairs. In additions, leakage through any of these potential leakage pathways would be processed by the standby gas treatment system prior to release to the environment. Therefore, this request does not involve a significant increase in the probability or the consequences of any accident previousiy evaluated.

2. This request does not involve a change to the plant design. In addition, leakage through a containment barrier cannot create an accident. As a result, this request cannot create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The only margin of safety that could potentially be impacted by this request is the margin concerning the offsite does consequences of postulated accidents (which is directly related to the containment leak rate). As discussed under item (1) above, this request does not result in a significant increase in the consequences of any accident previously evaluated. The performance of local leak testing of the subject potential leakage pathways with a soap solution during each ILRT will provide added assurance that these potential leakage pathways do not contribute significantly to the leakage measured during the ILRT and provide additional indication of the need for repairs. As a result, this request does not result in a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: John N. Hannon

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment request: February 18, 1992

Description of amendment request: The amendment would revise the Technical Specifications setpoints for isolation of the High Pressure Coolant Injection (HPCI) and Reactor Core Isolation Cooling (RCIC) systems on a high steam flow condition.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

1. The proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed setpoints continue to be conservative with respect to the 300 [percent] flow Analytic Limit. Increasing the setpoints to the proposed values will, however, provide additional margin above the transient flow rates that can occur during system startup that are not indicative of a break in the system. This will prevent unwanted system isolations and increase the probability that HPCI and RCIC will be available to provide their design function.

2. The proposed amendment will not create the possibility of a new or different kind of accident from any accident previously evaluated. The HPCI and RCIC system isolation functions will continue to provide protection as originally intended. Since the proposed changes only affect the setpoints for those isolations, the possibility of a new or different kind of accident is not created.

3. The proposed amendment will not involve any reduction in a margin of safety as defined in the Technical Specifications or the UFSAR. The HPCI and RCIC system isolation functions will continue to provide protection as originally intended. The proposed changes to the isolation setpoints will prevent inadvertent isolations during system startup and therefore increase the probability that HPCI and RCIC will be available to provide their design function. Consequently, there is no reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S.E., Cedar Rapids, Iowa 52401.

NRC Project Director: John N. Hannon.

Northeast Nuclear Energy Company, et al., Docket No. 50-336, Millstone Nuclear Power Station, Unit No. 2, New London County, Connecticut

Date of amendment request: January 30, 1992

Description of amendment request: The proposed amendment would change the Technical Specification by deleting the surveillance requirement (Section 4.5.2.C.1) associated with the Shutdown Cooling System (SDCS) autoclosure interlock (ACI) concurrent with the deletion of ACI circuitry planned for the next refueling outage. In addition the proposed change would add a surveillance requirement that would verify the operation of the open permissible interlock (OPI) that prevents opening of the SDCS suction valves when the reactor coolant pressure is greater than 300 psia.

Basis for proposed no significant hazards consideration determination. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed changes do not involve a significant hazards consideration because the changes would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The removal of the SDCS ACI was evaluated generically in CE NSPD-550 in terms of the frequency of an [interfacing system loss-of-coolant accident] ISLOCA, the availability of the SDCS, and the effect on overpressure transients. This generic evaluation has been supplemented by the plant-specific submittal (Attachment 2 [of January 30, 1992 submittal]) for Millstone Unit No. 2. There is a negligible change in the calculated probability of an ISLOCA event associated with ACI removal. The evaluation demonstrates that removing ACI, and replacing it with a valve position alarm, will reduce the number of spurious closures of suction valves and thus increase the availability of SDCS. The present LTOP system will remain available per Technical Specification 3.4.9.3 to mitigate a pressure transient. The proposed change related to testing of existing OPI has no impact on the design basis accidents. Therefore, the proposed changes would not increase the consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously evaluated. The effect of an overpressure transient at cold shutdown conditions will not be altered by removal of the ACI function. The ACI is intended to ensure that the low-pressure piping of the SDCS is properly isolated from the RCS pressure during start-up operations, it does not protect against hardware failure. The valve position alarm will warn against both operator error and hardware failure.

While it is true that the ACI initiates an autoclosure of the SDCS suction valves on high RCS pressure, overpressure protection of the SDCS is provided by the SDCS relief valve and not by slow- acting suction valves that isolate the SDCS from the RCS.

The possibility of a loss of SDCS is reduced by the proposed change because the potential of the SDCS isolation valves being closed by a spurious signal will be eliminated. No other failures are introduced by ACI removal. Therefore, the proposed changes will not create the possibility of a new or different kind of accident from any previously evaluated.

3. Involve a significant reduction in a margin of safety. The SDCS ACI function is not a consideration in a margin of safety for any Technical Specification. However, since the evaluation of CE NSPD-550 and the Millstone Unit No. 2 plant-specific evaluation indicates that the availability of the SDCS is increased with removal of ACI, implementation of the modification (addition of a control room alarm) and procedural changes will produce an increase in overall safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut 06360.

NRC Project Director: John F. Stolz

Northeast Nuclear Energy Company, et al., Docket No. 50-336, Millstone Nuclear Power Station, Unit No. 2, New London County, Connecticut

Date of amendment request: January 31, 1992

Description of amendment request: The proposed amendment would change the Technical Specification Tables 3.3-6 and 4.3-3 and the Bases Section 3/4.3.3.1 to delete the inference that the spent fuel pool area radiation monitors are required for criticality monitoring.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change does not involve a significant hazards consideration because the change would not:

1 Involve a significant increase in the probability or consequences of an accident previously analyzed. The proposed change clarifies the safety function of the spent fuel pool area radiation monitors by deleting the wording that termed these monitors as criticality monitors in Tables 3.3-6 and 4.3-3 and Bases Section 3/4.3.3.1. There are no design basis accidents adversely affected due to the change.

2. Create the possibility of a new or different kind of accident from any previously analyzed. Since there are no changes in the way the plant is operated, the potential for an unanalyzed accident is not created.

3. Involve a significant reduction in a margin of safety. Since the change does not affect the consequences of any accident previously analyzed, there is no reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut 06360.

NRC Project Director: John F. Stolz

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of amendment request: February 14, 1992

Description of amendment request: The proposed amendment would approve three changes to the Appendix A Technical Specifications (TS). The first change involves revising the Reactor Protection System TS to eliminate the main steam line (MSL) high radiation scram and isolation functions. The second change involves revising the requirements for the Intermediate Range Monitor (IRM) scram instrument functional test to clarify that the test is only required to be performed prior to each startup. The third change involves revising the description of the Average Power Range Monitor (APRM) scram trip function in the Bases section in order to clarify when bypasses are permissible.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below.

(1) Does not involve a significant increase in the probability or consequences of an accident previously analyzed.

(2) Does not create the possibility of a new or different kind of accident from any accident previously analyzed or evaluated,

(3) Does not involve a significant reduction in a margin of safety.

Change 1: Eliminate the MSL high radiation scram and isolation functions.

a. The proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The MSL high radiation signal is not an input in any Monticello Design Basis Accident (DBA) analyses, therefore, elimination of this signal will not increase the probability or consequences of such accidents. Similarly, the MSL high radiation vessel isolation function is unnecessary. The isolation function was provided for the purpose of mitigating a control rod drop accident. However, an analysis by the BWR Owner's Group demonstrates that it is of little benefit in this regard. The isolation feature in no way prevents the accident from occurring, therefore, its elimination will not increase the probability of an accident. The analysis concludes that, even without the isolation, calculated radiological release rates for a control rod drop accident are only a small fraction of 10 CFR Part 100 guidelines and are well within the criteria established by Standard Review Plan (SRP) Section 15.4.9. Details of the analysis mentioned above are discussed in NEDO-31400 "Safety Evaluation for Eliminating the Boiling Water Reactor Main Steam Line Isolation Valve Closure Function and Scram Function of the Main Steam Line Radiation Monitor." NEDO-31400 has been reviewed by the staff and it has been confirmed that Monticello is bounded by the assumptions and conclusions of the analysis with the following exception:

The analysis for the Control Rod Drop Accident without main steam line isolation valve (MSLIV) closure assumes that the augmented off-gas treatment system incorporates a charcoal bed of sufficient size to remove essentially all of the iodine that could be transported to the condenser. This assumption is not valid for Monticello because the Monticello augmented off-gas treatment system uses charcoal filters considerably smaller than those described in NEDO-31400. In order to assess this difference, off-site doses were projected using the Monticello MIDAS computer program, which is also utilized for emergency off-site dose projections and routine release calculations. No credit was taken for the charcoal filters installed at the off-gas compressor suction filters, since they could not accommodate the amount of iodine released in a control rod drop accident. In addition, due to their location in the system, the charcoal filters are bypassed when the storage tanks are bypassed. Two projections were run assuming an elevated (plant off-gas stack) release, stability class F conditions and a wind speed of 0.5 mph. The source term from NEDO-31400, Table 2 was deemed appropriate for this analysis and was used in both cases.

The Monticello off-gas system is designed to provide a minimum 50-hour delay time for main condenser off-gas, with several hundred hours of hold-up typically achieved. The first projection was run simulating 198 hours of decay time, as would normally be available with compressed off-gas system in operation. The second projection was run assuming zero off-gas delay time, which is conservative because the minimum delay time would be 2 hours even with the off-gas system storage tanks bypassed and assuming maximum (28 scfm) condenser in-leakage. In both cases, the resulting off-site dose projections where determined to be insignificant relative to 10 CFR Part 100 guidelines.

The existing MSL and condenser off-gas radiation monitoring instrumentation will remain installed to provide information and alarms to plant operators. In the event either or both of these monitors alarm, the reactor coolant will be promptly sampled to determine possible contamination levels. Other automatic off-gas system functions, such as isolation of the recombiner system upon a steam jet air ejector high radiation signal (30 minute built-in delay) or isolation of the off-gas system (15 minute built-in delay) if the recombiners are bypassed and termination of releases from the stack upon Wide Range Gas Monitor high radiation signal, remain unaffected by this modification. These isolations provide assurance that 10 CFR Part 20 limits are not exceeded. Based on the above discussion, it is concluded that there will be no significant increase in the consequences of a control rod drop accident were one to occur.

b. The proposed amendment will not create the possibility of a new or different kind of accident from any accident previously analyzed.

The MSL high radiation scram and vessel isolation functions were originally intended to mitigate, not prevent an existing accident scenario. Elimination of these functions will not introduce a new or different accident scenario. The proposed amendment represents a change to the physical configuration of the plant in that some Reactor Protection System circuits will be modified to eliminate the MSL high radiation scram and vessel isolation signals. However, these changes are minor and will not affect the remaining scram or vessel isolation functions. In all other respects, plant design and operation remain unchanged. Therefore, the proposed amendment will not create the possibility of any new or different kind of accident from any previously analyzed.

c. The proposed amendment will not involve a significant reduction in a margin of safety.

The proposed amendment will result in a net improvement in a margin of safety, since the analysis of NEDO-31400 concludes that the core damage frequency is reduced 0.3% due to a reduction in transient initiating events.

Based on the discussion above, it is concluded that the proposed change concerning elimination of the MSL high radiation scram and MSL high radiation vessel isolation signal do not involve significant hazards consideration.

Change 2: Clarification of Intermediate Range Monitor Scram Instrumentation Functional Test Requirements.

a. The proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The TS already identify the Intermediate Range Monitor scram instrumentation as "Group C," thereby recognizing that a practical test of the Intermediate Range Monitor scram and alarm function can only be performed while the plant is shutdown. The proposed amendment clarifies, but does not change, the intent of the TS and eliminates an inconsistency.

b. The proposed amendment will not create the possibility of a new or different kind of accident from any accident previously analyzed.

The proposed amendment represents an administrative change to the TS and will not involve any changes to equipment or operating procedures. It is, therefore, concluded that the change will not introduce the possibility of a new or different kind of accident than previously analyzed.

c. The proposed amendment will not involve a significant reduction in a margin of safety.

The performance and reliability of the Intermediate Range Monitor instrument scram function will not be reduced since Reactor Protection System capabilities will continue to be demonstrated in a manner meeting the original intent of the TS.

Based on the licensee's analysis, the proposed changes involving the Intermediate Range Monitor scram functional test do not involve a significant hazards consideration.

Change 3: Clarification of Bases Section Discussion of Permissible Average Power Range Monitor Bypasses.

a. The proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The TS and the Updated Safety Analysis Report (USAR) both discuss that an extra Average Power Range Monitor is installed in each of the Reactor Protection System primary channels to permit bypassing of one Average Power Range Monitor in each primary channel. Both documents state that the Average Power Range Monitor trip feature of the Reactor Protection System is fully functional provided both subchannels serving each primary channel are operable. As designed, the level of redundancy required by the Technical Specification and, therefore, the level of protection assumed by an accident analysis is maintained when one Average Power Range Monitor in each primary channel is bypassed. Therefore, this change does not involve a significant increase in the probability or consequences of an accident previously analyzed.

b. The proposed amendment will not create the possibility of a new or different kind of accident from any accident previously analyzed.

The proposed change is limited to clarification of statements in the Technical Specification 3.1 Bases Section. The proposed amendment does not involve any change to the physical configuration of the plant nor will plant operating procedures be affected. It is, therefore, concluded that the proposed amendment will not create the possibility of any new or different kind of accident than previously analyzed.

c. The proposed amendment will not involve a significant reduction in a margin of safety.

The proposed amendment will have no impact on the margin of safety since the design, function, and operation of the Reactor Protection System are unchanged, as are the Limiting Conditions for Operation and surveillance requirements currently specified in the TS. A probabilistic analysis was performed to verify that the benefits of continuous operation with one Average Power Range Monitor per primary channel in bypass outweighed any increase in risk. The analysis concluded that the slight increase in risk caused by reducing redundancy in the Average Power Range Monitor scram function was more than compensated for by the reduction in risk associated with avoidance of spurious scrams which could occur if all six monitors were in service. Although the net result is a reduction in core damage frequency, it should be noted that in both cases the risk was very small (less than 1 X 10^{-7}/year). It is therefore concluded that a net improvement in the margin of safety results from the practice of routinely bypassing one Average Power Range Monitor per Reactor Protection System channel.

Based on the analysis above, it is concluded that the proposed change

regarding clarifications to the Technical Specification Section 3.1 Basis do not involve a significant hazards consideration.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Attorney for licensee: Gerald Charnoff, Esq. Shaw, Pittman, Potts and Trowbridge, 2300 N Street, N.W., Washington, DC 20037.

NRC Project Director: L. B. Marsh.

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: February 12, 1992

Description of amendment request: The proposed amendment would revise Technical Specifications 5.5 and 5.6 to reflect the implementation of a Qualified Review (QR) Program for the review and approval of new procedures, and changes thereto at Fort Calhoun Station.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change to the Fort Calhoun Station Technical Specifications, which reflect implementation of a QR Program, does not constitute a Significant Hazards Consideration. In support of this conclusion, an evaluation of each of the three standards as set forth in 10 CFR 50.92 is provided below.

1 Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change is administrative in nature and provides for (1) procedural reviews through the use of qualified personnel designated by the PRC [Plant Review Committee] Chairman and (2) procedural approval through the use of Managers/Supervisors designated by the Manager-Fort Calhoun Station, as authorized by Administrative Controls Standing Orders upon their development and approval. As part of this program, the QR will be required to consider, document, and implement necessary cross-discipline review prior to approval. The program will be controlled by Administrative Controls Standing Orders which will be reviewed by the PRC and approved by the Manager-Fort Calhoun Station. The PRC will continue to review new procedures, and changes thereto for which an unreviewed safety question determination (i.e., 10 CFR 50.59 safety evaluation) is required to be performed. Implementing the proposed administrative change will not decrease the safety review function currently performed by the PRC. The proposed change requires review of any new procedure and procedure change by a qualified individual (other than the preparer) who is knowledgeable in the functional area affected. The proposed change does not affect any plant hardware, plant design, limiting safety system settings, or plant systems, and therefore, does not alter or add any initiating parameters that would cause a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed Technical Specifications change will implement a procedural review and approval process and is strictly administrative in nature. The QR Program will be controlled by Administrative Controls Standing Orders. These Standing Orders will be reviewed by the PRC and approved by the Manager-Fort Calhoun Station. The PRC will continue to review those new procedures and changes thereto for which an unreviewed safety question determination (i.e., 10 CFR 50.59) is required to be performed. Therefore, the proposed administrative change does not reduce the safety review function performed by the PRC. The proposed changes to setpoints, or operating parameters. There are no potential initiating events that would result in the possibility of a new or different kind of accident from any accident previously evaluated.

3. Involve a significant reduction in a margin of safety.

The proposed change is administrative in nature and is limited to (1) the transfer of procedure review responsibilities to designated Qualified Reviewers and (2) the transfer of procedure approval responsibilities to designated Managers/Supervisors. The PRC will continue to review and the Manager-Fort Calhoun Station will continue to approve those new procedures and changes thereto concluded that the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102

Attorney for licensee: LeBoeuf, Lamb, Leiby, and MacRae, 1875 Connecticut Avenue, N.W., Washington, D.C. 20009-5728

NRC Project Director: John T. Larkins

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: February 13, 1992

Description of amendment request: The proposed amendment would revise Technical Specification 2.6, "Containment System," and the definition of Containment Integrity to reflect the Combustion Engineering Standard Technical Specifications 3/4.6.1.1 and 3/4.6.1.3.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed changes do not involve significant hazards consideration because operation of Fort Calhoun Station Unit No. 1 in accordance with these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes are based upon the definition and requirements of the Combustion Engineering Standard Technical Specifications for containment integrity and air locks. The current definition of containment integrity contained within the Fort Calhoun Technical Specifications requires that only one door of the Personnel Air Lock be operable; therefore, the proposed change to the definition is more restrictive than current requirements. Adoption of the requirements of Standard Specification 3.6.1.1 implements a one hour allowed outage time for containment integrity. As stated in draft NUREG 1432, the one hour completion time provides a period of time to correct a problem commensurate with the importance of maintaining containment integrity, while ensuring that the probability of an accident occuring during these periods is minimal. The addition of valves IA-3092, IA-3093, and IA-3094 to the Type C Leak Rate Testing ensures that these valves will be tested and meet acceptable leak rate criteria. Therefore, these proposed changes do not involve a significant increase in the probability or consequences of an accident.

(2) Create the possibility of a new or different kind of accident from any previously analyzed.

It has been determined that no new or different kind of accident will be created due to the proposed changes. The proposed changes implement the requirements of CE Standard Technical Specifications for containment integrity, which is commensurate with the importance of containment integrity, but is sufficient to avoid unnecessary challenges to plant equipment. The proposed changes would not modify the operation of any plant equipment other than to place additional restrictions on the operability of the PAL. The addition of valves IA-3092, IA-3093, and IA-3094 to the Type C Leak Rate Testing ensures that these valves will be tested and meet acceptable

leak rate criteria. Therefore, the proposed changes do not create the possiblity of a new or different kind of accident from any previously evaluated.

(3) Involve a significant reduction in a margin of safety.

The proposed changes would not modify the acceptance criteria for allowed leakage from containment or the Personnel Air Lock, nor would the proposed changes modify the operation of plant equipment, therefore the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102

Attorney for licensee: LeBoeuf, Lamb, Leiby, and MacRae, 1875 Connecticut Avenue, N.W., Washington, D.C. 20009-5728

NRC Project Director: John T. Larkins

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: March 5, 1992

Description of amendment request: The proposed amendment would revise Technical Specification 5.9.5, "Core Operating Limits Report," to incorporate the latest NRC-approved revisions to core reload topical reports.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed changes do not involve significant hazards considerations because operation of Fort Calhoun Station Unit No. 1 in accordance with these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes are administrative in nature in that the revisions to the topical reports for conducting reload analyses have been previously reviewed and approved by the NRC in Safety Evaluation Reports dated March 2, 1992. The proposed changes merely incorporate a reference to these approved revisions into the Technical Specifications. Therefore these proposed changes do not involve a significant increase in the probability or consequences of an accident.

(2) Create the possibility of a new or different kind of accident from any previously analyzed.

It has been determined that no new or different kind of accident will be created due to the proposed changes. Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated.

(3) Involve a significant reduction in a margin of safety.

The proposed changes merely incorporate a reference to NRC approved methodologies for conducting core reload and accident analyses, therefore the proposed changes do not involve a significant reduction in margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102

Attorney for licensee: LeBoeuf, Lamb, Leiby, and MacRae, 1875 Connecticut Avenue, N.W., Washington, D.C. 20009-5728

NRC Project Director: John T. Larkins

Philadelphia Electric Company, Docket No. 50-353, Limerick Generating Station, Unit 2, Montgomery County Pennsylvania

Date of amendment request: March 3, 1992

Description of amendment request: The amendment would revise the Technical Specifications (TS) to extend the allowed outage time for the Emergency Core Cooling Systems supported by the "B" loop of the Emergency Service Water (ESW) system. This change would only be in effect during the Spring 1992 refueling outage of Limerick, Unit 1, and would allow for continued operation of Limerick, Unit 2, while repairs and modifications are made on the "B" loop of ESW.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1) The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed one-time TS change does not increase the consequences of an accident from any previously evaluated. The accidents that were considered are the full range of LOCAs [Loss of Coolant Accident] with and without a concurrent LOOP [Loss of Offsite Power]. Unit 2 will remain in operation during the repair on the "B" loop of ESW. Unit 1 will not be operating at this time but will be in a refueling outage and will be maintained in compliance with appropriate TS requirements.

The inoperability of HPCI [High Pressure Coolant Injection] and half of the ECCS [Emergency Core Coolant System] for Unit 2 does not cause an increase in the probability of an accident since all the systems affected are not accident initiators as defined in Chapter 15 of the LGS [Limerick Generating Station] Updated Final Safety Analysis Report (UFSAR). However, based on the probability of occurrence of a seismic event of any severity, and assuming this would cause failure of the freeze seals and the complete loss of the "B" ESW loop, a small increase of approximately $4X10^{-3}$ (i.e., 0.1%) in the annual Core Damage Frequency (CDF) would result. This increase is judged not to be significant, since the cumulative risk caused by shutdown and startup is estimated to be higher than the cumulative risk during the AOT [Allowed Outage Time] for the ESW system repair. Maintaining the remaining ECCS equipment operable during the 72-hour period ensures that the consequences of the accidents previously evaluated will remain bounded by the UFSAR safety analysis. Therefore, there is no increase in the consequences of an accident. This conclusion is based on the following considerations.

a. All ECCS will be available for short term mitigation of the consequences of an accident. For long-term accident response (i.e., greater than 10 minutes), sufficient ECCS systems and components will remain available to mitigate the consequences of an accident, even considering a single active failure.

b. For long term response to an accident occurring during the proposed 72-hour AOT, sufficient time exists so that plant operators could take appropriate action to realign equipment and establish cooling flow to ECCS. Operator actions beyond those assumed in the UFSAR are not required for the short term response to an accident for the consequences to be maintained within those evaluated in the UFSAR. ECCS equipment has been analyzed for a variety of conditions involving loss of room cooling, and we have determined that several hours are available for operators to take corrective action to maintain certain ECCS equipment operable before environmental qualification temperature limits are exceeded.

c. Unit 1 will be shutdown during this 72-hour period. This reduces the demand on the remaining operable ESW loop and other common safety-related equipment such that additional margin exists in the "A" loop of ESW for heat removal from Unit 2 should an accident occur.

d. The "B" loop of ESW could still be considered to be functionally available to support equipment cooling needs even though it will be considered inoperable. The pressure boundary of the "B" ESW piping will be maintained through the use of freeze seals in the areas where repair and maintenance activities are in progress. PECo experience with freeze seals indicates that they are a reliable method of maintaining a pressure boundary intact, and therefore, the "B" loop of ESW is expected to be capable of supporting loop operations should the need arise. Nevertheless, a freeze seal is not "qualified" as a pressure boundary in accordance with ASME [American Society of Mechanical Engineers] Code requirements and the "B" loop of ESW will be considered inoperable.

Since loss of the Unit 2 ECCS room unit coolers, RHR [Residual Heat Removal] seal cooling, and RHR pump motor oil cooling cooled by the "B" loop of ESW will not cause an immediate failure of these components upon initia[t]ion of the RHR pumps, operability for short term automatic response (i.e., less than 10 minutes) under the postulated accident conditions will be maintained. Beyond this 10 minute period, there would be two (2) RHR pumps and one (1) loop of CS [Core Spray] operable to provide the necessary long term accident mitigation. The availability of the ADS [Automatic Depressurization System], which itself is single failure proof and is unaffected by this activity, assures that the remaining RHR and/or CS pumps can maintain adequate core cooling. NEDO-24708A, provides the analysis that supports the conclusion that either one (1) RHR pump (operating in the LPCI [Low Pressure Coolant Injection] mode) or one (1) CS loop in conjunction with ADS, will provide adequate core cooling.

Therefore, even if a single failure were to occur, adequate core cooling capability would be maintained since two (2) RHR pumps and one (1) loop of CS will be operable during the proposed 72-hour AOT. Based on the accident mitigating capabilities of the ECCS equipment that remains operable with the "B" loop of ESW inoperable, the consequences of accidents previously evaluated will not be increased by this activity. Additional system specific details are provided below to support this conclusion.

a. RHR System - Even with a single failure of additional low pressure ECCS equipment that will not be rendered inoperable due to the loss of the "B" loop of ESW, the RHR system has enough redundancy that this system in conjunction with ADS could operate properly and mitigate an accident. Therefore, the consequences of accidents previously evaluated are not increased.

b. CS System - One of the two (2) loops of the CS system will be rendered inoperable due to the loss of the "B" loop of ESW. The analysis in NEDO-24708A has shown that one (1) CS loop is adequate to provide the required core cooling. Therefore, the consequences of an accident previously evaluated are not increased by the impact of this change on the CS system.

c. EDGs [Emergency Diesel Generators] - The EDSs (i.e., D12 and D14 for Unit 1, and D22 and D24 for Unit 2) will be rendered inoperable. The EDGs that will remain operable provide the necessary emergency electrical power to assure that Unit 2 (assumed to be in power operation) and Unit 1 (assumed to be shutdown) have the equipment and systems operable to mitigate the accidents previously analyzed. The number of EDGs operable meets or exceeds the minimum required by TS without requiring an immediate Unit 2 shutdown. TS requirements for emergency power for primary containment isolation valves will be verified as part of the Surveillance Tests which are performed when EDGs become or are made inoperable. Also, the inoperable EDGs will still remain functionally available assuming that the freeze seals maintain an adequate pressure boundary. Approved procedures exist which provide the ability to assess the applicable TS requirements relative to the specific inoperable EDGs. Therefore, the consequences of an accident previously evaluated are not increased by the inoperability of the EDGs cooled by the "B" loop of ESW.

d. HPCI [High Pressure Coolant Injection] System - This proposed change does remove room cooling capability from the Unit 2 HPCI compartment. This will eliminate the long term response of the HPCI pump for water injection capability in response to a small break LOCA, but the capability to use HPCI to inject into the reactor vessel for at least 15 minutes still exists. Despite this impact on HPCI, the remaining operable subsystems of RHR and CS in conjunction with ADS assures that adequate core cooling will remain available long term and that the consequences of an accident previously evaluated are not increased.

e. RCIC [Reactor Core Isolation Cooling] System - This proposed change, which renders the "B" loop of ESW inoperable for 72-hours, does not remove room cooling capability from the RCIC compartment. This is due to the fact that the "A" loop of ESW supplies the room unit coolers for this pump. This change has no effect on the alignment, configuration, or operation of the RCIC system. Therefore, with respect to the RCIC system, the consequences of an accident previously evaluated are not increased.

f. RECW [Reactor Enclosure Cooling Water] System - The "A" loop of ESW provides backup cooling to the RECW heat exchangers. Therefore, the loss of the "B" loop of ESW cooling water to the RECW heat exchange does not increase the consequences of an accident previously evaluated.

g. TECW [Turbine Enclosure Cooling Water] System - TECW is provided with a backup cooling water supply from the "B" loop of ESW. The TECW heat exchangers are not safety-related and do not require ESW as a cooling water supply. Therefore, there is no increase in the consequences of an accident previously evaluated because of the temporary loss of the back-up cooling water to the TECW heat exchangers from the "B" loop of ESW.

h. Reactor Recirculation (RR) Pumps - ESW provides a backup source of cooling water to the RR pumps should normal cooling be unavailable. The RR pumps form a portion of the primary coolant pressure boundary, and are therefore, safety-related in the passive sense. However, even if normal and backup cooling were lost to the pump seals, the potential leakage is within the makeup capability of the operable ECCS equipment. Therefore, with respect to the RR pumps, the consequences of an accident previously evaluated are not increased.

i. Fuel Pool Cooling System - The fuel pool cooling system does not perform a safety function to mitigate the consequences of an accident. Therefore, the loss of the ESW as a potential backup cooling (i.e., make-up) source to Unit 2 fuel pool does not increase the consequences of an accident previously evaluated.

j. RHRSW [Residual Heat Removal Service Water] System - The RHRSW system TS Section 3.7.1.1 provides a 30-day AOT with two (2) RHRSW pump/EDG pairs inoperable. Therefore, the impact of the one-time TS change on RHRSW system capability does not increase the consequences of an accident previously evaluated.

k. Spray Pond - The proposed TS change does not impact the spray pond operation as the ultimate heat sink. The Spray pond was sized to be able to handle both units' decay heat removal requirements from 100% power operating conditions. Since Unit 1 will not be in operation, minimal decay heat removal will be required for that unit. Also, the motor operated valves needed to align the operable ESW and RHRSW loops to the spray networks are still operable. Therefore, with respect to the Spray Pond, this one-time TS change does not increase the consequences of an accident previously evaluated.

l. Control Room Emergency Fresh Air Supply (CREFAS) System - The TS change does impact the CREFAS system since only one of the EDGs which supplies emergency power to the CREFAS system is affected. The emergency power supply to the "A" CREFAS subsystem is provided by Unit 1 D11 and D13 EDGs, whereas the "B" subsystem is powered by the Unit 1 D12 and D14 EDGs. The Unit 2 TS allow the CREFAS to be considered operable when the "B" loop of ESW is out-of-service for a period not to exceed 30 days. This envelopes the AOT that this TS change is requesting. Therefore, with respect to the CREFAS system this one-time TS change does not increase the consequences of an accident previously evaluated.

m. MCR [Main Control Room] Chillers - These are safety-related components and are required to be available in the event of an accident. The chillers are common plant equipment; however, only one (1) of the two (2) chillers is required to be available to support the design heat loads. Therefore, by taking the "B" loop of ESW out of service, only one of the chillers will be unavailable. If the available chiller would subsequently be lost and the MCR temperature exceeds the TS limit, appropriate action would be taken in accordance with TS. Therefore, with respect to the MCR chillers, the consequences of an accident previously evaluated are not increased.

n. Standby Gas Treatment System (SGTS) - This proposed change makes the emergency power supply for one of the SGTS subsystems inoperable, but does not make either subsystem inoperable. TS Section 3.6.1.1.e imposes the appropriate actions when less than the full complement of emergency power supplies are operable. In no case will the AOT for the affected SGTS emergency power supply be less than 72-hours, which is consistent with the requested AOT for this activity. Therefore, with respect to the SGTS, this one-time TS change does not increase the consequences of an accident previously evaluated.

o. Reactor Enclosure Recirculation System (RERS) - This change makes the emergency power supply for one (1) of two (2) RERS subsystems inoperable, but does not make either subsystem inoperable. TS Section 3.8.1.1.e imposes the appropriate actions when less than the full complement of emergency power supplies are operable. In no case will the AOT for the affected power supply be less than 72-hours. Therefore, the 72-hour AOT requested for this activity falls within the bounds of the TS AOT for the RERS, and does not increase the consequences of an accident previously evaluated with respect to the RERS.

p. Standby Liquid Control (SLC) System - This change makes the emergency power supply to one (1) of the three (3) SLC pumps and one (1) of the two (2) SLC subsystems inoperable, but does not make any pump or either subsystem inoperable. TS Section 3.8.1.1.e imposes the appropriate actions when less than the full complement of emergency power supplies are operable. In no case will the AOT for the affected SLC system emergency power supply be less than 72-hours. Since the proposed 72-hour AOT is bounded by the SLC system AOT, the consequences of an accident previously evaluated are not increased with respect to the SLC system.

q. Post LOCA Hydrogen Recombiner - This change makes the emergency power supply for one (1) of two (2) subsystems of the Post-LOCA Hydrogen Recombiner inoperable but does not make either subsystem inoperable. TS Section 3.8.1.1.e imposes the appropriate actions when less than the full complement of emergency power supplies are operable. In no case will the AOT for the affected Post-LOCA Hydrogen Recombiner emergency power supply be less than 72-hours. Since the proposed 72-hour AOT requested for this activity is bounded by the Post-LOCA Hydrogen Recombiner TS AOT, this activity does not increase the consequences of an accident previously evaluated with respec to the Post-LOCA Hydrogen Recombiner.

r. Main Steam Isolation Valve (MSIV) Leakage Control System - This change makes the emergency power supply to one (1) of the two (2) MSIV leakage control subsystems inoperable, but does not make either subsystem inoperable. TS Section 3.8.1.1.e imposes the appropriate actions when less than the full complement of emergency power supplies are operable. In no case will the AOT for the affected MSIV Leakage Control System emergency power supply be less than 72-hours. The 72-hour AOT requested for this activity falls within the bounds of the TS AOT for the MSIV Leakage Control System. Therefore, the consequences of an accident previously evaluated are not increased with respect to the MSIV Leakage Control System.

s. Drywell Hydrogen Mixing System - As a result of this activity, the emergency power supply for two (2) of the four (4) subsystems associated with the Drywell Hydrogen Mixing system will be inoperable, but none of the hydrogen mixing subsystems are made inoperable. TS Section 3.8.1.1.e imposes the appropriate actions when less than the full complement of emergency power supplies are operable. In no case will the AOT for the affected Drywell Hydrogen Mixing system emergency power supply be less than 72-hours. Therefore, since the 72-hour AOT requested for this activity is bounded by the Drywell Hydrogen Mixing system TS AOT, there is no increase in the consequences of an accident previously evaluated with respect to the Drywell Hydrogen Mixing system.

For the proposed 72-hour period in which the "B" loop of ESW will be inoperable, two (2) RHR pumps, one (1) CS subsystem, ADS, and RCIC remain operable for accident mitigation. Because this configuration remains single-failure-proof, a malfunction of any of these systems will not remove the ability to provide adequate core cooling. All other affected components, taken individually, are currently evaluated for allowable out-of-service times of at least 72-hours.

Therefore, implementation of the proposed 72-hour AOT will not result in an increase in the probability or consequences of an accident previously evaluated.

2) The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Since there are no changes in configuration, alignment, or operational procedures, the possibility of a new or different kind of accident is not created. The systems affected are not accident initiators. The systems that will remain operable are capable of mitigating an accident.

The following compensatory measures will be taken to offset the fact that the "B" loop of the ESW system will be inoperable but available due to this planned activity. Proper position of ESW system flow path valves will be verified prior to (i.e., within 24 hours of) initiation of this activity to reduce the possibility of valve misalignments.

The proposed change will not cause the components important to safety that have been discussed above to be challenged by a different type of malfunction, since no new type of malfunction will be created by any operation associated with this activity. Therefore, this proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3) The proposed change does not involve a significant reduction in a margin of safety.

Implementation of this proposed TS change will result in a reduction in the margin of safety due to the loss of system redundancy. However, this reduction in the margin is not significant since the remaining operable ECCS equipment is adequate to mitigate the consequences of an accident, even assuming a single failure. This is based on the analysis in NEDO-24708A and NEDC-30936P-A. These documents describe the minimum requirements to successfully terminate a transient or LOCA initiating event (assuming reactor trip), assuming multiple failures with realistic conditions. The minimum requirements for short term response to an accident would be one (1) low pressure ECCS in conjunction with ADS operation. For long term response, which would include decay heat removal through one RHR loop along with another low pressure ECCS (e.g., CS or LPCI) is required. Implementation of the proposed TS change will require that operability of two (2) RHR subsystems and one (1) CS loop be maintained during the 72-hour period. In addition, the RCIC system will remain operable during the 72-hour period although credit is not taken for it in the UFSAR safety analysis.

The bases for TS section 3/4.5.1 for ECCS during plant operation state that with the HPCI system inoperable, adequate core cooling is assured by the operability of ADS, both the CS and LPCI systems, and RCIC (although no credit is taken for RCIC in the UFSAR safety analysis). For the duration of the ESW pipe repair activity, a period not to exceed 72-hours, two (2) RHR LPCI pumps and one (1) Loop of CS will not be operable due to the loss of cooling from the "B" loop of ESW. However, the ability to provide adequate core cooling and decay heat removal is maintained, even assuming a single failure, by the remaining two (2) RHR pumps and one (1) loop of CS. Therefore, implementation of the proposed 72 AOT will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Attorney for licensee: J. W. Durham, Sr., Esquire, Sr. V. P. and General Counsel, Philadelphia Electric Company, 2301 Market Street, Philadelphia, Pennsylvania 19101

NRC Project Director: Charles L. Miller

Philadelphia Electric Company, Docket Nos. 50-352 and 50-353, Limerick Generating Station, Units 1 and 2, Montgomery County, Pennsylvania

Date of amendment request: March 3, 1992

Description of amendment request: The amendments would revise the Surveillance Requirements (SRs) and pertinent Bases of the Technical Specifications (TSs) to incorporate the most recent recommendations contained in the American Society of Mechanical Engineers (ASME) Operations and Maintenance (OM) standard for snubber testing, ASME/ANSI OM-1990 Addenda to ASME/ANSI OM-1987, Part 4, "Examination and Performance Testing of Nuclear Power Plant Dynamic Restraints (Snubbers)." Specifically, the changes would revise the 10% functional testing sampling plan (SR 4.7.4.e.1), 2) delete the 55 plan (SR 4.7.4.e.3), 3) incorporate the concept of "Failure Mode Grouping, (FMG)" 4) remove the "reject" line from the 37 plan (SR 4.7.4.e.2) and 5) change the snubber functional testing interval from 18 to 24 months (± 25%) to accommodate a 24-month refueling cycle.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1) The proposed TS changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The probability of occurrence of an accident previously evaluated is not increased by the proposed TS changes because snubber operability, snubber failure rate, snubber testing format or the interval between snubber functional tests are not postulated as a cause for the occurrence of any accident, transient, or other event that has been previously evaluated. All snubbers will continue to function as previously assumed and the probability of occurrence of an accident remains unchanged.

The consequences of an accident previously evaluated is not increased by the proposed TS changes to the snubber functional testing SRs. Physical changes are not being made to the plant. The snubbers role in mitigating the consequences of an accident are to permit the slow movement of piping and components during heatup and cooldown, and provide restraint during seismic or other dynamic events. The proposed TS changes will not affect the snubbers ability to continue to perform this role for the following reasons.

a. Revising the 10% snubber functional testing sample plan to require subsequent lot sizes to be at least 5% of the total population of a snubber type for each snubber test failure, instead of 10%, is in accordance with the ASME OM4 Code. Nonmandatory Appendix D to ASME OM4 further states that the two sampling plans that are permitted (i.e., 10% plan and 37 plan) provide the required protection. The ability of the 10% plan to assure a sound snubber population is not compr[om]ised by using smaller subsequent sample lot sizes because the 10% plan compares well to the stati[sti]cally based and accepted 37 plan. When the revised 10% plan for a total population of 370 snubbers is plotted with the 37 plan, it can be shown that both plans require the same number of tests and have the same size "accept" region. For sample populations greater than 370 snubbers, the revised 10% plan has a smaller "accept" region than the 37 plan, and therefore, is more conservative. For sample populations less than 370 snubbers, the 10% plan has a larger "accept" region than the 37 plan, but is still acceptable based on the fact that it is the recommended plan for smaller populations.

Since snubber operability is confirmed through testing, components that utilize snubbers in their design will continue to function as previously assumed. Therefore, the consequences of accidents will remain as previously evaluated, and the onsite or offsite radiological effects will not increase above those previously evaluated.

b. Removal of the "reject" line from the 37 plan, which results in an expanded "continue testing" region, will not reduce the effectiveness of the plan to detect failed or degraded snubbers. Snubber testing must still continue until the test results fall within the "accept" region or until all snubbers are tested, thus providing the same statistical confidence in the completed test.

Since snubber operability will be confirmed as before, components that utilize snubbers in their design will continue to function as previously assumed. Therefore, the consequences of accidents will remain as previously evaluated and the onsite or offsite radiological affects will not increase above those previously evaluated.

c. Deletion of the 55 plan from the TS will not reduce the ability of the snubber functional testing program to confirm the operability of the snubber population because two other approved plans will remain in the TS. The current TS requirements permit selection of any of these plans for snubber testing. Since the 37 plan is acceptable and should result in fewer snubbers being tested, the 55 plan is no longer needed. This change will therefore not increase the consequences of an accident previously evaluated.

d. Implementation of the concept of [Failure Mode Grouping] FMG when selecting additional snubbers to meet functional testing requirements will not reduce the ability of the snubber functional testing program to confirm the operability of the snubber population. The failure mode group will count as one (1) failure for additional testing in the general population according to the previously selected sample plan. FMG increases the focus on problem areas by directing testing towards specific failure mechanisms, while maintaining testing of the sample population. This will increase the ability of the program to detect and correct degraded snubbers. The use of the FMG will not increase the consequences of an accident for the same reasons as stated in item 'b' above, and is consistent with the referenced ASME OM4 Code. The proposed changes to the TS do not change plant design, hardware or system operations. Any changes to plant procedures as a result of the proposed changes will only affect the format of snubber functional testing and not plant operations or maintenance.

e. Changing the inspection cycle to 24 months (± 25%) will not reduce the ability of the functional testing program to confirm the operability of the snubber population. The original interval of 18 months (± 25%) was selected to accommodate the need to test snubbers that were inaccessible during normal operation. Since snubbers do not require preventative maintenance, the additional time added by a 24 month cycle has no consequences on snubber operability. Snubber functional testing has shown no failure mechanism which would be aggravated by an extension of the test interval to 24 months (± 25%). The requirement to monitor service life remains a part of the TS, and operational conditions which contribute to snubber degradation will still be monitored and corrected. Additionally, some snubber damage may result from maintenance and other work activities during outages. Fewer interruptions that could cause snubber degradations will result in a more reliable snubber population. This change will not increase the consequences of an accident for the same reasons as stated in item 'b' above.

As discussed above, the proposed TS changes will not effect the operability of the snubber population. Therefore, equipment important to safety that use snubbers will continue to meet all of the applicable design requirements. The proposed changes only affect the format used during the snubber functional testing and not the actual test itself. Also, these changes do not permit any physical modifications to snubbers or other equipment. Accordingly, the consequences of a malfunction of equipment important to safety is not affected.

2) The proposed TS changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

As previously stated above, the proposed TS changes do not involve operational procedures or physical changes to the plant. The snubbers will continue to meet their design basis of protecting piping and equipment during dynamic events. The proposed TS changes will not affect the operation of snubbers; therefore, equipment that incorporate[s] the use of snubbers in its design will continue to function as previously evaluated. These proposed changes, as discussed above will maintain the previous level of assurance of snubber operability because the basic requirements for snubber functional testing are unchanged. Therefore, the proposed TS changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3) The proposed TS changes do not involve a significant reduction in a margin of safety.

The bases for the TS require that all snubbers whose failure could have an adverse affect on any safety-related system, be operable. This ensures that the structural integrity of the reactor coolant system and all other safety-related systems is maintained during and following a seismic or other event initiating dynamic loads. The bases also discuss classification and grouping of the general snubber population, snubber listing requirements, visual inspection frequency, and visual acceptance criteria. The proposed TS changes maintain the same confidence level as that currently provided by the TS for determining snubber operability. Accordingly, the existing margin of safety will be maintained. Therefore, the proposed TS changes do not involve a reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Previously Published Notices of Consideration of Issuance of Amendments To Operating Licenses and Proposed No Significant Hazards Consideration Determination and Opportunity For Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Tennessee Valley Authority Docket No. 50-327, Sequoyah Nuclear Plant, Unit 1 Hamilton County, Tennessee

Date of amendment request: February 20, 1992 (TS 92-02)

Description of amendment request: The amendment changes the Technical Specifications to revise the overtemperature differential temperature allowable value, overpower differential temperature allowable value, the Reactor Coolant System loop differential temperature allowable value, and the calibration frequency requirements for the Reactor Coolant System resistance temperature detectors for Unit 1 Cycle 6 operation.

Date of publication of individual notice in **Federal Register:** February 27, 1992 (57 FR 6748)

Expiration date of individual notice: March 30, 1992

Local Public Document Room location: Chattanooga-Hamilton County Library 1101 Broad Street, Chattanooga, Tennessee 37402

Notice of Issuance of Amendment To Facility Operating License

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, D.C., and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Arizona Public Service Company, et al., Docket Nos. 50-528 ,50-529, and 50-530 Palo Verde Nuclear Generating Station, Unit Nos. 1 , 2, and 3, Maricopa County, Arizona

Date of application for amendments: May 28, 1991, as supplemented November 27, 1991

Brief description of amendments: These amendments revise Technical Specification 3/4.7.9 to allow Arizona Public Service Company to perform snubber visual inspections and corrective actions during plant outages. These amendments conform to the guidance provided by the NRC in Generic Letter (GL) 90-09, "Alternative Requirements for Snubber Visual Inspection Intervals and Corrective Actions," dated December 11, 1990.

Date of issuance: March 2, 1992

Effective date: March 2, 1992

Amendment Nos.: 57, 44, 30

Facility Operating License Nos. NPF-41 , NPF-51,and NPF-74: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 10, 1991 (56 FR 31429) The additional information contained in letter dated November 27, 1991, was clarifying in nature and thus within the scope of the initial notice and did not affect the NRC staff's proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 2, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Phoenix Public Library, 12 East McDowell Road, Phoenix, Arizona 85004

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529, and STN 50-530, Palo Verde Nuclear Generating Station, Units 1, 2, and 3, Maricopa County, Arizona

Date of application for amendment: August 28, 1991 and December 30, 1991

Brief description of amendment: These amendments revise Section 6, "Administrative Controls," of the Technical Specifications to define the lines of functional responsibility more clearly, and better describe technical and review activities.

Date of issuance: March 4, 1992

Effective date: March 4, 1992

Amendment No.: 58, 45 and 31

Facility Operating License Nos. NPF-41, NPF-51, and NPF-74: The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 30, 1991 (56 FR 55942) The December 30, 1991, letter withdrew a portion of the original amendment request, but did not change the proposed no significant hazards consideration finding of the initial notice.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 4, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Phoenix Public Library, 12 East McDowell Road, Phoenix, Arizona 85004

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529, and STN 50-530, Palo Verde Nuclear Generating Station, Units 1, 2, and 3, Maricopa County, Arizona

Date of application for amendments: December 26, 1991

Brief description of amendments: These amendments revise the technical specifications to allow replacement of existing 125V dc batteries with new batteries.

Date of issuance: March 6, 1992

Effective date: March 6, 1992

Amendment Nos.: 59, 46 and 32

Facility Operating License Nos. NPF-41, NPF-51, and NPF-74: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 22, 1992 (57 FR 2586) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 6, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Phoenix Public Library, 12 East McDowell Road, Phoenix, Arizona 85004

Commonwealth Edison Company, Docket No. 50-265, Quad Cities Nuclear Power Station, Unit 2, Rock Island County, Illinois

Date of application for amendment: June 28, 1991

Brief description of amendment: Revision of Technical Specifications to reflect a modification to the High Pressure Coolant Injection turbine steam exhaust line. The amendment adds the requirements for new containment isolation valves which are part of the modification.

Date of issuance: February 21, 1992

Effective date: immediately, to be implemented during 11th refueling outage.

Amendment No.: 130

Facility Operating License No. DPR-30. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 21, 1991 (56 FR 41576) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 21, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: Dixon Public Library, 221 Hennepin Avenue, Dixon, Illinois 61021.

Commonwealth Edison Company, Docket Nos. 50-295 and 50-304, Zion Nuclear Power Station Units 1 and 2, Lake County, Illinois

Date of application for amendments: August 9, 1991 as amended December 18, 1991.

Brief description of amendments: The amendments remove the containment isolation valve tables and the associated table references from the Technical Specifications for Zion Station, Units 1 and 2.

Date of issuance: February 18, 1992

Effective date: February 18, 1992

Amendment Nos.: 133 and 122

Facility Operating License Nos. DPR-39 and DPR-48. The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 18, 1991 (56 FR 47231) The December 18, 1991 submittal amended the original submittal to retain a portion of the current technical specification and did not change the initial proposed no significant hazards consideration. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 18, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: Waukegan Public Library, 128 N. County Street, Waukegan, Illinois 60085.

Connecticut Yankee Atomic Power Company and Northeast Nuclear Energy Company, Docket Nos. 50-213 and 50-245, Haddam Neck Plant and Millstone Nuclear Power Station, Unit 1, Middlesex County and New London County, Connecticut

Date of applications for amendment: March 24, 1988, March 31, 1988, supplemented December 23, 1991

Brief description of amendments: The amendments add a license condition requiring the licensees to implement and maintain their Integrated Implementation Schedule Program Plan. This Program Plan provides a methodology to be followed for scheduling plant modifications and engineering evaluations.

Date of issuance: February 26, 1992

Effective date: February 26, 1992

Amendment Nos.: 150 for Haddam Neck, and 56 for Millstone 1

Facility Operating License Nos. DPR-61 AND DPR-21. Amendments revised the Licenses.

Date of initial notice in **Federal Register:** May 4, 1988 (53 FR 15914) for Millstone 1 and January 22, 1992 (57 FR 2591 and 57 FR 2597) for Haddam Neck and Millstone 1

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 26, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room locations: Russell Library, 123 Broad Street, Middletown, Connecticut 06457, for the Haddam Neck Plant, and the Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut 06360, for Millstone, Unit 1.

Consumers Power Company, Docket No. 50-155, Big Rock Point Plant, Charlevoix County, Michigan

Date of application for amendment: April 12, 1991

Brief description of amendment: This amendment reissues all pages of the plant Technical Specification (TS) correcting a number of editorial errors and inconsistencies between the NRC and Consumers Power Company (CPCo) copies of the TS.

Date of issuance: February 19, 1992

Effective date: February 19, 1992

Amendment No.: 107

Facility Operating License No. DPR-6. The amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** May 1, 1991 (56 FR 20030) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 19, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: August 6, 1991

Brief description of amendments: The amendments revise the maximum allowable combined flowrates for both reactor makeup water pumps for MODES 3-5 with one or both trains of the Boron Dilution Mitigation System inoperable. A restriction is also added for MODE 6 and certain administrative changes are also made.

Date of issuance: March 3, 1992

Effective date: March 3, 1992

Amendment Nos.: 94 and 88

Facility Operating License Nos. NPF-35 and NPF-52: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 26, 1991 (56 FR 66919)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 3, 1992

No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of application for amendments: December 18, 1991

Brief description of amendments: The amendments which support the McGuire Unit 2 cycle 8 reload with B&W fuel, are administrative in nature and make McGuire Unit 2 TS identical to the previously reviewed and approved McGuire Unit 1 TS (November 27, 1991). The reload methodology and analyses that supported the previously approved Unit 1 TS amendments are conservatively bounding and applicable to both McGuire units.

Date of issuance: March 6, 1992

Effective date: March 6, 1992

Amendment Nos.: 130 and 112

Facility Operating License Nos. NPF-9 and NPF-17: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 5, 1992 (57 FR 4486) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 6, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223

Duquesne Light Company, et al., Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of application for amendment: February 28, 1991

Brief description of amendment: The amendment revises the Appendix A Technical Specification Surveillance Requirement 4.7.1.5 by deleting the requirement for periodic part-stroke testing of each main steam isolation valve (MSIV) and by deleting reference to specific testing requirements. These are replaced by the requirement to verify the full closure of each MSIV within 5 seconds when tested in accordance with the requirements of Specification 4.0.5 (which references Section XI of the ASME Boiler and Pressure Vessel Code). The modified surveillance requirement is in accordance with the Standard Technical Specifications for Westinghouse pressurized water reactors.

Date of issuance: February 25, 1992

Effective date: February 25, 1992

Amendment No. 162

Facility Operating License No. DPR-66. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** May 1, 1991 (56 FR 20034) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 25, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Duquesne Light Company, et al., Docket No. 50-412, Beaver Valley Power Station, Unit No. 2, Shippingport, Pennsylvania

Date of application for amendment: October 9, 1991

Brief description of amendment: The amendment revises Table 2.2-1 (Note 1) for Technical Specification 2.2.1, "Reactor Trip System Instrumentation Setpoints." Specifically, it revises a constant in the equation used to determine the overtemperature delta temperature trip setpoint.

Date of issuance: March 2, 1992

Effective date: March 2, 1992

Amendment No.: 42

Facility Operating License No. NPF-73. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 22, 1992 (57 FR 2592) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 2, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Entergy Operations, Inc., Docket Nos. 50-313 and 50-368, Arkansas Nuclear One, Unit Nos. 1 and 2, Pope County, Arkansas

Date of amendment request: October 15, 1991

Brief description of amendments: The amendments revised the Arkansas Nuclear One, Unit Nos. 1 and 2 (ANO-1&2) by deleting the requirement for a visual cell plate inspection for the diesel fire pump battery from ANO-1 Surveillance Requirement 4.20.3.c.1 and ANO-2 Surveillance Requirement 4.7.10.1.3.c.1.

Date of issuance: February 26, 1992

Effective date: February 26, 1992

Amendment Nos.: Unit 1; 157 and Unit 2; 131

Facility Operating License Nos. DPR-51 and NPF-6. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 11, 1991 (56 FR 64654). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 26, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801

Entergy Operations, Inc., System Energy Resources, Inc., South Mississippi Electric Power Association, and Mississippi Power & Light Company, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of application for amendment: June 25, 1991

Brief description of amendment: The amendment authorized a one-time extension of the required test interval for Overall Integrated Leakage Tests (Type A Tests) as specified in Technical Specification (TS) 4.6.1.2.a. The amendment also deleted the TS 4.6.1.2.a requirement coupling the third Type A test to the plant shutdown for the 10-year Inservice Inspection (ISI) outage. The submittal also requested an exemption from 10 CFR 50, Appendix J, which requires the performance of the third Type A leak test during the shutdown for the 10-year ISI required by Section 50.55a.

Date of issuance: February 20, 1992

Effective date: February 20, 1992

Amendment No: 89

Facility Operating License No. NPF-29. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** July 24, 1991 (56 FR 33954) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 20, 1992

No significant hazards consideration comments received: No

Local Public Document Room location: Judge George W. Armstrong Library, Post Office Box 1406, S. Commerce at Washington, Natchez, Mississippi 39120.

Entergy Operations, Inc., System Energy Resources, Inc., South Mississippi Electric Power Association, and Mississippi Power & Light Company, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of application for amendment: January 11, 1991, and supplements thereto dated March 13 and October 9, 1991.

Brief description of amendment: The amendment deleted the DC battery load profiles from Technical Specification (TS) 4.8.2.1.d.2. The battery load profiles being removed are contained in the Grand Gulf Nuclear Station Updated Final Safety Analysis Report (UFSAR). The TS Bases were also modified to include a description of the simulated emergency load profiles and their definition in the UFSAR.

Date of issuance: February 25, 1992

Effective date: February 25, 1992

Amendment No: 90

Facility Operating License No. NPF-29. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** October 2, 1991 (56 FR 49917) The additional information contained in the supplemental letters dated March 13 and October 9, 1991, was clarifying in nature and thus within the scope of the initial notice and did not affect the NRC staff's proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 25, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: Judge George W. Armstrong Library, Post Office Box 1406, S. Commerce at Washington, Natchez, Mississippi 39120.

Entergy Operations, Inc., System Energy Resources, Inc., South Mississippi Electric Power Association, and Mississippi Power & Light Company, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of application for amendment: October 18, 1991

Brief description of amendment: The amendment deletes a Technical Specification requirement to perform a daily surveillance verifying the measured recirculation system drive flow to be less than or equal to the established drive flow for a given flow control valve position.

Date of issuance: February 25, 1992

Effective date: February 25, 1992

Amendment No: 91

Facility Operating License No. NPF-29. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** November 13, 1991 (56 FR 57698) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 25, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: Judge George W. Armstrong Library, Post Office Box 1406, S. Commerce at Washington, Natchez, Mississippi 39120.

Florida Power and Light Company, et al., Docket Nos. 50-335 and 50-389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of application for amendments: December 17, 1991

Brief description of amendments: These amendments remove the schedule for the withdrawal of reactor vessel material specimens from Technical Specifications. These amendments are consistent with the guidance of Generic Letter 91-01.

Date of Issuance: February 25, 1992

Effective Date: February 25, 1992

Amendment Nos.: 113, 54

Facility Operating License Nos. DPR-67 and NPF-16: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 22, 1992 (57 FR 2594) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 25, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: August 26, 1991 as supplemented by letter dated January 24, 1992.

Brief description of amendments: The amendments change the Technical Specifications by decreasing the required minimum volume for the Auxiliary Feedwater Storage Tank (AFST) from 518,000 gallons to 485,000 gallons.

Date of issuance: February 25, 1992

Effective date: February 25, 1992, to be implemented within 90 days of issuance.

Amendment Nos.: Amendment Nos. 33 and 24

Facility Operating License Nos. NPF-76 and NPF-80. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 16, 1991 (56 FR 51925) The January 24, 1992, submittal requested a 90-day implementation period following date of issuance of the amendment and did not change the initial no significant hazards consideration determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 25, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy, Center, Linn County, Iowa

Date of application for amendment: August 30, 1991

Brief description of amendment: The amendment revised the Technical Specifications to require a Service Discharge Test each operating cycle and a Performance Discharge Test in lieu of the Service Discharge Test once every 5 years.

Date of issuance: March 2, 1992

Effective date: March 2, 1992

Amendment No.: 179

Facility Operating License No. DPR-49. Amendment revised the Technical Specifications

Date of initial notice in **Federal Register:** October 2, 1991 (56 FR 49922) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 2, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S. E., Cedar Rapids, Iowa 52401.

Maine Yankee Atomic Power Company, Docket No. 50-309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of application for amendment: January 7, 1992

Brief description of amendment: This amendment eliminates the requirement to perform surveillance testing on equipment that is not required to be operable by the Technical Specifications, or on equipment that is

otherwise inoperable (e.g., maintenance, repair, etc.).

Date of issuance: February 24, 1992
Effective date: February 24, 1992
Amendment No.: 129
Facility Operating License No. DPR-36: Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** January 22, 1992 (57 FR 2597) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 24, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: Wiscasset Public Library, High Street, P.O. Box 367, Wiscasset, Maine 04578.

Niagara Mohawk Power Corporation, Docket No. 50-410, Nine Mile Point Nuclear Station, Unit 2, Scriba, New York

Date of application for amendment: November 6, 1991, as supplemented December 5, 1991

Brief description of amendment: The amendment revises Technical Specification Surveillance Requirement 4.5.1.e.2(b) to incorporate a revised automatic depressurization system test pressure. This review was required to reduce the potential of seat damage to the safety relief valves that could occur during low pressure testing.

Date of issuance: February 27, 1992
Effective date: February 27, 1992
Amendment No.: 36
Facility Operating License No. NPF-69: Amendment revises the Technical Specifications.
Date of initial notice in **Federal Register:** January 8, 1992 (57 FR 712) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 27, 1992.

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Docket Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: December 19, 1991

Brief description of amendments: These amendments revise the Technical Specification definition of Surveillance Frequency. The revised definition provides specific definitions of the surveillance intervals used throughout the Technical Specifications. In addition, the changes revise the reference date from which subsequent surveillance tests are scheduled. Finally, the changes delete redundant and potentially confusing words from the definition.

Date of issuance: February 25, 1992
Effective date: Effective upon implementation of the Plant Information Monitoring System Surveillance Testing Module.
Amendments Nos.: 166 and 170
Facility Operating License Nos. DPR-44 and DPR-56: Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** January 8, 1992 (57 FR 714) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 25, 1992.

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of application for amendment: April 9, 1991, and October 3, 1991

Brief description of amendment: This amendment revises Trojan Technical Specification (TTS) 6.5.2.2 to modify the membership requirements of the Trojan Nuclear Operation Board (TNOB), Trojan's safety review oversight group. This revision would allow for substitution of ten years of appropriate technical experience in lieu of an academic degree in engineering or science field and a minimum of five years technical experience.

Date of issuance: February 20, 1992
Effective date: February 20, 1992
Amendment No.: 180
Facility Operating License No. NPF-1: The amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** December 11, 1991 (56 FR 64660) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 20, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of application for amendment: December 12, 1991

Brief description of amendment: This amendment modifies the Trojan Technical Specification Section 6.0, "Administrative Controls." This amendment incorporates an organizational change, modifies the Plant Review Board composition, and corrects several editorial errors in Trojan Technical Specification Section 6.0.

Date of issuance: February 20, 1992
Effective date: Februardy 20, 1992
Amendment No.: 181
Facility Operating License No. NPF-1: The amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** January 8, 1992 (57 FR 714) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 20, 1992.

No significant hazards consideration comments received: No.

Rochester Gas and Electric Corporation, Docket No. 50-244, R. E. Ginna Nuclear Power Plant, Wayne County, New York

Date of application for amendment: February 15, 1991, as supplemented on May 14, 1991 (published as March 26, 1991, in Federal Register on July 24, 1991, 56 FR 33980).

Brief description of amendment: The proposed amendment would revise the pressure-temperature (P-T) limits for the reactor coolant system, the Ginna Technical Specifications, during heatup, cooldown, leak test, and criticality. The revised P-T limits were developed by the licensee to comply with the NRC position on radiation embrittlement of reactor vessel materials and its effect on plant operations, outlined in Regulatory Guide (RG) 1.99, Revision 2, and Generic Letter 88-11 guidance. The revised P-T limits also considered a re-evaluation of the low temperature overpressurization protection system (LTOPS) setpoint. The supplemental information submitted on May 14, 1991, clarified information in the application. The information did not change the scope of the amendment request or the proposed determination of no significant hazards consideration.

Date of issuance: March 6, 1992
Effective date: March 6, 1992
Amendment No.: 48

Facility Operating License No. DPR-18: Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** July 24, 1991 (56 FR 33980). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 6, 1992

No significant hazards consideration comments received: No

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610.

Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, San Diego County, California

Date of application for amendments: August 30, 1991

Brief description of amendments: The amendment modified the Technical Specifications 3/4.3.1, "Reactor Protection System Instrumentation" and 3/4.4.3.2, "Engineered Safety Features Actuation System Instrumentation" by changing the channel functional and logic units surveillance test intervals from monthly to quarterly.

Date of issuance: February 28, 1992
Effective date: February 28, 1992
Amendment Nos.: 101 and 90
Facility Operating License Nos. NPF-10 and NPF-15: The amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** October 2, 1991 (56 FR 49926) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 28, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Main Library, University of California, P.O. Box 19557, Irvine, California 92713

TU Electric Company, Docket No. 50-445, Comanche Peak Steam Electric Station, Unit 1, Somervell County, Texas

Date of amendment request: April 22, 1991, supplemented by letter dated November 4, 1991

Brief description of amendment: The amendment revises Sections 6.2 and 6.5 of the technical specifications to reflect organizational and title changes at TU Electric.

Date of Issuance: March 6, 1992
Effective date: March 6, 1992, to be implemented within 7 days of issuance.
Amendment No.: Amendment No. 9
Facility Operating License No. NPF-87. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** July 10, 1991 (56 FR 31444) and December 26, 1991 (56 FR 66930). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 6, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room Location: University of Texas at Arlington Library, Government Publications/Maps, 701 South Cooper, P. O. Box 19497, Arlington, Texas 76019.

Toledo Edison Company, Centerior Service Company, and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of application for amendment: May 10, 1991 and supplemented December 21, 1991

Brief description of amendment: This amendment revised Technical Specification (TS) 6.0., Administrative controls, Section 6.5.12, Station Review Board Composition by changing the number of members from 8 to 6. In addition, revisions to TS Sections 6.3., 6.4.1, 6.4.2, 6.5.1.4 and 6.5.1.5 reflect organizational changes and are administrative in nature. The proposed changes are similar to those approved by Amendment Numbers 20 and 10, dated November 14, 1990 issued by the NRC staff to Houston Lighting and Power Company's South Texas Project, Units 1 and 2, and Amendment Number 122, dated October 10, 1989 issued to Florida Power Corporation's Crystal River, Unit 3. The proposed changes are also consistent with the NRC Generic Letter (GL) 88-06 dated March 22, 1988, Removal of Organizational Charts from Technical Specification Administrative Control Requirements.

Date of issuance: January 31, 1992
Effective date: January 31, 1992
Amendment No. 169
Facility Operating License No. NPF-3. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** July 24, 1991 (56 FR 33962). The December 21, 1991 letter provided additional clarifying information that did not change the initial proposed no significant hazards consideration. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated January 31, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Union Electric Company, Docket No. 50-483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: August 1, 1991, clarified February 19, 1992. Based on discussions with the NRC staff, the licensee revised its request by letter dated February 19, 1992, to more closely conform with the recommendations of GL 90-09. As this revision is more conservative in defining snubber visual inspection acceptance criteria than the original proposal, the staff's proposed no significant hazards determination, dated September 4, 1991 remains valid.

Brief description of amendment: The amendment revised TS 3/4.7.8, "Snubbers," and associated Bases by changing the snubber visual inspection intervals and corrective actions. The proposed changes are consistent with the guidance of Generic Letter 90-09, dated December 11, 1990.

Date of issuance: March 5, 1992
Effective date: March 5, 1992
Amendment No.: 67
Facility Operating License No. NPF-30. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** September 4, 1991 (56 FR 43617) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 5, 1992. No significant hazards consideration comments received: No.

Local Public Document Room location: Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251 and the John M. Olin Library, Washington University, Skinker and Lindell Boulevards, St. Louis, Missouri 63130.

Virginia Electric and Power Company, et al., Docket No. 50-338, North Anna Power Station, Unit No. 1, Louisa County, Virginia

Date of application for amendment: January 8, 1992, as supplemented January 31, February 10 and February 25, 1992.

Brief description of amendment: This amendment revises the minimum allowable Reactor Coolant System total flow from the current value of 284,000 gpm to a value of 268,000 gpm. This revision is temporary and will remain in effect until the currently scheduled 1993 steam generator replacement. In addition, an administrative change has been made to Table 2.2-1.

Date of issuance: March 3, 1992
Effective date: March 3, 1992
Amendment No.: 154

Facility Operating License No. NPF-4: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 21, 1992 (57 FR 2291) The January 31, February 10 and February 25, 1992 letters provided additional information which did not change the staff's proposed no significant hazard consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 3, 1992.

No significant hazards consideration comments received: No.

Local Public Document Room location: Swem Library, College of William and Mary, Williamsburg, Virginia 23185

Washington Public Power Supply System, Docket No. 50-397, Nuclear Project No. 2, Benton County, Washington

Date of application for amendment: March 11, 1991

Brief description of amendment: The proposed amendment increases the surveillance intervals for the channel functional tests of isolation actuation instrumentation from monthly to quarterly. The proposed amendment also increases the allowable outage times for single trip system channels from 2 hours to 6 hours and clarifies when the required actions should be taken with one or more isolation actuation instrumentation channels inoperable. For those isolation actuation instruments which are common to both the Reactor Protection System and the isolation actuation instrumentation, the more restrictive requirements are proposed.

Date of issuance: March 2, 1992

Effective date: March 2, 1992

Amendment No.: 99

Facility Operating License No. NPF-21: The amendment revised the Technical Specifications.

Notice of Issuance of Amendment To Facility Operating License and Final Determination of No Significant Hazards Consideration and Opportunity For Hearing (Exigent or Emergency Circumstances)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing. For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendment. By April 17, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to **(Project Director):** petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Virginia Electric and Power Company, et al., Docket No. 50-338, North Anna Power Station, Unit No. 1, Louisa County, Virginia

Date of application for amendment: January 28, 1992, as supplemented February 27, 1992.

Brief description of amendment: This amendment limits maximum reactor power to 95% of rated thermal power and imposes more restrictive equipment operability requirements for the Emergency Core Cooling System. The changes will remain in effect until steam generator replacement is completed in 1993.

Date of issuance: March 3, 1992

Effective date: March 3, 1992

Amendment No.: 153

Facility Operating License No. NPF-4: Amendment revised the Technical Specifications and the license. Public comments requested as to proposed no significant hazards consideration: Yes,

February 5, 1992 (57 FR 4503). The notice period ends March 6, 1992. However, due to changed circumstances, the amendment was issued prior to the end of the 30-day notice period. The Commission's related evaluation of the amendment and final determination of no significant hazards consideration are contained in a Safety Evaluation dated March 3, 1992.

Attorney for licensee: Michael W. Maupin, Esq., Hunton and Williams, P.O. Box 1535, Richmond, Virginia 23212.

Local Public Document Room location: The Alderman Library, Special Collections Department, University of Virginia, Charlottesville, Virginia 22903-2498.

NRC Project Director: Herbert N. Berkow

Dated at Rockville, Maryland, this 11th day of March 1992.

For the Nuclear Regulatory Commission

Steven A. Varga,

Director, Division of Reactor Projects - I/II, Office of Nuclear Reactor Regulation

BILLING CODE 7590-01-D

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, DG-1022 (which should be mentioned in all correspondence concerning this draft guide), is a proposed Revision 3 to Regulatory Guide 1.101, "Emergency Planning and Preparedness for Nuclear Power Reactors." This guide is being developed to provide guidance to licensees and applicants on methods acceptable to the NRC staff for complying with the Commission's regulations for emergency response plans and preparedness at nuclear power reactors.

This draft guide is being issued to involve the public in the early stages of the development of a regulatory position in this area. It has not received complete staff review and does not represent an offical NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Written comments may be submitted to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by April 15, 1992.

Although a time limit is given for comments on this draft, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Distribution and Mail Services Section. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 2 day of March 1992.

For the Nuclear Regulatory Commission.

Warren Minners,

Director, Division of Safety Issue Resolution Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

Requests Under Review by Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272-2142.

Upon written request copies available from: Securities and Exchange Commission, Public Reference Branch, 450 Fifth Street, NW., Washington, DC 20549.

Extension

Rule 15a-6, File No. 270-329

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for extension of OMB approval Rule 15a-6 [17 CFR 240.15a-6] under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*), which provides, among other things, an exemption from broker-dealer registration for foreign broker-dealers that effect trades with or for U.S. institutional investors through a U.S. registered broker-dealer, provided that the U.S. broker-dealer obtains certain information about, and consents to service of process from, the personnel of the foreign broker-dealer involved in such transactions, and maintains certain records in connection therewith. It is estimated that approximately 2000 respondents will incur an average burden of three hours per year to comply with this rule.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with Securities and Exchange Commission rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, and Gary Waxman, Clearance Officer, Office of Management and Budget, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: March 9, 1992.

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34-20469; File No. SR-MSE-92-03]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by Midwest Stock Exchange, Inc. To Establish an Automatic Execution System for Limit Orders

March 11, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") 15 U.S.C. 78s(b)(1), notice is hereby given that on February 20, 1992, the Midwest Stock Exchange, Inc. ("MSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSE is proposing a system enchancement which would facilitate the execution of limit orders in a specialist's book automatically.[1] The proposed automatic execution feature ("Auto-Ex") will execute limit orders in accordance with existing MSE rules.[2] Auto-Ex will be available for all dually traded issues; however, specialists will be permitted to choose Auto-Ex on an issue by issue basis. Generally, however, Auto-Ex will be used for issues which, based on experience, have demonstrated reliable and accurate quotes in the primary market. Limit orders not subject to Auto-Ex will be "flagged" with a prompt to alert the specialist that a fill may be due.

The Auto-Ex feature will operate by comparing the size of the MSE-entered limit order against the amount of stock ahead of that order in the consolidated market. The comparison will be made against the consolidated quote size at the time the MSE limit order is received. Thereafter, the Auto-Ex system will keep track of all prints in the primary market and will automatically execute the limit order once sufficient size prints in the primary market.[3] As additional limit orders at the same price are received by the specialist, comparisons will be made and entered based upon the shares ahead of those limit orders at the time of receipt, including shares ahead on the MSE. The Auto-Ex feature will not permit a limit order to be filled out of sequence. Limit orders will not be compared for Auto-Ex purposes until such time as the limit price becomes the best bid/offer ("BBO") for the first time.[4] The proposal to establish the Auto-Ex feature applies only to limit orders. It is not applicable to marketable limit orders or to market orders.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of this proposal is to further automate the MSE's trading floor functions in order to improve the Exchange's performance in filling limit orders.[5] By providing for automatic execution of limit orders in accordance with existing Exchange rules, the MSE is eliminating the need for the manual operation required of specialists in determining when and to what extent limit orders are due fills based on primary market prints. The manual effort expended by specialists in filling limit orders that have primary market protection is often time-consuming and can result in errors, particularly when trading is busy. The present proposal will, therefore, directly benefit customers because it will result in more timely fills while eliminating errors resulting from manual execution.

Although this proposal will require additional system capacity, the time that specialists now require on the system to perform manual search and execution functions with respect to the execution of limit orders will be eliminated. It is anticipated that the implementation will result in a small net increased use of system capacity; however, the MSE believes that there are no system capacity concerns with respect to the Auto-Ex feature.

The Auto-Ex feature does not change or amend any MSE trading rules, nor will it cause or allow limit orders to be filled under different parameters than under existing rules. Auto-Ex will affect only the manner in which limit orders are filled. The MSE will continue to monitor specialist execution of limit orders through the Market Regulation/Surveillance Department and specialists will continue to be responsible for their books to the same degree as they are now under the manual execution system for limit orders.

The proposed rule change is consistent with section 6(b)(5) of the Act in that it is designed to prevent fraudulent and manipulative acts and practices; promote just and equitable principles of trade; and, help to perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe any burdens will be placed on competition as a result of the proposed rule change.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Changed Received From Members, Participants or Others

No comments were received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the Federal Register or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments,

---

[1] A limit order is an order to buy or sell a stated amount of a security at a specified price or at a better price. A limit order is called "marketable" when the prevailing best offer (bid) is equal to or less (greater) than the order price. The proposed rule change does not apply to the execution of marketable limit orders.

[2] The MSE specialist will be the contra-side of all Auto-Ex trades. Conversation between Daniel J. Liberti, Associate Counsel, MSE, and Edith Hallahan, Attorney, Commission, on February 25, 1992.

[3] For example, assume an MSE specialist receives an agency limit order to buy 2,000 shares of ABC at ½. The consolidated quote is ½ bid, ¾ offered; 5,000 shares bid and 5,000 shares offered, meaning there are 5,000 shares ahead of the MSE order. The Auto-Ex system will automatically execute the entire MSE limit order after 7,000 shares print at ½ in the primary market. However, when more than 5,000 but less than 7,000 shares print at ½ in the primary market, the order will be flagged with a flashing prompt to alert the specialist that the order may be due at least a partial fill. See MSE Article XX, Rule 37 governing primary market protection of certain limit orders.

[4] For example, if the consolidated quote is ¼ bid, ½ offered, 4,000 shares bid and 4,000 shares offered, and a specialist receives a limit order to buy 2,000 shares for ¼, that limit order will not be compared until such time as the ¼ bid is exhausted and the ¼ bid becomes the best bid. At that time, the size which is disseminated with the ¼ bid is the size against which the limit order is compared for Auto-Ex purposes.

[5] The proposed rule change is part of the MSE's initiative to improve Exchange performance in filling all orders on the MSE floor. The Exchange is currently addressing improved fills for market orders through the SuperMAX and Enhanced SuperMAX systems. See Securities Exchange Act Release No. 30058 (December 10, 1991), 56 FR 65765 (approving File No. SR-MSE-91-12).

all written statements with respect to the proposed rule change that are filed with the Commission, and all written comunications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the MSE. All submissions should refer to File No. SR-MSE-92-03 and should be submitted by April 8, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-6283 Filed 3-17-92; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-30473; File No. SR-NYSE-92-01]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to Listing Fees

March 12, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 19, 1992, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is revising the fees it charges for the listing of outstanding bond issues.[1] Currently, issuers pay listing fees based on a specified fee schedule.[2] However, a modified fee structure for outstanding issues where the issuer was listing equity on the NYSE for the first time was effective from August 1, 1989 until January 1, 1991.[3] This filing re-institutes the modified fee structure on a permanent basis.

Under the new fee structure, the fee for outstanding issues will be half the dollar amount calculated under the fee schedule for all issuers, whether or not the issuer is listing equity for the first time on the Exchange.[4] The structure also provides for the totaling of par values and the averaging of maturities of outstanding issues where more than one issue is being listed.[5] This method of calculation provides issuers with size discounts for larger issues.[6] In addition, where issuers list two or more outstanding issues, maturities will be averaged, thus providing issuers with lower listing rates for shorter maturities.[7]

To be eligible for this reduced listing fee, otherwise qualified bond issues must have been outstanding at least one year prior to application.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is restructuring its fees for listing outstanding debt by reestablishing its outstanding issues program. These restructured fees acknowledge the distinct characteristics of various categories of debt offerings and enhance the opportunity for their participation, through listing, in the Exchange's public secondary market for debt.

2. Statutory Basis

The statutory basis under the Act is Section 6(b)(4) and its requirements that a national securities exchange have rules that provide for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its services.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change establishes or changes a due, fee, or other charge imposed by the Exchange and therefore has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

---

[1] A copy of the NYSE's current bond listing fees was attached to the rule filing as Exhibit A, and is available at the NYSE as well as at the Commission. See also NYSE Listed Company Manual, § 902.02.

[2] The initial listing fee for bonds is based on both the maturity and par value of the issue. With respect to outstanding bond issues, maturity refers to the remaining life of the bond. Currently, the fee for outstanding bonds is 50% of the fee calculated pursuant to this schedule, but this reduced fee is available only for 18 months and only to companies listing equity for the first time. See note 1 of NYSE Listing Fees, Fixed Income. The NYSE is proposing to delete the 18 month limitation and permanently expand the 50% fee reduction to include all issuers currently listing equities on the NYSE who seek to list outstanding debt issues. Conversation between Donald G. Dueweke, Senior Vice President; NYSE, and Edith Hallahan, Staff Attorney, Commission, on March 5, 1992.

[3] See Securities Exchange Act Release No. 27546 (December 18, 1989), 54 FR 53016 (approving File No. SR-NYSE-89-21). This fee structure was also in effect for an 18 month period ending on July 31, 1989. See Securities Exchange Act Release No. 25313 (February 4, 1988), 53 FR 4088 (approving File No. SR-NYSE-87-50).

[4] Accordingly, at the next printing of the fee schedule, the NYSE will amend note 1 of NYSE Listing Fees, Fixed Income, to read: "Eligible bond issues outstanding at least one year prior to application." See letter from Donald G. Dueweke, Senior Vice President, NYSE, to Mary Revell, Branch Chief, SEC, dated March 5, 1992.

[5] See note 2 of NYSE Listing Fees, Fixed Income.

[6] Example: An issuer lists a 30 year, $500 million issue with 4 years remaining and a 15 year, $350 million issue with 5 years remaining. The proposed fee ($41,500) is less than the fee for the new issue of the same size and maturities ($97,750) and the fee for outstanding issues calculated individually ($49,875).

[7] Example: In the example in note 6, if the remaining life of the $350 million issue is 6 years rather than 5, the remaining life of the total is averaged to 5 years. The fee would be $41,500. If calculated individually, without totaling or averaging maturities, the fee would have been $92,000.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No. SR-NYSE-92-01 and should be submitted by April 8, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel No. IC-18610; 811-5787]

Octagon Funds, Inc.; Application

March 11, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Octagon Funds, Inc.

RELEVANT 1940 ACT SECTIONS: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order of the Commission declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on January 31, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving the applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 6, 1992, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 275 Commerce Drive, Fort Washington, PA 19034.

FOR FURTHER INFORMATION CONTACT: Eva Marie Carney, Senior Attorney, at (202) 504-2274 or Max Berueffy, Branch Chief, at (202) 272-3016 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management investment company organized as a Maryland corporation. On March 20, 1989, applicant filed a notification of registration on Form N-8A. On that same date, applicant filed a registration statement on Form N-1A pursuant to section 8(b) of the Act, and a registration statement on Form N-1A (File No. 33-27846) pursuant to the Securities Act of 1933 to register an indefinite number of shares of its Common Stock, par value $.00001 per share, of each of the following series: Octagon Quality Income Portfolio, Octagon Aggressive Growth Portfolio, Octagon Money Market Portfolio, Octagon Disciplined Asset Allocation Portfolio, Octagon Market Plus Portfolio and Octagon International ADR Portfolio. The registration statement reflects that applicant's shares were to be offered only to trusts established under an unfunded, non-tax qualified deferred compensation and fee program adopted by entities associated with USF&G Marketing, a wholly owned subsidiary of USF&G Corporation, a publicly-held insurance and financial services holding company, and USF&G Corporation, and that the program was to be made available only to a limited group of these entities' employees and independent contractors. The registration statement became effective on August 2, 1989, and the initial public offering of the shares commenced immediately thereafter.

2. As of the close of business on December 31, 1990, all of applicant's outstanding shares were held by United States Fidelity and Guaranty Company, a wholly owned subsidiary of USF&G Corporation. Immediately following the close of business on December 31, 1990, applicant redeemed all its then-outstanding shares at their net asset value determined using the valuation procedures set forth in its then-current prospectus and statement of additional information, as follows: 504,621.34 shares of the Octagon Quality Income Portfolio at $10.01 per share; 502,461.45 shares of the Octagon Aggressive Growth Portfolio at $9.98 per share; 15,451,815.32 shares of the Octagon Money Market Portfolio at $1.00 per share; 503,104.27 shares of the Octagon Growth and Income Portfolio at $8.66 per share; 501,161.31 shares of the Octagon High Yield Portfolio at $8.36 per share; 503,907.84 shares of the Octagon Disciplined Asset Allocation Portfolio at $9.20 per share; 700,059.33 shares of the Octagon Market Plus Portfolios at $9.17 per share; and 500,568.24 shares of the Octagon International ADR Portfolio at $8.00 per share.

3. Prior to its liquidation on December 31, 1990, applicant sold substantially all of its portfolio securities in open market transactions at market prices. Octagon Aggressive Growth Portfolio, Octagon Growth and Income Portfolio, Octagon Market Plus Portfolio, Octagon Disciplined Asset Allocation Portfolio, and Octagon International ADR Portfolio each incurred brokerage commissions in connection with the sale of their portfolio securities. These investment series incurred a total of $36,734 in such commissions. Applicant's other investment series incurred no brokerage commissions in connection with the sale of their portfolio securities.

4. All expenses relating to applicant's liquidation and the winding-up of its affairs, including legal, accounting, and other general and administrative expenses, were borne by USF&G Corporaton or its affiliates.

5. On June 17, 1991, applicant's Board of Directors adopted resolutions approving its dissolution under Maryland law. On January 23, 1992, applicant filed Articles of Dissolution pursuant to Section 3-401 of the Maryland General Corporation Law with the State Department of Assessments and Taxation of Maryland and was dissolved as a Maryland corporation.

6. Applicant has no assets, liabilities or shareholders. Applicant is not a party to any litigation or administrative proceeding and is not engaged in, nor does it propose to engage in, any business activities other than those

necessary for the winding-up of its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-18613; 811-2561]

Vanguard High Yield Stock Fund, Inc., Application

March 12, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Vanguard High Yield Stock Fund, Inc.

RELEVANT ACT SECTION: Section 8(f) of the Act.

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on November 27, 1991, and amended on January 6, 1992, and March 4, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 6, 1992, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 1300 Morris Drive, P.O. Box 110, Valley Forge, PA 19482.

FOR FURTHER INFORMATION CONTACT: Elizabeth G. Osterman, Staff Attorney, at (202) 272-3016, or Barry D. Miller, Branch Chief, at (202) 272-3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Prior to its dissolution, applicant was an open-end diversified management company organized as a corporation under the laws of the State of Maryland. On January 31, 1975, applicant filed a Notification of Registration pursuant to section 8(a) of the Act and a registration statement pursuant to the Securities Act of 1933 and section 8(b) of the Act. Applicant represents that its registration statement was declared effective on July 19, 1975, and it commenced its initial public offering on the same date.

2. At a meeting on December 18, 1990, applicant's board of directors approved an agreement and plan of reorganization. Applicant filed preliminary proxy materials with the SEC regarding the proposed transaction on January 18, 1991, and filed definitive proxy materials with the SEC on February 28, 1991. Applicant's shareholders approved the reorganization at a special meeting held on April 16, 1991.

3. On April 17, 1991, pursuant to the agreement and plan of reorganization, applicant transferred substantially all of its assets to The Windsor Fund Series of The Windsor Funds, Inc. (the "Acquiror") in exchange for shares of the Acquiror's capital stock.[1] The transfer of applicant's assets in exchange for shares of Acquiror's capital stock was based on the relative net asset value of the funds. Applicant distributed the Acquiror's shares acquired by it in the exchange to its shareholders on a *pro rata* basis.

4. Expenses incurred in connection with the transaction amounted to $21,600, and consisted of accounting fees and printing and processing costs associated with the proxy solicitation. Such expenses were borne by applicant.

5. Applicant was dissolved under the laws of the State of Maryland pursuant to articles of dissolution dated June 10, 1991, and filed with the Maryland Department of Assessments and Taxation on June 20, 1991.

6. As of the date of the application, applicant had no shareholders, assets, or liabilities and was not a party to any litigation or administrative proceeding.

7. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs.

[1] By letter dated December 20, 1991, counsel for applicant represented that the acquisition was in compliance with the requirements of rule 17a-8 of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

Advisory Committee to the United States Section Inter-American Tropical Tuna Commission; Closed Meeting

The Advisory Committee to the United States section of the Inter-American Tropical Tuna Commission (IATTC) will meet on April 2, 1992, at the Federal Building, Conference Room 3400, 501 West Ocean Boulevard, Long Beach, California. This session will discuss recent developments regarding the problem of dolphin mortality in the eastern Pacific tuna fisheries, as well as the U.S. position in the April 21-23, 1992 special meeting of the IATTC to address this matter. The meeting will begin at 1:30 p.m.

The Advisory Committee meeting will not be open to the public inasmuch as the discussion will involve classified matters pertaining to the United States negotiating position to be taken at the upcoming IATTC meeting. Accordingly, the determination has been made to close the session pursuant to section 19(d) of the Federal Advisory Committee Act, 5 U.S.C. App. 1, section 19(d) and 5 U.S.C. 552 (c)(1) and (c)(9).

Requests for further information on the meeting should be directed to Mr. Brian S. Hallman, Deputy Director, Office of Fisheries Affairs (OES/OFA), room 5806, U.S. Department of State, Washington, DC 20520-7818. Mr. Hallman can be reached by telephone on (202) 647-2335 or by FAX on (202) 647-1106.

Dated: March 12, 1992.

David A. Colson,

Deputy Assistant Secretary, Oceans and Fisheries Affairs.

BILLING CODE 4710-07-M

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

SUPPLEMENTARY INFORMATION: Under Title IV of the Clean Air Act Amendments, Sec. 402, Public Law 101-549, 104 Stat. 2586, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public hearing, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J.W. Dickey, to be TVA's DR for its affected utilities units, and TVA's Vice President, Fossil and Hydro Projects, W.M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

BILLING CODE 4910-81-M

National Highway Traffic Safety Administration

Denial of Defect Petition for Rulemaking and for a Motor Vehicle Defect Investigation

This notice sets forth the reasons for the denial of a petition submitted to NHTSA under section 124 of the National Traffic and Motor Vehicle Safety Act of 1966, as amended (15 U.S.C. 1381 *et seq.*).

Mr. Ralph Hoar submitted a petition dated November 22, 1991, requesting that formal steps be taken to have "LooPo Seatbelt Tension Adjusters" (LooPo) recalled, ban the sale of these and other such slack inducing devices, and issue a consumer warning that slack in belt systems compromises the protection that seat belts are designed to have. The LooPo device is designed to clip onto the upper torso restraint belt so as to limit its tension by preventing complete retraction of the belt.

To support his petition, Mr. Hoar states, "As you may know, all devices that induce seat belt slack have been banned in Australia for a number of years. NHTSA's research has established a clear correlation between belt slack and increased risk of injury. An official warning is overdue that belt slack is hazardous."

In 1989, two petitions were filed with NHTSA addressing tension relieving devices on safety belt systems. In one of the petitions, NHTSA was requested to make a determination that all vehicles with safety belt systems incorporating a "window shade" tension-relieving device contain a defect relating to motor vehicle safety. This petition was denied by the agency at 54 FR 50301, December 5, 1989. The other was a petition for rulemaking asking NHTSA to reexamine its previous decision to permit the installation of "window shade" tension-relieving devices on safety belt systems. The petition argued that these tension-relieving devices will be knowingly or unintentionally misued to introduce excessive slack and seriously compromise the occupant protection offered by the safety belt system.

In response to that petition, NHTSA determined that it was appropriate to reexamine the issue of tension-relieving devices in the context of a rulemaking proceeding. Observations of belt slack recorded in NHTSA's 19-city survey of safety belt use have consistently shown that no more than 2 percent of persons wearing their safety belts have excessive slack in their shoulder belts. In separate studies, the National Transportation Safety Board concluded, based on data from investigations of actual motor vehicle crashes, that occupants of vehicles with tension-relieving devices are not injured more frequently or more seriously than occupants of vehicles whose safety belts do not include any tension-relieving devices.

This reexamination of the issue indicated that there is no demonstrated real-world problem resulting from the use of tension-relieving devices on safety belts. Accordingly, there is no evidence that these devices are being misused to introduce excess belt slack.

The agency has screened its computerized consumer complaint system for instances where add-on tension-relieving devices were alleged to have caused or exacerbated injuries related to vehicle collisions. None were found. Further, the petitioner has provided no specific information to support his contention that tension-relieving devices create an unreasonable risk to safety.

Mr. Hoar's petition requests the agency to recall the subject device. We construe this petition as a request that NHTSA commence a proceeding to determine whether to issue an order concerning the notification and remedy of a defect in the "LooPo Seatbelt Tension Adjusters." The petition does not provide any factual data to support a finding that this device poses a serious safety risk. Separately, we screened NHTSA's computerized complaint database to determine if any reports of problems with tension-relieving devices have been reported. None were found. Under the circumstances, a defect investigation proceeding is not warranted and the petition for a defect investigation is denied.

Mr. Hoar also "petitioned" NHTSA to ban the sale of these and other such slack-inducing devices. Such a ban would be accomplished through a rulemaking process. For the reasons cited above, the agency has determined that the facts would not support issuance of a standard that would ban the sale of these devices.

Finally, Mr. Hoar petitions NHTSA to issue a consumer warning that slack in belt systems compromises the protection that seat belts are designed to provide. NHTSA has previously published consumer information on the role of belt slack in influencing effective crash protection. Mr. Hoar has not provided any new data or information that indicates that additional agency action concerning consumer information is necessary.

Since tension-relieving devices have been used widely over the past 16 years and the "in use" data do not demonstrate increased safety risk, there is no reasonable possibility that a recall order would be issued at the conclusion of an investigation into this issue. Further commitment of resources to pursue rulemaking in this area is also not warranted. Therefore, the petition is denied.

Authority: 19 U.S.C. 1410a delegations of authority at 40 CFR 1.50 and 501.8.

Issued on: March 13, 1992.

William A. Boehly,

Associate Administrator for Enforcement.

Customs Service

[T.D. 92-27]

Determination That Merchandise Imported From the People's Republic of China Is Being Produced by Convict, Forced or Indentured Labor

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Determination that merchandise is subject to 19 U.S.C. 1307.

SUMMARY: This document advises that the Commissioner of Customs, with the approval of the Secretary of the Treasury, has determined that certain diesel engines manufactured by the Golden Horse ("JINMA") Diesel Engine Factory, identified and/or marketed under the "JINMA" brand name, which are being, or are likely to be, imported into the United States from the People's Republic of China (PRC), are being manufactured with the use of convict labor and/or forced labor and/or indentured labor. The Commissioner of Customs, pursuant to 19 CFR 12.42(f) has determined, on the basis of a Customs investigation, that such merchandise is being, or is likely to be imported into the United States in violation of section 307 of the Tariff Act of 1930, as amended. As such importations of the aforementioned engines shall be considered and treated as prohibited by section 307 of the Tariff Act of 1930, as amended (19 U.S.C. 1307), unless pursuant to CFR 12.42(g), the importer establishes by satisfactory evidence that the merchandise was not mined, produced, or manufactured in any part with the use of a class of labor specified herein.

DATES: This determination shall take effect March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Harvey B. Fox, Director, Office of Regulations and Rulings, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229, (202) 566–2507.

SUPPLEMENTARY INFORMATION:

Background

Section 307, Tariff Act of 1930, as amended (19 U.S.C. 1307), provides in pertinent part:

> All goods, wares, articles, and merchandise mined, produced, or manufactured wholly or in part in any foreign country by convict labor or/and forced labor or/and indentured labor under penal sanctions shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited, and the Secretary of the Treasury is authorized and directed to prescribe such regulations as may be necessary for the enforcement of this provision.

Forced labor is defined to mean: all work or service which is extracted from any person under the menace of any penalty for its nonperformance and for which the worker does not offer himself voluntarily. See, 29 U.S.C. 1307.

Pursuant to section 307, the Secretary of the Treasury promulgated implementing regulations found at 19 CFR 12.42, *et seq.* These regulations set forth the procedure for the Commissioner of Customs to make a finding that an article is being, or is likely to be imported into the United States which is being produced, whether by mining, manufacture, or other means, in any foreign locality with the use of convict labor, forced labor, or indentured labor under penal sanctions so as to come within the purview of 19 U.S.C. 1307.

Paragraph (f) of § 12.42, Customs Regulations (19 CFR 12.42(f)), provides that if the Commissioner of Customs finds that merchandise within the purview of 19 U.S.C. 1307 is being, or is likely to be, imported, [s]he will, with the approval of the Secretary of the Treasury, publish a finding to that effect in a weekly issue of the Customs Bulletin and in the **Federal Register.**

Finding

Pursuant to § 12.42(f), Customs Regulations (19 CFR 12.42(f)), it is hereby determined that certain articles of the People's Republic of China are being, or likely to be, imported into the United States, which are being mined, produced, or manufactured with the use of convict, forced, or indentured labor.

Accordingly, merchandise, subject to this finding and indicated below, shall be denied entry, at all ports of entry and/or release from warehouse for consumption shall be prohibited. Based upon this finding, Customs officers shall withhold release of any of these articles from the People's Republic of China, otherwise than for exportation.

Articles	Item No. from the Harmonized Tariff Schedule (19 U.S.C. 1202)
Diesel Engines manufactured by Golden Horse ("JINMA") Factory	8408.10.00—8408.90.90

Approved: January 27, 1992.

Carol Hallett,

Commissioner of Customs.

Peter K. Nunez,

Assistant Secretary (Enforcement).

BILLING CODE 4820–02–M

Sunshine Act Meetings

Federal Register
Vol. 57, No. 53
Wednesday, March 18, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL HOUSING FINANCE BOARD

TIME AND DATE: 9:00 a.m., Tuesday, March 24, 1992.

SUMMARY:

PLACE: Vista Hotel, 1400 M Street, NW., Washington, DC 20005.

STATUS: The meeting will be closed to the public.

MATTERS TO BE CONSIDERED: The Finance Board will be hosting a meeting of the Advisory Council of the Federal Home Loan Bank System. Matters to be considered are the following:

1. Report on FHLBank System's Financial Status.
2. Legislative Update.
3. Annual Reports from Advisory Council Representatives.

The above matters are exempt under one or more of sections 552b(c) (2), (6), (8), (9)(A) and (9)(B) of title 5 of the United States Code. 5 U.S.C. 552b(c) (2), (6), (8), (9)(A) and (9)(B).

CONTACT PERSON FOR MORE INFORMATION: Elaine L. Baker, Executive Secretary to the Board, (202) 408–2837.

J. Stephen Britt,

Executive Director.

[FR Doc. 92–6456 Filed 3–16–92; 2:50 pm]

BILLING CODE 6725–01–M

FEDERAL HOUSING FINANCE BOARD

TIME AND DATE: 9:00 a.m., Wednesday, March 25, 1992.

PLACE: Board Room, Second Floor, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

PORTIONS OPEN TO THE PUBLIC: The Board will consider the following:

1. Monthly Reports—
   A. District Banks Directorate
   B. Housing Finance Directorate

PORTIONS CLOSED TO THE PUBLIC: The Board will consider the following:

1. Approval of the February Board Minutes
2. Legislative/Strategic Discussion—
   A. Legislative Update
   B. System Efficiencies Task Force Update
3. Advances Issues
4. District Bank Presidents' Compensation
5. Examination Report
6. Credit Product Developments
7. District Board Outreach
8. Board Management Issues

The above matters are exempt under one or more of sections 552b(c)(2), (6), (8), (9)(A) and (9)(B) of title 5 of the United States Code. 5 U.S.C. 552b(c)(2), (6), (8), (9)(A) and (9)(B).

CONTACT PERSON FOR MORE INFORMATION: Elaine L. Baker, Executive Secretary to the Board, (202) 408–2837.

J. Stephen Britt,

Executive Director.

[FR Doc. 92–6459 Filed 3–16–92; 2:50 pm]

BILLING CODE 6725–01–M

MARINE MAMMAL COMMISSION

TIME AND DATE: The Marine Mammal Commission and its Committee of Scientific Advisors on Marine Mammals will meet in executive session on Thursday, April 30, 1992, from 8:30 a.m. to 10:00 a.m. The public sessions of the Commission and the Committee meeting will be held on Thursday, April 30, from 10:00 a.m. to 5:30 p.m., on Friday, May 1, from 9:00 a.m. to 6:00 p.m., and on Saturday, May 2, from 8:30 a.m. to 1:00 p.m.

PLACE: The Sheraton Tallahassee Hotel, 101 South Adams Street, Tallahassee, Florida 32301.

STATUS: The executive session will be closed to the public. At it, matters relating to budget, personnel, internal practices of the Commission, and international negotiations in process will be discussed. All other portions of the meeting will be open to public observation. Public participation will be allowed if time permits and it is determined to be desirable by the Chairman.

MATTER TO BE CONSIDERED: The Commission and Committee will meet in public session to discuss a broad range of marine mammal matters. The primary focus of the meeting will be the conservation and recovery of the West Indian manatee. Among other matters the Commission plans to consider at the meeting are: high seas driftnet fisheries; marine mammal die-offs; the International Whaling Commission; the Mineral's Management Service's Gulf of Mexico marine mammal program; and progress on conservation and recovery plans.

SUPPLEMENTARY INFORMATION: This is a second notice of the Commission's 1992 meeting and does not constitute any significant change in the scheduling, location, or agenda of the meeting as originally published in the January 15, 1992 (57 FR 1793) notice.

CONTACT PERSON FOR MORE INFORMATION: John R. Twiss, Jr., Executive Director, Marine Mammal Commission, 1825 Connecticut Avenue, N.W., Room 514, Washington, D.C. 20009, 202/606–5504.

Dated: March 13, 1992.

John R. Twiss, Jr.,

Executive Director.

[FR Doc. 92–6364 Filed 3–16–92; 11:25 am]

BILLING CODE 6820–31–M

NATIONAL TRANSPORTATION SAFETY BOARD

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Vol. 57, No. 39/Thursday, February 27, 1992.

PREVIOUSLY ANNOUNCED TIME AND DATE: 9:30 a.m., Tuesday, March 3, 1992.

CHANGE IN MEETING: A majority of the Board Members determined by recorded vote that the business of the Board required amending the agenda to include civil penalties as a topic for discussion at a closed portion of the meeting at this time and that no earlier announcement was possible.

FOR MORE INFORMATION, CONTACT: Bea Hardesty, (202) 382–6525.

Dated: March 12, 1992.

Bea Hardesty,

Federal Register Liaison Officer.

BILLING CODE 7533–01–M

Corrections

Federal Register
Vol. 57, No. 53
Wednesday, March 18, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 172

[Docket No. 82F-0295]

Food Additives Permitted for Direct Addition to Food for Human Consumption; Acesulfame Potassium

Correction

In rule document 92-4425, beginning on page 6667, in the issue of Thursday, February 27, 1992, make the following corrections:

1. On page 6667, in the third column, in the first line, "objectives" should read "objections".

2. On page 6671, in the first column, in the first full paragraph, in the sixth line, "rat" should read "rare".

BILLING CODE 1505-01-D

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Rural Health Research Centers

Correction

In notice document 92-5221 beginning on page 8129 in the issue of Friday, March 6, 1992, make the following correction:

On page 8131, in the first column, under "Other Information", in the second line, insert "indirect" after "plus".

BILLING CODE 1505-01-D

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ID-030-02-4212-11]

Realty Action; ID

Correction

In notice document 92-4554 beginning on page 6851, in the issue of Friday, February 28, 1992, make the following corrections:

1. On page 6851, in the third column, under T. 8 S., R. 36 E., in Sec. 22, in the second line, "E½NW¼SW¼;" should read "E½NW¼SE¼;

2. On the same page, in the same column, in the last line, "Sec. 36," should read "Sec. 26,".

BILLING CODE 1505-01-D

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Subcommittee on Thermal Hydraulic Phenomena; Meeting

Correction

In notice document 92-5528, appearing on page 8495, in the issue of Tuesday, March 10, 1992, in the 2d column, in the 14th line, "6:30 a.m." should read "8:30 a.m.".

Part II

Environmental Protection Agency

Pesticide Reregistration; Outstanding Data Requirements for List B Active Ingredients (Fourth Notice)

ENVIRONMENTAL PROTECTION AGENCY

[OPP-34024; FRL 4049-6]

Pesticide Reregistration: Outstanding Data Requirements for Certain List B Active Ingredients (Fourth Notice)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1988 establishes a five-phase process for the reregistration of pesticide products containing active ingredients "contained in any pesticide first registered before November 1, 1984." During Phase 1 the Environmental Protection Agency (the Agency) divided the active ingredients subject to reregistration into four lists; List B was published in the **Federal Register** (54 FR 22706) on May 25, 1989. FIFRA requires the Administrator during Phase 4 of reregistration to publish the outstanding data requirements identified for those active ingredients being supported for reregistration. The outstanding data requirements of 74 List B active ingredients were published by the Agency among three previous **Federal Register** Notices at 56 FR 6849, February 20, 1991; 56 FR 3710, August 7, 1991; and 56 FR 54852, October 23, 1991. This fourth Notice continues the series by reporting the outstanding data requirements of 55 additional List B active ingredients. Remaining supported List B active ingredients are on a later reregistration schedule and their unfulfilled data requirements will be published in a future Notice.

FOR FURTHER INFORMATION CONTACT: By mail, Denise Greenway, Special Review and Reregistration Division (H-7508W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, Crystal Station 1, 2800 Crystal Drive, Arlington, VA 22202. Telephone No. (703) 308-8179.

SUPPLEMENTARY INFORMATION: This Notice identifies, pursuant to FIFRA section 4(f)(1)(B), the outstanding data requirements needed for reregistration of certain of the active ingredients on List B. That section also calls for the separate issuance of Data Call-In notices to registrants to obtain information satisfying these data requirements. The Agency has recently issued such Data Call-In notices to the appropriate registrants.

This SUPPLEMENTARY INFORMATION is divided into four units. Unit I provides background information on pesticide reregistration. Unit II discusses the requirements of section 4(f)(1)(B). Unit III describes the process used by the Agency in identifying outstanding data requirements. It also contains a table of the outstanding data requirements for each active ingredient. Unit IV describes the Data Call-In notices that have been issued to obtain data to satisfy the data requirements identified in this Notice.

I. Background

Section 4 of FIFRA as amended in 1988 required the Agency to conduct pesticide reregistration of older pesticides in five phases. In Phase 1, the Agency published Lists A, B, C, and D of pesticide active ingredients subject to reregistration. For Lists B, C, and D in Phase 2, registrants seeking reregistration had to identify for the Agency any data requirements which registrants believe would apply to their active ingredients, and indicate the ones that they thought were now satisfied. For those that were not satisfied, registrants had to indicate how they would fulfill the remaining data requirements necessary for the reregistration of their products. In Phase 3, these registrants summarized and in some cases reformatted studies that they believed were adequate and that they had previously submitted to the Agency. In Phase 4, the Agency is directed to review the materials submitted by registrants in Phases 2 and 3, and to identify the outstanding data requirements that need to be fulfilled in order for the Agency to determine whether or not pesticides containing particular active ingredients are eligible for reregistration. The Agency is further directed to issue Data Call-In notices to obtain data to satisfy these outstanding requirements. Finally, in Phase 5, the Agency must review the data submitted by registrants; determine whether pesticides containing particular active ingredients are eligible for reregistration; obtain product-specific information needed to determine whether particular products should be reregistered; and make final determinations on whether such products should be reregistered. The final determination on reregistration is to be based on whether a pesticide meets the standards of FIFRA section 3(c)(5), which prescribes the standards for initial registration of pesticides. If the Administrator determines that a pesticide should not be reregistered, section 4 directs the Administrator to take appropriate regulatory action.

Pursuant to FIFRA section 4(c)(2)(B) the Agency published in the **Federal Register** on May 25, 1989, a list of 229 chemicals (in 149 review cases) constituting List B of reregistration. The Agency then sent guidance on how to comply with Phase 2 of reregistration to all registrants of pesticides containing active ingredients on List B. Registrants were required by August 25, 1989, to inform EPA of their intent to seek or not to seek reregistration, to identify data requirements they believe applied to their active ingredients in their products, to identify the data requirements for which they have already submitted adequate data, and to commit to replace missing or inadequate data concerning the List B active ingredients contained in their products.

To assist registrants in complying with Phase 3, the Agency issued on December 24, 1989 the FIFRA Accelerated Reregistration —Phase 3 Technical Guidance (EPA No. 540/09-90-078). This document provides detailed instructions on: (i) Summarizing studies, (ii) reformatting studies, (iii) identifying adverse information, and (iv) identifying previously submitted studies that may not fully satisfy current requirements. To meet the requirements for Phase 3, registrants were required to submit summaries of previously submitted studies that they wished to rely on for reregistration. Additionally, for studies submitted prior to January 1, 1982, registrants had to submit a reformatted version of the study, if data were for certain toxicological and residue chemistry guidelines. Registrants were to certify that the raw data for the previously submitted studies were either in their possession, or in the possession of the Agency, or were readily accessible elsewhere. Registrants were to identify and submit any data considered under section 6(a)(2) to show an adverse effect of the pesticide. Also, registrants were to identify any other information they considered to be supportive of registration. And registrants had to commit to fill any new data gaps identified by them. FIFRA required that these actions be completed by registrants of products containing List B chemicals by May 25, 1990.

In Phase 4, the Agency has been conducting a review of the adequacy of the data submitted by registrants for active ingredients on List B during Phases 2 and 3 and in compliance with any Data Call-In notices previously issued under section 3(c)(2)(B) of FIFRA. The purpose of the Agency's review was to systematically identify all data requirements for active ingredients that, based on information available to the Agency at this time, are necessary for a determination of eligibility for reregistration. For many active ingredients, registrants may have already committed to meet some of those requirements but have not yet submitted the results of their studies to the Agency. Concurrently, to effect the submission of those data for which commitments have not yet been made, the Agency issued Data Call-In notices to affected registrants for the additional data required by the Agency. This Notice identifies the outstanding data requirements for 55 active ingredients. It includes any new data requirements identified that are the subject of Data Call-In notices being sent to affected registrants, as well as any other prior commitments of unfulfilled data requirements. Collection of this information is authorized under the Paperwork Reduction Act by the Office of Management and Budget under OMB Control No. 2070-0107.

II. Outstanding Data Requirements

Section 4 (f)(1)(B) of FIFRA requires the Agency to publish this Notice of outstanding data requirements for each active ingredient on Reregistration List B. The Agency has been conducting a review of the information provided on all List B submissions on record for data adequacy and completeness, and has identified in this followup Notice a partial list of those chemicals with outstanding data requirements. Section 2(ff) of FIFRA defines outstanding data requirements as "a requirement for any study, information, or data that is necessary to make a determination under section 3(c)(5) and which study, information, or data — (A) has not been submitted to the Administrator; or (B) if submitted to the Administrator, the Administrator has determined must be resubmitted because it is not valid, complete, or adequate to make a determination under section 3(c)(5) and the regulations and guidelines issued under such section."

For purposes of the **Federal Register** Notice, outstanding data requirements include all requirements identified by the Agency which have yet to be satisfied at the active ingredient level, before or pursuant to Phases 2, 3, and 4 of reregistration. If registrants committed during Phases 2 and 3 or pursuant to prior actions to submit data to fulfill certain data requirements, and the data have not yet been submitted, the Agency is identifying them as outstanding. Upon review of the completed studies submitted either in response to earlier Data Call-In notices or as part of the reregistration process, the Agency may need to call in some additional studies before a final determination on reregistration can be made.

As in the previous **Federal Register** Notices, the following Table 1 provides a complete listing of the Guideline Reference Numbers (GRN) and corresponding titles for the data requirements referred to in this Notice.

TABLE 1.—STUDY TITLES AND GUIDELINE REFERENCE NUMBERS OF REREGISTRATION DATA REQUIREMENTS

Guideline Reference No.	Test of Study
61-1	Product Identification and Disclosure of Ingredients[1]
61-2(a)	Description of Beginning Materials and Manufacturing Process[2]
61-2(b)	Discussion of Formation of Impurities[3]
62-1	Preliminary Analysis[4]
62-2	Certification of Limits[5]
62-3	Analytical Methods to Verify Certified Limits[6]
Physical and Chemical Characteristics[7]	
63-2	Color
63-3	Physical State
63-4	Odor
63-5	Melting Point
63-6	Boiling Point
63-7	Density, Bulk Density, or Specific Gravity
63-8	Solubility
63-9	Vapor Pressure
63-10	Dissociation Constant
63-11	Octanol/Water Partition Coefficient
63-12	pH
63-13	Stability
63-14	Oxidizing or Reducing Action
63-15	Flammability
63-16	Explodability
63-17	Storage Stability
63-18	Viscosity
63-19	Miscibility
63-20	Corrosion Characteristics
63-21	Dielectric Breakdown Voltage
64-1	Submittal of Samples
Wildlife and Aquatic Organisms Data Requirements[8]	
71-1(a)	Acute Avian Oral Toxicity (LD50) in Bobwhite Quail or Mallard Duck
71-1(b)	Acute Avian Oral Toxicity (LD50) in Bobwhite Quail or Mallard Duck (Using Typical End-Use Product)
71-2(a)	Acute Avian Dietary Toxicity (LC50) in Bobwhite Quail
71-2(b)	Acute Avian Dietary Toxicity (LC50) in Mallard Duck
71-3	Wild Mammal Toxicity Test
71-4(a)	Avian Reproductive Toxicity in Bobwhite Quail
71-4(b)	Avian Reproductive Toxicity in Mallard Duck
71-5(a)	Simulated Terrestrial Field Study
71-5(b)	Actual Terrestrial Field Study
72-1(a)	Fish Toxicity in Bluegill Sunfish
72-1(b)	Fish Toxicity in Bluegill Sunfish (Using Typical End-Use Product)
72-1(c)	Fish Toxicity in Rainbow Trout
72-1(d)	Fish Toxicity in Rainbow Trout (Using Typical End-Use Product)

TABLE 1.—STUDY TITLES AND GUIDELINE REFERENCE NUMBERS OF REREGISTRATION DATA REQUIREMENTS—Continued

Guideline Reference No.	Test of Study
72-2(a)	Invertebrate Toxicity Freshwater LC50 (*Daphnia* Preferred)
72-2(b)	Invertebrate Toxicity Freshwater LC50 (*Daphnia* Preferred-Using Typical End-Use Product)
72-3(a)	Toxicity to Estuarine and Marine Organisms (in Fish)
72-3(b)	Toxicity to Estuarine and Marine Organisms (in Mollusks)
72-3(c)	Toxicity to Estuarine and Marine Organisms (in Shrimp)
72-3(d)	Toxicity to Estuarine and Marine Organisms (in Fish - Using Typical End-Use Product)
72-3(e)	Toxicity to Estuarine and Marine Organisms (in Mollusks - Using Typical End-Use Product)
72-3(f)	Toxicity to Estuarine and Marine Organisms (in Shrimp - Using Typical End-Use Product)
72-4(a)	Early Life Stage in Fish

For further information and descriptions regarding specific data requirements, criteria for testing, and general guidance on data acceptability, consult the FIFRA Accelerated Reregistration—Phase 3 Technical Guidance document (December 24, 1989), and the Pesticide Assessment Guidelines available from the National Technical Information Service (NTIS), Attn: Order Desk, 5285 Port Royal Road, Springfield, VA 22161 (Tel: 703-487-4650).

III. Partial Listing of List B Active Ingredients Outstanding Data Requirements

The pesticide reregistration effort under section 4 has proved to be a monumental undertaking requiring significant effort and resources from both the Agency and the pesticide industry. The Agency received approximately 200 List B Phase 3 submissions for review of data requirements under Phase 4. The amount of data submitted by registrants was voluminous, and differed widely by active ingredient, the number of registrants supporting an ingredient, and the number and type of summaries and reformatted studies. In total this group of submissions contained some 5000 summaries, reformatted studies, and complete studies, and a similar number of study waiver requests that had to be reviewed and acted upon by the Agency.

For a variety of reasons EPA's issuance of the reregistration data requirements for active ingredients on List B was delayed beyond the statutory deadline of October 24, 1990. To fulfill its commitments in Phase 4 the Agency decided to publish a series of **Federal Register** notices and issue Data Call-In notices for groups of active ingredients as their outstanding data requirements are identified. The outstanding data requirements of 74 List B active ingredients were published by the Agency among three previous **Federal Register** Notices at 56 FR 6849, February 20, 1991; 56 FR 3710, August 7, 1991; and 56 FR 54852, October 23, 1991. This fourth Notice continues the series by reporting the outstanding data requirements of 55 additional List B active ingredients. Remaining supported List B active ingredients are on a later reregistration schedule and their unfulfilled data requirements will be published in a future Notice.

The 149 List B cases involving 229 active ingredients, originally published in the **Federal Register** in May 1989, have been reduced to 105 cases and 141 active ingredients as of this date. Of these, 129 active ingredients in 101 cases have completed the Phase 4 reregistration schedule. An additional 7 active ingredients in 5 cases previously unsupported in Phase 2 are now supported, and will be on a later reregistration schedule. Products containing the unsupported active ingredients have been cancelled.

The following Table 2 contains 55 List B active ingredients with data requirements that are unfulfilled by registrants at this time.

TABLE 2.—OUTSTANDING DATA REQUIREMENTS FOR LIST B ACTIVE INGREDIENTS

Case No.	Chemical No.	Chemical Name	Outstanding Data Requirements(By Guideline No.)
2055	035601	Bis(trichloromethyl)sulfone	63-8, 63-9, 63-10, 63-11, 63-12, 72-3(c), 72-4(a), 72-4(b), 81-1, 81-3, 82-5(b), 83-3(b), 84-4, 161-2, 162-3, 162-4, 163-1, 164-2
2070	035301	3,5-Dibromo-4-hydroxybenzonitrile	71-4(a), 71-4(b), 81-3, 81-6, 82-2, 83-2(b), 84-2(b), 122-1(a), 122-1(b), 122-2, 171-4(d), 171-4(j), 171-4(k), 171-4(l)
2070	035302	Bromoxynil octanoate	61-1, 61-2(a), 61-2(b), 62-1, 62-2, 62-3, 63-8, 63-9, 63-11, 63-13, 71-4(a), 71-4(b), 72-3(a), 72-3(b), 72-3(c), 72-4(a), 72-4(b), 72-5, 81-3, 81-6, 82-1(a), 82-1(b), 82-2, 84-2(a), 84-2(b), 84-4, 85-1, 123-1(a), 123-1(b), 123-2, 160-5, 161-2, 161-3, 162-2, 162-4, 163-1, 164-2, 164-5, 165-2, 165-4, 171-2, 171-4(a), 171-4(b), 171-4(d), 171-4(e), 171-4(j), 171-4(k), 171-4(l)
2075	106501	4-(1,1-Dimethylethyl)-*N*-(1-methylpropyl)-2,6-dinitro-benzeneamine	61-2(a), 61-2(b), 63-7, 63-8, 63-9, 63-11, 63-13, 72-2(a), 81-1, 81-2, 81-6, 83-3(a), 83-3(b), 162-1, 163-1, 164-1, 165-4, 171-2, 201-1, 202-1
2080	012501	Cacodylic acid	62-1, 62-2, 62-3, 63-8, 63-13, 72-3(a), 72-3(b), 72-3(c), 82-4, 85-1, 85-2, 162-1, 162-3, 162-4, 164-1, 164-2, 165-1, 165-3, 171-4(a), 171-4(b), 171-4(c), 171-4(d), 171-4(e), 171-4(j), 171-4(k), 171-4(l)
2080	012502	Sodium cacodylate	62-1, 62-2, 62-3, 63-2, 63-3, 63-4, 63-5, 63-7, 63-8, 63-13, 72-3(a), 72-3(b), 72-3(c), 82-4, 85-1, 85-2, 162-1, 162-3, 162-4, 164-1, 164-2, 165-1, 165-3, 171-4(a), 171-4(b), 171-4(c), 171-4(d), 171-4(e), 171-4(j), 171-4(k), 171-4(l)

TABLE 2.—OUTSTANDING DATA REQUIREMENTS FOR LIST B ACTIVE INGREDIENTS—Continued

Case No.	Chemical No.	Chemical Name	Outstanding Data Requirements(By Guideline No.)
2110	021202	2-(*m*-Chlorophenoxy)propionic acid, sodium salt	61–1, 61–2(a), 61–2(b), 62–1, 62–2, 62–3, 63–13, 71–1(a), 71–2(a), 72–1(a), 72–2(a), 82–1(a), 82–1(b), 83–1(a), 83–1(b), 83–2(a), 83–2(b), 83–3(a), 83–4, 84–2(b), 122–2, 160–5, 161–1, 161–2, 161–3, 162–1, 162–2, 163–1, 171–2, 171–4(a), 171–4(b), 171–4(c), 171–4(d), 171–4(e), 171–4(j), 171–4(k), 171–4(l)
2170	279500	*N*-Chloroacetyl-*N*-(2,6-diethylphenyl)glycine, ethyl ester	81–1, 81–4, 81–5, 82–2, 83–4, 123–1(a), 123–1(b), 123–2, 161–2, 171–4(e), 171–4(j), 171–4(k)
2180	034801	Ferric dimethyldithiocarbamate	61–2(a), 61–2(b), 62–1, 62–2, 62–3, 63–7, 63–13, 71–1(a), 71–2(a), 71–2(b), 72–1(a), 72–1(c), 72–2(a), 72–3(a), 72–3(b), 72–3(c), 81–6*, 82–7*, 83–4, 84–2(a), 84–2(b), 84–4, 141–1, 161–1, 161–2, 161–3, 161–4, 162–1, 162–2, 163–2, 164–1, 171–3, 171–4(a), 171–4(b), 171–4(c), 171–4(d), 171–4(e), 171–4(k)
2180	034803	Potassium dimethyldithiocarbamate	61–1, 61–2(b), 62–1, 62–2, 62–3, 63–7, 63–11, 63–12, 63–13, 71–1(a), 71–2(a), 71–2(b), 72–1(a), 72–1(c), 72–2(a), 72–3(b), 72–3(c), 72–3(d), 72–3(e), 81–3, 82–3, 161–1, 161–2, 162–3, 162–4, 163–1
2180	034804	Sodium dimethyldithiocarbamate	61–1, 61–2(b), 62–1, 62–2, 62–3, 63–7, 63–12, 71–2(a), 71–2(b), 72–1(a), 72–1(b), 72–1(c), 72–2(a), 72–3(b), 72–3(c), 81–3, 82–1(b), 82–3, 83–1(a), 83–1(b), 83–2(a), 83–2(b), 83–4, 85–1, 161–1, 161–2, 161–4, 162–3, 162–4, 163–1, 163–2
2180	034805	Zinc dimethyldithiocarbamate	61–1, 61–2(b), 62–3, 71–1(a), 71–1(b), 72–1(a), 72–1(c), 72–2(a), 72–3(a), 72–3(b), 72–3(c), 83–1(b), 83–2(a), 83–2(b), 83–4, 171–3, 171–4(a), 171–4(b), 171–4(c), 171–4(d), 171–4(e), 171–4(j), 171–4(l)
2200	036001	Dinitro-6-octyl° phenyl crotonate; 2,6-dinitro-4-octyl°phenyl crotonate; and nitrooctylphenols	63–9, 63–11, 63–13, 71–2(a), 71–2(b), 71–4(a), 71–4(b), 72–1(a), 72–1(b), 72–1(d), 72–2(a), 72–2(b), 72–3(a), 72–3(b), 72–3(c), 72–4(a), 72–4(b), 82–1(a), 82–2, 83–1(a), 83–1(b), 83–2(a), 83–2(b), 85–1, 85–2, 86–1, 121–1, 122–1(a), 122–1(b), 122–2, 132–1(a), 132–1(b), 133–3, 133–4, 141–1, 161–2, 161–3, 162–1, 162–2, 162–3, 163–1, 165–1, 165–4, 171–4(a), 171–4(b), 171–4(c), 171–4(d), 171–4(e), 171–4(j), 171–4(k), 171–4(l)
2205	067701	2-(Diphenylacetyl)-1,3-indandione	61–2(a), 72–1(a), 72–1(c), 72–2(a), 81–1, 81–2, 81–3, 81–4, 81–5, 82–1(a), 83–3(a), 83–3(b), 85–1, 86–1, 161–1, 161–2, 161–4, 162–1, 162–2, 162–4, 163–1, 164–2, 164–3, 165–3

TABLE 2.—OUTSTANDING DATA REQUIREMENTS FOR LIST B ACTIVE INGREDIENTS—Continued

Case No.	Chemical No.	Chemical Name	Outstanding Data Requirements(By Guideline No.)
2670	060101	2-(4-Thiazolyl)benzimidazole	63–7, 63–10, 63–12, 63–13, 72–1(a), 72–3(a), 72–3(b), 72–4(a), 84–2(a), 84–2(b), 122–2, 161–1, 161–2, 162–3, 162–4, 163–1, 164–2, 164–5, 165–3, 171–4(d) 171–4(e), 171–4(f), 171–4(g), 171–4(h), 171–4(k)
2670	060102	2-(4-Thiazolyl)benzimidazole, hypophosphite salt	61–1, 61–2(a), 61–2(b), 63–7, 63–10, 63–12, 63–13, 71–1(b), 71–2(a), 71–2(b), 72–1(b), 72–1(d), 72–2(b), 81–3, 84–2(a), 84–2(b), 85–1
2710	116002	Triethylammonium triclopyr	61–2(a), 61–2(b), 62–1, 62–3, 63–3, 63–4, 63–5, 63–7, 63–12, 71–2(a), 71–4(a), 71–4(b), 72–1(a), 72–1(b), 72–1(c), 72–1(d), 72–2(a), 72–2(b), 72–3(b), 72–3(c), 72–3(e), 72–3(f), 72–4(a), 72–4(b), 72–6, 82–1(a), 82–2, 83–4, 84–2(a), 84–2(b), 84–4, 123–2, 160–5, 164–1, 165–4, 171–3, 171–4(a), 171–4(b), 171–4(e), 171–4(k), 201–1, 202–1
2710	116004	Butoxyethyl triclopyr	61–2(a), 61–2(b), 62–1, 62–3, 63–7, 63–8, 63–9, 63–11, 72–2(b), 72–3(a), 82–2, 123–2, 161–3, 162–1, 162–3, 164–1, 165–4, 171–3, 171–4(a), 171–4(e), 171–4(k), 171–6, 201–1, 202–1
2740	113201	3-(3,5-Dichlorophenyl)-5-ethenyl-5-methyl-2,4-oxazolidinedione	71–4(a), 71–4(b), 71–4(c), 82–1(a), 83–1(a), 83–2(a), 83–2(b), 83–3(b), 84–4, 85–1, 85–2, 122–2, 132–1(a), 133–3, 133–4, 161–2, 162–2, 162–3, 164–1, 165–2, 165–4, 171–4(k), 231–x*, 232–x*

KEY: * Special Studies; Guidelines for the following studies are presently being developed (for more information, contact the person named in the Notice):

81–8 Acute Neurotoxicity Screening—Rat.
82–7 90–Day Neurotoxicity Screening—Rat.
85–4 Ocular Toxicity Study—Dog.
231–x Estimation of Dermal Exposure, Outdoor Sites.
232–x Estimation of Respiratory Exposure, Outdoor Sites.
233–x Estimation of Dermal Exposure, Indoor Sites.
234–x Estimation of Respiratory Exposure, Indoor Sites.
GLN–x Environmental Availability Testing, no guideline number has yet been assigned.

This list contains 55 currently supported active ingredients reviewed during Phase 4 of reregistration and their outstanding data requirements identified as Guideline Reference Numbers. In a number of instances, registrants have already committed to satisfy many of these requirements, with the remaining requirements being subject to the recently issued Data Call-In notices. Of these, some may have been partially satisfied by studies that can be upgraded or supplemented with additional data. The data needs for specific crops are not presented here; instead the overall Guideline Reference Number is listed if any crop specific data are outstanding, even though some individual crop data requirements under it may be in fact satisfied.

IV. Phase 4 List B Data Call-In Notices

Under FIFRA section 3(c)(2)(B) the Agency has issued to affected registrants Phase 4 List B Data Call-In notices for the outstanding data requirements that registrants have not previously committed to satisfy for the active ingredients listed on Table 2 of this Notice. Registrants with unfilled data requirements for their active ingredients must respond to the Agency within 90 days of receipt of their Data Call-In Notice to express their intent to satisfy the remaining data requirements. The data requirements identified in the Data Call-In notices must be submitted within the time schedule specified in them. Additional Data Call-In notices for the remaining List B chemicals not covered by this followup Notice will be sent to the affected registrants, coinciding with the publication of one or more additional **Federal Register** notices in the next several months.

Dated: March 5, 1992.

Part III

Department of Labor
Employment and Training Administration

Department of Education
Office of Vocational and Adult Education

Skill Standards and Certification Issues Paper; Public Meetings; Notice

DEPARTMENT OF LABOR

Employment and Training Administration

DEPARTMENT OF EDUCATION

Office of Vocational and Adult Education

Skill Standards and Certification Issues Paper; Public Meetings

AGENCIES: Employment and Training Administration; Labor; and Office of Vocational and Adult Education, Education.

ACTION: Request for comments: Notice of public meetings.

SUMMARY: The Employment and Training Administration (ETA) of the Department of Labor and the Office of Vocational and Adult Education (OVAE) of the Department of Education are announcing five public meetings to be held to provide interested parties opportunities to present their views to ETA, OVAE and the National Advisory Commission on Work-Based Learning (NACWBL) on issues related to the development of voluntary, industry-based skill standards and certifications. Written submissions on this topic are also being solicited.

The President charged the Departments of Labor and Education to jointly pursue this issue in response to the needs of business, workers, educators, training providers and governments. This mandate was officially conferred under America 2000, the President's education strategy. This notice is the first step in answering the President's charge and there will be further opportunities for public involvement in discussions on this issue.

DATES: The dates of the five public meetings are as follows:

April 14, 1992 Boston, Massachusetts.
April 21, 1992 Atlanta, Georgia.
April 24, 1992 Chicago, Illinois.
April 28, 1992 San Francisco, California.
April 30, 1992 Washington, DC.

Persons desiring to present oral statements at a meeting must provide a notice of intent to appear, postmarked no later than seven calendar days before the date of the hearing.

Written statements from persons not presenting oral statements must be postmarked no later than May 29, 1992 and be sent to the U.S. Department of Labor Office of Work-Based Learning, Room N–4649, 200 Constitution Avenue NW., Washington, DC 20210 or to the U.S. Department of Education, Office of Vocational and Adult Education, Division of National Programs, MES–4518, 330 C Street SW., Washington, DC 20202–7242.

ADDRESSES: The meetings are open to the public. The locations are shown below.

April 14, 1992 Boston, Massachusetts, O'Neill Federal Building, Auditorium, 10 Causeway Street, Boston, Massachusetts 02222.
April 21, 1992 Atlanta, Georgia, Georgia International Convention and Trade Center, Biltmore II, 1902 Sullivan Road, College Park, Georgia 30337.
April 24, 1992 Chicago, Illinois, State of Illinois Building, room 9–040, 100 West Randolph Street, Chicago, Illinois 60601.
April 28, 1992 San Francisco, California, ANA Hotel, Cabernet II, 50 Third Street, San Francisco, California 94103.
April 30, 1992 Washington, DC, The Pullman Highland Hotel, 1914 Connecticut Avenue NW., Washington, DC 20009.

FOR FURTHER INFORMATION CONTACT: James Van Erden, Administrator, Office of Work-Based Learning, room N–4649, 200 Constitution Avenue NW., Washington, DC 20210 (Telephone: 202/535–0840) or Debra J. Nolan, Senior Program Advisor, Business and Education Standards, Division of National Programs, MES–4518, Office of Vocational and Adult Education, U.S. Department of Education, 330 C Street SW., Washington, DC 20202–7242 (Telephone: 202/732–2417).

SUPPLEMENTARY INFORMATION:

Background

The need to improve the quality of information affecting employment-related choices is heightened by the changing economic environment in which the United States now competes. For decades, America has held the competitive advantage in the world marketplace on the basis of superior mass production. In today's economy, there is increased emphasis on quality, variety, customization, convenience and timeliness, placing greater importance on the skills of the individual front-line worker.

Nearly 85 percent of America's workforce for the year 2000 is in the workforce today and of that number, by some estimates, 25 million already need to update their skill or knowledge base to keep pace with the changing economy and technology. New entrants to the labor market will consist primarily of women and minorities, groups traditionally disadvantaged in the workplace. These factors, combined with the fact that higher education levels will be required for many of our workers, only raise the importance of life-long learning for the American worker.

In 1990, at the National Education Summit the President and the nation's governors adopted six national education goals intended to close America's skills-and-knowledge gap. On April 18, 1991, the President introduced America 2000, a strategy for achieving these goals. This strategy is divided into four tracks with each track being tied to one or more of the six national education goals.

Track III of America 2000, serves National Education Goal Number Five, which reads, "Every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship." Adult Americans are challenged to go back to school and make this a nation of students. To enable them to meet this challenge, the Secretaries of Labor and Education are charged with spearheading a public-private partnership to help develop voluntary, industry-based skill standards for all industries.

As part of the overall strategy, Track III asks business and labor, "to adopt a strategy to establish job-related (and industry-specific) skill standards, built around core proficiencies, and to develop skill certificates to accompany these standards." The President reemphasized his concern for improving the quality of job training in the Job Training 2000 initiative recently announced.

Voluntary, industry-based skill standards and certificates may be used to inform decision-making in all sectors of the economy. For example,

- Industries may use skill standards as a vehicle for informing training providers and prospective employees of skills required for employment;
- Employers may use the attainment of skill certification to reduce the costs and legal risks associated with the assessment of job candidates and make more objective employment decisions;
- Labor organizations may use skill standards to increase their members' employment security and marketability through access to competency-based training and certification;
- Workers may choose to obtain certification of their skills for many reasons, including: to help protect against dislocation, to pursue career advancement and to enhance their

ability to reenter the workforce by having a work portfolio based on training to industry standards;

- Training providers (colleges, high schools, vocational education institutions, private training bodies and companies, industry-based training and employers) may use skill standards to determine appropriate educational goals and objectives and training services to offer; and
- Government may use skill standards and competency-based outcomes to protect the integrity of public expenditures by requiring that employment-related training meet industry standards where they exist.

This notice of public hearings and request for comments is the first step in shaping this important tool for choice. In addition to this public dialogue, the Track III activities of the Departments of Labor and Education will be informed by research, the results of technical assistance and pilot projects, and the work of the National Advisory Commission on Work-Based Learning (NACWBL) and the Secretary of Labor's Commission on Achieving Necessary Skills (SCANS). SCANS, for example, has made some progress in identifying the generic skill requirements of the workplace which lay the foundation for the job-related, industry-specific skill standards addressed by the President.

Definition of Terms

Generally, a *job-related industry skill standard* is the identification of the knowledge, skill and level of ability needed to satisfactorily perform a given job. These standards may be specific to a given occupation, cross occupational lines or apply to groupings of occupations. This concept of skill standards can be tailored to any industry, to reflect its particular needs and economic environment.

Proficiency indicates the ability to perform the activities within an occupation to the set standard. It may incorporate the ability to apply the relevant skills and knowledge to new situations within the occupational area as well as generic skills.

Core proficiencies indicate capabilities for performing activities that are common across occupational areas and can be built upon during the course of a career.

Certification is the provision of a certificate or award to individuals, indicating the attainment of a skill, certain skills or knowledge, usually as a result of a competency-based assessment process.

Assessment is the process of measuring performance against a set of standards (through examination, practical tests, performance observation and/or the completion of portfolios of work and assignments).

Existing Skill Standards and Certification

Some industries and professional and technical associations already offer employers and individuals better information than other industries and associations by developing skill standards and worker certification opportunities.

- By some estimates, 200 industry associations have systems of standards and certification in place to improve the skills of their members' employees, to increase the quality of choice for employers and employees and to provide quality assurance for customers.
- Professional and technical associations have developed processes for setting education and occupational entry standards and, in some cases, standards for skills maintenance which members must meet to continue to practice in a particular occupation. Individuals wanting to enter these occupations have clear roadmaps of the choices they must make to be able to qualify to work. Employers are able to choose among qualified individuals without the need for additional, expensive testing arrangements.
- National programs such as those developed by the construction industry and registered with the Department of Labor's Bureau of Apprenticeship and Training and the Federal Aviation Administration's competency requirements for aircraft frame technicians have been developed to provide national standards and quality assurance for employers. At the same time, individuals who may wish to seek a career in these areas can see what is required of them and make informed choices about enrolling in training programs.

The American Institute of Banking (AIB), the National Institute for Automotive Service Excellence (ASE) and the Printing Industries of America (PIA) are examples of industry associations that have established standards and certification processes. The AIB, for example, has initiated a voluntary certification program for mid-level occupations such as trust officer, compliance officer and security officer to respond to deregulation, interstate banking and the development of new products and services. ASE was founded to promote the highest standards of automotive service and, as part of its strategy for achieving that goal, administers competency-based assessments in nineteen specialty areas. PIA initiated a certification program, PrintED, to respond to a nationwide shortage of skilled workers.

In a number of industries, joint labor-management bodies have guided the development of skill standards. For example, the Seafarers International Union and private ship owners jointly founded the Seafarer's School of Seamanship in Piney Point, Maryland. Detailed curricula have been designed for specific occupations, with promotion from one level to the next being determined by performance of practical job factors, behavior and traditional written examinations. In cooperation with the State of Maryland, the school also offers associate arts degrees in Marine Engineering and Nautical Science.

The Vocational-Technical Education Consortium of States (V–TECS) is notable as the largest system in the United States for converting job analysis information into curriculum objectives and vehicles for assessing student achievement.

Other organizations that have ongoing efforts to define and measure employability and workplace competencies include the National Occupational Competency Testing Institute (NOCTI), the Educational Testing Service (ETS), American College Testing Service (ACT), the American Society for Training and Development (ASTD), and the Secretary of Labor's Commission on Achieving Necessary Skills (SCANS).

Standards and certification processes have long been used by professional and technical associations to protect the consumer by assuring the competence of members. Doctors, engineers, lawyers, accountants and nurses are examples of professional and technical occupations for which standards have been developed to determine occupational competence. The standards used in these occupations set the requirements for certification of competence through licensing and promote consumer information and choice.

The Department of Labor's Bureau of Apprenticeship and Training approves standards for formal, industry-based apprenticeship programs where apprentices participate in training programs which combine class-room and job-site instruction. While the standards setting process is often time-based rather than competency-based, the apprenticeship model may offer useful experience in the development and use of skills within a national standards and certification framework.

Similarly, the Federal Aviation Administration has established minimum competency requirements for

technicians working on aircraft frames. Post-secondary programs that address the competencies can be certified by the FAA. Schools must offer a specific curriculum and attest to the competency of students at the completion of the program.

The military provides yet another example. In addition to their military mission, the armed forces (Army, Navy, Marine Corps and Air Force) are the largest training organizations in the United States. The Army offers employment and training in 32 occupational career fields, the Navy 24, the Marine Corps 36 and the Air Force 47. In each of the career fields, classroom, technical and work-based learning opportunities are available. Advancement is dependent upon occupational skill improvement; higher skills are clearly correlated with higher rank.

Key Issues

In order to proceed with the Track III directive on voluntary, industry-based skill standards and certification, four major issues must be raised for public comment and discussion that directly affect the development of an appropriate approach. These issues are:

1. What should be the guiding principles for the development of voluntary, industry-based skill standards in the context of the social, economic and political realities of the United States?

2. What will be the effect of voluntary, industry-based skill standards and certification on the decision-making processes of industry, organized labor, joint labor-management committees, individual firms and workers, educational institutions providing occupational, vocational and technical training and federal, state and local governments?

3.What are the appropriate roles and responsibilities of industry, labor organizations, joint labor-management committees, educators, community-based organizations and governments in the development, implementation, promotion, dissemination and maintenance of voluntary, industry-based skill standards and certification?

4. What processes should be followed in the development, implementation, promotion, dissemination and maintenance of voluntary, industry-based skill standards?

Each of these issues is presented below with a series of questions intended to begin a discussion of the most appropriate way to implement voluntary, industry-based skill standards. The list is not considered to be exhaustive, nor is it prioritized.

Issue #1

The first major issue is the identification of the principles which should guide the development of voluntary, industry-based skill standards in the context of the social economic and political realities of the United States.

Several meetings, briefings and roundtables were held during the summer of 1991 to discuss the issues related to skill standards and certification. As a result of these meetings, further research, discussions between the Departments of Labor and Education, meetings with industry associations and labor organizations and a wealth of commission reports and academic studies, it is suggested that the guiding principles of voluntary, industry-based skill standards be:

- Bench marked to world-class levels of industry performance;
- Tied to measurable, performance-based outcomes that can be readily assessed;
- Based on broadly defined occupational categories within industries in order to promote a highly skilled and flexible work force;
- Comparable across industries, similar occupations, and states;
- Applicable to a wide variety of education and training service providers, both work- and school-based;
- Developed independently of any single training provider or type of training provider;
- Based on a relatively simple structure to make the system readily understandable for those who use it;
- Useful for qualifying new hires and for continuously upgrading the skills of employees;
- Free from and reduce gender, age, racial and any other form of bias of discriminatory practices; and
- Responsive to readily changing work organizations, technologies and market structure.

While this list is clearly not exhaustive, it is intended to identify the guiding principles and requirements of skill standards.

- Are these principles appropriate and sufficient to guide industry, education, labor organizations, and state and federal governments in the voluntary development of skill standards and certification?
- If not, what should be added, omitted or varied?

Issue #2

The second major issue posed is what would be the effect of voluntary, industry-based skill standards and certification on the decision-making processes of industry, organized labor, educational and other institutions providing occupational, vocational or technical training, individual firms and workers and federal, state and local governments. For example, would skill standards and certification,

- Enable individuals, employers and governments to improve the quality of their training investment decisions by giving them a means of assessing the quality of training programs?
- Provide workers with an identified career path?
- Provide employers with objective hiring criteria?
- Help workers to identify what skills are needed to perform a job and to evaluate their own grasp of those skills?
- Assist labor organizations in representing the interests of their members with regards to career paths, compensation and ongoing skills training?
- Provide a basis for specifying curricular objectives in educational institutions?
- Ease the transition from school- to work-based learning, or from high school to post-secondary school?
- Offer a means of recognizing skills obtained outside of the formal education system?

And, if so, how?

Issue #3

The third major issue pertains to the particular designation of responsibilities in the development, implementation, promotion, dissemination and maintenance of skill standards and certification among the various stakeholders: industry, labor organizations, joint labor-management committees, educators, community-based organizations and federal, state and local governments.

- While each stakeholder is dependent upon the cooperation of all the others, who should take the lead and what are the specific roles of each stakeholder?
- What is an 'industry' and what are the appropriate criteria for deciding who represents 'industry'?
- Understanding that the responsibility for most education and training lies at the state and local level and in individual plants, establishments or larger firms, how should the need for local delivery be reconciled with the reality of national and international labor markets?
- What are the appropriate roles of federal, state and local governments in the development, implementation, promotion, dissemination and maintenance of skill standards and certifications? What is the appropriate division of responsibilities among these levels of government?

Issue #4

The fourth major issue is the process for the development, implementation, dissemination and maintenance of voluntary industry-based skill standards.

- Is a national framework needed? If so, what should it look like? If not, how can consistency among industries, between industry and educators and within occupational groups which transcend industries be assured?
- Which structure will best guarantee the existing workforce access to the means for achieving the standards?
- Which structure will best insure that standards will quickly adapt to advances in technology, changes in the organization of work and other factors which will continue to evolve over time?
- Which structure will best facilitate the extensive and continuous collection and dissemination of information about skill standards which will be necessary?

Notice of Public Hearings and Request for Comment

To explore fully the above issues and any other issues which interested parties may wish to raise, the Departments of Labor and Education are requesting public comment on issues related to the development of voluntary industry-based skill standards and certifications.

Written statements from persons not presenting oral statements or persons wishing to comment on issues raised in the following paper should submit such comment to the Department of Labor, Office of Work-Based Learning, room N–4649, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210 or to the U.S. Department of Education, Office of Vocational and Adult Education, Division of National Programs, MES–4518, U.S. Department of Education, 330 C Street SW., Washington, DC 20202–7242.

Oral comments may be presented at a series of five public meetings that will be convened by the Departments of Labor and Education and in cooperation with the National Advisory Commission on Work-Based Learning.

Locations and Dates

The meeting locations and dates are as follows:

April 14, 1992 Boston, Massachusetts, O'Neill Federal Building, Auditorium, 10 Causeway Street, Boston, Massachusetts 02222.

April 21, 1992 Atlanta, Georgia, Georgia International Convention and Trade Center, Biltmore II, 1902 Sullivan Road, College Park, Georgia 30337.

April 24, 1992 Chicago, Illinois, State of Illinois Building, room 9–040, 100 West, Randolph Street, Chicago, Illinois 60601.

April 28, 1992 San Francisco, California, ANA Hotel, Cabernet II, 50 Third Street, San Francisco, California 94103.

April 30, 1992 Washington, DC, The Pullman Highland Hotel, 1914 Connecticut Avenue, NW., Washington, DC 20009.

The meetings will commence at 9 a.m. and adjourn at 4 p.m. There will be a lunch break from 12 p.m. to 1 p.m. The meetings will be open to the public.

Participation of Interested Parties

An opportunity to present oral statements concerning the issues raised above will be provided at these public meetings. Notices of intent to present oral statements must be postmarked seven calendar days before the date of the hearing and must be mailed to the appropriate Department of Labor regional office. Notice of intent to present oral statements in Boston should be sent to: Holly O'Brien, U.S. Department of Labor, Employment and Training Administration, One Congress Street, Boston, Massachusetts 02203.

Notices of intent to present oral statements in Atlanta should be sent to: Mary Smarr, U.S. Department of Labor, Employment and Training Administration, 1375 Peachtree Street, NE., Atlanta, Georgia, 30367.

Notices of intent to present oral statements in Chicago should be sent to: Louis Gibert, U.S. Department of Labor, Employment and Training Administration, 230 South Dearborn Street, Chicago, Illinois, 60604.

Notices of intent to present oral statements in San Francisco should be sent to: Jeff Salzman, U.S. Department of Labor, Employment and Training Administration, 71 Stevenson Street, San Francisco, California, 94105.

Notices of intent to present oral statements in Washington, DC, should be sent to: Mae Brown, U.S. Department of Labor, Employment and Training Administration/OWBL, room N–4649, 200 Constitution Avenue, NW., Washington, DC 20210.

The notice of intent must contain the following information:

(1) The name, title, address and telephone number of each person to appear;

(2) Affiliation;

(3) The issues and/or concerns that will be addressed.

Individuals who do not register in advance will be permitted to register and speak at the meeting, in order of registration, subject to scheduling constraints. Speakers should plan to limit their comments to five minutes; longer presentations will be allowed if time permits. While it is anticipated that all persons desiring to speak will have an opportunity to do so, time constraints may not allow this to occur. However, all written statements will be accepted and incorporated into the public record. The Departments of Labor and Education, in consultation with the National Advisory Commission on Work-Based Learning will make the final determination on selection and scheduling of speakers.

The public hearings will be audiotaped and transcribed.

Meeting Procedures and Objectives

A Commissioner of the National Advisory Commission on Work-Based Learning will preside at each of the five meetings. The Commissioner will:

1. Regulate the course of the meeting including the order of appearance of persons presenting oral statements;

2. Dispose of procedural matters;

3. Confine the presentations to matters pertinent to the purpose of the implementation of voluntary, industry-based skill standards and certification.

Signed in Washington, DC, on this 9th day of March.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

Betsy Brand,

Assistant Secretary for Vocational and Adult Education.

Department of Justice

Office of Juvenile Justice and Delinquency Prevention

Missing Children's Assistance Act: Proposed Program Priorities for Fiscal Year 1992 and Comment Period; Notice

DEPARTMENT OF JUSTICE

Office of Juvenile Justice and Delinquency Prevention

Missing Children's Assistance Act: Proposed Program Priorities for Fiscal Year 1992 and Comment Period

AGENCY: Office of Juvenile Justice and Delinquency Prevention, Office of Justice Programs, Justice.

ACTION: Notice of Proposed Priorities and comment period for Fiscal Year 1992 Research, Demonstration, and Service Program Priorities and Merit Selection Criteria under the Missing Children's Assistance Act.

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is publishing its Fiscal Year 1992 proposed program priorities for making grants and contracts under section 405 of title IV (the Missing Children's Assistance Act) of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, 42 U.S.C. 5775.

DATES: All comments must be received by 5 p.m. EDT on May 18, 1992.

ADDRESSES: All comments must be mailed or sent to: Director, Missing and Exploited Children's Program, Office of Juvenile Justice and Delinquency Prevention, 633 Indiana Avenue NW., Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: Kathryn Turman at the above address. Telephone (202) 616–3631.

SUPPLEMENTARY INFORMATION: Responsibility for establishing annual research, demonstration, and service program priorities and criteria for making grants and contracts pursuant to section 405 of the Missing Children's Assistance Act rests with Administrator of the Office of Juvenile Justice and Delinquency Prevention. For FY 1992, 12 new programs, one new award for a continuing program, and a jointly OJJDP–NIJ funded program to be administered by NIJ will constitute all proposed section 405 priority funding areas. The Administrator is hereby announcing these final priorities, specifying merit and performance criteria to be applied in their review.

During FY 1992 other new programs, or continuations of currently funded programs, may also be funded under sections 404 and 408 of the Missing Children's Assistance Act, 42 U.S.C. 5773 and 5778. Solicitations to fund all new Title IV assistance awards in amounts exceeding $50,000 will be announced in the **Federal Register** and competitively awarded. Described below are discretionary programs being planned for funding under section 405 of the Missing Children's Assistance Act followed by a listing of continuation programs currently funded under section 405 that are proposed as eligible to receive continuation funding during their currently existing project periods. Following the sixty-day comment period, OJJDP will publish in the **Federal Register** a final plan, including the substantive comments received. Thereafter, OJJDP will publish and make available a document including full program announcements of those programs labeled "new programs" and the application kit.

Introduction and Program Update

The Missing and Exploited Children's Program was established by Congress in the 1984 Missing Children's Assistance Act as Title IV of the Juvenile Justice and Delinquency Prevention Act, as amended. The Office of Juvenile Justice and Delinquency Prevention in the Office of Justice Programs, U.S. Department of Justice is the Federal agency that has the responsibility for administering the Missing and Exploited Children's Program.

The Missing Children's Assistance Act requires OJJDP to facilitate coordination among all federally funded programs relating to missing children; to establish and operate a national 24-hour toll-free telephone line; to establish and operate a national resource center and clearinghouse; to coordinate public and private programs which locate, recover, and reunite missing children with their legal custodians; to disseminate nationally information about effective missing children's programs, services, and legislation; and to provide technical assistance and training to law enforcement, State and local governments, the criminal justice system, public and private agencies, and other individuals involved with missing children's cases.

OJJDP funds and coordinates many activities on behalf of missing children, including the National Center for Missing and Exploited Children, a network of 43 State clearinghouses; nonprofit organizations; research and demonstration programs; and training and technical assistance for law enforcement personnel, judges and prosecutors. OJJDP sponsors a comprehensive five day training program for law enforcement officers on the investigation of missing, exploited, and abused children and a new advanced technical assistance course will be offered beginning in early 1992. OJJDP also provides assistance to the Department of Defense in the design of an extensive child maltreatment investigative course for the military and helps to train tribal police on Indian lands.

The National Center for Missing and Exploited Children (NCMEC) utilizes the latest in advanced computer technology to assist in the timely collection and dissemination of leads and information on missing children's cases. Currently, NCMEC is in the process of updating photos of children missing for two years or longer using computer photo age progression technology. State missing children clearinghouses are being linked to NCMEC via computer. In order to meet the increasing number of requests for age progression, regional age progression technology labs will be established in three to four state clearinghouses. Valuable technical assistance is provided through the National Center for Missing and Exploited Children to police departments, investigators, and prosecutors on individual missing children's cases. Assistance and referrals are also offered to parents and families of missing and exploited children. Plans are currently going forward to recruit and train retired law enforcement officers to provide consultation and specialized technical assistance on breaking or long-term missing child cases to police departments and other law enforcement agencies upon request.

Culminating a 5-year effort, the first findings of the National Incidence Study of Missing, Abducted, Runaway and Thrownaway Children (NISMART) were released in May, 1990. NISMART identified distinct and separate problems affecting five categories of children who are missing or displaced, including victims of family abductions. Further research is continuing to develop an array of responses for each type of problem. Major research projects are nearing completion on the following issues: Obstacles to the recovery and return of parentally abducted children, police handling of missing and exploited children cases, the child victim as witness, the psychological consequences of family and non-family abductions and runaway episodes on children and their families, and the problems of reunification of missing children with their families. Additional data analysis of the first NISMART study (ADD-NISMART) will be looking at the high number of attempted abductions identified, the category of "lost, injured and otherwise missing" children, as well as other issues. OJJDP expects that directions for further research in these areas will be indicated. FY 1992 funds provided for research programs which will focus on the sexual exploitation of

children and tracking of these cases, effective screening practices for child and youth service workers, and risk factors and promising interventions in parental abduction cases. An on-going Interagency Agreement with the FBI Academy's Behavioral Science Unit is providing valuable information and analysis through profiles of child molesters, abductors who kill their child victims, and infant abductors. Other programs seek to reduce the harmful effects of abduction and exploitation of missing children on children and families and to prosecute offenders.

A number of research projects will be completed and are scheduled for publication in 1992:

- Legal Obstacles to the Recovery and Return of Parentally Abducted Children.
- The Reunification of Missing Children Project.
- Families of Missing Children: Psychological Consequences and Promising Interventions.
- A National Study of Law Enforcement Agencies' Policies and Practices Regarding Missing Children and Homeless Youth.
- The Child Victim as Witness.

Additional publications scheduled for FY 92 include prosecutors' manuals on child pornography and child prostitution cases. In addition, a number of existing publications will be updated or rewritten. These include Parental Kidnapping, Interviewing Child Victims of Sexual Exploitation, and Investigator's Guide to Missing Child Cases. A new "Case in Point" series focusing on individual missing child cases will be introduced. Through the work of the crime analysis units of the program sites, the Missing and Exploited Children Comprehensive Action Program (M/CAP) will publish a number of monographs and technical assistance bulletins on specialized topics.

The Missing and Exploited Children Program will participate in a number of joint or coordinated projects with other Department of Justice programs as well as other Federal agencies. A multi-site jointly funded by the National Institute of Justice (NIJ) and OJJDP and administered by NIJ will examine justice system processing of child maltreatment cases. OJJDP is coordinating planning for NISMART II with the third national incidence study on child abuse and neglect, NIS III, which is funded by the Department of Health and Human Services (HHS). OJJDP and HHS will also jointly sponsor a symposium on the interaction and handling of child maltreatment cases by law enforcement and child protective services.

FY 92 Goals and Objectives

In order to facilitate the location, recovery and return of missing and exploited children more effectively, OJJDP will:

- Provide for timely dissemination of collected materials, resources, and research findings to practitioners and translation of relevant research and other information into policies and practices, training and community education.
- Expand training and technical assistance in existing programs and to areas currently not being served, e.g., criminal courts, probation personnel, social services, mental health professionals, and victims services. Additional emphasis will be placed on the development and provision of training for trainers.
- Continue to develop programs and research which focus on the differing types of missing children problems as defined by NISMART while also continuing to identify linkages with the overall field of child victimization.
- Provide for the evaluation of public and private recovery programs such as nonprofit organizations specializing in missing children and State missing children clearinghouses.
- Continue to identify and develop centralized expertise in missing and exploited children cases.

The program will approach these objectives through the support and funding of services which assist the families of missing and exploited children through basic and applied research, interagency coordination, training for practitioners and decision-makers, and the development and use of new technology and resources which will facilitate the location and recovery of missing and exploited children more effectively.

Continuing Program With a New Award

Missing and Exploited Children Comprehensive Action Program (M/CAP) $1,300,000

This is a continuing program which requires a new award. The original award was for three years. The Missing and Exploited Children Comprehensive Action Program (M/CAP) serves communities by helping them develop coordinated, cooperative procedures for prevention and handling of missing, exploited and abused children's cases among the various institutions invloved. The M/CAP program will be expanded to facilitate the development of additional sites. New program staff and training specialists will be added, as well as at least one technical writer who will develop training monographs and specialized curriculum. Through the work of the crime analysis units of the program sites, the M/CAP program will publish a number of monographs and technical assistance bulletins on specialized topics.

New Programs

Applied Research to Address Practioner Needs

A Study to Explore Legal Barriers to Using Schools, Public Service Agencies, and Hospitals in Locating Missing Children $100,000

This project will involve studying the legal barriers and obstacles now facing parents, attorneys, law enforcement, prosecutors and missing children clearinghouses in gaining the cooperation of schools, hospitals and other public agencies in the search for missing children. Because of different laws concerning privacy and confidentiality, obtaining assistance from these various agencies in locating a missing child is often difficult.

This study should attempt to identify the case law and legislation present at the Federal level, as well as State and local levels, that commonly frustrate efforts to locate missing children. Existing legislation that aids parents and investigative agencies in gaining access to schools, hospitals and public agencies should be highlighted as well. The project should present suggested remedies and recommend solutions where feasible. The intended audience of final reports will be parents and agencies that will benefit most from the above sources of information in the search for missing children.

A Project to Examine Newspaper Articles on Non-Family Child Molestation, Exploitation, and Abuse Cases $100,000

Currently there is no national data collection focused on the number of children who are sexually abused by non-family members or non-day-care givers each year. Due to reporting methods and the lack of national data, it is difficult to know how many of these cases of child molestation involve the abduction of children, including short-term abductions. Through the National Center for Missing and Exploited Children, an informal project was developed utilizing newspaper clippings detailing confirmed cases of child molestation by non-family members collected from over forty major media markets over a four month period. The first month's clippings alone yielded over 800 cases. Data was compiled from the clippings on 32 case characteristics.

including the ages of the offenders and the victims, the occupation of the offenders, the relationship between victim and offender, the number of victims, previous arrest history, involvement of child pornography, probationary status of the offender, and the arresting charges.

This new program will expand on the earlier short-term project and will involve tracking data on a more expansive basis and over a one-year period in order to include the school and vacation cycle. Data gathered should include types of charges, number of offenses, and characteristic information about both victims and perpetrators. Particular attention should be paid to examining these reports for abduction offenses and arresting charges.

The prospective grantee should plan to utilize the best available sources, including computer networks, newspaper clipping services, or other methods to obtain the necessary information. In all cases, duplication should be monitored so that cases of national proportion are not entered into the data base more than once. The resulting report should include basic information about the populations served by the news sources utilized in order to give some indication of the breadth of the numbers. After the compilation of cases for one year are entered, they should be summarized and analyzed. The analysis is not expected to generalize the problems of non-family sexual abuse, molestation and exploitation. The final report should also identify potential alternative data collection methods and approaches which could be utilized for a more comprehensive study of the incidence of non-family, non-caregiver sexual abuse and exploitation of children.

A Study to Resurvey the Respondents in the Original Study, Families of Missing Children: Psychological Consequences and Promising Interventions $150,000

The purpose of this resurvey would be to determine how lasting are the psychological effects of family and non-family abductions and serious runaway episodes on victims and families. The results of the initial Psychological Consequences project indicated that it is appropriate to identify two traumas rather than the one associated with each missing child incident. The initial trauma arises when the child is taken, but there is a second trauma at the time of resolution, the recovery of a body or a child. The second trauma appears to be equal to or more profound than the first.

Since the two events, abduction and recovery, could not be separated by the passage of considerable time due to the time contraints of the project period, many cases had not been resolved at the time of the last data collection. Further data collection, after either one year or 18 months, would increase the size of the post-resolution sample and provide better information on the second trauma.

The information to be gained from this research should have considerable value in the design of programs to alleviate the traumatic effects of abduction and recovery.

Justice System Processing of Child Maltreatment Cases. (A Jointly Supported Study With the National Institute of Justice) $250,000

Approximately 2.5 million cases of suspected child maltreatment were reported in 1990. These increasing numbers tax both child protective services and the justice system and demand improvements in the social service and legal response to the problem. While many child maltreatment cases are handled by child protective service agencies, the more serious cases come to family and domestic relations courts for the protection of the child, and an increasing number involve charging the perpetrator with a criminal offense. An indication of the increasing demand of these cases on prosecutors is seen in the results of a recent survey in which 90 percent of the prosecutors report child victim cases as a factor in the rising number of felony cases filed in recent years.

A number of past efforts have addressed the effects of child testimony on sexually abused children, explored sexual abuse case processing issues, examined the police role, and discussed state of the art child abuse investigation and prosecution methods. These efforts provide a part of the background for the development of this project on the tracking of child maltreatment cases from the point of official justice system entry to disposition. Prospective case studies would track cases, victims, and perpetrators through law enforcement, prosecution, and courts to case dispositions. The goals of the project would be to provide a description of the nature and dynamics of the justice system response to child maltreatment and to inform policy and improve practice regarding the handling of these cases in the child protection and justice systems.

OJJDP will transfer funds to the National Institute of Justice for this multi-site study. The project is jointly supported by NIJ and OJJDP, and the solicitation will be issued by NIJ.

Training and Technical Assistance

A Program To Develop Model Sentencing Guidelines in Parental Abduction Cases, $125,000

Recent OJJDP-sponsored studies on the legal obstacles to the recovery of parentally abducted children and on the psychological impact of abduction on children and families show that child victims of family abductions experience more trauma and long-term disturbances than is commonly believed. One study found that almost eighty percent of abducting parents were motivated by anger and revenge against the other parent and attempted to use their children to control and attack the opposing parent. Some parents were fleeing abuse directed at either themselves, their child, or both and needed protection. Regardless of whether an abduction is prompted by frustration with unsatisfactory custody or visitation arrangements or by a desire to punish or control the other parent, many abducting parents intentionally or unintentionally inflict serious emotional or physical harm upon their children. OJJDP-sponsored studies indicate that few abductors are being prosecuted or are receiving sentences of any kind. Consequently, in many jurisdictions, law enforcement involvement in these cases is infrequent and inconsistent. Guidelines should be developed so that judges have information which would enable them to identify and address a wide range of cases with varying motivations and consequences to the child. Examples of the factors to be considered include changing a child's name, depriving the child of stable schooling, physical or sexual abuse, emotional and physical neglect, and lying to the child by telling it the other parent does not want it or is dead. The information should be specifically directed to the complex concerns facing judges and court personnel, such as the types of situations in which abduction is likely to re-occur, any history of domestic violence, the circumstances in which child custody might be granted to the abducting parent, and the types of visitation and circumstances guiding visitation permitted after the recovery of the child. Along with providing training for judges, the project would develop a bench book for judges as well as a series of articles for publication and dissemination to judges and prosecutors.

Treatment Models and Training Materials for Mental Health Professionals Working With Families of Missing Children, $300,000

The Families of Missing Children: The Psychological Consequences and Promising Interventions study found that the vast majority of families of missing and recovered children do not receive any mental health services even though the experience of having a child abducted inflicts significant trauma upon the victim and the family members left behind. While the severity of trauma suffered by victims and families of non-family abduction is more easily recognizable, children and left-behind parents involved in parental abductions also suffer high levels of trauma and long-term distress. Geoffrey L. Greif and Rebecca L. Heger (School of Social Work, University of Maryland At Baltimore), authors of an article entitled "Parents Whose Children are Abducted by the Other Parent: Implications for Treatment", based upon a national survey, reported that children are usually abducted by a parent during or after the breakup of a marriage or relationship. As a consequence, in addition to the trauma ensuing from the loss of the child, the parent must also deal with other stressful factors stemming from the marital or relationship break-up. The literature review conducted in conjunction with this study found that there is a dearth of experience and knowledge and almost no research on abduction trauma and reactions of families to having a child abducted. Thus, parents who do seek mental health assistance are not likely to find a therapist with any experience in either non-family or family abduction trauma.

Given the void in experience, information, and research on the psychological trauma associated with child abduction, the purpose of this program is to develop, test, and refine treatment models and training materials for use by mental health professionals in stabilizing family units upon recovery of missing children, and supporting the members of these family units and the returned child to recover effectively from the associated emotional trauma. While the desirability of developing research-based treatment models is irrefutable, given the immediate need for professionally structured treatment models, the strategy anticipated for development of these models anticipates an eclectic approach. Program models should be developed which are based upon a combination of treatment approaches which have been determined to be effective in cases involving child protection, family violence, gross family dysfunctioning, court ordered placement of children, familial incest, and marital conflict accompanied by serious violence. Treatment with families of soldiers missing in action should also be explored to determine if effective approaches were developed.

The end product should be two to three treatment models which can be tested in the second and third years of a three year project period, along with replication manuals, training curricula, and a complete literature review.

Program to Develop Multidisciplinary Training for Law Enforcement, Mental Health and Other Professionals on the Reunification of Missing Children, $150,000

The Reunification of Missing Children Project found in most cases of recovered children that law enforcement and other community agencies were not prepared to handle or aid in the process of reuniting the child with his or her family and in helping them rebuild their lives. Many important factors need to be considered in reuniting a child with the family or parent: The type of abduction, the length of the episode, and what actually happened to both the child and the left-behind family members during the period the child was missing. Previous family history and coping styles will also play a part in how well the victim and family reacts and readjusts after recovery. This project would adapt the findings and field testing of the Reunification of Missing Children Project into a training curriculum, including technical assistance bulletins for dissemination to practioners. Topics covered will include: (1) The different types of child abduction and the circumstances surrounding the event(s); (2) agency staff responsibilities pertaining to the abduction and the reunification of the children with their families; (3) special needs of the children (including siblings) and parents; (4) elements of investigation, interview and counseling techniques specific to the reunification of missing children; and (5) the management (and sharing) of information and mobilization of agency resources pertaining to the reunification of missing children with their families. It is expected that the training format will include workshops or seminars, and a training guide or curriculum, together with background materials. Follow-up technical assistance will be provided to trainees upon request.

Program to Develop Techniques for Interviewing Adolescent Victims of Sexual Exploitation and Sexual Abuse $125,000

Interviewing adolescent victims of sexual abuse and exploitation require particular skills and techniques. There is little literature or training available in the field to instruct law enforcement personnel and medical and direct service providers on how to conduct interviews with the adolescent victim. However, individual practioners in various police, prosecutorial, health, or related agencies have developed considerable proficiency in dealing with young victims. Their expertise could be harnessed to train others. In order to expand the availability of training in this area, OJJDP will sponsor an assessment of existing training resources and of further training needs pertaining to this topic. The project should cover the protocol for conducting the interviews and the distinctions between the first responder interview, the investigative interview, and the therapeutic interview. Joint investigative interviewing by law enforcement personnel and child protective services should also be addressed. The curriculum is expected to cover: (1) Interviewing techniques, including types and purposes; (2) essential elements of sexual exploitation and abuse investigations; and (3) essential elements of adolescent psychology and behavior. The grantee is expected to draw on the expertise of experienced law enforcement investigators and others who have developed special skills in interviewing adolescent victims. End products would include a training curriculum and monograph, as well as a listing of resources and practioners with particular expertise, all of which could be added to existing investigative training courses.

Resource Guide of Victim Services and Compensation for Missing and Exploited Children and Their Families $60,000

The Families of Missing Children: The Psychological Consequences and Promising Interventions study found that the vast majority of families of missing and recovered children do not receive mental health services or other victims services and resources even though the experience of having a child abducted afflicts significant trauma upon both the victims and the family members left behind. Families of missing and recovered children can (1) enhance their personal, marital, and family stability during this crisis when they know what constitutes expected or normative

reactions of child loss; (2) improve the parent-child relationship when they know the child's experience during the event and after recovery; and (3) insure their understanding of on-going needs of the non-missing children in the family when they know sibling rection to child loss. This project would develop and publish a specialized manual designed to enable families and victims to identify and access services available on a local, State, and national basis. This publication will include information on the types of victim compensation, *e.g.*, local, State and federal funding, a listing of national support organizations for families and victims, as well as information on selecting a therapist. Dissemination of this publication to families of missing children will be primarily through the National Center for Missing and Exploited Children, missing children State clearinghouses, and other public and private organizations serving child victims and their families.

Symposium on International Child Abductions $125,000

The Hague Convention is an international treaty governing the return of internationally abducted children. It was negotiated in 1980 and has been ratified by a number of countries, including the United States in 1988. The Hague Convention sets international policy condemning parental abduction and seeks promptly to restore children to their pre-abduction circumstances, thus limiting the harm they suffer as a result of the abduction. It also provides international laws and procedures for the resolution of these difficult disputes. Despite the adoption of the Hague Convention by many countries, international child abduction still poses complicated problems for parents, governments and other agencies involved in the location and recovery of these children. The grantee would work cooperatively with the National Center for Missing and Exploited Children, Department of State, Interpol, the National Center for the Prosecution of Child Abuse, the American Bar Association Center on Children and the Law, and others to convene a forum of practioners to examine current issues regarding international abductions, the obstacles for locating and recovering abducted children in a world-wide arena, and adoption and implementation of the Hague Convention. The symposium should be planned for early 1993 to follow an international meeting of representatives of Hague Convention Central Authorities scheduled for November of 1992. An expected outcome of such a forum would be the publication of a report indicating directions for future study and program development.

A Program to Develop Training, Technical Assistance and Product Resources Based Upon the Findings of OJJDP's Congressionally Mandated Study on the Legal Obstacles to the Recovery and Return of Parentally Abducted Children $400,000

The three key obstacles to the recovery of parentally abducted children identified in the interim Congressional report were: (1) Lack of knowledge of applicable law on the part of judges and attorneys; (2) lack of compliance, even when knowledgeable; and (3) lack of uniformity and specificity in State laws. The final report, due in June 1992, will make recommendations for removing legal obstacles and improving interstate and inter-jurisdictional cooperation in parental abduction cases. This project would develop materials for different audiences and create cooperative arrangements with existing organizations to disseminate these materials, including training materials. Target audiences would include parents, lawyers, judges, law enforcement personnel, prosecutors, and public and private missing children's organizations. Training could also focus on utilizing a multi-agency approach to parental abduction cases. Model State statutes would also be developed and disseminated and would possibly include a conference for State legislative staffs.

Specific products would be a written bench book for judges, a booklet of practice tips for attorneys in family law, information for parents on how best to cooperate with their lawyers, development of a written protocol for law enforcement for both civil and criminal cases, fifty State directory of relevant State statutes and case law (on disk), and possibly written procedures for establishing a child custody registry. In addition, assistance needs to be available to left-behind parents so that they can find attorneys who can adequately and knowledgeably represent them. The program would develop a directory and possibly a nationwide attorney referral system specific to parental abductions and enforcement of child custody orders.

A program to Develop a Series of Training Videos on Basic Techniques for Investigating Missing, Exploited and Abused Child Cases for Law Enforcement, $125,000

The vast majority of law enforcement agencies employ less than ten officers. These law enforcement officers have few opportunities to receive specialized training in the investigation of child maltreatment cases. Therefore, in order to provide needed information to these smaller departments, OJJDP plans to develop a series of training videotapes on the investigation of such child maltreatment issues as physical abuse, sexual abuse, missing children (including parental abductions), exploited children, offender profiles, and child fatalities. Related topics to be addressed in training videotapes would include case management, techniques for interviewing child victims and suspects, and interacting with social service, medical, and mental health professionals. The grantee would be expected to utilize the revised training curriculum and the expertise of the law enforcement trainers used by OJJDP and the Federal Law Enforcement Training Center in the child abuse and missing and exploited investigators courses. The curriculum would focus on basic information and techniques. In addition to the series of training videotapes, there would be a small publication or pocket card listing national and regional resources for law enforcement agencies on available training, information, and technical assistance on cases of abused, exploited, and missing children. Law enforcement training academies and organizations would be the primary organizations reproducing and further disseminating these materials to the law enforcement field.

Funding Support for Missing Children State Clearinghouses for Specific Program Development up to $100,000

The goal of this project would be to assist State missing children clearinghouses to strengthen their role within their State through the development of specific projects relating to missing and exploited children. The individual special projects would include: (1) A project to develop a series (maximum of five) 20 minute "roll call style" video presentations for law enforcement personnel on missing and exploited children investigation, resources, and issues. The project would also require the development of a State-wide listing of investigators specializing in missing and/or exploited child cases from which the target audience would be drawn. (2) A second project would be the development of a training curriculum designed for law enforcement agencies and officers on how to utilize and interface with their State clearinghouse. The grantee must take into account and address the different levels and services of State clearinghouses available around

the country. The curriculum should be in a format which could be presented on site by State clearinghouse personnel or standardized for presentation through in-service training or academy curriculum. The project requires the development of a State-wide listing of investigators specializing in missing and/or exploited child cases. (3) A project to develop a network of volunteers within the State who have experience and background in providing services for the parents of missing or exploited children. Parents of missing children frequently need more special attention and support than can be provided by local law enforcement agencies. Retired law enforcement, social service, and criminal justice professionals would be ideally suited to provide necessary time, experience and contacts to devote to assisting parents within the local community. The volunteers would be referred to the parents through the State clearinghouse, upon request. A program called "Project ALERT" is currently being developed on the national level to recruit and train retired law enforcement officers to assist in the investigation of missing child cases. It is possible that the individual State clearinghouse project could be coordinated with any "Project ALERT" volunteers from that State. OJJDP may fund more than one applicant for this particular program to develop a volunteer network.

OJJDP anticipates providing several grants to individual clearinghouses to develop the special programs and products detailed above. The grantees would be encouraged to develop their programs in formats which could serve as models for other State clearinghouses around the country.

Selection Criteria

For all assistance awards funded under Title IV—Missing Children's Assistance Act, priority will be given to applicants who utilize volunteers in locating, reuniting, and providing other services to missing children and their families. In order to receive assistance for a fiscal year, applicants must give assurance that they will expend, to the greatest extent practicable, for such fiscal year an amount of funds (without regard to any funds received under any Federal law) that is not less than the amount of funds they received in the preceding fiscal year from State, local, and private sources.

The following merit-based general selection criteria will be used to rate applications submitted in response to the program announcements:

(1) The problem to be addressed by the project is clearly stated. The applicant must demonstrate an understanding of the extent and nature of the problem of missing and exploited children.

(2) The objectives of the proposed project are clearly defined.

(3) The project design is sound and contains program elements directly linked to the prevention and recovery of missing children and/or the provision of services to such children and their families. The project design demonstrates an innovative approach to addressing the problem.

(4) The project management structure is adequate to the successful conduct of the project.

(5) Organizational capability is demonstrated at a level sufficient to conduct the project successfully.

(6) Budgeted costs are reasonable, allowable and cost effective for the activities proposed to be undertaken.

Robert W. Sweet,

Administrator, Office of Juvenile Justice and Delinquency Prevention.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center
St. Louis: 1-800-366-2998
Missouri (outside St. Louis): 1-800-735-8004

Rules and Regulations

Federal Register
Vol. 57, No. 54
Thursday, March 19, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF DEFENSE

Department of the Army

32 CFR Part 519

Publication of Rules Affecting the Public

AGENCY: Department of the Army, DoD.

ACTION: Withdrawal of rule.

SUMMARY: The purpose of this document is to withdraw the revision of 32 CFR part 519 which appeared in the **Federal Register** on December 16, 1991 (56 FR 65392). The reason for withdrawing this revision is to effect further staffing within the Department of the Army and to secure legal approval from the Office of the Army Staff Judge Advocate. A revision of 32 CFR part 519 will be published at a later date as a final rule.

EFFECTIVE DATE: The revision of 32 CFR part 519 published at 56 FR 65392 is withdrawn March 13, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Ken Denton, U.S. Army Publications and Printing Command, Attn: ASQZ–PD–SS, room 1050, Hoffman Building I, Alexandria, VA 22331–0302, (703) 325–6277.

SUPPLEMENTARY INFORMATION: The document published at 56 FR 56392 announced a revision of Army Regulation 310–4, Publication of Rules Affecting the Public. It was to bring the AR in line with policy and program proponency changes and the reorganization of Headquarters, Department of the Army. It prescribed procedures and responsiblities for publishing certain Department of the Army policies, practices, and procedures in the **Federal Register** as required by statute, and for inviting public comment thereon, as appropriate.

List of Subjects in 32 CFR Part 519

Administrative practice and procedures.

Under the Secretary's authority, 44 U.S.C. chapter 15, the revision to 32 CFR part 519 published at 56 FR 65392 is withdrawn.

Gregory D. Showalter,

Alternate Army Federal Liaison Officer.

BILLING CODE 3710–08–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL 4116–3]

Minnesota: Final Authorization of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: Minnesota has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act of 1976 as amended (hereinafter "RCRA" or the "Act"). The Environmental Protection Agency (EPA) has reviewed Minnesota's application and has reached a decision, subject to public review and comment, that these hazardous waste program revisions satisfy all the requirements necessary to qualify for final authorization. Thus, EPA intends to grant final authorization to Minnesota to operate its expanded program, subject to authority retained by EPA under the Hazardous and Solid Waste Amendments of 1984 (Pub. L. 98–616, November 8, 1984, hereinafter "HSWA").

EFFECTIVE DATE: Final authorization for Minnesota's program revisions shall be effective May 18, 1992 unless EPA publishes a prior **Federal Register** (FR) action withdrawing this immediate final rule. All comments on Minnesota's final authorization must be received by 4:30 p.m. central time on April 20, 1992. If an adverse comment is received, EPA will publish either (1) a withdrawal of this immediate final rule or (2) a notice containing a response to the comment which either affirms that the immediate final decision takes effect or reverses the decision.

ADDRESSES: Copies of Minnesota's final authorization application are available during 9 a.m. to 4 p.m. at the following addresses for inspection and copying: Ms. Carol Nankivel, Supervisor, Rules Unit, Minnesota Pollution Control Agency, 520 Lafayette Road, St. Paul, Minnesota 55155, Phone 612/297–8369; Ms. Christine Klemme, U.S. EPA, Region V, Office of RCRA, 77 W. Jackson, 7th Floor, Chicago, Illinois 60604, Phone 312/886–3715. Written comments should be sent to Ms. Christine Klemme, Program Management Branch, Office of RCRA, 77 W. Jackson, 5HRM–7J, Chicago, Illinois 60604, Phone 312/886–3715.

FOR FURTHER INFORMATION CONTACT: Christine Klemme, Minnesota Regulatory Specialist, U.S. Environmental Protection Agency, Region V, Office of RCRA, Program Management Branch, Regulatory Development Section, 5HRM–7J, 77 W. Jackson, Chicago, Illinois 60604, (312) 886–3715 [FTS 8 886–3715].

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of RCRA, 42 U.S.C. 6926(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. For further explanation, see section C of this notice.

In accordance with 40 CFR 271.21(a), revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessary because of changes to EPA's regulations in 40 CFR parts 124, 260–268 and 270.

B. Minnesota

Minnesota initially received final authorization for its base RCRA program effective on February 11, 1985 (see 50 FR 3756, January 28, 1985). On June 30, 1986, January 29, 1988, November 16, 1988, November 21, 1989, and January 22, 1991, Minnesota submitted revision applications for program approval. Effective on September 16, 1987, June 23, 1989, August 14, 1990, and August 23, 1991, (see 52 FR 27199, July 20, 1987; 54 FR

16361, April 24, 1989; 55 FR 24232, June 15, 1990, and 56 FR 28709, June 24, 1991, respectively), Minnesota received authorization for additional program revisions.

Minnesota submitted an additional revision application on June 28, 1991. EPA reviewed this application and upon receipt of the signed Attorney General's statement on December 3, 1991, made an immediate final decision that Minnesota's hazardous waste program revision satisfies all the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant Minnesota final authorization for this additional program revision.

On May 18, 1992 (unless EPA publishes a prior FR action withdrawing this immediate final rule), Minnesota will be authorized to carry out, in lieu of the Federal program, those provisions of the State's program which are analogous to the following provisions of the Federal program:

Federal requirement	Analogous state authority
Reportable Quantity Adjustment—Methyl Bromide Production Wastes, October 6, 1989, (54 FR 41402) *.	MN 7045.0135(3)(e), 7045.0139(2)(b), effective 8/12/91.
Reportable Quantity Adjustment—Chlorinated Aliphatic Hydrocarbons, December 11, 1989, (54 FR 50968) *.	MN 7045.0135(2), 7045.0139(2), 7045.0141(2), effective 8/12/91.
Double Liners, Correction, May 9, 1990, (55 FR 19262) *.	MN 7045.0532(3)(C), effective 12/18/91.
—Mining Waste Exclusion I, September 1, 1989, (54 FR 36592).	MN7045.0102(2), 7045.0135(3), effective 8/12/91.
—Mining Waste Exclusion II-(Bevill), January 23, 1990, (55 FR 2322).	MN 7045.0020(15), 7045.0120(l), MN 7045.0265(4), effective 8/12/91.
—Modification of F019 Listing, February 14, 1990, (55 FR 5340).	MN 7045.0135(2)(M), effective 8/12/91.
—Financial Responsibility: Settlement Agreement (as amended), June 26, 1990, (55 FR 25976).	MN 7045.0486, 7045.0596, effective 4/28/87.
Corrections: Definition of Solid Waste, April 11, 1985, (50 FR 14216), and August 20, 1985, (50 FR 33541).	MN 7045.0020; 7045.0075 (3) & (4), 7001.0700; 7045.0135, effective 2/17/86.
Correction: Biennial Reports, August 8, 1988, (51 FR 28556) *.	MN 7045.0482(2) and 7045.0588, effective 4/13/87.

* indicates HSWA provisions.

EPA shall administer any RCRA hazardous waste permits or portions of permits that contain conditions based upon the Federal program provisions for which the State is applying for authorization and which were issued by EPA prior to the effective date of this authorization. EPA will suspend issuance of any further permits under the provisions for which the State is being authorized on the effective date of this authorization. EPA has previously suspended issuance of permits for the other provisions on February 11, 1985, September 18, 1987, June 23, 1989, August 14, 1990, and August 23, 1991, the effective dates of Minnesota's final authorization for the RCRA base program and for rules in non-HSWA Clusters I–VI and HSWA I and II.

Minnesota is not authorized to operate the Federal program on Indian lands. This authority remains with EPA unless provided otherwise in a future statute or regulation.

C. Effect of HSWA on Minnesota's Authorization

1. General

Prior to the Hazardous and Solid Waste Amendments to RCRA, a State with final authorization administered its hazardous waste program instead of, or entirely in lieu of, the Federal program. Except for enforcement provisions not applicable here, EPA no longer directly applied the Federal requirements in the authorized State and EPA could not issue permits for any facilities the State was authorized to permit. When new, more stringent, Federal requirements were promulgated or enacted, the State was obligated to obtain equivalent authority within specified time frames. New Federal requirements usually did not take effect in an authorized State until the State adopted the requirements as State law.

In contrast, under the amended section 3006(g) of RCRA, 42 U.S.C. 6926(g), new HSWA requirements and prohibitions take effect in authorized States at the same time they take effect in non-authorized States. EPA carries out those requirements and prohibitions directly in authorized and non-authorized States, including the issuance of full or partial HSWA permits, until EPA grants the State authorization to do so. States must still, at one point, adopt HSWA-related provisions as State law to retain final authorization. In the interim, the HSWA provisions apply in authorized States.

As a result of the HSWA, there is a dual State/Federal regulatory program in Minnesota. To the extent HSWA does not affect the authorized State program, the State program will operate in lieu of the Federal program. To the extent HSWA-related requirements are in effect, EPA will administer and enforce those HSWA requirements in Minnesota until the State is authorized for them.

Once EPA authorizes Minnesota to carry out a HSWA requirement or prohibition, the State program in that area will operate in lieu of the Federal provision or prohibition. Until that time, the State may assist EPA's implementation of the HSWA under a Cooperative Agreement.

Today's rulemaking includes authorization of Minnesota's program for several requirements implementing the HSWA. Those requirements implementing the HSWA are specified in the "Minnesota" section of this notice. Any effective State requirement that is more stringent or broader in scope than a Federal HSWA provision will continue to remain in effect; thus regulated handlers must comply with any more stringent State requirements.

EPA published a FR notice explaining in detail the HSWA and its affect on authorized States (50 FR 28702–28755, July 15, 1985).

2. Land Disposal Prohibitions

EPA does not intend to authorize Minnesota to impose additional land disposal prohibitions at this time. The regulations implementing the land disposal prohibitions are found in 40 CFR part 268.

D. Decision

I conclude that Minnesota's program revision application meets all the statutory and regulatory requirements established by RCRA and its amendments. Accordingly, EPA grants Minnesota final authorization to operate its hazardous waste program as revised. Minnesota currently has responsibility for permitting treatment, storage, and disposal facilities within its borders and carrying out other aspects of the RCRA program and its amendments. This responsibility is subject to the limitations of its program revision applications and previously approved authorities. Minnesota also has primary enforcement responsibilities, although EPA retains the right to conduct inspections under section 3007 of RCRA, and to take enforcement actions under section 3008, 3013, and 7003 or RCRA.

E. Codification

EPA codifies authorized State programs in part 272 of 40 CFR. The purpose of codification is to provide notice to the public of the scope of the authorized program in each State. Codification of the Minnesota program will be completed at a later date.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of Minnesota's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. This rule, therefore, does not require a regulatory flexibility analysis.

Paperwork Reduction Act

Under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, Federal agencies must consider the paperwork burden imposed by any information requests contained in a proposed rule or a final rule. This rule will not impose any information requirements upon the regulated community.

Lists of Subjects in 40 CFR Part 271

Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority: This notice is issued under the authority of sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act as amended (42 U.S.C. 6912(a), 6926 and 6974(b)).

Dated: March 13, 1992.

Robert Springer,

Acting Regional Administrator.

[FR Doc. 92-6387 Filed 3-18-92; 8:45 am]

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 7534]

Federal Insurance Administration; Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule identifies communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If FEMA receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, 500 C Street SW., room 417, Washington, DC 20472, (202) 646–2717.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022), prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR part 59 *et seq.*) Accordingly, the communities will be suspended on the effective date in the fourth column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register**. In the interim, if you wish to determine if a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

In addition, the Federal Emergency Management Agency has identified the special flood hazard area in these communities by publishing a Flood Insurance Rate Map (FIRM). The date of the FIRM if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Administrator finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications have been made, this final rule may take effect within less than 30 days.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, FEMA, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate floodplain management, thus placing itself in noncompliance with the Federal standards required for community participation. In each entry, a complete chronology of effective dates appears for each listed community.

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

Accordingly, 44 CFR part 64 is amended as follows:

PART 64—[AMENDED]

Federal Register
Vol. 57, No. 54
Thursday, March 19, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 246

Special Supplemental Food Program for Women, Infants and Children (WIC); Enhanced Food Package for Breastfeeding Women

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend regulations governing the Special Supplemental Food Program for Women Infants and Children (WIC) to better assist breastfeeding WIC participants. The Food and Nutrition Service (FNS) proposes that a separate enhanced WIC food package (Food Package VII) be made available to breastfeeding women whose infants do not receive formula from the WIC Program. The current types and quantities of supplemental foods will be retained in Food Package V for pregnant women and for women who are supplementing breastfeeding with any amount of formula provided by WIC. The proposed Food Package VII would contain the same supplemental foods as are currently available to breastfeeding women in Food Package V with augmented amounts of juice, cheese, legumes (beans, peas and peanut butter) and with the addition of two new items: canned tuna and carrots.

DATES: To be assured of consideration, comments on this rule must be received on or before May 4, 1992.

ADDRESSES: Comments should be sent to Ronald J. Vogel, Director, Supplemental Food Programs Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, room 540, Alexandria, Virginia 22302. Comments on this rule should be clearly labeled "Food Package for Breastfeeding Women Rule." All written comments will be available for public inspection during regular business hours (8:30 a.m. to 5 p.m., Monday through Friday) at the office of the Food and Nutrition Service, 3101 Park Center Drive, Alexandria, Virginia 22302.

FOR FURTHER INFORMATION CONTACT: Barbara Hallman, Chief, Program and Policy Development Branch, Supplemental Food Programs Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, room 540, Alexandria, Virginia 22302, (703) 305-2730.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291

This proposed rule has been reviewed under Executive Order 12291, and has been determined to be not major because it does not meet any of the three criteria identified under the Executive Order. This action will not have an annual effect on the economy of $100 million or more, nor will it result in major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. Furthermore, this rule will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601-612). Pursuant to that review, the Administrator of the Food and Nutrition Service has certified that this proposed rule will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

This proposed rulemaking imposes no new reporting or recordkeeping provisions that are subject to OMB review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Executive Order 12372

The Special Supplemental Food Program for Women, Infants and Children (WIC) is listed in the Catalog of Federal Domestic Assistance Programs under 10.557 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR part 3015, subpart V, and final rule-related notice at 48 FR 29114 (June 24, 1983)).

Executive Order 12778

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any state or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This rule is not intended to have retroactive effect unless so specified in the "Effective Date" section of this preamble. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted. In the WIC Program, the administrative procedures are as follows: (1) Local agencies and vendors—State agency hearing procedures issued pursuant to 7 CFR 246.18; (2) applicants and participants—State agency hearing procedures issued pursuant to 7 CFR 246.9; and (3) sanctions against State agencies (but not claims for repayment assessed against a State agency) pursuant to 7 CFR 246.19—administrative appeal in accordance with 7 CFR 246.22. (4) procurement by State or local agencies—administrative appeal to the extent required by 7 CFR 3016.36.

The Department's Support of Breastfeeding

The Department is strongly committed to the support of breastfeeding. Support of breastfeeding is a priority for many public health programs, including the WIC Program. Nutritional and medical research has shown that there is no better food than breast milk for a baby's first year of life (Institute of Medicine Report, Nutrition During Lactation, 1991). Since a major goal of the WIC Program is to improve the nutritional status of infants, WIC mothers are encouraged to breastfeed their infants. Alarmingly, despite efforts to promote breastfeeding among this target population, decreases in the incidence and duration of breastfeeding have recently been documented among low-income populations in the United States (Institute of Medicine Report, Nutrition During Lactation, 1991). To respond to this trend, the Administration

established as a national goal the improvement of the incidence and duration of breastfeeding in "Healthy People 2000—National Health Promotion and Disease Prevention Objectives." In support of the Healthy People 2000 breastfeeding goals and to tailor food assistance to breastfeeding women, the Department proposes a new WIC food package—Food Package VII.

This proposal is but one of several of the Department's initiatives underway to further promote breastfeeding. These initiatives are briefly discussed in appendix I to this preamble.

Background

The authorizing legislation for the WIC Program, section 17 of the Child Nutrition Act of 1966, as amended (CNA), (42 U.S.C. 1786), established the WIC Program to provide supplemental foods and nutrition education to low income pregnant, breastfeeding, and postpartum women, infants, and children up to age 5 who are at nutritional risk. The Program also serves as an adjunct to good health care during critical times of growth and development, in order to prevent the occurrence of health problems and to improve the health status of Program participants.

The CNA clearly established the WIC Program as "supplemental" in nature; that is, the WIC food packages, including the new Food Package VII designed for breastfeeding women whose infants receive no formula from the WIC Program, are not intended to provide a complete diet but are designed to provide additional wholesome foods needed for a balanced diet. In addition to WIC, the Department administers a variety of other complementary food assistance programs which can work together to provide a more nutritious diet to needy Americans. The largest of these programs, the Food Stamp Program, provides general food assistance in the form of food stamps which are used to increase the food buying power of low income households. The National School Lunch Program and the School Breakfast Program provide free and reduced price meals to low income children in school. Also, the Child and Adult Care Food Program provides meals to persons in child and adult care centers and family day care homes. A variety of commodity donation programs are also available to low income persons.

In addition to food assistance, WIC provides nutrition education to participants. The nutrition education provided by WIC enables participants to make informed decisions in choosing foods which, together with the supplemental foods contained in the WIC food packages, can meet their total dietary needs.

Section 17(b)(14) of the CNA defines "supplemental foods" as "those foods containing nutrients determined by nutritional research to be lacking in the diets of pregnant, breastfeeding, and postpartum women, infants, and children, as prescribed by the Secretary." This legislation provides substantial latitude to the Department in designing WIC food packages, but obligates the Department to prescribe foods which effectively supply those nutrients critical to growth and development and which are typically lacking in the diets of the WIC eligible population. The Department has designed the WIC food packages based on nutritional research and input from various sources, including State and local agencies, the health and scientific communities, industry and the general public.

Food Package History

Food package requirements appear in 7 CFR 246.10 of the WIC Program regulations. The Department created six different monthly packages in a 1980 rulemaking (45 FR 74854 (1980)): One for infants 0–3 months, one for infants 4–12 months, one for children and women with special dietary needs, one for children 1–5 years of age, one for pregnant and breastfeeding women, and one for nonbreastfeeding postpartum women. These packages were designed to help meet participants needs and to follow current medical and nutritional guidance; complement the eating patterns of preschool children; and address the special requirements of pregnant and breastfeeding women. As described in the 1980 final rule (45 FR 74854), the current food packages were initially designed and adopted with five considerations in mind. These considerations, listed below, are still valid in guiding decisions concerning food package changes. They should be kept in mind while commenting on this proposal.

1. Nutritional Integrity

Great consideration is given to the provision of foods that are rich sources of the nutrients that tend to be lacking in the diets of the WIC eligible population. The original legislation for the WIC Program, the Child Nutrition Act of 1966, as amended by the 1972 School Lunch Program—Summer Food Service Act (Pub. L. 92–433), specifically identified protein, iron, calcium and vitamins A and C as the target nutrients for WIC participants. However, subsequent legislation in 1975 (Pub. L. 94–105) and 1978 (Pub. L. 95–627) deleted the references to specific target nutrients and instead directed the Department to prescribe appropriate nutrients. The Department, consistent with this legislation, determined in October of 1978 that the original five target nutrients continued to be lacking among the WIC eligible population. The Department made this determination through an ongoing examination of nutritional research and with the assistance of State and regional representatives, representatives of industry, the nutrition community, advocacy groups, and program participants.

Given the supplemental nature of the WIC Program, the food packages are not intended to supply 100 percent of the Recommended Dietary Allowances (RDAs) of each specified nutrient, nor are they intended to meet any pre-established goals for RDAs. As mentioned previously, participants are expected to obtain the remainder of the RDAs from other food sources. These, in some cases, could include foods provided through the Department's other food assistance programs. However, the packages do provide categories of foods which are high in one or more of the previously targeted nutrients and are capable of providing a substantial portion, and in some instances the entire amount, of the RDAs for the targeted nutrients.

1. Fat, Sugar, and Salt Content

The fat, sugar and salt content of WIC foods is a consideration which is required by statute. Section 17(f)(12) of the CNA, among other provisions, directs the Department to assure that, to the extent possible, the fat, sugar and salt content of WIC foods is appropriate. Several changes made to the WIC food packages in the 1980 rulemaking responded specifically to this mandate. For example, the Department established a limit on the amount of sugar permitted in WIC cereals.

Additionally, FNS policy guidance permits WIC State agencies to issue low fat, low cholesterol and low sodium forms of WIC cheeses to participants. Further, the Department encourages local program administrators to tailor the WIC food packages to meet the individual nutritional needs of participants and, when appropriate, to adjust the types of WIC foods prescribed to help reduce the amount of fat, cholesterol, sodium and sugar the WIC food packages contribute to the diet. Through WIC nutrition education, participants also receive advice on how to further minimize intakes of fat, cholesterol, sodium and sugar and how to include adequate amounts of vegetables, fruits and whole grain products in their diets.

3. Cost

Aside from considerations which are specified in legislation, a prime consideration in any food package design is cost. The Department is committed to serving as many eligible persons as possible while maintaining the nutritional integrity of the program. WIC is not an entitlement program, and the number of potentially eligible individuals who can be served is determined by the amount of money appropriated by Congress. Therefore, efficiency in providing nutrients is important because increases in the total cost of the food packages reduce the number of participants served by the program. The packages are designed to encourage further cost control by permitting State and local agencies the flexibility to specify lower cost food brands, types and container sizes within regulatory parameters.

4. Practicality

The food packages are designed to address a number of practical considerations which reflect participant and program needs. The WIC foods should be readily available, offer variety and versatility to participants, be relatively nutrient dense, and have broad appeal. The WIC food package is an individual food prescription which, in order to have full effect in improving nutritional status, is intended to be consumed by the participant only and not other family members. Thus, a consideration in the selection of a WIC food is its potential for inappropriate sharing.

Further, the foods should generally be of dometic origin with minimal processing. The WIC Program, along with other food assistance programs administered by the Department, participates in a longstanding partnership with American agriculture and endeavors to provide foods which support the nation's farming industry.

Lastly, the packages should be administratively manageable for State and local agencies and vendors.

5. Food Package Quantities and Cultural Eating Patterns

The quantities of foods provided by a food package and participants' cultural eating patterns are also significant. State and local agencies are permitted flexibility in such aspects of the food pacakges as well. The quantities in the packages are expressed as maximum levels which must be made available to participants as needed to supplement their diets. However, State and local agencies have the authority to tailor quantities according to the needs of individual participants or categories of participants when based on a sound nutritional rationale. These tailoring provisions, established in program regulations (7 CFR 246.10) and supplemented by FNS Insruction 804–1 "WIC Program—Food Package Design: Admnistrative Adjustments and Nutrition Tailoring," are designed to permit State and loal agencies to implement their own nutrition policies and philosophies within the parameters of food package requirements. Section 17(b)(14) of the CNA and § 246.10(c)(7) of the WIC Program regulations also give the Department the authority to approve substitution of foods by State agencies which allows for different cultural eating patterns under certain circumstances. State agencies must demonstrate that the substitute foods are nutritionally equivalent to those in the food package established by the Department.

Currently, WIC food packages are sufficiently flexible to meet the special needs of homeless persons in most instances. WIC State agencies have devised creative ways to accommodate homeless WIC participants within the framework of the existing WIC food package requirements. For example, some States provide WIC foods such as juice, cereal, cheese, and milk in smaller pacakge sizes and issue more food instruments, each for a smaller part of the total food package, so that the homeles can acquire WIC foods in smaller quantities, thus reducing the need for convential storage facilities.

Summation of Comments on Proposed Food Package VII Considerations

The proposed Food Package VII was developed based on comments rceived on a Notice of Intent to Propose Rulemaking and Solicitation of Comments published in the **Federal Register** on December 2, 1991 (56 FR 61165). The majority of the 83 comments received during the 30-day comment period strongly supported an enhanced food package for breastfeeding women.

Commenters in support of an enhanced food package consistently expressed concern about the special nutritional needs of the exclusively breastfeeding woman as a basis for the creation of an enhanced food package. Many commenters referred to publications and cited the content of these publications. For example, one State agency mentioned that data from a Nationwide Food Consumption Survey (NFCS), 1980–85, indicate that many nutrients are often lacking in the diets of breastfeeding women in the first 6 months postpartum. The commenter also referred to the Institute of Medicine Report, Nutrition During Lactation, which notes that nutrients such as calcium and vitamin A are likely to be consumed in lower amounts by lactating women. Another State agency recommended that the Department propose a new WIC food package for exclusively breastfeeding women to increase the percentage of nutrients provided to lactating women. Further, the majority of commenters referred to increased nutrient and caloric needs of breastfeeding women, particularly those who exclusively breastfeed. Most suggested tuna, increased quantities of legumes (beans, peas and peanut butter) and carrots for inclusion in the food package.

One commenter stated that the adequacy of vitamin A in the diet of breastfeeding women depends upon WIC participant choices within the categories of WIC approved juices and fortified cereals. The commener referred to an analysis of the WIC package in July 1991 which showed that it provides a maximum of 85.6% of the (RDA) of vitamin A for breastfeeding women. The cereal used in this analysis "provided 25% of the RDA." The juice selected for this study was the only WIC juice that contains an appreciable amount of vitamin A. The commenter also believed that a woman's intake of this vitamin could be well below 85.6% of the RDA should she choose one of several approved WIC-approved cereals that contain no vitamin A and a juice that contains little or no vitamin A. Many commenters felt that adding sources of this vitamin could be constructive.

One State agency commented extensively on how to better meet the nutritional needs of exclusively breastfeeding women by providing foods rich in nutrients such as protein and iron. Its rationale was based on the National Research Council's Recommended Dietary Allowances, 10th edition, 1989 (RDA). Another State agency noted that "the National Research Council reports that the energy requirements for lactation are proportional to the quantity of milk produced."

A wide range of other modifications were suggested by commenters including various food and non-food items. A further review of comments on the Notice revealed clear preferences for certain food items appropraite for inclusion in Food Package VII. Some, however, were more feasible than others. For example, some nutrient

dense foods that were recommended, such as fresh fruits and vegetables, are not available in a variety of forms or are difficult to weigh and/or measure in consistent and reliable quantities. This could limit their availability and create administrative difficulties for the local agencies, vendors and the participants themselves.

Another factor making some of the suggested foods less appropriate was the perishability of the foods. A number of commenters suggested fresh fruits and vegetables for inclusion in the food package. Others made specific suggestions that perishable foods would be inappropriate for State agencies not using a retail distribution system, that is, those agencies which distribute food packages directly to participant from warehouses with no facilities to store highly perishable foods or through dairy delivery systems. One State agency stated: "We encourage FNS to keep in mind the food delivery constraints of non-retail states when proposing additional foods. Highly perishable foods and those available only in one form (only fresh or only frozen, for example) may be difficult to provide in non-retail systems."

In general, the food items most consistently suggested by commenters were fruits and vegetables (in general and/or not specified). Most commenters who suggested fruits and vegetables did not specify any particular fruit or vegetable. When specified, the most commonly mentioned vegetable was carrots. Carrots, as mentioned previously, are one of the two new WIC food items included in Food Package VII. Some commenters specified the type of carrot (i.e. fresh, frozen or canned) and others only suggested "carrots" for inclusion into the food package. Because carrots come in a variety of forms, and because fresh carrots are generally packaged in one pound quantities, commenters believed some of the general practical concerns with fruits and vegetables, could be overcome with the provision of carrots. Most commenters recommending carrots for inclusion in the food package referred to their nutrient content and administratively feasibility. One commenter stated that carrots would provide a constant source of carotene (precursor of vitamin A) and suggested that for those States which have direct distribution system, cannd carrots may be an option. Further, one State agency pointed out that "vitamin A is very important for breast milk production because the women's dietary intake of this vitamin will have an impact on the level in the milk she produces."

Canned tuna was the second food item which was most suggested by the commenters. Most commenters specified canned tuna for inclusion due to its wide availability, ease of apportionment, participant acceptance, ease and versatility in preparation, and nutrient composition. Many State agencies suggested canned tuna for inclusion in the food package and described it as "a high protein, low fat, nutrient dense food." In further support of the nutritional qualities of canned tuna, one State agency stated that, "Tuna contributes high-quality protein and other nutrients to the diet." Additionally, a number of State agencies recommended that the Department "consider canned tuna as an additional protein food. It is convenient, versatile, and well accepted by our participant population."

A number of commenters suggested an increased quantity of legumes (beans, peas, and peanut butter). Again, most commenters did not specify exact types and quantities of these foods, but there was a clearly established pattern to the comments. Commenters stated that legumes are nutrient dense, relatively low in cost, administratively manageable, widely available, offer flexibility to State and local agencies, and are generally a good source of the target nutrients. For example, one State agency stated that, "Beans and peas are a good source of protein, iron, and fiber, and are an excellent low-fat, low-cholesterol alternative to meats." Another recommended "allowing both legumes and peanut butter. The allowance of both of these items is one of the simplest and least expensive alternatives." Further, a number of State agencies stated that, "The justification for additional beans or peanut butter is that these may be popular foods, easily available, and they would help the breastfeeding mother receive a greater percent of the RDAs for calories, protein, and iron, which are not being met by WIC Supplemental Food Package V presently."

The selection of foods to include a Food Package VII and their amounts were based on the rationale provided by the commenters as described above. Consequently, Food Package VII contains the same supplemental foods as are currently provided to breastfeeding women in Food Package V with augmented amounts of juice, cheese and legumes and with the addition of two new items: Canned tuna and carrots. In accordance with many comments in support of Food Package VII, this proposed rule, and consequently the foods selected for inclusion in Food Package VII, strongly supports the provision of foods which are recognized as being a relatively good source of the nutrients most lacking in the diets of WIC eligible lactating women.

Some commenters also expressed great concern about the cost of the food package to the program. For example, one commenter suggested that "it is critical that any breastfeeding food package which may be offered to breastfeeding mothers be as cost neutral as possible." In acknowledgement of this, the foods selected for inclusion were carefully reviewed and analyzed in terms of their cost to the program, their cost relative to the other food packages and how the cost of the food package could affect program participation. The amounts of the foods included in Food Package VII were consequently guided by this analysis.

FNS' goal in developing the enhanced breastfeeding food package was to compose a package that would be cost neutral and have minimal effect on overall WIC participation levels. FNS estimates that the cost of Food Package VII is approximately equivalent to WIC's net cost to provide monthly food packages to both a mother and her infant. Since Food Package VII will be made available to only breastfeeding women whose infants do not receive formula from the WIC Program, a portion of the potential increase in food cost is offset by the reduced amount of formula purchases. In support of this view, many commenters mentioned the offsetting costs of reduced formula purchases.

Some commenters were concerned that increased food costs could adversely affect participation rates. For this reason, the foods selected for inclusion in the food package are relatively low in cost and will not have measurable effect on program participation rates. Further, the Department continues to be committed to serving the largest number of eligible persons with the funds available for the Program and realizes that a major increase in the total cost of the food packages could moderately affect the number of participants the Program serves.

In summation, this proposed rule has been developed with serious regard to the suggestions offered by the commenters and the principles of food package design enumerated in the Notice and further discussed in this preamble. Particular consideration was given to the cost and potential impact on program participation levels of Food Package VII. Further, the Department is strongly committed to the support of breastfeeding and to assisting breastfeeding women in meeting the special nutritional requirements of lactation. Consequently, and as many commenters mentioned, an incidental effect of an enhanced food package may be an inducement for some women to breastfeed and/or breastfeed longer.

The Department would like to thank those commenters who took the time to comment on the December 2, 1991 Notice of Intent to Propose Rulemaking and Solicitation of Comments and encourages those commenters and other interested members of the public to comment on this proposed rulemaking.

Proposed Food Package VII For Breastfeeding Women

As stated previously in this rulemaking, the proposed Food Package VII would be made available to those breastfeeding women who elect not to receive WIC formula for their infants and thus be exclusive of all WIC formula. The current types and quantities of supplemental foods are proposed to be retained in Food Package V for pregnant women and for women who are supplementing breastfeeding with any amount of infant formula provided by WIC. Further, the proposed Food Package VII would contain the same supplemental foods as are currently provided to breastfeeding women in Food Package V, but with augmented amounts of juice, cheese and legumes and with the addition of two new items: canned tuna and carrots.

Canned tuna was selected based on the commenters' recommendations, and in recognition of its nutrient content. Food Package VII would include up to 26 ounces of canned tuna.

Up to 2 pounds of carrots would also be included in the new food package. Carrots were selected based on their nutrient content, administrative feasibility, availability, broad appeal, and commenters' recommendations.

In addition, after extensive review of the comments, it was decided to provide both one pound of mature dried beans or peas and 18 ounces of peanut butter per month in Food Package VII (as opposed to one pound of mature dried beans or peas or 18 ounces of peanut butter as is now provided in Food Package V).

The amount of juice in Food Package VII would be increased by up to 48 ounces from the amount provided in Food Package V. Many commenters recommended an augmented amount of the juice which is currently offered in Food Package V because of its nutrient qualities, administrative feasibility and participant acceptance.

An additional one pound of cheese would be provided in the new food package. Cheese is a good source of target nutrients and for those breastfeeding women who may be intolerant of milk it provides a good source of protein and other target nutrients. Cheese is currently provided in Food Packages IV, V, and VI only as a milk substitute.

For the convenience of commenters, an analysis of Food Packages V and VII is provided as the appendix II to this preamble. This chart compares two hypothetical food packages for breastfeeding women in their first six months of lactation. Food Package V for breastfeeding women is indicated in the chart by "BF (Formula)." Food Package VII for breastfeeding women whose infants do not receive formula from the WIC program is indicated by "BF (Enhanced)." The percent RDAs for both food packages are for breastfeeding women during their first six months of lactation. This analysis is based on maximum amounts of foods allowed in the food packages.

As permitted in § 246.10(b)(1) of the current WIC regulations, State agencies would continue to be responsible for determining the brands and types of WIC foods authorized for use in their States from among those foods authorized in federal regulations. The decison may be influenced by factors such as food prices, product distribution within a State, WIC participant acceptance, and program management costs. State agencies have the flexibility to limit the number of foods authorized for use in their States. They are not obligated to authorize every available food that meets Federal requirements. They are, however, obligated to ensure that local agencies make available at least one food from each group in each food package, including the new food package proposed in this rulemaking (7 CFR 246.10 (b)(2)(i)). This includes the five new categories of foods (i.e. cheese, dry beans or peas, peanut butter, fish and vegetable) in this proposed rulemaking. The State can limit the type (e.g. fresh, canned or frozen) or the brand (e.g. the least expensive).

The principles outlined above, and discussed elsewhere in this Proposed rule, constitute a framework within which all WIC Food Packages have been developed. The Department encourages commenters to present their comments on this issue mindful of these principles or to alternate principles which the commenter believes should be considered.

Further, comments which include a justification in terms of current research are greatly appreciated and of exceptional use to the Department in the development of this and succeeding regulations.

Appendix I

The Department's Support of Breastfeeding

Current Federal Requirements

Current Federal requirements for the WIC Program include various provisions to encourage participating women to breastfeed. For example: The WIC food package for breastfeeding participants (Food Package V) provides a greater variety and quantity of food than that for nonbreastfeeding postpartum participants (Food Package VI); breastfeeding women are always considered to be at a higher level of nutritional risk than nonbreastfeeding postpartum women (a nutritional risk priority system is used to determine position on the waiting list when a local agency has reached maximum caseload, and those persons in the highest priorities are served first); information on the benefits of breastfeeding must be included in WIC nutrition education sessions; WIC breastfeeding women may receive program benefits for up to 1 year while nonbreastfeeding participants are eligible for only 6 months postpartum; funding initiatives are made available to WIC State agencies serving large proportions of high risk persons, which include breastfeeding women and their breastfed infants; and a breastfeeding woman with no nutritional risk of her own may receive program benefits based on the eligibility of her at risk breastfed infant. Furthermore, the WIC Program provides funding incentives to WIC States to support and promote breastfeeding initiatives in WIC.

Section 123 of the Child Nutrition WIC Reauthorization Act of 1989 (Pub. L. 101–147) amended section 17 of the CNA to require the Department to better promote breastfeeding among WIC participants by: (1) Establishing, in consultation with the Secretary of Health and Human Services, a standard definition for the term "breastfeeding"; (2) establishing breastfeeding promotion and support standards for State and local agencies; and (3) authorizing the purchase of breastfeeding aids by State and local agencies as an allowable administrative cost. A proposed rule to implement these legislative provisions was published on July 9, 1990 (55 FR 28033). The final rule should be published in 1992. In addition, Public Law 101–147 requires each State agency to annually spend an amount equal to its share of the $8,000,000 specifically distributed by the Department for breastfeeding promotion and support. This provision became effective October 1, 1989.

Initiatives

The Department also encourages the promotion of breastfeeding in the WIC Program through a number of activities, including the following:

1. The Department funds a variety of breastfeeding projects, including grants to WIC State and local agencies and a study to demonstrate and evaluate effective breastfeeding promotion approaches in the WIC program. The study's final report showed that interventions improved

breastfeeding rates among WIC participants. Currently, eight local WIC agencies have received approximately $100,000 in grants to study the effectiveness of using locally donated tokens and gifts as incentives to promote breastfeeding.

2. The Department developed publications on breastfeeding for participants and technical assistance materials to give WIC State and local agency staff ideas on how to better promote breastfeeding. Some of the more recent publications are: Promoting Breastfeeding in WIC: A Compendium of Practical Approaches and WIC Breastfeeding Promotion Study and Demonstration Report (for agency staff), and How WIC Helps—Eating for You and Your Baby and Pregnant? Drugs and Alcohol Can Hurt Your Unborn Baby (for participants).

3. The Department has participated in numerous cooperative efforts with other Federal agencies and private organizations to promote breastfeeding. Examples include: (1) The Department cooperated with the Department of Health and Human Services in sponsoring conferences to train health care providers and local agency staff in lactation management; (2) the Department is active in the Healthy Mothers, Healthy Babies Coalition Breastfeeding Promotion Subcommittee; (3) finally, the Department is working with UNICEF on its Baby Friendly Hospital Initiative, which would further support hospital breastfeeding initiation.

4. The Department hosts ongoing semi-annual meetings of the Breastfeeding Promotion Consortium to exchange information on how government and private health interests, including major health professional and non-profit organizations, can work together to promote breastfeeding.

5. As a result of information gained at the Breastfeeding Promotion Consortium meetings, the Department discerned a need to develop a national media campaign to promote the concept that breastfeeding is the optimum choice for infant feeding for both mother and baby. The Department has developed plans for such a comprehensive media campaign. On February 26, 1992, a bill, H.R. 4322 (the Breastfeeding Promotion Act of 1992), was introduced to amend the CNA of 1966 to establish a breastfeeding promotion program. The bill would authorize the Secretary of Agriculture to utilize private funding and in-kind contributions from the private sector to conduct a national campaign and eductional program to promote breastfeeding.

6. The Department cooperated with the National Association of WIC Directors to develop and distribute voluntary guidelines for use by WIC State agencies in promoting and supporting breastfeeding in the WIC Program.

7. Pursuant to the Child Nutrition and WIC Reauthorization Act of 1989 (Pub. L. 101–147) the Department issued Program guidance on allowable breastfeeding aids and has authorized the use of WIC administrative funds to purchase breastfeeding aids such as: Breast pumps, breastshells, and nursing supplementers. These allowable aids directly support the initiation and continuation of breastfeeding.

8. The Department contracted for a detailed analysis of breastfeeding rates and patterns of WIC mothers and eligible, non-WIC mothers using data from the National Maternal and Infant Health Survey.

List of Subjects in 7 CFR Part 246

Food assistance programs, Food donations, Grant programs—Social programs, Infants and children, Maternal and Child health, Nutrition education, Public assistance programs, WIC, Women.

For reasons set forth in the preamble, 7 CFR part 246 is proposed to be amended as follows:

PART 246—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN

1. The authority citation for part 246 is revised to read as follows:

Authority: Secs. 123 and 213, Pub. L. 101–147, 103 Stat. 877 (42 U.S.C. 1786); sec. 3201, Pub. L. 100–690, 102 Stat. 4181 (42 U.S.C. 1786); sec. 645, Pub. L. 100–460, 102 Stat. 2229 (42 U.S.C. 1786); secs. 212 and 501, Pub. L. 100–435, 102 Stat. 1645 (42 U.S.C. 1786); sec. 3, Pub. L. 100–356, 102 Stat. 669 (42 U.S.C. 1786); secs. 8–12, Pub. L. 100–237, 101 Stat. 1733 (42 U.S.C. 1786); secs. 341–353, Pub. L. 99–500 and 99–591, 100 Stat. 1783 and 3341 (42 U.S.C. 1786); sec. 815, Pub. L. 97–35, 95 Stat. 521 (42 U.S.C. 1786); sec. 203, Pub. L. 96–499, 94 Stat. 2599 (42 U.S.C. 1786); sec. 3, Pub. L. 95–627, 92 Stat. 3611 (42 U.S.C. 1786).

2. In § 246.10:

a. The introductory text in paragraph (c) is revised;

b. The introductory text in paragraph (c)(5) is revised; and

c. A new paragraph (c)(7) is added.

The revisions and addition read as follows:

§ 246.10 Supplemental foods.

* * * * *

(c) *Food packages.* There are seven food packages available under the Program which may be provided to participants.* * *

* * * * *

(5) *Food Package V—Pregnant and Breastfeeding Woman (Formula).** * *

* * * * *

(7) *Food Package VII—Breastfeeding Women (Enhanced).* (i) Pasteurized fluid whole milk which is flavored or unflavored and which contains 400 International Units of Vitamin D per quart (.9 liter) or pasteurized fluid skim or lowfat milk which is flavored or unflavored and which contains 400 International Units of vitamin D and 2000 International Units of vitamin A per fluid quart (.9 liter); or pasteurized cultured buttermilk which contains 400 International Units of vitamin D and 2000 International Units of Vitamin A per fluid quart (.9 liter); or evaporated whole milk which contains 400 International Units of Vitamin D per reconstituted quart (.9 liter); or evaporated skimmed milk which contains 400 International Units of vitamin D and 2000 International Units of vitamin A per reconstituted quart (.9 liter); or dry whole milk which contains 400 International Units of vitamin D per reconstituted quart (.9 liter); or nonfat or lowfat dry milk which contains 400 International Units of vitamin D and 2000 International Units of vitamin A per reconstituted quart (.9 liter); or domestic cheese (pasteurized process American, Monterey Jack, Colby, natural Cheddar, Swiss, Brick, Muenster, Provolone, Mozzarella Part-Skim or Whole).

(ii) Domestic cheese (pasteurized process American, Monterey Jack, Colby, natural Cheddar, Swiss, Brick, Muenster, Provolone, Mozzarella Part-Skim or Whole.)

(iii) Adult cereal (hot or cold) which contains a minimum of 28 milligrams of iron per 100 grams of dry cereal and not more than 21.2 grams of sucrose and other sugars per 100 grams of dry cereal (6 grams per ounce).

(iv) Single strength fruit juice or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters; or frozen concentrated fruit or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters of reconstituted juice.

(v) Eggs or dried egg mix.

(vi) Peanut butter.

(vii) Mature dry beans or peas, including but not limited to lentils, black, navy, kidney, garbanzo, soy, pinto and mung beans, crowder, cow, split and black-eyed peas.

(viii) Tuna: Canned white, light, dark or blended tuna packed in water, including solid and solid pack; chunk, chunks and chunk style; flake and flakes; and grated.

(ix) Carrots: Raw, canned or frozen. Raw and 100% Canned and frozen carrots containing only the mature root of the carrot plant packed in water.

(x) The quantities and types of supplemental foods prescribed shall be appropriate for the participant taking into consideration the participant's age and dietary needs. The maximum quantity of supplemental foods authorized per month is as follows:

Food	Quantity
Milk:	
Fluid whole milk or	26 qt. (26.5 L).
Cheese or	May be substituted for fluid whole milk at the rate of 1 lb. (.4 kg) per 3 qt. (2.8L) of fluid whole milk. 4 lbs. (1.8 kg) is the maximum amount which may be substituted.[1]
Fluid skim or lowfat milk or	May be substituted for fluid whole milk on a quart-for-quart (.9 L) basis.
Cultured buttermilk or	May be substituted for fluid whole milk on a quart-for-quart (.9 L) basis.
Evaporated whole milk or	May be substituted for fluid whole milk at the rate of 13 fluid oz. (.4 L) per qt. (.9 L) of fluid whole milk.
Evaporated skimmed milk or	May be substituted for fluid whole milk at the rate of 13 fluid oz. (.4 L) per qt. (.9 L) of fluid whole milk.
Dry whole milk or	May be substituted for fluid whole milk at the rate of 1 lb. (.4 kg) per 3 qt. (2.8 L) of fluid whole milk.
Nonfat or lowfat dry milk.	May be substituted for fluid whole milk at the rate of 1 lb. (.4 kg) per 5 qt. (4.7 L) of fluid whole milk.
Cheese:	
Cheese	1 lb. (.4 kg).
Eggs:	
Eggs or	2 doz. or 2-½ doz.
Dried egg mix	May be substituted at the rate of 1.5 lb. (.7 kg) egg mix per 2 doz. fresh eggs, or 2 lb. (.9 kg) egg mix per 2-½ doz fresh eggs.
Cereals:	
Cereals (hot or cold).	36 oz. dry (1 kg).
Juice [2]:	
Single strength juice or	322 fluid oz. (9.6 L).
Frozen, concentrated juice.	336 fluid oz. reconstituted (10.0 L).
Dry Beans or Peas:	
Dry beans or peas	1 lb. (.4 kg).
Peanut Butter:	
Peanut Butter	18 oz. (.5 kg).
Fish:	
Tuna [3]	26 oz. (.8 kg).
Vegetable:	
Carrots [4] or	2 lb. (.9 kg).
Frozen Carrots or	May be substituted for fresh at the rate of and 1 lb. frozen to 1 lb fresh.
Canned Carrots	May be substituted for fresh at the rate of 1 16–20 ounce can of carrots to 1 lb of fresh.

[1] Additional cheese may be issued on an individual basis in cases of lactose intolerance, provided the need is documented in the participant's file by the competent professional authority.

[2] Combinations of single strength or frozen concentrated juice may be issued as long as the total volume does not exceed the amount specified for single strength juice.

[3] Canned white, light, dark or blended tuna packed in water, including solid and solid pack; chunk, chunks and chunk style; flake and flakes; and grated.

[4] Carrots: raw, canned or frozen. 100 raw, canned and frozen carrots containing only the mature root of the carrot plant packed in water.

BILLING CODE 3410-30-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 23

[Docket No. 098CE, Special Conditions 23-ACE-66]

Special Conditions; Grob Model G520T Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for Burkhart Grob for the Grob Model G520T Series airplane. These airplanes will have novel and unusual design features when compared to the state of technology envisaged in the applicable airworthiness standards. This novel and unusual design feature includes the use of composite materials for primary flight structure for which the applicable regulations do not contain adequate or appropriate airworthiness standards. This notice contains the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that provided by the applicable airworthiness standards.

DATES: Comments must be received on or before July 17, 1992.

ADDRESSES: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, Ace–7, Attention: Rules Docket Clerk, Docket No. 098CE, room 1558, 601 East 12th Street, Kansas City, Missouri 64106. All comments must be marked: Docket No. 098CE. Comments may be inspected in the rules docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: J. Lowell Foster, Aerospace Engineer, Standards Office (ACE–110), Small Airplane Directorate, Aircraft Certification Service, Federal Aviation Administration, room 1544, 601 East 12th Street, Kansas City, Missouri 64106; telephone (816) 426–5688.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of these special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking further rulemaking action on this proposals. Commenters within the FAA to acknowledge receipt of their comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 098CE." The postcard will be date stamped and returned to the commenter. The proposals contained in this notice may be changed in light of the comments received. All comments received will be available, both before and after the closing date for comments, in the rules docket for examination by interested parties. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket.

Background

On May 7, 1991, Burkhart Grob Luft und Raumfahrt GmbH, Postfach 1257, D–8948, Mindelheim, Germany, made application for a type certificate through the Luftfahrt Bundesamt (LBA) to the FAA Brussels Office for the Model G520T airplane. The Grob Model G520T Series airplane is a two seat, trainer version of the G520, which is a single-seat, high aspect ratio, pressurized, mid-wing monoplane with tricycle landing gear. The Grob Model G520T Series airplane utilizes composite material for its structure, powered by a turbopropeller engine. The maximum gross weight is unchanged from the Grob Model G520 Series airplane at 9,950 pounds.

The Grob Model 520T series airplane is made of composites assembled mainly by bonding. Since the early 1940's, airframes have predominantly been composed of semi-monocoque aluminum construction. Composite material of the type used on the Grob 520T is generally not susceptible to the initiation of fatigue cracks by the application of repetitive loads, like that of semi-monocoque aluminum construction. The composite material is, however, susceptible to damage in the form of cracks, breaks, and delaminations. Because of this and other factors, the FAA has determined that the wing fatigue requirements of § 23.572 are inadequate to ensure that the composite material structure can withstand the repeated loads of variable magnitude expected in service.

Type Certification Basis

The type certification basis for the Grob Model G520T Series airplane is as follows: Part 21 of the FAR, §§ 21.29, 21.183(c) and part 23 of the FAR, effective February 11, 1965, including amendment 23–1 through 23–34; and amendment 23–42, § 23.831; and part 36 of the FAR, effective November 18, 1969, including amendments 36–1 through amendment 36–16; and SFAR 27, effective February 1, 1974, including amendments 27–1 through 27–5; and special conditions pursuant to part 21 of the FAR, § 21.16 issued to the Egrett model, and published on November 14, 1990, (55 FR 47455); and Equivalent Safety Finding No. ACE–91–01, dated June 25, 1991; and Section 611(b) of the FAA Act of 1958, and Exemption No. 5223 granted by the FAA (§ 11.27) on September 13, 1990.

Discussion

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.17(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane. Special conditions, as appropriate, are issued in accordance with § 11.49, after public notice, as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and become part of the type certification basis, in accordance with § 21.17(a)(2).

The proposed type design of the Grob Model G520T Series airplane contains a number of novel or unusual design features not envisaged by the applicable part 23 airworthiness standards. Special condtions are considered necessary because the airworthiness requirements of part 23 do not contain adequate or appropriate safety standards for the novel and unusual design features of the Grob Model G520T Series airplane.

Composite Structure

All safety of flight structure is to be constructed of composite materials, which require damage tolerance methods for a thorough evaluation. Composite materials in existence, and in commonly used aircraft airframes at this time, are typically more suspectible than commonly used aluminum structure to damage from intrinsic and discrete sources that might adversely influence strength properties. It is generally agreed that damage tolerance criteria should be used to show that composite material structure can withstand the repeated loads of variable magnitude expected in service. Because of the lack of a service experience base for these new materials and their mechanical properties characteristics, there is a need to apply special requirements such as residual strength load with large area

manufacturing defects (for example, understrength bonds) and impact damage from discrete sources, and ability to carry ultimate load with realistic impact damage below the threshold of detectability and material environmental exposure effects.

Conclusion

This action is not a rule of general applicability and affects only the model/series of airplane identified in these special conditions.

List of Subjects in 14 CFR Parts 21 and 23

Aircraft, Air transportation, Aviation safety, and Safety.

The authority citation for these special conditions is as follows:

Authority: Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g); 14 CFR 21.16 and 21.17; and 14 CFR 11.28 and 11.49(b).

The Proposed Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the FAA proposes the following special conditions as part of the type certification basis for the Grob Model G520T Series airplane:

Evaluation of Composite Structure

Instead of complying with §§ 23.571 and 23.572, and in addition to the requirements of §§ 23.603 and 23.613, airframe structure, the failure of which would result in catastrophic loss of airplane, the wing, wing carry-through, wing attaching structure, horizontal stabilizer, stabilizer carry-through and attaching structure, fuselage, vertical stabilizer and attaching structure, wing flaps, and all movable control surfaces and attaching structure must be evaluated to damage tolerance criteria prescribed in paragraphs (a) through (j) of this special condition, unless shown to be impractical. In cases shown to be impractical, the aforementioned structure must be evaluated in accordance with the criteria of paragraphs (a) and (k) of this special condition. Where bonded joints are used, the structure must also be evaluated in accordance with the residual strength criteria in paragraph (h) of this special condition.

(a) It must be demonstrated by tests, or by analysis supported by tests, that the structure is capable of carrying ultimate load with impact damage. The level of impact damage considered need not be more than the established threshold of detectability considering the inspection procedures employed.

(b) The growth rate of damage that may occur from fatigue, corrosion, intrinsic defects, manufacturing defects; for example, bond defects, or damage from discrete sources under repeated loads expected in service; that is, between the time at which damage becomes initially detectable and the time at which the extent of damage reaches the value selected by the applicant for residual strength demonstration, must be established by tests or by analysis supported by tests.

(c) The damage growth, between initial detectability and the value selected for residual strength demonstrations, factored to obtain inspection intervals, must permit development of an inspection program suitable for application by operation and maintenance personnel.

(d) Instructions for continued airworthiness for the airframe must be established consistent with the results of the damage tolerance evaluations. Inspection intervals must be set so that after the damage initially becomes detectable by the inspection method specified, the damage will be detected before it exceeds the extent of damage for which residual strength is demonstrated.

(e) Loads spectra, load truncation, and the locations and types of damage considered in the damage tolerance evaluations, must be documented in test proposals.

(f) The structure of the pressurized cabin and fuselage must be shown by residual strength tests, or by analysis supported by residual strength tests, to be able to withstand critical limit flight loads listed in subparagraph (1) and (2) below, considered as ultimate loads, with damage consistent with the results of the damage tolerance evaluations.

(1) Critical limit flight loads with the combined effects of normal operating pressures and expected external aerodynamic pressures; and

(2) The expected external aerodynamic pressure in 1g flight combined with a cabin differential pressure equal to 1.1 times the normal operating differential pressure without consideration of any other load.

(g) The wing, carry-through, wing attaching structure, horizontal stabilizer, stabilizer carry-through and attaching structure, vertical stabilizer and attaching structure, and all movable control surfaces, and their attaching structure must be shown by residual strength tests, or analysis supported by residual strength tests, to be able to withstand critical limit flight loads, considered as ultimate loads, with the extent of damage consistent with the results of the damage tolerance evaluations.

(h) In lieu of a non-destructive inspection technique that ensures ultimate strength of each bonded joint, the limit load capacity of each bonded joint critical to safe flight must be substantiated by either of the following methods used singly or in combination:

(1) The maximum disbonds of each bonded joint, consistent with the capability to withstand the loads in paragraphs (f) and (g) of this special condition, must be determined by analysis, tests, or both. Disbonds of each bonded joint greater than this must be prevented by design features.

(2) Proof-testing must be conducted on each production article that will apply the critical limit design load to each critical bonded joint.

(i) The effects of material variability and environmental conditions; for example, exposure to temperature, humidity, erosion, ultraviolet radiation, and/or chemicals, on the strength and durability properties of the composite materials, must be accounted for in the damage tolerance evaluations and in the residual strength tests.

(j) The airplane must be shown by analysis to be free from flutter to V_D with the extent of damage for which residual strength is demonstrated.

(k) For those structures where the damage tolerance method is shown to be impractical, the strength of such structures must be demonstrated by tests, or analysis supported by tests, to be able to withstand the repeated loads of variable magnitude expected in service. Sufficient component, sub-component, element, or coupon tests must be performed to establish the fatigue scatter and environmental effects. Impact damage in composite material components that may occur must be considered in the demonstration. The impact damage level considered must be consistent with detectability by the inspection procedures employed.

Issued in Kansas City, Missouri, on March 10, 1992.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 152

[Docket No. RM92-2-000]

Vehicular Natural Gas Sales

March 12, 1992.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission is issuing proposed regulations applicable to sales for resale of vehicular natural gas (VNG) in interstate commerce subject to the Commission's jurisdiction pursuant to the Natural Gas Act (NGA).

The proposed regulations would codify the Commission's prior determination that VNG is ultimately consumed in the state in which it is injected into a vehicle's fuel tank. The proposed regulations also would provide for the generic issuance of a blanket certificate of public convenience and necessity authorizing sales of VNG for resale by (1) any local distribution company (LDC) that does not qualify for the exemption under section 1(c) of the NGA, (2) any holder of a service area determination under section 7(f)(1) of the NGA, and (3) any other person, including all interstate pipelines, all natural gas marketers, as well as persons not otherwise natural-gas companies for purposes of the NGA.

The purpose of the proposed regulations is to promote the availability of VNG to endusers by facilitating all persons' obtaining authority to engage in VNG sales that are subject to the Commission's jurisdiction under the NGA.

DATES: Comments are due on or before April 20, 1992.

ADDRESSES: All filings should refer to Docket No. RM92-2-000 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Jack O. Kendall, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 208-1022.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission has made this document available so that all interested persons may inspect or copy its contents during normal business hours in Room 3104, 941 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a person computer with a modem by dialing (202) 208-1397. To access CIPS, set your communications software to use 300, 1200, or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this document will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in room 3108, 941 North Capitol Street, NE., Washington, DC 20426.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is proposing regulations that would codify the Commission's prior determination that vehicular natural gas (VNG) is ultimately consumed in the state in which it is injected into a vehicle's fuel tank. The proposed regulations also would provide for the generic issuance of a blanket certificate of public convenience and necessity authorizing sales of VNG for resale by (1) any local distribution company (LDC) that does not qualify for the exemption under section 1(c) of the Natural Gas Act (NGA),[1] (2) any holder of a service area determination under section 7(f)(1) of the NGA, and (3) any other person, including all interstate pipelines, all natural gas marketers, as well as persons not otherwise natural-gas companies for purposes of the NGA.

The purpose of the proposed regulations is to promote the availability of VNG to endusers by facilitating all persons' obtaining authority to engage in VNG sales that are subject to the Commission's jurisdiction under the NGA. The proposed rule's generic blanket certificates would be limited-jurisdiction certificates, which would not subject the holders to any other regulation under the Natural Gas Act jurisdiction of the Commission.

II. Background

Gasoline is derived from crude oil, and the United States is heavily dependent on foreign oil supplies. Natural gas supplies are abundant throughout North America. Further, when compressed for use as vehicular fuel, natural gas is cleaner-burning and potentially less expensive than gasoline. Thus, enhanced use of VNG represents a significant means of reducing U.S. reliance on foreign oil.

The Commission has determined that VNG is natural gas for purposes of the NGA and, therefore, that the sale of VNG for resale in interstate commerce is subject to the Commission's jurisdiction.[2] However, the Commission wants to avoid unwarranted regulatory intrusion that would create an unnecessary disincentive to the marketing and use of VNG and, thus, the realization of that fuel's potential competitive benefits.

Today, a number of nonjurisdictional companies are engaged in or planning test programs for the sale of VNG. Most of these companies are local distribution companies, whose activities are limited to the transportation and sale of gas to consumers and, therefore, are exempt from the Commission's jurisdiction pursuant to section 1(b) of the NGA.[3] The Commission has found that, to the extent an LDC's VNG sales volumes are delivered directly into the fuel tanks of vehicles that will burn the VNG as fuel, the sales are not sales for resale. Such sales do not require Commission authorization and therefore do not jeopardize an LDC's exemption under section NGA section 1(b).

However, as discussed below, the Commission has determined that clarification and the adoption of new regulations is necessary to remove unwarranted impediments to the marketing and use of VNG sales by nonjurisdictional entities in other instances. Although the Commission's statutory responsibility with respect to sales for resale of natural gas applies to VNG, the Commission has fashioned this proposed rule to ensure that its regulatory oversight of VNG will not exceed that necessary to satisfy the Commission's satutory mandate.

---

[1] 15 U.S.C. 717-717w.

[2] In Kansas-Nebraska Natural Gas Company, Inc., the Commission found that compressed natural gas, or VNG, is natural gas as defined in section 2(5) of the NGA. 22 FERC ¶ 61,176 at 61,307 (1983), *reh'g denied*, 24 FERC ¶ 61,200 (1983).

[3] Section 1(b) of the NGA provides that:

The provisions of this act shall apply to the transportation of natural gas in interstate commerce, to the sale in interstate commerce of natural gas for resale for ultimate public consumption for domestic, commercial, industrial, or any other use, and to natural gas companies engaged in such transportation or sale, but shall not apply to any other transportation or sale of natural gas or to the local distribution of natural gas or to the facilities used for such distribution or to the production or gathering of natural gas.

III. Proposed Rule

Definition of VNG

As discussed above, natural gas which has been compressed, but which is still in a gaseous state, is being used increasingly as fuel in motor vehicles. The proposed rule would add a new paragraph (b)(1)(i) to § 152.1 of the regulations [4] to define "vehicular natural gas," or "VNG," for purposes of the Commission's regulations, as "natural gas that is ultimately used as a fuel in a motor vehicle."

VNG Vehicles That Cross State Lines

VNG sales programs are being considered by a number of companies. Some of these entities' natural gas activities involve only VNG. Other entities that are engaged in VNG operations in addition to other natural gas activities are companies that are referred to as Hinshaw pipelines. Hinshaws' activities include sales of interstate gas for resale, but section 1(c) of the NGA prevents a Hinshaw from becoming subject to the Commission's jurisdiction because: (1) All of the gas transported or sold by the Hinshaw is gas received at or within the boundary of the state in which the Hinshaw is located and all of the gas is ultimately consumed in the same state, and (2) the Hinshaw's rates, services and facilities are subject to regulation by a state commission.[5]

Recognizing that VNG fuel delivered into a vehicle may be partially burned in another state as the vehicle moves about, the Commission has previously addressed the issue raised by the requirement in section 1(c) of the NGA that all of a Hinshaw's sale-for-resale gas, as well as its direct-sale gas, be "ultimately consumed" in the Hinshaw's operating state. The Commission determined that all of the VNG sold and delivered into a vehicle's fuel tank is "ultimately consumed" in the state where the fuel is injected.

Thus, even when VNG is sold by a Hinshaw for resale, the Hinshaw's section 1(c) exemption is preserved so long as the VNG is injected as vehicular fuel in the Hinshaw's operating state. This determination is unaffected by whether the vehicle thereafter will cross state lines.[6]

The Commission is proposing to codify this determination as a new paragraph (b)(1) to existing section 152.1 of the regulations.[7] This codification should avoid possible confusion that might impede the marketing of VNG by Hinshaw pipelines.

VNG Sales for Resale Subject to NGA Certification Requirements

Many companies that function in effect as LDCs in more than one state hold service area determinations issued by the Commission pursuant to section 7(f)(1) of the NGA. A designated service area generally includes a portion of each state in which the company operates. The Commission's designation of a section 7(f)(1) service area determination enables the company to extend its facilities in the out-of-state portion of its service area, without further Commission authorization, to supply increased gas demands by residential customers and other endusers.

Section 7(f)(2) was added to the NGA by the Uniform Regulatory Jurisdiction Act of 1988.[8] Pursuant to that section, when the holder of a section 7(f)(1) service area determination transports gas to any person, other than a natural gas company, in the service area, the transportation is subject to the exclusive jurisdiction of the state commission in the state in which the gas is consumed, regardless of whether the transportation crosses state lines.[9] Thus, section 7(f)(2) exempts a holder of a service area determination from the certification requirements of section 7(c) of the NGA when the holder is providing gas transportation service to any person (other than a natural gas company) in its service area, regardless of whether the gas is moving in interstate commerce or whether the shipper will resell the gas.

However, a holder of a service area determination is still subject to NGA section 7(c) certification requirements, if it sells interstate gas, including VNG, for resale. NGA section 7(c) certification requirements also apply to LDCs' sales for resale of VNG that do not qualify for the Hinshaw exemption of section 1(c) of the NGA either (1) because the LDC is not subject to regulation by a state commission or (2) because the VNG will be transported to another state before being injected into vehicles and, therefore, is "ultimately consumed" in the other state.

NGA certification requirements also apply to sales for resale of jurisdictional VNG by interstate pipelines and gas marketers, as well as persons that otherwise are not natural-gas companies for purposes of the NGA. Thus, if a person purchases gas subject to the NGA and sells it for resale, NGA certification requirements apply, even if all of the gas is compressed to make VNG prior to being sold for resale. For example, a sales-for-resale certificate is needed by an LDC or other VNG wholesaler that purchases natural gas from an interstate pipeline and then transports it by pipeline or in closed containers and sells it to VNG retail stations in one or more states.

The Commission wants to facilitate the necessary certification for LDCs whose activities include VNG sales for resale that do not qualify for the Hinshaw exemption, section 7(f) service area holders, and persons that are or would become natural-gas companies for purposes of the NGA by reason of their sales of VNG for resale. Thus, the Commission believes it would be appropriate to provide generic blanket certificate authorization for sales for resale of VNG by *any* entity, including all interstate pipelines and all gas marketers.

Accordingly, the Commission is proposing a regulation, to be set forth in a new paragraph (b)(2) to § 152.1 of the regulations, which would issue generic limited-jurisdiction blanket certificate authorization for all covered companies to make sales for resale of natural gas to be use as VNG. Generic blanket certificate authority would avoid the necessity of the holder's having to file a case-specific section 7(c) application for each VNG sale-for-resale agreement. Since VNG competes with gasoline, and the gasoline market is competitive, the Commission is proposing that companies be authorized to make sales for resale under their blanket certificates at market rates.

Generic blanket certificates of limited jurisdiction would issue automatically as of the effective date of new § 152.1(b)(2). Therefore, companies would not need to file applications for the generic blanket certificates. The generic blanket certificates would become effective on the date of issuance of a final rule in this proceeding.

IV. Environmental Analysis

Commission regulations require that an Environmental Assessment or an Environmental Impact Statement be prepared for any Commission action that may have a significant adverse effect on the human environment.[10] The Commission has categorically excluded certain actions from these requirements as not having a significant effect on the human environment.[11] The subject action here will not have a significant adverse impact on the human environment and falls within the categorical exemption provided in the Commission's regulations for sales of natural gas that require no construction of facilities. Therefore, an environmental assessment is unnecessary and will not be prepared in this rulemaking.

V. Regulatory Flexibility Act Certification

When the Commission is required by section 553 of the Administrative Procedures Act [12] to publish a notice of proposed rulemaking, it is also required by section 603 of the Regulatory Flexibility Act (RFA) [13] to prepare and make available for public comment an initial regulatory flexibility analysis, unless the Commission certifies, pursuant to the RFA, that the proposed rule would not have a "significant economic impact on a substantial number of small entities." [14] The RFA is intended to ensure careful and informed agency consideration of rules that may significantly affect small entities and to encourage consideration of alternative approaches to minimize harm or burdens on small entities.

The Commission does not believe that this rule would have a significant economic impact, within the meaning of the RFA, on a substantial number of small entities. This rule would (1) codify the Commission's prior determination that a Hinshaw pipeline does not lose its NGA section 1(c) exemption from the Commission's jurisdiction by reason of selling VNG that eventually moves across state lines in a VNG-powered vehicle itself, and (2) issue blanket certificates to all persons that make VNG sales for resale, thereby eliminating the necessity of such companies' having to apply for case-specific authority for each sale of VNG for resale.

In view of the nature of the proposals, the Commission concludes that there will not be a significant impact on a significant number of small entities.

VI. Information Collection Requirements

The Office of Management and Budget's (OMB) regulations require that OMB approve certain information collection requirements imposed by agency rules.[15] However, this proposed rule contains no information collection requirements and therefore is not subject to OMB approval.

VII. Comment Procedures

The Commission invites all interested persons to submit written comments on the matters proposed in this notice, including any related matters or alternative proposals that commentors may wish to discuss. An original and 14 copies of the written comments must be filed with the Commission no later than 30 days after publication of this notice of proposed rulemaking in the Federal Register. Comments should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, and should refer to Docket No. RM92-2-000.

All written comments will be placed in the Commission's public files and will be available for inspection in the Commission's Public Reference Room, room 3104, 941 North Capitol Street, NE., Washington DC 20426, during regular business hours.

List of Subjects in 18 CFR Part 152

Natural gas, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission proposes to amend part 152, chapter I, title 18, Code of Federal Regulations, as set forth below.

By direction of the Commission.

Linwood A. Watson, Jr.,

Acting Secretary.

PART 152—APPLICATION FOR EXEMPTION FROM THE PROVISIONS OF THE NATURAL GAS ACT PURSUANT TO SECTION 1 (C) THEREOF

1. The authority citation for part 152 is revised to read as follows:

Authority: 15 U.S.C. 717–717w; 15 U.S.C. 3301–3432; 42 U.S.C. 7101–7352; E.O. 12009, 3 CFR 142.

2. The title of part 152 is revised to read as follows:

PART 152—APPLICATIONS FOR EXEMPTION FROM THE PROVISIONS OF THE NATURAL GAS ACT PURSUANT TO SECTION 1(C) THEREOF AND ISSUANCE OF BLANKET CERTIFICATES AUTHORIZING CERTAIN SALES FOR RESALE

3. In § 152.1, the section heading is revised, the existing text is designated as paragraph (a) and a new paragraph (b) is added to read as follows:

§ 152.1 Exemption applications and blanket certificates.

(a) * * *

(b)(1)(i) For purposes of the Commission's regulations implementing the Natural Gas Act, "vehicular natural gas" or "VNG" means natural gas that is ultimately used as a fuel in a motor vehicle.

(ii) For purposes of the Commission's regulations implementing the Natural Gas Act, vehicular natural gas, or VNG, is deemed to be ultimately consumed in the state in which the gas is physically delivered into the fuel tank of the vehicle.

(2)(i) Generic blanket certificates of public convenience and necessity are issued pursuant to section 7(c) of the Natural Gas Act to each local distribution company, each holder of a service area determination by the Commission pursuant to section 7(f)(1) of the Natural Gas Act, and each person that is or would become a natural-gas company for purposes of the Natural Gas Act by reason of sales for resale of VNG in interstate commerce. A blanket certificate issued under this paragraph is

---

[4] 18 CFR 152.1.

[5] Section 1(c) states:

The provisions of this Act shall not apply to any person engaged in or legally authorized to engage in the transportation in interstate commerce or the sale in interstate commerce for resale, of natural gas received by such person from another person within or at the boundary of a State if all the natural gas so received is ultimately consumed within such State, or to any facilities used by such person for such transportation or sale, provided that the rates and service of such person and facilities may be subject to regulation by a State commission.

[6] Northern Illinois Gas Company, 20 FERC ¶ 61,267 at 61,504 (1982); Kansas-Nebraska Natural Gas Company, 22 FERC FERC ¶ 66,170 at 61,307 (1983), *reh'g denied*, 24 FERC ¶ 61,200 (1983).

As discussed herein, Hinshaw status also is contingent upon the Hinshaw's being subject to regulation by a state commission. Therefore, while a state-regulated Hinshaw's sale for resale of VNG will not jeopardize its Hinshaw status, so long as the VNG is at some point injected as fuel in the same state, a non-state-regulated company would be subject to the Commission's jurisdiction, if it sells the VNG for resale. 20 FERC ¶ 61,267 at 61,505 (1982). However, these entities would be authorized to make VNG sales for resales by the generic blanket certificates that would issue pursuant to this proposed rule.

[7] 18 CFR 152.1.

[8] Public Law 100–474 (Oct. 6, 1988).

[9] Section 7(f) of the NGA provides that:

(1) The Commission, after a hearing had upon its own motion or upon application, may determine the service area to which each authorization under this section is to be limited. Within such service area as determined by the Commission a natural gas company may enlarge or extend its facilities for the purpose of supplying increased market demands in such service area without further authorization; and

(2) If the Commission has determined a service area pursuant to this subsection, transportation to ultimate consumers in such service area by the holder of such service area determination, even if across State lines, shall be subject to the exclusive jurisdiction of the State commission in the State in which the gas is consumed. This section shall not apply to the transportation of natural gas to another natural gas company.

[10] Order No. 486, Regulations Implementing National Environmental Policy Act, 52 FR 47897 (Dec. 17, 1987), FERC Stats. & Regs. ¶ 30,783, codified at 18 CFR part 380.

[11] 18 CFR 380.4.

[12] 5 U.S.C. 553.

[13] 5 U.S.C. 601–611.

[14] 5 U.S.C. 605(b).

[15] 5 CFR part 1320.

a certificate of limited jurisdiction which will not subject the certificate holder to any other regulation under the Natural Gas Act jurisdiction of the Commission. Such certificate will not impair the continued validity of any exclusion under section 1(c) of the Natural Gas Act which may be applicable to the certificate holder. See 18 CFR 284.224(d).

(ii) A blanket certificate issued under paragraph (b)(2)(i) of this section authorizes the holder to make sales of VNG for resale in interstate commerce at market rates.

(iii) A person's blanket certificate authority under this section shall beome effective on (insert date of issuance of final rule).

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Part 100

RIN 1219-AA44

Criteria and Procedures for Proposed Assessment of Civil Penalties

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Extension of comment period.

SUMMARY: The Mine Safety and Health Administration (MSHA) is extending the period for public comment regarding the Agency's proposed rule concerning criteria and procedures for its proposed assessments of civil penalties from March 24, 1992, to April 24, 1992, in response to requests from the mining community.

DATES: Written comments must be received on or before April 24, 1992.

ADDRESSES: Send written comments to the Office of Standards, Regulations, and Variances, MSHA, room 631, Ballston Towers No. 3, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, MSHA, (703) 235-1910.

SUPPLEMENTARY INFORMATION: On January 24, 1992, MSHA published a proposed rule (57 FR 2972) to revise its regulations governing the criteria and procedures used for assessing civil penalties. The proposal addresses penalty increases for a mine with an excessive history of violations. The comment period for the proposed rule was scheduled to close on March 24, 1992. Due to requests from the mining community for more time in which to prepare their comments, MSHA is extending the comment period to April 24, 1992. All interested parties are encouraged to submit comments prior to this date.

Dated: March 13, 1992.

William J. Tattersall,

Assistant Secretary for Mine Safety and Health.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-4115-9]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusion

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is proposing to grant a petition submitted by Care Free Aluminum Products, Inc., (Care Free), Charlotte, Michigan, to exclude certain solid wastes generated at its facility from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of parts 260 through 265 and 268 of title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists. Today's proposed decision is based on an evaluation of waste-specific information provided by the petitioner.

The Agency is also proposing the use of a fate and transport model to evaluate the potential impact of the petitioned waste on human health and the environment, based on the waste-specific information provided by the petitioner. This model has been used in evaluating the petition to predict the concentration of hazardous constituents that may be released from the petitioned waste, once it is disposed of.

DATES: EPA is requesting public comments on today's proposed decision and on the applicability of the fate and transport model used to evaluate the petition. Comments will be accepted until May 4, 1992. Comments postmarked after the close of the comment period will be stamped "late."

Any person may request a hearing on this proposed decision by filing a request with the Director, Characterization and Assessment Division, Office of Solid Waste, whose address appears below, by April 3, 1992. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send three copies of your comments to EPA. Two copies should be sent to the Docket Clerk, Office of Solid Waste (OS-305), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. A third copy should be sent to Jim Kent, Delisting Section, Waste Identification Branch, CAD/OSW (OS-333), U.S. Environmental Protection AGency, 401 M Street, SW., Washington, DC 20460. Identify your comments at the top with this regulatory docket number: "F-92-CFEP-FFFFF."

Requests for hearing should be addressed to the Director, Characterization and Assessment Division, Office of Solid Waste (OS-330), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

The RCRA regulatory docket for this proposed rule is located at the U.S. Environmental Protection Agency, 401 M Street, SW., (room M2427), Washington, DC 20460, and is available for viewing from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Call (202) 260-9327 for appointments. The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424-9346, or at (703) 920-9810. For technical information concerning this notice, contact Chichang Chen, Office of Solid Waste (OS-333), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 260-7392.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit one or more of the characteristics of

hazardous wastes identified in subpart C of part 261 (*i.e.*, ignitability, corrosivity, reactivity, and toxicity) or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To have their wastes excluded, petitioners must show that wastes generated at their facilities do not meet any of the criteria for which the wastes were listed. See 40 CFR 260.22(a) and the background documents for the listed wastes. In addition, the Hazardous and Solid Waste Amendments (HSWA) of 1984 require the Agency to consider any factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous waste characteristics (*i.e.*, ignitability, reactivity, corrosivity, and toxicity), and must present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. See 40 CFR 260.22(a), 42 U.S.C. 6921(f), and the background documents for the listed wastes. Although wastes which are "delisted" (*i.e.*, excluded) have been evaluated to determine whether or not they exhibit any of the characteristics of hazardous waste, generators remain obligated under RCRA to determine whether or not their waste remains non-hazardous based on the hazardous waste characteristics.

B. Approach Used To Evaluate This Petition

This petition requests a delisting for a listed hazardous waste. In making the initial delisting determination, the Agency evaluated the petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). Based on this review, the Agency agreed with the petitioner that the waste is non-hazardous with respect to the orginial listing criteria. (If the Agency had found, based on this review, that the waste remained hazardous based on the factors for which the waste was originally listed, EPA would have proposed to deny the petition.) EPA then evaluated the waste with respect to other factors or criteria to assess whether there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. The Agency considered whether the waste is acutely toxic, and considered the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the quantities, of waste generated, and waste variability.

For this delisting determination, the Agency identified plausible exposure routes for hazardous constituents present in the waste, *i.e.*, waterborne dispersal (via ground water and surface water routes) and airborne dispersal of waste contaminants. The Agency determined that disposal in a landfill is the most reasonable, worst-case disposal scenario for Care Free's petitioned waste, and that the major exposure route of concern would be ingestion of contaminated ground water. Therefore, the Agency is proposing to use a particular fate and transport model to predict the maximum allowable concentrations of hazardous constituents that may be released from the petitioned waste after disposal in a landfill and to determine the potential impact of the unregulated disposal of Care Free's petitioned waste on human health and the environment. Specifically, the Agency used the maximum estimated waste volume and the maximum reported leachate concentrations as inpute to estimate the constituent concentrations in the ground water at a hypothetical receptor well downgradient from the disposal site. The calculated receptor well concentrations (referred to as compliance-point concentrations) were then compared directly to the health-based levels used in delisting decision-making for the hazardous constituents of concern.
